Fr: Bryce Condo,
Date: 9/6/01

Re: Combined average limitation

Two needs appear for combined limitation

1) Present "cushading" of Ben. use nights for additional & from licensed nights. Accomplish this by combined average limitations w/ each pair.

2) Present "enlargement" of earlier priority right 29-13143 in connection w/ accomplished right 29-2419. Accomplish this by limiting even portion of Ben use right (29-13143) 29-13144 to 29-2419. to 29-13143 = 2.95 ds
29-13144 = 4.24 ds
claimed
claimed

This appears to be an error; the original intent was to apportion the 1.82 g/s of documented "beneficial use" capacity as needed to balance division water. It looks like I forgot to adjust the division water.

Average limit p 2 9/6/01

North Pole 233 acrs
~~Kierma 29-2419~~
 South Pole 365 acrs
 Total 598 acrs

29-2292 4.24 g/s
 29-2419 2.95 g/s
 7.19 g/s
 1.82 g/s
 9.01 g/s

$$\frac{9.01}{598} = 0.01507 \text{ g/s/acre}$$

North Pole 233 acrs $\times 0.01507 = 3.51$
 $3.51 - 2.95 = 0.56 \text{ g/s for } 29-13143$

FEB 07 2006

SCANNED

for

$$\begin{aligned} 29-2914 \div 29-13144 \div 13143 &= 233 \\ 29-2292 \div 29-13144 &= 365 \end{aligned}$$

~~29-2292, 29-13143, 29-13144 =~~

Combined limits:

$$409 \text{ acm} - 126 = 283 \text{ acm limit for } 29-13144$$

$$409 \text{ acm} \times 0.56 = \frac{1.82}{126 \text{ acm limit for } 29-13143}$$

Original Ben. use was 10020 overlap w/
29-2292, 409 acm.

Re: Amended claims, office visit, intent of recommendations

Today I visited in the office with Lavell Rupp, representative of Veda Rupp and the Harold L. Rupp Trust; and Gordon Jensen, representative of the Melville W. Jensen Trust and the Ora L. Jensen Estate.

Originally Veda and Harold Rupp had filed claims 29-2292 and 29-2419, based upon licenses. Historically the lands had belonged first to Veda Rupp's and Melville Jensen's father, then were jointly owned by Veda Rupp and her husband, and Melville Jensen and his wife. By some oversight, Rupp's omitted Melville Jensen as an owner on claim 29-2292, and both Jensens as owners on claim 29-2419.

Since that time, both Jensens, as well as Harold Rupp, have passed away. Terry Jensen as representative of the Jensen Trust and Jensen Estate filed competing claims 29-13143 and 29-13144. This was not an attempt to claim all of the original rights, but to make sure the Jensen heirs were represented as owners.

In my preliminary investigation I found evidence that there was additional original diversion rate documented in licensing exam 29-2292, but never licensed. I also found that the systems are interconnected, that the diversion rates per acre are not in balance, and that the capacities of the wells are not in balance with the original licenses.

Earlier, by telephone, Lavell Rupp and Gary Jensen had indicated an intent to eventually divide the property, and perhaps to file transfers to change place of use. Letters in the files give some of the history of these conversations.

Based on today's interview Lavell and Gordon, I have done the following:

1. Accepted amended claims on both licenses, to clarify POD and to show Veda Rupp, the Harold L Rupp Trust, the Ora L Jensen Estate, and the Melville W Jensen trust as owners.
2. Accepted amended claims on the two "competing" claims 29-13143 and 29-13144 to change them into beneficial use claims for the additional

PROFILED

SCANNED
FEB 07 2006

diversion rate documented in the licensing exam. These also were adjusted to show the same four owners as the two licenses.

My intent is to recommend these four claims basically as claimed, with appropriate combined use limitations. In doing this, I assert that the original development of 29-2292 was for the 6.06 cfs found, on the original POU. (this is still within 0.02/acre). When adjacent 29-2419 was developed and the mainlines were connected, there was an accomplished transfer to a PPU with the lands of 29-2419 of some of the additional diversion rate.

The beneficial use right did not involve any new acres and there has not been any enlargement of original licensed acres.

To accommodate these accomplished transfers and still allow flexibility for dividing the place, I have amended 29-13144 as the portion of the beneficial use right that overlaps 29-2292 and I have amended 29-13143 as the portion that overlaps 29-2419. Because there are no "new" acres associated with the beneficial use, none of the rights will carry K06, but both pairs (29-2292 and 29-13144, 29-2419 and 29-12143) will carry appropriate combined acreage limitations.

Re: Phone conversation with Gary Jensen

Today I spoke with Gary Jensen, the representative of the Melville Jensen Trust, on the telephone. He confirmed what Mr. LaMar Rupp had told me regarding the four-way joint ownership of the farm and water rights, and the difficulty with the county records. He also suggested that the farm might soon be divided into an east and west portion, perhaps with the interstate as the dividing line. The intent would be to divide the distribution systems, with the west well handling the west parcel and the east well, the east parcel. He believes both wells have adequate capacity to handle that division.

Gary confirmed what I had assumed from the claim filing, that the systems are currently connected by a common mainline. He will review and consider the PPU concept, prior to the division of the land.

In a few weeks he will be in Idaho to meet with Rupps and the attorneys, and will make an appointment to come work with me on how these claims should best be structured.

Re: Adjudication claims 29-2292, 29-2419

Dear Water Users:

Enclosed is a copy of the letter I sent to LaMar Rupp regarding the possibility of filing a "beneficial use" claim to reflect the additional capacity of the 1950 well, and the possibility of recommending these rights on a "permissible place of use" basis to more appropriately balance the diversion rate per acre of the two rights.

In my phone conversation with Gary, we discussed the possibility of dividing the farm into an eastern and western portion. Currently the water rights are divided into a northern and southern portion, based upon the way the land was originally developed. An enclosed map shows the approximate layout of the rights as currently claimed, based upon the original licenses.

Water right 29-2292 is for 369 acres on the south, with a 1954 priority date and a diversion rate of 4.24 cubic feet per second (cfs). This works out to about 0.0115 cfs/acre, which is marginal at best. If you file the beneficial use claim for the additional water documented in the 1953 measurement, the overall rate would be 0.0164 cfs/acre.

Water right 29-2419 is for 233 acres on the north, with a 1959 priority date and a diversion rate of 2.95 cfs. This works out to 0.0126 cfs/acre, which is better than 0.0115 but still marginal.

The enclosed map shows that the current place of use matches these claims and original licenses very closely.

One option available to you is to amend the claims to re-align these rights into an eastern and western portion. This would preserve the 1950/1953 priority dates on part of the lands, and keep the 1959 priority date on the balance of the lands. For this to work, the lands would have to be divided in the same ratio (369 acres to 233 acres), and the difference in diversion rate per acre would not change.

PROFILED

SCANNED

FEB 07 2006

Another option is to amend the claims on a "permissible place of use" basis, which effectively would apply all three rights to all the lands. Then, when the property is divided, all three rights would be divided proportionately. If the lands were divided to two units, the result would be six water rights, three to the west parcel and three to the east parcel. Each parcel would enjoy part of the 1950 right, part of the 1953 right, and part of the 1959 right. All the lands would effectively enjoy a diversion rate of about 0.015 cfs/acre, which is adequate with good management.

Both LaMar Rupp and Gary have told me of the difficulty with correcting the ownership on the county records. I can adjust the water right ownership based on the deeds and/or trust documents that you have, if they show the correct ownership and the proper legal descriptions. This will allow at least the water right recommendations to proceed.

Please feel free to call me if you have questions. I look forward to meeting with you after you have had your meetings. My goal is to recommend these water rights correctly, and your input has been very helpful.

Sincerely,

Bryce A. Contor
Senior Water Resource Agent

Re: Adjudication Claim 29-2292, 29-2419

Dear Mr. Rupp:

I have begun reviewing these adjudication claims. The well under 29-2292 was originally licensed for 4.24 cfs, which is probably not quite adequate for the 369 acres you appear to be irrigating. The capacity of the well was measured in 1953 at 6.06 cfs, which is much more appropriate for 369 acres.

If you wish, I can prepare a "beneficial use" claim for the additional diversion rate, with a priority of 1953. This would result in an additional 1.82 cfs, or about 817 gallons per minute. The fee would be \$100.

Another issue with these water rights is that the diversion rate per acre is not balanced between the two rights. It appears that the two systems are interconnected, and operated together. It would be appropriate to recommend these two rights (three, if you file the beneficial use claim) on a "permissible place of use" basis. The advantage to this is that you would be able distribute your available diversion rate across the entire farm, from either water right or well.

The disadvantage would be that if the land were divided, or a portion were sold off, each piece of land would get a proportionate share of each water right. If you wished to keep the older water right on one parcel, and the junior right(s) on another, the "permissible place of use" would interfere with your plans.

Please consider what you would like to do, and let me know. You may call me at home in the evenings at 208-663-4853, if you can't reach me during the day.

Sincerely,

Bryce A. Contor
Senior Water Resource Agent

Re: Adjudication claims 29-2292, 29-2419

Dear Water Users:

These two adjudication claims are based upon licensed ground water rights for irrigation. License 29-2292 was originally issued to Henry Jensen, but was shown in the names of Harold and Veda Rupp and Melville and Ora Jensen in a 1965 transfer. License 29-2419 was issued in 1969 to the same four parties.

Based upon these two licenses, there have been four adjudication claims filed. Claim 29-2292 is filed in the names of Harold or Veda Rupp, or Ora Jensen. Claim 29-2419 is filed in the names of Harold or Veda Rupp. Claim 29-13143 and claim 29-13144 are filed by the Melville W. Jensen Trust and the Ora L. Jensen Estate, asserting partial ownership of rights 29-2292 and 29-2419.

We are now investigating adjudication claims in Basin 29, to prepare recommendations to present to the court. My charge is to accurately report the water rights, including the ownership of the rights.

If the lands are still jointly owned, I must recommend the water rights to all the owners of the lands. If the lands have been divided, the water rights must be divided accordingly. Unless the conveyance documents or deeds explicitly state otherwise, water is divided proportionately to the division of the irrigated lands.

Please contact me to help me sort out what is the correct ownership status of these water rights. If you have copies of deeds or conveyance documents, these would be most helpful. You may leave a message for me at 525-7161. I am hard to catch up to, but I will return your calls within a week.

Thank you,

Bryce A. Contor

Subject: competing claims

Claims 29-13143 and 29-13144 were filed by the Ora L. Jensen Estate and the Melvin W. Jensen Trust, alleging co-ownership of claims 29-2292 and 29-2419. 29-2292 is filed by Harold or Veda Rupp or Ora L. Jensen, 29-2419 is filed only by Rupps.

Unless you have a better plan (I hope you do) my idea was to invite both sets of claimants to document their ownership of the right, then sort it out and make a recommendation. I haven't looked at the claims to know if they will otherwise be recommendable.

MEMORANDUM

Date: 1/31/01

From: Craig Saxton

Subject: 29-13143 and 29-13144

Back ground:

Two families have owned and operated the land covered under water right licenses 29-02292 and 29-02419. The Rupp's family and the Jensen Family. Adjudication claims were filed on these water rights by the Rupp's.

The Jensen family has part ownership of the land and now wants their names on the adjudication claims. The only way to add the Jensen's names to the claims filed by the Rupp's would be to have the Rupp's sent a letter to add the Jensen's names.

The Jensen's told me that there is some sort of tension and the Rupp's would not allow the Jensen's name to be added.

Result:

The Jensen's filed separate adjudication claims on the land in question. The Jensen's claims were filed exactly like the claims filed by the Rupps. The intention of filing the claims is not to claim sole ownership of the water rights, but rather to ensure that their names are included as owners when the department makes it's recommendation to the court.

Fees:

Acreage fees paid by AJ claims 29-02292 and 29-02419. A notice of extension of time to avoid late fees was filed based on the fact that the Jensen's thought that their name was included on the original filing.

WATER LICENSE

Water License No. G-28240 Priority October 26, 1959 Amount 2,947 c. f. s.

THIS IS TO CERTIFY, that Harold L. & Veda J. Rupp & Melville W. & Ora L. Jensen
 of Pocatello, Idaho, made application for a permit to appropriate the public waters of
 the State of Idaho, dated October 26, 1959; that Permit G-28240 was issued pursuant
 to said application; that the proposed works were completed on or about May 1960,
 with a storage/or carrying capacity of 2,947 c. f. s., said works consisting of well,
pump and motor; and that on September 24, 1964,

proof was made to the satisfaction of the State Reclamation Engineer, of the beneficial use of 816
 when combined with all other rights appurtenant to the same land and shall not exceed
 acre feet per season, with a maximum rate of diversion of 2,947 cubic feet per second of the waters that
 amount

of ground water, tributary of _____,
 for the purpose of irrigation from April 1 to October 31;
 and for _____ from _____ to _____; and for
 _____ from _____ to _____; and that the use

of said waters has been made in accordance with the laws of Idaho, and is hereby confirmed by the State Recla-
 mation Engineer and entered in the records of the Idaho Department of Reclamation: the point of diversion is
 located in NE $\frac{1}{4}$ NW $\frac{1}{4}$, Sec. 35, T. 5 S, R. 34 E, B.M., and
 other additional points _____, in the County of

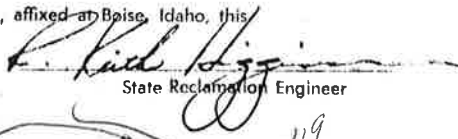

Bannock; and that the amount of water to which such right is
 entitled and which is hereby confirmed, for the purposes aforesaid, is limited to an amount actually beneficially
 used for said purposes and shall not exceed 816 acre feet per year. when combined with all other
 rights appurtenant to the same land.
 Description and location of place of use:

APPLICATION FOR PERMIT

To Appropriate the Subterranean Waters of The State of Idaho

Application No. G- 36200
Permit No. G- 28240
District No.

1. Name of Applicant: Harold L. Rupp, Veda J. Rupp, Melville W. Jensen, & Ora L. Jensen
Postoffice address: Route 2, Pocatello County: Bannock State: Idaho
2. Quantity of water claimed: Four Second Feet
 - (a) Rate of withdrawal in cubic feet per second 4 or Idaho
Miners' inches 200 or gallons per minute
 - (b) Annual withdrawal in acre feet per annum
3. Source of water supply: Irrigation well
4. Location of point of diversion or well is in the NE $\frac{1}{4}$ of the NW $\frac{1}{4}$ of Section 35
Twp. 5 S , Rge. 34 E , B.M., County of Bannock
5. Water is to be used for: Irrigation
6. If for municipal, industrial or recreational purposes, give:
 - (a) Point of use of water is in the $\frac{1}{4}$ of the $\frac{1}{4}$ of Section , Twp.
Rge. , B.M.
 - (b) Waste water or sewage effluent is to be returned to
at a point in the $\frac{1}{4}$ of the $\frac{1}{4}$ of Section , Twp. , Rge. , B.M.
7. Kind of works: Well and pump, sprinkler
8. Estimated cost of works: \$ 20,000.00
9. (a) Is reservoir to be used? No
(b) Capacity of reservoir:
10. The time required for the completion of such work and complete application of the water to the proposed use is five years.
11. If applicant is a corporation, give:
 - I. (a) Date and place of incorporation:
(b) Amount of capital stock: \$ (c) Amount paid in: \$
(d) Names and addresses of directors:
 - II. The financial resources of the applicant are (a) Cash onhand: \$
(b) Treasury stock: (c) Bonds to be issued:
(d) Other resources:
12. The land to be irrigated is described in the following tabulation:
13. Existing water rights and/or valid permits appurtenant to the lands to be irrigated are: none
 - (a) (cubic feet per second, inches or gallons per minute) of the water herein applied for is to be supplemental to the existing water rights.
 - (b) 4 (cubic feet per second, inches or gallons per minute) is for new lands.

Remarks:

BE IT KNOWN THAT The undersigned hereby makes application for permit to appropriate the public waters of the State of Idaho as herein set forth.

INSTRUCTIONS TO EXAMINERS

1. Always carefully note the location of the point of diversion and accurately plat same.
2. When proof is for beneficial use, carefully check up the number of acres actually irrigated in each forty and accurately plat same.
3. Make a map showing the correct location of streams and ditches, and the irrigated lands, and any adjacent permanent landmarks, such as towns, lakes, large streams and public roads.
4. If any unusual conditions are discovered, make plain statement of them under remarks.
5. Always see the holder, if possible, and go over the whole ground with him and make your report only upon actual existing facts and conditions.
6. Give general characteristics of soils, topography, and crops raised.
