(a) 3.9 (cubic feet per second, inches or gallons per minute) of the water herein applied for is to be supplemental to the existing water rights.
(b) (cubic feet per second, inches or gallons per minute) is for new lands.

I have drilled this well to a depth of 60' with a 16" casing and installed a 125 hp elec. motor and have now increased the flow from 2.1 second feet to 6 second feet and pumped this amount of water all during the 1964 irrigation season. I have installed over 3600' of steel underground main line plus 3500' of alum. main line and 10 quarter miles of laterals at a total cost of over \$27,000.00 to me.

The land on this farm is mostly of a porous nature and flood irrigation has not proven satisfactory and also it is very unlevel so sprinkler irrigation is the most practical method and the additional 3.9 which I have developed in this well makes it possible to water most of the land on my farm very efficient.

BE IT KNOWN THAT The undersigned hereby makes application for permit to appropriate the public waters of the State of Idaho as herein set forth.
