RE: Notice of Change of Address for 29-71 & 29-2558 and Notice of
Completed Administrative Proceeding (NCAP)

Dear Mr. Davids:

On December 17, 2003, the Idaho Department of Water Resources (IDWR) received a change of address for the above referenced water right(s). Based on this change, IDWR water right records for the Snake River Basin Adjudication (SRBA) have been updated.

Furthermore, as directed by the SRBA Court, this office mailed a copy of the updated water right record(s) to each party listed on the enclosed NCAP. The intent of this mailing is to ensure each party has a current record of water right(s) as recorded in the SRBA.

Please feel free to contact me if you have any questions concerning this matter.

Respectfully,

Kristen Forsgren
Office Specialist 1

Subject: Season of Use

Hi Cindy,

In talking to Candice, it sounds like 29-2558 should have the 4-1 to 10-31 season of use for irrigation from storage to be consistent with the way we are recommending post decree beneficial use rights in that area.

Amount 700 Acre-Feet
 Priority 5-12-1928

THIS IS TO CERTIFY that Chesterfield Canal & Reservoir Company, store and of Bancroft, County of Bannock, made application for a permit to appropriate the public waters of the State of Idaho, dated May 12, 1928, 19 28; that Permit No. 427 was issued under said application; that Certificate of Completion of works, with a carrying capacity of 700 second feet, was issued thereunder on February 26, 19 29, showing that said works were completed on the 8th day of November, 19 28; and that on the 8th day of November, 19 28,

Chesterfield Canal & Reservoir Company of Bancroft, State of Idaho, made proof to the satisfaction of the Commissioner of Reclamation of Idaho, of the right to use the waters of Twenty-four Mile Creek, a tributary of Portneuf River, for the purpose of irrigation and domestic use, under Permit No. 427 of the Commissioner of Reclamation and that said right to the use of said waters has been perfected in accordance with the laws of Idaho, and is hereby confirmed by the Commissioner of Reclamation of Idaho and entered of record in Volume 6 of Licenses, at page 3569, on the 26th day of February, 19 29;

The right hereby confirmed dates from May 12, 19 28;

The outlet of the said reservoir is located in the NE $\frac{1}{4}$ of NE $\frac{1}{4}$ in the $\frac{1}{4}$ Sec. 16, Tp. 6 S., R. 39 E., B. M.

That the amount of water to which such right is entitled and hereby confirmed, for the purposes aforesaid, is limited to an amount actually needed and beneficially used for said purposes, and shall not exceed 700 acre-feet annually, subject per second, being a supplemental right to the decreed right now held by said Chesterfield Canal & Reservoir Company.

Mr. Joe Holbrook, Secretary
Chesterfield Canal & Reservoir Co.
Bancroft, Idaho

Dear Mr. Holbrook:

License was issued on Permit R-427 for 700 acre feet of storage in addition to the decreed right held previously.

The dam was built to the 1928 specifications and repair to these specifications of crest elevation, high water elevation, crest width and slopes would not require submission of plans and specifications to the Department for approval.

However, as we understand the situation, it is your intention to increase the crest elevation and spillway level so that the full amount of decreed and licensed storage can be obtained. For this purpose plans and specifications should be submitted for approval. We will require a copy for our files.

Very truly yours,

MARK R. KULP

Dear Sirs:

Could you let us know if additional water storage right was filed upon and recorded when this Reservoir was rebuilt in 1928. Could you also tell us what the present storage capacity is to date, that has been filed upon and recorded. If not, could you tell us where to obtain this information?

The United States Department of Agriculture ^{Soil Conservation} is helping us to raise this Reservoir up to the present specifications.

(you will find these in your copy of a letter sent to Chesterfield Canal & Reservoir Co. in care of Mr. D. H. Smith October 27, 1947) The Soil Conservation has plans drawn up, still they have to submit these plans to the State Reclamation Department for inspection or can we proceed with this work without. Our plans are to bring this up to the 1928 specifications.

Very Truly Yours

Mr. A. Paul Hatch
President

Dear Mr. Hatch:

In checking over the water rights, we can't seem to find anything after the 1922 decree. This right dates back to 1882 and is for 100 acre feet storage and 6 cubic feet per second of flow. Did the company obtain additional storage right in 1923 when the dam was rebuilt?

I believe you should check with the Idaho State Reclamation Engineer to find out how much storage right you have. Also, ask if the state is interested in approving the plans to rebuild the dam to the 1928 plans. The storage will be increased to compensate for silting of the reservoir, but the freeboard will not be changed. A reinforced concrete spillway structure will be designed wide and shallow to carry the same maximum discharge at a depth of 1½ feet with 4 feet of freeboard as before. The state also requires air vents at the intake structure, which we are including in the plans with the new gate control. A trash rack and fish screen is also planned for the intake.

I believe immediate action should be taken to make sure the company is in the clear with the State Engineer's office.

Very truly yours,

Dear Mr. Call:

Referring to your letter of February 18th, relative to the construction of a concrete spillway to replace the former wooden one, and also the restoration of the dam to its original height by adding material to replace that worn off by the passage of cattle and sheep:

Your suggested improvement will doubtless meet with the approval of this Department. However, as regards your desire to build the dam to an increased height of five feet, we would require some additional knowledge of the present structure, probably in the form of a cross-section survey, and any other information which might be pertinent. This would also apply in the matter of the smaller reservoir down stream from the one under discussion, where there would also be need for examination and survey data.

We will endeavor to examine your project in the near future, and in the mean time, we are,

Dear Sirs:

In 1928 we raised the dam on our twenty-four mile creek reservoir. There was a wooden spillway put in. About three years ago, it rotted and washed out. The cattle and sheep have used the dam for a crossing and have worn it down about two feet in some places.

We are writing to find out if it will be allright to put in a concrete spillway and build our dam up to its original capacity. What size spillway will we have to put in? We would like to build our dam four or five feet higher, if possible. There are some years we might be able to fill it.

There is, also, a little reservoir, about one-half mile below the large one, that washed out years ago. There is some talk of putting it in, again. So, if you could write us the details about these reservoirs, it will be greatly a preciated.

The number of our permit to build it was R-427 and permit number 14504. Proof of completion was number 172, in case you want to refer to them.

Hoping to hear from you soon. We remain

Respectfully yours,

Re: Permit No. R-427.

Mr. Earle V. Thorpe, Secretary,
Chesterfield Canal & Reservoir Co.,
Bamcroft, Idaho.

Dear Sir:-

Depositions of yourself and two witnesses, together with the affidavit of publication for proof of completion of works and beneficial use of water under the above permit were duly received in this office and are satisfactory.

The statutory fee due this office for proof of completion of works where the amount of water claimed does not exceed 6.4 second feet (1600 acre-feet) is \$5.00 and, upon receipt of this amount, the certificate of completion of reservoir and right to store water will be issued the applicant herein.

Very truly yours,
GEO. M. CARTER,
Commissioner of Reclamation.

By _____
Chief Clerk.

Chesterfield Canal & Reservoir Co.

Dear Sir:

In reply to your letter of November 3:

I beg to advise that it was not the intention of this office to hold up your proof of completion of works on account of the riprapping. This matter was called to your attention under the provision of the statute which provides for regular inspection of all dams by this department and the suggestion that this riprap be done was made as a result of an inspection made by the writer last fall.

I am pleased to note that you are making progress in this matter and will be pleased to have a report from you from time to time as the work proceeds.

I wired you yesterday, as follows:

"Reference Chesterfield permit stop you should proceed with proof on date set."

Inasmuch as your proof was set for this date at Bancroft, I take it that it is already made and that the depositions will be forwarded to this office when completed.

Yours very truly,

Assistant Commissioner
of Reclamation

Dear Sir: ReDams 39I, Permit R-427

Refering to your letter of Sept. 22nd, this was after
you had been up and inspected our dam.

We have been rip-rapping where we had no willow mats
for the last week, and expect to rock it all with the exception
where the willow mats are in place and doing good, now we will not
have this all finished by the time we prove up, but will finish this
winter some time. The Company didnt feel able to do riprapping at
the time we built the dam, but figured on doing some each year until
all the upstream face was ~~protected~~. *Protected*

Will we go ahead and prove up, or wait until we have
rocked it all and you inspect it from your office?

I am,

Yours very truly

E. B. Thorpe
Secretary.

P.S.

*Time to prove up was set
for Nov 8th 1928

AND
PROOF OF BENEFICIAL USE OF WATER

BOISE, IDAHO, **October 29, 1928.**

CHESTERFIELD CANAL & RESERVOIR CO.

**c/o H. Van Slooten,
Bancroft, Idaho.**

DEAR SIR:

I enclose herewith the following forms to be used in connection with proof of completion of works and beneficial use of water under Permit No. **R-427**

DEPOSITION OF PERMIT HOLDER.

DEPOSITIONS OF TWO WITNESSES.

In submitting this proof the following instructions should be CAREFULLY followed out, since failure to do so may result in the loss of rights:

1. On **November 6, 1928**, the date set for proof, the enclosed forms (two for permit holder and two each for two disinterested witnesses) should be filled out and sworn to, at **Bancroft** before **H. Van Slooten, notary public,**

2. When the depositions have been taken they should be mailed to this office, together with affidavit of publication of notice.

When these have been received, together with report of the examining engineer, if everything is properly executed, you will be further advised as to fees due, etc., before certificate is issued.

Yours truly,

GEO. N. CARTER, ~~Wm. G. SEVENSON~~

Commissioner of Reclamation.

Re: Dams 391
Permit R-427

MR. EARL B. THORPE,
Secretary, Chesterfield
Canal & Reservoir Co.,
Bancroft, Idaho.

Dear Sir:

I recently made an inspection of the reservoir dam of your company located on Twenty-four Mile Creek in connection with proofs of beneficial use and completion of works on your Permit No. R-427.

It was noted that the plans were not followed in the matter of placing rock riprap on the upstream face to prevent erosion. It was noted that willow mats had been placed a part of the way across the dam. Some erosion has taken place in portions of the dam where the willow mats were placed and also on the east end of the dam, where the embankment is unprotected.

Inasmuch as your company has already had one failure of this dam, I take it that you fully appreciate the necessity of giving ample protection, and as I know of no other means by which erosion on the upstream face of this dam can be prevented, except by placing a coat of rock riprap, I would suggest that you call this matter to the attention of the Board with a view of either getting the plans amended or placing the rock riprap, as indicated in the plans.

Assuring you that this department will be glad to cooperate with you in any way, I remain

Yours very truly,

Assistant Commissioner of
Reclamation

INSTRUCTIONS
PROOF OF COMPLETION OF WORKS

August 1, 1928

Boise, Idaho,

Earl B. Thorpe, Agent
Chesterfield Canal & Res. Co.
Bancroft, Idaho
DEAR SIR:

I enclose herewith blank form upon which to give notice that you are prepared and desire to submit proof of completion of works under your permit No. B-427.

This form should be filled out and mailed to the Department of Reclamation, at least 60 days before the date upon which proof is to be submitted, which proof MUST be on or before Nov. 29, 1928. Upon receipt of the blank properly filled out, notice for publication will be sent to the paper direct from this office, which notice must be published a period of four weeks prior to the date of proof.

The proof may be submitted at any place convenient to you and two witnesses, where there is a notary public or other officer authorized to administer oaths.

The certificate that shall be issued under this proof does not give you a perpetual right to the use of the water for which application is made, as it only confirms the completion of the works of a capacity to divert and convey to the place of intended use a certain amount of water. The law requires that another proof be submitted when the water has been fully applied to a beneficial use, at which time license is issued for the amount of water actually in use. Information in regard to this last proof will be furnished on request.

Very truly yours,

GEO. N. CARTER

Gentlemen:

Attention: Mr. Earle B. Thorpe

Reference is made to your letter of April 5th, relative to enlargement of your reservoir on Twenty-four Mile Creek.

Inasmuch as you are asking for additional water, it will not be possible for you to amend your old permit. I would, therefore, suggest that you make application for enlargement of your reservoir and in this connection, for your information, I am sending you a copy of your original application, together with instructions and blank form for the new application.
