Re: Acres, diversion rate, combined limitation

- 1) 29-2611 licensed for 93 acres, claimed 93 acres
- 2) 29-7648 licensed for 76 acres, claimed 76 acres
- 3) Σ claims/licenses = 169 acres
- 4) 29-2611 licensed for 1.69 cfs
- 5) 29-7648 licensed for 0.91 cfs
- 6) Σ claims/licenses = 2.70 cfs $\approx$ 0.16 cfs/acre
- 7) POU per GIS $\approx$ 163 acres
- 8) $2.70/163 \approx 0.166$ cfs/acre
- 9) 29-2611 no volume on license
- 10) 29-7648 licensed for 266 cfs $\approx$ 3.5 cfs/acre
- 11) license exam 29-7648 was done in 1984, examiner found $39 + 40 + 40 + 38 + 12 = 169$ acres. Claims were filed in 1990.
- 12) FSA (2001) map indicates $51 + 48.8 + 53.1 + 4.8 + 4.9 = 162.6$ acres

Note that blue line on map was drawn either by claimant or by FSA.

Conclusion

The difference appears to be the ship against the reservoir in NUSE of 15. This does not appear in 1987 NAPP and can not be included within the blue line drawn on the EPA map submitted by the claimant. My letter to the claimant explicitly asked about that parcel.

Since more than 5 years elapsed between the 1984 license exam and the claim, and since current data supports the 1987 NAPP, I will recommend with a combined ore liberation of 163 acm, ~~and a combined volume line~~

Volume will be adjusted to current 514 4.0 oya/acre per Center Fitts's instructions in B31, with combined liberation of 163×4.0 oya. $163 \times 4 = 652$

No combined rate limitation is req. as rate ~~is~~ ^{is less than} 0.02 yds/acre.

I am enclosing the map from the FSA which you requested - Your map had left out a little 4.5 acre irrigated pasture which is irrigated on my water -

It would probably be a good idea to merge these two rights into a "permissible place of use" to give us the flexibility for the farm. So if you can do that, go ahead -

If you need anything else let me know.

Thanks

Re: Adjudication Claims 29-2611, 29-7648

Dear Ms. Anderson:

I am in the process of reviewing your adjudication claims, to make recommendations to the court. It is important for these to be accurate, and I need some help from you. The enclosed aerial photo was taken in 1987. The yellow lines show what I think was irrigated then. However, there is a little corner on the very south (southwest of the house) that may possibly have been irrigated, and there is a strip on the very west next to the river that may have been irrigated.

If those two parcels were irrigated in 1987, or if they are irrigated today, I want to include those in the recommendation to the court. Could you please go to the Farm Service Agency (FSA) and get aerial photos (either 1987, or very recent) showing what is actually farmed? The FSA won't release your information to me, so I can't do this. Please ask the FSA to write on the map what crop year is represented, and date, stamp, and sign the photo, clearly indicating that it is an FSA photo. This is important.

You have two irrigation claims on this property, one with a 1956 priority date and one with a 1982 priority date. Right now, the lands irrigated under these two are separated into blocks. The 1982 right irrigates the very west, the south end, and a strip in the middle. The 1956 right irrigates two blocks, separated by lands under the 1982 right.

This situation is awkward for administration of water rights, and could become an inconvenience for you if your use of water is ever regulated strictly to the water right conditions.

If you wish, I could merge these two rights into a "permissible place of use," which would allow you the flexibility to use either right anywhere on the farm.

Please send me a copy of the FSA photo, if the yellow shape I have drawn on the map is not correct. Otherwise, I'll use the yellow shape for your recommendation.

If you would like me to recommend these rights as a "permissible place of use," please send me a postcard or write me a note asking for this.

Sincerely,

A handwritten signature in cursive script that reads "Bryce A. Contor".
