Water Source: Station Creek--5½ miles west of Downey.

Off stream reservoir of 3; acres. When filled it holds near 23 acre feet of water. Located 400 yards east of Marsh Valley Road and Woodland Road--and 300 yards north of fore-mentioned point.

It came into being as a holding point and distribution device to fully utilize the water transfer No. (1) 29-0318 (2) 29-0331 made possible by 'changing the point of diversion'. The water not utilized while changing sprinkler lines was held in the reservoir and used where and when needed to maintain the water table for the pasture, hay and meadow land in the No. 1717 Identification as approved in April 1974. The waters here were decreed on June 9, 1904.

The State of Idaho Department of Fish and Game issued private Fish Pond permits No. 52-18 on 12-16-81 and No. 53-17 on 12-17-82 showing that the reservoir was in multi use then and has been since and is providing water where needed, and a waterfowl and water-life haven.

Dave Walrath of the Idaho Department of Water Resources inspected the pond and suggested that the spillway be lowered two feet. He was notified when this was done.

Started building the project in 1960's as evidenced by documents, it has been an important factor in my beneficial use of water.
