and recommending the ground water
under (0.005 cfs) 29-4431.

The system is connected and both
source flow into the pond and used
for flood irrigation, stockwater and
domestic.

The domestic use is only occasional,
so am going to recommend irrigation of
2 acres under this right.

Recommending 0.050 cfs from ground water

Contractor information: The contractor has assumed a 1.5 hp pump to calculate the flow rate. This system doesn't have a pump. It's all gravity feed. This claim had the GPS tag on the culvert next to the main road.

Groundwater well claim has been filed. Waiting for claim from Idaho Falls. This system is connected with the groundwater well.

Need to see if we can uncover the pipe to determine if the groundwater can be measured.

The spring comes up in the pond and gravity feeds the system, flood irrigates.

REF: Ground water well

SUBJECT: Beneficial Use Claim

Dear Vadna,

I've been researching your ground water well. I can't find anything on it, not even a well log. Since the well was drilled and used prior to 1963 I would suggest you file a Snake River Basin Adjudication (SRBA) claim on the well. I've enclosed a SRBA irrigation claim form for you to fill out on the well. I would suggest filing the claim as soon as possible to avoid a \$50.00 late fee.

After looking at the imagery of the irrigated lands, it appears that your historical irrigation is 20 acres. Also to remind you this would be a beneficial use claim and would also need "Evidence of Priority". If you have any further question, please feel free to give me a call at 547-3993.

Sincerely,

Cindy E. Bird

The home isn't used continuously but is used regularly throughout the year. The home site has several camp trailers and campers that belong to the family. Behind the tree in the foreground is an outdoors (cowboy) shower that is hooked to the gravity system.

Photo 2 was taken looking east at the ponds. The spring and artesian well is commingled in the pond and flow by gravity to the home and flood irrigation of the lawn and trees. The artesian well and spring flows into the first pond.

The artesian well is not shown in the photo. It would be located to the left of the photo.

DEAR CLAIMANT (S):

Last spring I wrote you requesting additional information or documentation of the use of this water right. I need this information to make an accurate recommendation to the court in the Snake River Basin Adjudication. Because these rights have never been confirmed by a court decree or a department investigation, we need documentation that the water uses were developed prior to March 25, 1963 (ground water source) or May 20, 1970 (surface water source).

Please refer to the letter and pamphlet sent last spring, and provide documentation. Remember that affidavits must clearly identify "first person" knowledge (I did..., I saw...) and clearly state when the use of water was first seen by the person.

Feel free to contact me at our new satellite office in Soda Springs at 547-3993 if you have any questions.

RE: EVIDENCE OF PRIORITY

Dear Claimant (s):

The Idaho Department of Water Resources has recently begun its water right review in Basin 29. The Notice(s) of Claim identified with the number shown above in the "address" label and at the "end" of this letter has been filed in the Snake River Basin Adjudication (SRBA). The Notice indicates water usage is based on "Beneficial Use". Water rights of this type are established by the historical use of water, dating back to when water was first used for the purpose claimed, at or on the place of use identified on the Notice. The date the water was first put to use, known as the priority date, has not been confirmed by a license, Decree, or Permit. For this reason, proof must be provided supporting the priority date. As the claimant, you are responsible for submitting the necessary proof to support the priority date.

It is important that each element of the Notice be substantiated. For instance, regarding claims for irrigation, the evidence should tend to show that diversion works were in place, that they were capable of diverting the claimed diversion rate, and that the diverted water was beneficially used on the entire claimed place of use on or before the claimed priority date.

For your reference, I have provided a printout of your Notice and the pamphlet entitled "Evidence of Priority". The pamphlet describes the types of evidence required and suggests which documents will fulfill this requirement. While I encourage you to read the entire pamphlet, I direct your attention to the two sections entitled "What Kind of Evidence is Required" and "Some examples of Documents Which May Be Evidence of the Priority Date".

It is our goal to recommend historical water rights within the Snake River Basin as accurately as possible. Field exams to verify other items of the Notice have been or soon will be conducted by Department personnel.

.....
The Department can not recommend the Notice be decreed by the court if no evidence of a priority date is submitted.
.....

Please submit the documentation supporting the priority date by June 22, 2001, referencing all documents with the corresponding Notice number. If you have any questions not covered by this letter or the enclosed pamphlet, please feel free to contact me at 327-5450.

Respectfully submitted,

Cindy E. Bird
