10. Place of use in counties: LATAH

11. Do you own the property listed above as place of use? Yes

12. Other Water Rights Used:

13. Remarks:

Priority date description: Year we purchased the farm, 2011. Grandparents first farmed here in 1931, and farm, ranch has been in continuous use since Buchanan homestead in mid 1860s.

Description of use:	<u>Water Use</u>	<u>Description</u>
	DOMESTIC	Household well drilled approximately 300 feet deep off northeast corner of garage. Well supplies household water, and is a supplement to yard standpipes and animal watering provided by lower dug well.
	DOMESTIC STORAGE	Approximately 15 foot deep hand dug well, encased in vertical culvert, stores water for use in both animal watering when drainages are dry, and yard irrigation and, or minor non-house water use. Plumbing configuration through well house at garage allows for this well to act as a backup to the domestic needs of the house. Location is at the east central portion of the property, in small well house and adjacent to milk house.
	FISH HABITAT	Bluegill sunfish were planted in this pond in the 1980s to help with vegetation control. The island is part of the original Idaho Fish and Game design, and is meant to attract geese to the goose boxes.
	IRRIGATION STORAGE	Pond stores water for on-site sheep watering, as well as downstream feeding of pasture and in-drainage stock watering.
	STOCKWATER	Livestock, currently sheep, drink directly from the pond.
	STOCKWATER STORAGE	Pond has an overflow tube and eastward drainage ditch, but holds water than can be released through overflow tube to provide volume to downstream ditches where sheep water directly from the channel.
	SUBIRRIGATION	This draw and seasonal drainage provides irrigation to our pasture and hay, and drinking water for our livestock. Without this water source, our pasture and hay crops would be almost non-existent.
