Comments: Wheel line to upper alpha field was running at time of exam. This setting accounts for roughly 7/9 of time system is run. Another 1/9 of the time water is used on an upper pasture at the same pressure. The final condition is a low area near the home and well.
For all readings only 15 birds were on. Owner forgot to turn on last two birds. System is run with 17 birds. Final five readings are with all 17 birds on. A dedicated power meter will not be installed on this system as once planned.
