Subject: POU for 29-08011

Photo taken in 1992

Note: Original claim was based on the permit. My recommendation will be based on the license.

Paul Meyer preformed the field exam for 29-08011 in 1995. I conferred with him about the actual place of use during the 1995 field exam vs the Place of use shown on the 1987 Napp photo's.

From my discussion with Paul Meyer and looking at the aerial photo's I could not make the licensed acreage distribution fit exactly to the 1998 license. Since the licensed acreage distribution was based on "dot counting", I will use the ArcView GIS calculation for acreage distribution in my recommendation which, at this time, is the most accurate tool we have to calculate irrigated acreage.

The total acreage licensed along with the QQ's containing irrigation will not change. The minor changes in acreage distribution were done in order to create a recommendation that most accurately represents the water use.

CONDITIONS OF APPROVAL AND REMARKS

1. The maximum diversion volume is defined as the maximum allowable volume of water that may be diverted annually from the source under this right. The use of water confirmed by this right is limited to the amount that can actually be beneficially used. The maximum diversion volume may be adjusted to more accurately describe the beneficial use or to implement accepted standards of diversion and use efficiency.
2. This water right is appurtenant to the described place of use.
3. This right is subject to all prior water rights and may be forfeited by five years of non-use.
4. Modifications to or variance from this license shall be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.
