Re: Period of Use

Irrigation and Irrigation from Storage

No documentation is presented for claimed season, so 5th season is recommended. I neglected to ask claimant about this at field exam, but NOE process gives claimant another opportunity.

Division to Storage and Irrigation Storage

With limited storage capacity, claimed that date 3/15 is probably adequate. Recommendation 3/15 through 10/31.

Re: Calculation of storage volume

I. Volume of pond ≈ 9.5 acre feet per
6/12/01 memo.

II. Potential annual volume
214 days $\times 3$ cfs $\times 1.9835$ af/cfs/day
= 1273.4 acre feet
 $1273.4 / 9.5$ acre feet ≈ 134 fills.

III. Annual volume at storage limit 5 acre feet/ann
 360 ann $\times 5$ af/ann = 1800 acre feet.
This exceeds limit at typical peak rate (II).
Conclusion: $1273.4 + 9.5 = 1282.9$

Water is entitled to initial fill
+ full season flow, as this ≈ 5 yrs.
flow.

Recommended volume for each night in ratio
of acres.

Storage volume

$$31-11445 \quad \frac{9.5}{360} \times 231 = 6.1 \text{ acre feet}$$

$$31-11448 \quad \frac{9.5}{360} \times 69 = 1.8 \text{ acre feet}$$

$$31-11450 \quad 9.5 - (6.1 + 1.8) = 1.6 \text{ acre feet}$$

Frr. from storage volume

$$31-11445 \quad \frac{1282.9}{\cancel{1273.4}} \times 231 = \frac{823.2}{\cancel{817.1}} \text{ acre feet}$$

$$31-11448 \quad \frac{1282.9}{\cancel{1273.4}} \times 69 = \frac{245.9}{\cancel{244.1}} \text{ acre feet}$$

$$31-11450 \quad 1282.9 - (\cancel{817.1} + \cancel{244.1}) = \frac{213.8}{\cancel{212.2}} \text{ ac.ft.}$$

Combined limitations

Use of water for irrigation and for irrigation from storage for 31-11445, 31-11448, 31-11450 shall not exceed 1273.4 acre feet in any irrigation season. (Use modified Std Qat remarks)

I. Claimed Areas (before amendment)

29-10445	231	N/2 26
29-10448	69	SE 26, SW 25
29-10450	60	Section 23
<u>360</u>		acres.

No apparent overlap in claims

II. Original POA (area/location)

a) Blumentry deed 171397 2/20/81 conveys
 "ten shares out of a total of 12" for
 240 acres. (copy in 29-10450)
 (NE 1/4 & E 1/2 NW 1/4 26)
 b) Indenture 11/20/1945

28.4 acres w/ 3/4 of one share.
 3/4 of one share = 18 hrs of flow of creek
 every 12 days. Located in Section 23

c) Indenture # 7738 12/1/1915

Pou & Phonthy p 2

NESE 23	16.68	acres
W 1/2 SE 22	70.00	acres
SW 23	20.00	acres
NW 23	40.00	acres
		≈ 150 acres

right of Little Creek 2 days 18 hrs out & 12 days

III. Average Analysis

One share appears to possibly equal 1 day out of 12 of flow of creek. Item (a) implies 10 shares ≈ 240 acres; 12 shares ≈ 288 acres.

Item (b) implies 28.4 acres $= 3/4$ share; 12 shares ≈ 317 acres.

Item (c) implies 150 acres $\approx 2 3/4$ shares; 12 shares ≈ 650 acres.

It appears claimed acreage is more or less consistent w/ acreage for full supply of creek at original rates. Original Pou is more or less consistent w/ pre-amendment Pou.

Claimed average 360 / claimed of 30 ≈ 0.12 /acre. In light of the fact that this area is suitable climate & soil type for dry farm, this rate

could be beneficially applied in a "supplemental" basis and is not unreasonable.

Velocity head rod measurement and theoretical calculation are within reasonable range of claimed division rate.

IV. Average Recommendation

Propose recommending on a PPR basis as amended, limiting each claim to original claimed area.

V. Priority Date Recommendation

Lack of competing claims & list of documents indicates all Little Creek rights belong to those claimants.

Interference 7738 documents existence of Little Creek rights back to 12/1/1915.

Propose recommending priority date 12/1/1915.

Re: Irrigation Storage

When doing the field exam I failed to

question claimant fully about storage

claim. Claim lists "pumps" from ponds

but current system as inspected involves

only one pond, in the S/E of section

26. This is claimed with volume

120' x 540' x 5' = 7.4 acre feet. GIS

Analysis shows water surface at time of

photo is 1.32 acres and pond capacity water

level is 6.84 acres. Assuming 9' depth at time

of photo and 5 foot average depth over all:

$$2.28 \times 3 = 6.84 \text{ acre feet}$$

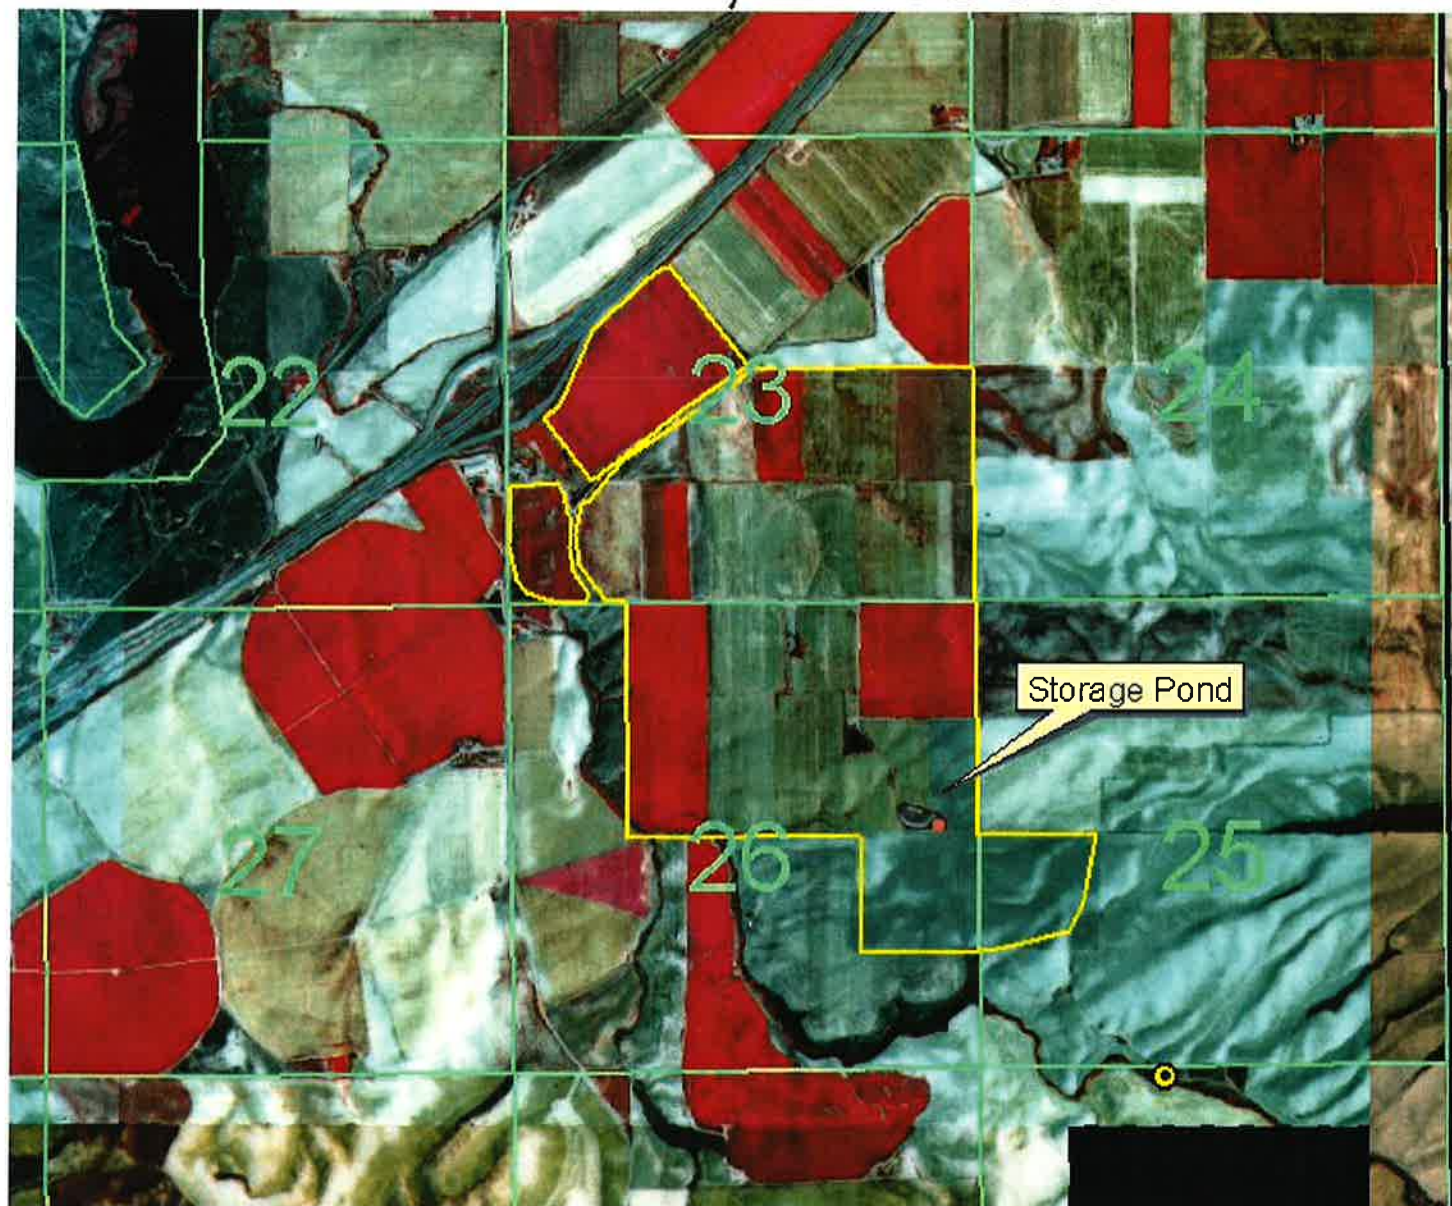

$$1.32 \times 2 = 2.64 \text{ acre feet}$$

$$\text{Total} = 9.5 \text{ acre feet}$$

Recurrent estimate total of 9.5 acre feet, if claimant disagrees at NCE time, do more thorough follow-up exam. JBA 6/12/01

 Re: Pump/Engine Capacity

Today I talked with Ed at Power Systems, Boise, 342-6541. Max horsepower of the 30 diesel is about 80 hp @ 2200 rpm but for continuous duty it would be operated at 1800 rpm, 60-65 horsepower. Theoretical @ 60 hp, 70 psi at pump =

$$= \frac{60 \text{ hp} \times 70\% \times 3960}{(10 \text{ ft inlet lift} + 10 \text{ ft friction} + 70 \text{ psi} \times 2.31)}$$

$$\frac{65 \times 70\% \times 3960}{(10 \text{ ft} + 10 \text{ ft} + 50 \times 2.31)} = 1330 \text{ gpm} \approx 3.0 \text{ g/s}$$

This form is to be used to document public record information requests regarding any SRBA claim or claims. The form may also be used to document IDWR communications requesting information regarding any SRBA claim or claims when the request is not made in writing or the claim verification report is not readily available to document the request. This form is to be filed in all relevant claim files or a central office file.

IDWR Employee/Agent Bryce Contor / Dean Byington Date 5/17/01

Nature of Contact Interview at home, inspection of pool
POD.

Substance of Communication Several items of documentation
provided which evidence existence of Little Creek
irrigation shares. No other claimants on Little
Creek; I accept concept of accomplished transfer
to current POD.

Claimant states diesel pump is 96 or 106 horsepower,
looks like 40-50 hp to me. Claimant states it
runs two pivots. Motor & pump serial #'s
recorded on yellow field sheet.
Entire farm has multiple sources of
water, interconnected w/ main line.

- 1) Falls Irrigation "Contract Water",
irrigated portions of $S\frac{1}{2}$ of section 23.
Includes $\approx$ 43.4 acres within claimed 60
acre tract in section 23. Only 26.6 acres
in that tract are attributed to ~~the~~ Little
Creek Irrigation.
- 2) "Interruptable" Falls Irrigation water
on $E\frac{1}{2}NW\frac{1}{4}$ section 26.
- 3) Falls Irrigation Wastewater permit, pump
in NESESE 22. No specified POU
- 4) Little Creek water. Claims each indicate
total claimed is 3.0 cfs.

Claimant wishes to claim Permissible Place
of Use, see field amendment.

Note that this area is suitable for dry
farm, therefore even limited rates of supplemental
irr. can be "beneficial" use.

Rough measurement w/ velocity rod indicates $\approx$
2.8 cfs, this is consistent w/ claim & consistent
w/ 2 pivots operating.

Re: Adjudication Claim 29-10445, 29-10448, 29-10450

Dear Water Users:

Attached are copies of Adjudication Claims for water rights near American Falls, Idaho. These claims are based upon "beneficial use." This means that the underlying water rights were perfected by the original user simply developing diversions and using the rights. This was completely legal and appropriate at the time it occurred, but it did not result in paper records of the water rights with the department.

In order to recommend these rights, I need you to supply "evidence of priority" and "evidence of beneficial use." The enclosed pamphlet describes some typical sources that may be used. If an affidavit is used, it must clearly show that the person making the affidavit personally observed the water use. The more detail the affidavit gives, indicating dates, circumstances, amounts and details of water use, the better. As I review the documentation provided, my standard will be:

The documentation should tend to indicate that diversion works were in place and had adequate capacity for the claimed use. The documentation should also tend to indicate that water was applied to the claimed beneficial use on the claimed place of use.

Please review these documents, and provide documentation of the historical use of these rights. Feel free to call me if you have questions. You should be able to reach me Thursday or Friday mornings.

Sincerely,

Bryce A. Contor
Senior Water Resource Agent

THE UNITED STATES OF AMERICA

Blackfoot 02220

To All to Whom These Presents Shall Come—GREETING:

WHEREAS, A certificate of the Register of the Land Office at Blackfoot, Idaho

has been deposited in the General Land Office whereby it appears that, pursuant to the Act of Congress of May 20, 1862, "To
Homesteads to Actual Settlers on the Public Domain," and the acts supplemental thereto, the claim of

Charles H. Stanor

has been established and duly consummated, in conformity to law, for the

south half of the southwest quarter, the northeast quarter of the southwest quarter, and
northwest quarter of the southeast quarter of Section twenty three in Township eight
of Range thirty east of the Boise Meridian, Idaho, containing one hundred sixty acres.

according to the Official Plat of the Survey of the said Land, returned to the General Land Office by the Surveyor General.

NOW, KNOW YE, That there is, therefore, granted by the United States unto the said Claimant the tract of land above described

TO HAVE AND TO HOLD THE SAID TRACT OF LAND, with the appurtenances thereof, unto the said Claimant and
heirs and assigns of the said Claimant forever, subject to any vested and accrued water rights for mining, agricultural, man-
ufacturing or other purposes, and rights to ditches and reservoirs used in connection with such water rights, as may be recognized
acknowledged by the local customs, laws and decisions of Courts, and there is reserved from the lands hereby granted a right of way
for ditches or canals constructed by the authority of the United States.

IN TESTIMONY WHEREOF, I, Woodrow Wilson

President of the United

of America, have caused these letters to be made Patent, and the said Seal of the General Land Office
hereunto affixed.
