To Whom It May Concern:

I have done some research in regards to the tile drain, east of the Portneuf Canal. I purchased a 1965 International 10 wheeler in 1967 that I used to haul the gravel to put around the tile. The reason I remember the year was that I got the 10 wheeler stuck, loaded with gravel, and pulled the front axel out from under it.

The tile drain was completed in 1967 and 1968. The open drain on the west side of the Portneuf Canal was done one year later in 1969.

If there are any other questions please call. I can be reached on my cel phone @ 801-557-7740.

Sincerely,

Rondo Perkins

Drain # 1

Drain 1 was dug in april of 1972. It was dug to collect the water that seeps through the canal and comes from a small spring.

This water was making a swamp out of approximately 150 acres. When I first dug the drain in 1972 I had a portable pump just west of the bridge and pumped the water on the higher ground east of the canal through a mainline.

In 1976 we installed a turbine pump in the canal and pumped the water from the south pump.

RE: EVIDENCE OF PRIORITY

Dear Claimant (s):

The Idaho Department of Water Resources has recently begun its water right review in Basin 29. The Notice(s) of Claim identified with the number shown above in the "address" label and at the "end" of this letter has been filed in the Snake River Basin Adjudication (SRBA). The Notice indicates water usage is based on "Beneficial Use". Water rights of this type are established by the historical use of water, dating back to when water was first used for the purpose claimed, at or on the place of use identified on the Notice. The date the water was first put to use, known as the priority date, has not been confirmed by a license, Decree, or Permit. For this reason, proof must be provided supporting the priority date. As the claimant, you are responsible for submitting the necessary proof to support the priority date.

It is important that each element of the Notice be substantiated. For instance, regarding claims for irrigation, the evidence should tend to show that diversion works were in place, that they were capable of diverting the claimed diversion rate, and that the diverted water was beneficially used on the entire claimed place of use on or before the claimed priority date.

For your reference, I have provided a printout of your Notice and the pamphlet entitled "Evidence of Priority". The pamphlet describes the types of evidence required and suggests which documents will fulfill this requirement. While I encourage you to read the entire pamphlet, I direct your attention to the two sections entitled "What Kind of Evidence is Required" and "Some examples of Documents Which May Be Evidence of the Priority Date".

It is our goal to recommend historical water rights within the Snake River Basin as accurately as possible. **Field exams to verify other items of the Notice needs to be conducted by the Department personnel, please call me as soon as possible to set up an appointment.**

.....
The Department cannot recommend the Notice be decreed by the court if no evidence of a priority date is submitted.
.....

Please submit the documentation supporting the priority date by **November 22, 2001, referencing all documents with the corresponding Notice number.** If you have any questions not covered by this letter or the enclosed pamphlet, please feel free to contact me at 547-3993.

I've also enclosed a change of address form that needs to be filled out and returned to the Department so we can update your claim records.

Respectfully,

Cindy E. Bird
