Allen:

We appreciate your time spent with a few of our members on March 4th and explaining the process.

I am attaching copies of the changes in acreages we found and the names of the owners of the acreages, we did this by review and comparison to the 32" map sent by water resources and the table of acreages.

Portneuf Irrigating did file the objections but we wanted to be sure our corrections of how and where reaches your hands for review. Thank you.

Douglas G. Freestone, Sr., having been first duly sworn deposes and states:

1. I have personal knowledge of all facts set forth herein and am competent in all respects to testify thereto except as specifically stated.
2. I reside at 1897 South 2225 East, Malta, ID, 83342.
3. I am 61 years of age.
4. I was general manager of Arimo Ranch, located approximately one mile north of the Village of Arimo, Bannock County, State of Idaho, (the "Ranch") from 1976 until 1989 (the "Period"). I lived on the ranch and was personally responsible for supervising all irrigation and stock watering. During that Period, the Ranch was the largest single shareholder in Portneuf Irrigating Company ("PIC") and received irrigation water from the Portneuf River transported through PIC's diversion and ditch improvements.
5. During that Period, I was also either an officer or director of PIC.
6. Throughout the Period, water was diverted and beneficially applied to the lands of the Ranch and to those of the other members of PIC, for irrigation as early as ice and weather conditions allowed. While the exact date varied from year to year, diversion and application could be

as early as April 1st.

7. Diversion and application for irrigation continued until crop rotation or weather rendered applications no longer beneficial. Again the exact date varied from year to year but irrigation could end as late as October 31st.
8. During and after the irrigation season, water was diverted for stock watering for the Ranch and for the other members of PIC, unless ice prevented water from being diverted or flowing down the ditches. Because of the very flat nature of the ditch system, approximately 10 cfs of water was required to maintain the flow through the ditches to provide water for livestock and to get it to the end of the ditch system. While the bulk of this water returned to the Portneuf River (through its tributary Marsh Creek) at the end of PIC's ditch system, the water could not be delivered without the flow. The diversion for stock water continued until ice closed the system and/or stock water was no longer needed which could be as late as December 31.
9. The area of Idaho where Ranch is located has a long history of ranching by established families and a great oral history. Water is critically important to ranching, and its history is well known and frequently discussed. Based on that oral history, including conversations with people involved in early irrigation and stock watering practices, the irrigation and stock watering diversions and applications I followed and described above, have been continuously

observed and followed by PIC since its ditch was installed in the late
1,800's, and has continued thereafter to the date of this affidavit.

Dated this 20 day of April, 2004.

My name is Randal Z. Morris and I live 1½ miles south of Arimo at 3224 E. Arkansas Rd. We run approximately 300 cow-calf pairs and bring them home to the fields each fall. At times and in certain fields the Portneuf Marsh Valley Canal is the only source of water. We have used it for stock water ever since we moved here in April 1988 and I assume it was also used before then. We use it late into the fall and it takes approximately 5 cfs of water at the diversion to reach my place.

The above statement is true and correct to the best of my knowledge.

Let it be know that I have used stock water from the Arimo Ditch and Portneuf Irrigation late into every fall to water up to 80 cow-calf pairs plus heifers and bulls since 1972. That is when I took over my father's farm. I can't remember a year growing up when my father, T. J. Smith, didn't have cows pasturing the field east of Arimo and below Arimo Ditch late in the fall when the only source of water was the Arimo Ditch. I estimate that it takes five CFS of water released at the diversion point to reach my field in sufficient quantity. As you can see stock water is a vital part of my operation.

RE: Notice of Change of Address for 29-51 & 29-11277 and Notice of
Completed Administrative Proceeding (NCAP)

Dear Claimant:

On January 13, 2004, the Idaho Department of Water Resources (IDWR) received a change of address for the above referenced water right(s). Based on this change, IDWR water right records for the Snake River Basin Adjudication (SRBA) have been updated.

Furthermore, as directed by the SRBA Court, this office mailed a copy of the updated water right record(s) to each party listed on the enclosed NCAP. The intent of this mailing is to ensure each party has a current record of water right(s) as recorded in the SRBA.

Please feel free to contact me if you have any questions concerning this matter.

Respectfully,

Kristen Forsgren

Gentlemen:

We are enclosing with this letter an Amended Notice of Claim to Water Right on behalf of the Portneuf Irrigation Company for claim number A29-11277. The amendment adds 75 acres to the place of use which was omitted from the original because of oversight. Our check in the amount of \$75.00 for the additional filing fee is also enclosed. If we may be of any further assistance or provide any additional information please feel free to call upon us at your convenience.

Very truly yours,

Kent W. Foster
