Dear Jim,

Idaho Power Company studies indicate you may have your choice of three options for pumping on your property near Inkom. For your sake, please contact Idaho Power with your choice of the options prior to purchasing any equipment.

The options are:

1. Up to three 7.5 HP, 240 volt, single phase motors.
2. Up to two 10 HP 240 volt, single phase motors.

*If you choose options 1 or 2, motors must start sequentially.

3. One 20 HP, 480 volt, three phase motor with rotary phase convertor and 70% voltage reduction.

Please take note, all three studies were based on 140 feet #2 triplex service length (conductor length from IPCO's transformer to terminals on customer's pump). If conductor length is longer and/or a different size, please contact Idaho Power before proceeding.

I have enclosed phase convertor information and am looking forward to working with you as your project moves ahead. Please feel free to call on me as needed.

Sincerely,

John G MacKay
