CONDITIONS OF APPROVAL AND REMARKS

1. Right holder shall comply with the drilling permit requirements of Section 42-235, Idaho Code.
2. Use of water under this approval shall comply with applicable water quality standards of the Division of Environmental Quality of the Idaho Department of Health and Welfare.
3. This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 4.5 afa per acre at the field headgate for irrigation of the lands above.
4. The right holder shall accomplish the change authorized by this transfer within one (1) year of the date of this approval.
5. Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.
6. Approval of this transfer does not preclude the opportunity for review of the validity of the water right(s) in the ongoing Snake River Basin Adjudication.
7. Prior to diversion of water under this approval, the right holder shall provide a means of measurement acceptable to the Department from all authorized points of diversion which will allow determination of the total rate of diversion.
8. The total instantaneous diversion of water from all points of diversion under Transfer 5255 shall not exceed 6.09 cfs, nor a total combined annual volume of 1723.8 af.
9. Rights 63-02824 and 63-03054 when combined shall not exceed a total annual maximum diversion volume of 1615.1 af at the field headgate for the irrigation of 358.9 acres.

MEMORANDUM

TO: Files 63-02824 & 63-03054
FROM: Pam Skaggs/State Office *PS*
SUBJECT: Transfer 5255
DATE: September 9, 1998

Transfer 5255 adds a point of diversion, and changes the nature and season of use under a portion of Rights 63-02824 and 63-03054. The applicant is adding a third well to the system and building a dairy on-site.

SRBA field investigation found a maximum of 390 irrigated acres under these rights instead of the licensed 400 acres. The dairy requires a reduction of 31.1 acres to provide water for commercial and stockwater uses, leaving 358.9 remaining irrigated acres. Commercial use includes the dairy barn site and all irrigated quarter-quarters for land application of wastewater from the dairy.

Season of use was adjusted to year round use at the dairy, and diversion volume was identified as current standards. Recommended conditions include drilling permit requirements, water quality, irrigation overlap, multiple points of diversion/measuring devices, combined right limits, land application limits and standard transfer conditions.

MANAGEMENT CRITERIA FOR Sprinkling APPLICATION OF LIQUIDS>>>

Sprinkler Flowrate= 300 GPM
 Wetted Diameter= 250 FEET
 Application Rate= 0.59 INCHES/HOUR
 NITROGEN Concentration in Storage= 512 PPM OR 4.27 LBS/1000 GAL

To apply 6,929,531 gallons of liquids generated from the operation, it will take approximately 385 hours of pumping annually. Based on applying NITROGEN at the agronomic rate, use the application depths, set times and travel rates listed below for each crop:

CROP	Application			Set Time (HOURS)	Travel Rate (FEET/MINUTE)

INSTRUCTIONS

This form has been prepared to assist new owners of property to comply with the requirements of Section 42-1409(7), Idaho Code. This statute provides that new property owners notify the Department of Water Resources (IDWR) of any change in ownership of a water right during an adjudication of water rights, and if a claim for the water right has not been filed to file the needed claim(s).

Separate brochures are available from IDWR describing the adjudication of water rights and the requirement to notify IDWR of changes in ownership. If you would like any of these brochures or if you have questions about completing this form please contact your nearest office of IDWR or you may call 1-800-451-4129 (toll-free).

The first line of the form asks for the date of closing so IDWR will have a record of the effective date of the property transfer.

The second line of information requires the legal description of the property being transferred. This information is **ESSENTIAL** and should be available from the documents that will be present at the time of closing. The first two lines of the legal description **MUST** be completed. IDWR's records are based upon legal descriptions using township, range, section and fractions of a section descriptions, and this information must be included on the form. If you also have available a legal description based upon a townsite or subdivision and lot and block number, please also include this additional information. A lot and block legal description is **NOT** a substitute for the township, range, section and fraction of a section description.

After completing the legal description, if all water is supplied by a public service water supply you may check the first box; complete the name, address and telephone information for yourself, the new owner; sign the form in the space provided and return the form to the IDWR office nearest you.

If there are water rights associated with the property, the seller should be able to provide you with the water right number(s). The water right number(s) for the property are to be put in the space provided at the second box on the form. If you or the seller believe there are water rights for the property but the numbers are unknown, then you may wish to call or come into an office of IDWR for assistance in identifying the water rights for the property involved. If claims for the property have not been filed you will be so advised by IDWR.

After the water right number(s) for the property has been entered on the form, complete the name and address information for **BOTH** the former owner/seller and for yourself, the new owner, in the spaces provided. Please also include your telephone number. If the property you have purchased is only part of the property owned by the former owner/seller, you may be purchasing only part of the total water right held by the seller. This means the water right held by the seller must be split so you get your proportionate share of the water right. Be sure to include a description of the portion of the water right you have purchased. The seller should be able to help you describe the portion of the water right for the property you have purchased.

If the former owner/seller will sign the form and the seller is shown as the claimant of the water right in IDWR's records, then you do not need to attach proof of ownership of the land or the water right. The seller should know if the original claim was filed by him, or if the seller has filed a change in ownership so the seller is shown as the claimant of the water right in IDWR's records. If the seller is not going to sign the form then you must attach some proof of ownership of the property described at the top of the form or proof of ownership referencing the specific water right(s) for the property.

The new owner must sign the form in the space provided. If the former owner/seller is available to sign the form please do so in the space provided.

When complete, the new owner and the former owner/seller should each retain one of the copies and return the original of the form to IDWR. You may return the form to the IDWR office nearest you or to: Idaho Department of Water Resources, Statehouse Mail, Boise, ID 83720-9000, Attention: Adjudication Bureau.

1. Describe the portion of the proposed recommendation with which you disagree (e.g. priority date, period of use, source):

Point of diversion

2. Describe the changes you wish to make in the proposed recommendation:

PD in NESW should be in NWSW. There are two wells in the NWSW. Condition #12 of transfer 5255 is correct. Explanation on recommendation should be removed.

3. Give a brief explanation as to why you disagree with these portions:

The well is actually on the west side of the quarter-quarter line and is in the NWSW.

☐ I AGREE with this proposed recommendation: no changes need to be made.

An aerial photograph of a rural landscape, likely agricultural land, showing a grid of fields. A blue rectangular box highlights a specific area in the center. Within this box, there are three small blue 'x' marks. The image is a high-contrast black and white photograph. At the top left, there is a small circular logo with the number '28' inside. At the top center, there is a small rectangular label with the number '21' inside. A white rectangular label with handwritten text is positioned in the upper center of the image.

Re: A63-02824 & A63-03054

Dear Mr & Mrs DeWinkle:

We are currently conducting field exams in the area of Canyon County where your 400 acre farm is located. I need to complete an exam for the two water right claims referenced above that were filed by the previous owners, James & Shirley Marshall.

The purpose of my field exam is to verify the major components of the rights such as the source of water, type of usage, amount of water used and the legal description of the point of diversion and places of use. It is not mandatory that you accompany me during my field work but it would be helpful to have you or someone assist me that knows the property and water delivery system. Please call me at 208-334-2190 so that we can discuss an appointment date and who can assist me during my exam.

Sincerely,

Mel Schulte

Re: A63-03054 Change of Ownership

Dear Mr & Mrs DeWinkle:

Enclosed is a copy of Notice of Change of Ownership form you filed for right A63-02824 you filed for the 400 acre parcel you purchased from James and Shirley Marshall. When the original form was filed in February 1995, another water right claim number, A63-03054 should have been included on the form. Since both A63-02824 and A63-03054 are appurtenant to the property, we changed the ownership of both claims to your names.

The enclosed copy of Snake River Basin Adjudication claim for A63-03054 is for your records and reflects the name change we made on our records. It is not necessary that you return anything to us at this time. If we need additional information when we complete our review of the two water right claims we will inform you at that time. In the mean time if you have any questions please call me at 208-334-2190.

Cordially,

Dear Wateruser(s):

This office has reviewed the **Notice of Change of Water Right Ownership** form submitted to our office. However, due to the items checked below, we cannot continue to process this ownership change. We are returning the Notice of Change of Ownership to you to COMPLETE OR RESEARCH ONLY THE FOLLOWING ITEM(S) SHOWING A CHECKMARK IN THE BLANK FOR THAT ITEM(S).

_____ There is no existing water right in our records either under the former owner's name or for the legal description given. If, after contacting the former owner, you find more information concerning a water right, please contact us.

_____ Legal description of property. Please complete showing the legal description by 1/41/4 (40-acre tract), section, township and range for the property changing ownership. If you only have a subdivision lot & block legal description, please send us a copy of your subdivision plat map.

_____ It appears you receive your water from an irrigation district, ditch company, municipality or community water company. If this is the case, then the water right remains in the name of this entity and you should contact them concerning the ownership change.

_____ Name and address of former owner (seller). This will clarify the original owner of the water right.

_____ Name, address and phone number of new owner (purchaser).

_____ This change in ownership appears to result in a splitting of the water right. A split of the water right occurs when the ownership change affects only a portion of the original right. In order to accurately split this right we must know what portion of the right was sold. The amount of water in CFS, the place of use by 1/4 1/4 with the number of acres in each 1/41/4 (if applicable) and the point of diversion by 1/41/4, Section, Township and Range is needed. If this right is not being split, please submit proof of ownership for the remaining portion.
Enclosed is a computer copy of this right for your review.

X
_____ Proof of ownership is needed. This proof can be a copy of the warranty deed, sales contract or tax assessment in your name which includes a description of this property by 1/41/4, Section, Township and Range.

Signature of new owner (purchaser) is needed on this form.

X other: There was not a copy of the deed attached
as stated on the Ownership Change form.

Please complete the above item(s), if required, on the Notice of Change of Water Right Ownership form and return it with the requested information to the Department of Water Resources, Western Region Office, 2735 Airport Way, Boise, ID 83705. If we do not hear from you within 30 days, the claim upon which this form was filed(if one exists), will remain in the original owner's name.

Feel free to contact this office if you have any questions concerning this letter.

Sincerely,

CONDITIONS OF APPROVAL AND REMARKS

1. Right holder shall comply with the drilling permit requirements of Section 42-235, Idaho Code.
2. Use of water under this approval shall comply with applicable water quality standards of the Division of Environmental Quality of the Idaho Department of Health and Welfare.
3. This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 4.5 afa per acre at the field headgate for irrigation of the lands above.
4. The right holder shall accomplish the change authorized by this transfer within one (1) year of the date of this approval.
5. Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.
6. Approval of this transfer does not preclude the opportunity for review of the validity of the water right(s) in the ongoing Snake River Basin Adjudication.
7. Prior to diversion of water under this approval, the right holder shall provide a means of measurement acceptable to the Department from all authorized points of diversion which will allow determination of the total rate of diversion.
- ** 8. The total instantaneous diversion of water from all points of diversion under Transfer 5255 shall not exceed 6.09 cfs, nor a total combined annual volume of 1723.8 af.
- * 9. Rights 63-02824 and 63-03054 when combined shall not exceed a total annual maximum diversion volume of 1615.1 af at the field headgate for the irrigation of 358.9 acres.

2. ☐ If present water use is other than irrigation, attach an estimate of the annual volume of water that has been consumptively used. Also, provide justification for the estimate.
3. ☒ Attach copy of design report or system design supporting required water flow rates and volumes for the new use. Describe attachment(s):

4. If water or waste will be discharged from project, describe quantity, quality and location of the discharge:

See Attachment B

5. Describe measures that will be taken to prevent impacts to other water uses and water users:

The annual consumptive use will not be changed. All waste water will be contained pursuant
to State regulations and the system design (Attachment D).
