What is required for evidence of priority for irrigation under this right?

Evidence brochure shows what is expected. They don't want to pursue the irrigation under this right. Stockwater is the primary use of the water from Cottonwood.

They keep horses in the corals year round and the spring waters the horses.

RE: EVIDENCE OF PRIORITY

Dear Claimant (s):

The Idaho Department of Water Resources has recently begun its water right review in Basin 29. The Notice(s) of Claim identified with the number shown above in the "address" label and at the "end" of this letter has been filed in the Snake River Basin Adjudication (SRBA). The Notice indicates water usage is based on "Beneficial Use". Water rights of this type are established by the historical use of water, dating back to when water was first used for the purpose claimed, at or on the place of use identified on the Notice. The date the water was first put to use, known as the priority date, has not been confirmed by a license, Decree, or Permit. For this reason, proof must be provided supporting the priority date. As the claimant, you are responsible for submitting the necessary proof to support the priority date.

It is important that each element of the Notice be substantiated. For instance, regarding claims for irrigation, the evidence should tend to show that diversion works were in place, that they were capable of diverting the claimed diversion rate, and that the diverted water was beneficially used on the entire claimed place of use on or before the claimed priority date.

For your reference, I have enclosed the pamphlet entitled "Evidence of Priority". The pamphlet describes the types of evidence required and suggests which documents will fulfill this requirement. While I encourage you to read the entire pamphlet, I direct your attention to the two sections entitled "What Kind of Evidence is Required" and "Some examples of Documents Which May Be Evidence of the Priority Date".

It is our goal to recommend historical water rights within the Snake River Basin as accurately as possible. **Field exams to verify other items of the Notice need to be conducted by the Department personnel.**

.....
The Department cannot recommend the court decree the Notice if no evidence of a priority date is submitted.
.....

Please submit the documentation supporting the priority date by September 9, 2002, referencing all documents with the corresponding Notice number. If you have any questions not covered by this letter or the enclosed pamphlet, please feel free to contact me at 547-3993.

Respectfully,

Cindy E. Bird

Photo 1. Diversion point from Marsh Creek.

Photo 3. Diversion from Cottonwood Creek.

Sarah Davis claims. Bill and Nancy Fields accompanied me during the field exam for Sarah Davis. Sarah is Bill's son's mother-in-law. Bill is operating an organic fertilizer business from the property. Bill and his ex-wife Constance Muetting previously owned the property.

Photo 1 was taken looking east at the point of diversion on Marsh Creek. The pump has been pulled and a new pump has been ordered. Bill has been using a 7.5 hp portable gas pump but the pump was not there during the exam. The pump pulls the water out of Marsh Creek into a 5" pipe then flows into a 12" pinstock to the riser.

I explained to Bill that a period of 5 consecutive years of nonuse they could get into an abandonment/forfeit issue on the water rights.

Photo 2 was taken looking west at the place of use. The place of use includes the fence in the foreground of the white house in the left side of the photo. The vertical lift is 45 feet.

The GPS file name for the POD on Marsh Creek is SDAVIS, N42 degrees, 37.311 minutes, W112 degrees, 14.328 minutes.

Photo 3 was taken looking south at the point of diversion off Cottonwood Creek. Photo 3 shows the air vent for the 6 inch buried pipe from Cottonwood Creek. The diversion file name is COTDAV, N42 degrees, 37.352 minutes, W112 degrees, 14.715 minutes.
