Please print or type. Attach pages with additional information. Instructions are included at the end of this form.
 Incomplete forms will be returned.

1. Please list the water right number(s) and/or adjudication claim number(s) (if any) for each water right to be changed. List just the adjudication claim number if there is no corresponding water right record on file with the department. Indicate, by checking in the space provided (under the "split" heading), if the change in ownership is limited to a portion of a water right in which case division of the existing water right or adjudication claim record will be required.

2. The following **REQUIRED** information must be submitted with this form:

- A. The appropriate **FILING FEE**. See instructions for fee amounts.
- B. A copy of the most recent **DEED, TITLE POLICY, CONTRACT OF SALE** or other legal document indicating your ownership of the property and water right(s) or claim(s) in question, **WITH ATTACHED LEGAL DESCRIPTION**.
- C. Either of the following (if necessary to clarify division of water rights or other complex property descriptions):
PLAT OF PROPERTY or **SURVEY MAP** clearly showing the location of the point(s) of diversion and place of use of your water right(s) and/or adjudication claim(s) (these are usually attached to your deed or on file with the county).

OR

If your water right(s) and/or adjudication claim(s) is for ten or more acres of irrigation, you must submit a USDA Farm Service Agency **AERIAL PHOTO** with the irrigated acres outlined and point(s) of diversion clearly marked. The **AERIAL PHOTO** should be submitted in place of the **PLAT OF PROPERTY** or **SURVEY MAP**.

6. If the change in ownership affects the entire water right for each water right or adjudication claim number listed in item 1, THEN SKIP THIS ITEM AND GO TO ITEM 7. If the change in ownership divides the water right(s) among multiple owners, you must describe, in detail, your portion of each water right after the change. Fill in the appropriate spaces in the box(es) below to describe your water right(s) after the change (one water right per box, you may copy this page as necessary). If your quantity of water is greater than a proportionate split, you must attach documentation to show justification for a larger amount. If you are not sure how to identify your portion of the original water right or adjudication claim records, please contact the nearest IDWR office for assistance.

INSTRUCTIONS

This form has been prepared to assist new owners of property to comply with the requirements of Section 42-1409(7), Idaho Code. This statute provides that new property owners notify the Department of Water Resources (IDWR) of any change in ownership of a water right during an adjudication of water rights, and if a claim for the water right has not been filed to file the needed claim(s).

Separate brochures are available from IDWR describing the adjudication of water rights and the requirement to notify IDWR of changes in ownership. If you would like any of these brochures or if you have questions about completing this form please contact your nearest office of IDWR or you may call 1-800-451-4129 (toll-free).

The first line of the form asks for the date of closing so IDWR will have a record of the effective date of the property transfer.

The second line of information requires the legal description of the property being transferred. This information is **ESSENTIAL** and should be available from the documents that will be present at the time of closing. The first two lines of the legal description **MUST** be completed. IDWR's records are based upon legal descriptions using township, range, section and fractions of a section descriptions; and this information must be included on the form. If you also have available a legal description based upon a townsite or subdivision and lot and block number, please also include this additional information. A lot and block legal description is **NOT** a substitute for the township, range, section and fraction of a section description.

After completing the legal description, if all water is supplied by a public service water supply you may check the first box; complete the name, address and telephone information for yourself, the new owner; sign the form in the space provided and return the form to the IDWR office nearest you.

If there are water rights associated with the property, the seller should be able to provide you with the water right number(s). The water right number(s) for the property are to be put in the space provided at the second box on the form. If you or the seller believe there are water rights for the property but the numbers are unknown, then you may wish to call or come into an office of IDWR for assistance in identifying the water rights for the property involved. If claims for the property have not been filed you will be so advised by IDWR.

After the water right number(s) for the property has been entered on the form, complete the name and address information for **BOTH** the former owner/seller and for yourself, the new owner, in the spaces provided. Please also include your telephone number. If the property you have purchased is only part of the property owned by the former owner/seller, you may be purchasing only part of the total water right held by the seller. This means the water right held by the seller must be split so you get your proportionate share of the water right. Be sure to include a description of the portion of the water right you have purchased. The seller should be able to help you describe the portion of the water right for the property you have purchased.

If the former owner/seller will sign the form and the seller is shown as the claimant of the water right in IDWR's records, then you do not need to attach proof of ownership of the land or the water right. The seller should know if the original claim was filed by him, or if the seller has filed a change in ownership so the seller is shown as the claimant of the water right in IDWR's records. If the seller is not going to sign the form then you must attach some proof of ownership of the property described at the top of the form or proof of ownership referencing the specific water right(s) for the property.

The new owner must sign the form in the space provided. If the former owner/seller is available to sign the form please do so in the space provided.

When complete, the new owner and the former owner/seller should each retain one of the copies and return the original of the form to IDWR. You may return the form to the IDWR office nearest you or to: Idaho Department of Water Resources, Statehouse Mail, Boise, ID 83720-9000, Attention: Adjudication Bureau.

Re: Water Right No. 63-4462

Dear Mr. Thomson:

This letter is in response to your dated February 12, 2009, regarding the priority date of the right referenced above. I see from the SRBA webpage at www.srba.idaho.gov that the partial decree for this right was issued February 6, 2009. I assume you received a copy in the mail which prompted your letter to IDWR.

I remember that there was quite a bit of confusion on both the part of IDWR and you during the Snake River Basin Adjudication (SRBA) process. There are several water uses associated with your property and the other property from which yours was divided. Your letter indicates that the IDWR arbitrarily changed the priority date from 12/31/1930 to correspond with permit 63-6051A. That is not true and I hope this letter clarifies what happened. Please keep this letter in your water right files.

First, there is no permit 63-6051B. I am sure you meant 63-3051B, your portion of the licensed right 63-3051, which was for commercial use for the Liberty Grange. Again, here is where there was confusion because in 1955, William Robertson went through the application/ permit/ license process with IDWR and obtained a license for this commercial use for the grange building. This process fixed the priority date for the grange water use at 1955. A water right is defined by its elements and this right number, 63-3051, is defined in part by its commercial use and the priority date of when MR Robertson filed the application. There were statements that the well was drilled before that and used for the grange but no evidence of this was found or provided by claimants.

The right that is the subject of your recent letter to IDWR, 63-4462, was first claimed by Shirley and Norman Reich in 1977. At that time, the claim stated that this well was drilled in 1955 (as a replacement because of the highway construction) and used for domestic and irrigation of 1 acre. The 1930 date was first introduced by Mr. Reich when he filed the SRBA claim. No information was provided to prove this date.

March 16, 2009
Craig Thomson re 63-4462
Page 2

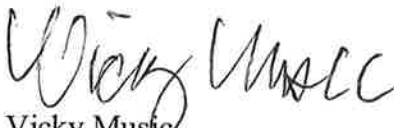

You and I spoke about this in 2006 during what we refer to as the SRBA "Notice of Error" process. We had at least one lengthy conversation during that time period. I have included a copy of your Notice of Error (NOA) form. I noted on it that we spoke on October 30, 2006. On the NOA form, you state that the priority date should be 12/12/1939. No documentation as provided to substantiate this as required by IDWR. I conveyed to you in 2006 that you would have to file an objection to our recommendation to the SRBA Court, and provide IDWR with some verification regarding the earlier priority date before it could be changed. At that time, I explained that even a statement or letter from you regarding your knowledge of the earlier date would be helpful.

You did not file an objection and IDWR cannot change the SRBA Court decreed date. You can ask the court to set aside the partial decree, but to reiterate our earlier conversation, IDWR must have some written evidence in order to change the priority date.

There are a couple more items I will clarify. The fact that you use the water for a heat pump is not included on a partial decree. That information is in the IDWR database.

Last, your NOA form and other correspondence from you in the file states that you did not get "paper" regarding 63-10732. Due to its 1988 priority date, 63-10732 was not required to be claimed in the SRBA, was not claimed in the SRBA, and so you did not receive SRBA paperwork regarding this right.

Sincerely,

Vicky Music
Sr. Water Resource Agent

Dear Sirs:

Water Right 63-04462

Years ago I pointed out that the priority date for this well is not correct. It should be 12/31/1930. All of the documentation I have for this well has this priority date. Someone in your office elected to change this date to agree with another permit A63-06051B. This is a different well that is in a different location. Domestic use should also include use for a water to air heat pump. Kindly make these corrections.

Very Truly Yours

Craig Thomson

Notice of Claim to a Water Right No. 63-3051B, 63-4462

Dear Claimant(s):

Enclosed is a copy of the above referenced claim(s), which reflect the change in ownership of the land and appurtenant water rights, covered under the original filing.

Please note that the enclosed Notice of Claim to a Water Right is not a final determination of your water right. This claim was filed during claims taking in the Snake River Basin Adjudication (SRBA) and has not yet been verified by this Department. Water rights are established and maintained by beneficial use of water for the uses designated on this claim form dating back to the priority date listed. This claim will be investigated, verified and recommended to the SRBA Court for court decree sometime in the near future. You will be notified prior to the beginning of any verification of this water right.

Thank you for your patience and cooperation, as we have had several water right changes to process. If you have any questions concerning the enclosed information, please feel free to contact this office.

Sincerely,

A handwritten signature in black ink, appearing to read 'L. Gagnon', is written over a horizontal line.

MEMORANDUM TO CLAIM FILE

TO: CLAIM FILE NOS. 63-3051B AND 63-4462
FROM: VICKY L MUSIC, SR WATER RESOURCE AGENT, IDWR / WESTERN REGION
SUBJECT: CLAIMS REVIEW
DATE: 9/29/2006
CC:

These claims were included in the B63Pt2 preliminary DR but not in the DR because of the NOE response from current owner, Craig Thomson. There is a lot of confusion because the sources are old artesian wells, are owned by multiple owners, have been licensed twice in some cases or may not have a recorded water right in another case [if there is a 4th artesian well as field examiner Darwin thought]. Additionally, 1 or 2 were in the highway right-of-way and it is unknown if one or both were replaced.

in 63-3051B file
A 1939 aerial is attached that shows the old Liberty schoolhouse and the farm.

63-4462

This SRBA claim is based on a statutory claim filed in 1977 by the Reiches for 1 acre irrigation of and domestic use from a 6" dia. well with a 1955 priority date. It was in approx 1955 that Hwy 16 was widened and the Highway department had to remove either 1 or 2 artesian wells in their right-of-way.

License 63-2546 is for 38 acres of irrigation & domestic from an artesian well 3" dia., 175' deep with a valve control and house connections. Priority date is 12/12/1939. The license file map shows the well located SE of the corner of the farm house. There is a note dated 12-19-1962 on the map that states "this well in Highway R/w when R/w widened. Probable [sic] Highway Dept. drilled 6" well at rear of house yard as replacement." If so, this is one of the wells claimed here is 63-4462. However, it could be that the 3" well found on site is the well licensed under 63-2546. We really do not know which wells were replaced and which were not.

2546
~~63-2246~~ was recommended to Mike Moyle. The NOE sent in by Moyle states the well is also used for domestic purposes for 1 home. It is for a 3" well located on the Thomson property by the house.

The SRBA claim lists 2 artesian wells as sources, a 3" well and a 6" well. The prior owner Reich, who filed the statutory claim, filed the SRBA claim with a 1955 priority date. The present owner, Craig Thomson, filed it with a 1930 priority date for which we have no information.

I will recommend the 6" well as this right with a 1955 priority date and or the 1 acre of irrigation. This well is ALSO licensed under 63-10732, with priority date of 1988 for 9 acres irrigation. I will assume this is a unique acre because the entire Thomson lot is 13.6 acres and between the 3 rights, he will have irrigation of 11 acres.

63-3051

This is a license for domestic and stockwater from a well located in the extreme SE of the parcel right next to Hwy 16. This is the grange well. The grange has 63-3051A which was not claimed and the Thomsons claimed 63-3051B for stockwater only. Will recommend for 1 acre irrigation and stockwater for 35 head cattle with combined quantity with 63-10732 of .21 cf and 44.5 afa. The acre is not covered under 63-10732 so I just added .02 cfs for irrigation and nothing for stockwater in the combined limits remark.

63-10732

This is a license with a 1988 priority date issued to the Thomsons who were assigned the permit from the Reiches. PODs are 3 wells, a 3" diameter that the b/u filed exam states is the grange well and a 6" dia. well located by the farmhouse. It was not claimed in the SRBA because the application was made after the commencement of the adjudication.

Wells are artesian

Comment about combined wells is not correct. Permit 63-03051B is located on the south side of the property. The combined well on the permit is in front of the house. This well might be 63-10732. Did not get a notice of error for this well.

No mention about water to air heat pump

Points of diversion don't look right. Upper dot should be to the left or west of the lower dot.

Use is stock water

Point of Diversion is further south than indicated

No paperwork for license 63-10732

Appears to be the well that for some reason was combined with 63-4462. These two wells are not connected in way other than they are uses are similar. I had trouble explaining this in 1992. I sent pictures of each well to explain the problem. I don't think it was ever resolved.

An inspector tagged the main well 63-4462 A0002431. He didn't know anything about the other two wells.

ACTION OF THE DEPARTMENT OF WATER RESOURCES

I, R. Keith Higginson, of the Department of Water Resources hereby approve the above Application for Amendment for Permit No. 63-10732 with the following;

CONDITIONS/REMARKS:

1. The maximum diversion volume is defined as the maximum allowable volume of water that may be diverted annually from the source under this right. The use of water confirmed by this right limited to the amount that can actually be beneficially use used. The maximum diversion volume may be adjusted to more accurately describe the beneficial use or to implement accepted standards of diversion and use efficiency.
2. This water right is appurtenant to the described place of use.
3. This right is subject to all prior water rights and may be forfeited by five years of non-use.
4. Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.
5. This right when combined with all other rights shall provide no more than .02 cfs per acre nor more than 4.5 afa per acre for the lands above.
6. Two points of diversion are located within NWSE, S09, T04N, R01W. Stockwater use is for 35 range cattle.

Comment: CHANGE IN OWNERSHIP COMPLETED ON 12/18/92. CHANGE OF OWNERSHIP SUBMITTED WITH WARRANTY DEED. "CONTRACTOR TO CONTINUE REVIEW"

2. csaxton 11/26/2003 Priority Date

Comment: 63-04462 appears to be claiming domestic and Irrigation use from the well originally licensed under License 63-02546. Notes in the field examiners report the well was located in the Highway Department right of way. According to Darwin Vander Stelts filed exam, this well was covered when the highway was expanded in 1955 and a new well was drilled. License 63-02546 was not claimed in the SRBA so this seems to fit. Recommend the priority date for 63-04462 with same priority date as 63-02546 which is 12/12/1939.

3. csaxton 11/26/2003 Diversion Rate

Comment: Diversion Rate recommended at 1.5 inches per acre or 0.03 cfs for one acre.

4. csaxton 11/26/2003 POD

Comment: Only one POD listed on claim but comments speak of two PODs. Darwin Vander Stelt conducted a field exam on 11/15/03 and found two different points of diversion. This matches comments on claim. Recommend both points of diversion. Three inch well is also used for right 63-03051B.

5. csaxton 11/26/2003 POU

Comment: POU for irrigation overlaps with right 63-03051B.

6. csaxton 11/26/2003 Domestic

Comment: Domestic for one home.

CONDITIONS/REMARKS:

1. The maximum diversion volume is defined as the maximum allowable volume of water that may be diverted annually from the source under this right. The use of water confirmed by this right limited to the amount that can actually be beneficially use used. The maximum diversion volume may be adjusted to more accurately describe the beneficial use or to implement accepted standards of diversion and use efficiency.
2. This water right is appurtenant to the described place of use.
3. This right is subject to all prior water rights and may be forfeited by five years of non-use.
4. Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.

RE: AMENDMENT OF PERMIT

DATE: 2-OCT-1992

=====

I have spoken to Mr. Thomson several times regarding this permit and licensing amendment. He is unfamiliar with water rights and wants to complete this right in the correct manner.

I told Mr. Thomson that it was his decision rather or not to sign the amendment. I offered to return the amendment and \$20.00 filing fee if he felt it was in error. He agreed that the stocktank (bathtub) noted on the exam and pictures is being used as described. He asked me to proceed with the amendment and licensing.

Dear Mr. Spackman:

I have spent a lot of time discussing an amendment to Water Right 63-10732 with your staff and the Regional Office. Ron Howerton suggested that I write to you and explain the problem and protest the results of the field inspection.

I purchased the property associated with the Water Right about four months ago from Norm Reich. He is adamant that the amendment is not correct. Norm spent a lot of time with Ron explaining the problem and left thinking the matter was resolved. Norm contends that the original system has not been changed. Norm says and I agree there are not two well associated with the permit.

I discussed the results of the meeting with Pam Skaggs to determine if the Region contacted her to resolve the issue. The Region hadn't and she expected someone would in the future. Later I received correspondence from Pam indicating I need to act on the amendment in 15 days.

I contacted Ron again. He did indicate that his records did not include some information about the permit. There was nothing in the records indicating there are two wells. Ron did not clearly recall discussing the matter with Norm and suggested paying the fee under protest.

It seems like the Department's objective should be to have accurate information. Frankly I don't know what is right. The most convincing document you could provide is a copy of the field inspection acknowledged by Norm. In any event I want you to acknowledge in writing that I have protested the amendment fee so that at some future date I will not have to pay another amendment fee to correct your records.

Very Truly Yours,

This is sort of a mess! There are actually 4 artesian wells we are dealing with here (I think). There is one to the south which is used by the Grange (signed over to them in 1955) which constitutes 63-03051. There is a well which was obliterated by the new hwy 16 in 1955, and which was replaced by the well currently used by Craig Thomas, and which is pictured, and which is one of the POD's for 63-04462 (I think). Finally there is an old and mostly defunct artesian well in the Thomas's front yard which does about 5 gals a minute, and is used to run one little sprinkler to water the lawn. Mr Thomas thinks it is assigned to a neighbor, but there is no way to get the water to the neighbor and the flow is inadequate to bother with. It looks to me like it is the POD listed on 63-03051B, and the other POD listed on 63-04462. To muddy it up more, there is a license for 9 additional acres and more stockwater which use the same two wells. (63-10732)

NARRATIVE/REMARKS/COMMENTS

There are three water rights. 63-4462 includes both wells and is the oldest claim, for domestic use and irrigation of one acre. 63-03051B is next in priority and lists only the 3" well but the owner says that is not connected to the house and has very low flow. Claim 63-04462 says that the 3" well is 200" deep, and 63-03051B says the POD is 200' deep so I assumed it is the 3" well. To further complicate matters, 63-10732 uses the the same POD for stockwater and irrigation for 9 acres. The flow going into the box appears to be adequate to cover all three rights.

AFTER EXAM THE FILE SHOULD CONTAIN:

- ☒ Completed claim checklist
- ☒ Photographs of POD's and POU
- ☒ GPS readings
