IDWR does not recommend diversion volumes for surface rights,
Evaporation from raceways is minimal,

Remarks:

IDWR is recommending 6.5 acres imigation as claimed despite Transfer No 1051 which indicates imigation of 5 acres at this site in 1965. The expansion is allowable under the provisions of Idaho code 42-1416 [1], NAP Photography and ASCS Photographs show that the use was occurring prior to the commencement of the SRBA in 1987, Gary Baker at the hatchery indicated that renovation of the hatchery occurred in 1983 and the increase in imigated acreage probably occurred at that time.

See memorandum document dated Nov. 30, 1993, "Insuing Analysis of Imigation Expansion"

RE: Injury Analysis of Irrigation Expansion

According to the instructions on page 108 of the Claim Investigation Handbook, a first presumption expansion must meet the following two requirements to avoid injury.

1. There can be no increase in diversion rate or diversion volume.

In this case, the right is a surface water right which contains no diversion volume limitation. Therefore, only a possible increase in diversion rate must be considered.

Transfer #1051 indicated that three inches, or 0.06 cfs, per acre would be used for the irrigation of five acres. Thus, the approved total diversion rate for irrigation was 15 inches or 0.30 cfs. The current irrigation use was measured at 0.12 cfs total on 6.5 acres. Although there has been an increase the number of irrigated acres, there has actually been a decrease, not an increase, in the diversion rate for irrigation.

2. There can be no change in the location of return flows that affects a junior appropriator.

In the past, return flows from irrigation probably entered the Snake River at SESE, S36, T7S, R30E. Because irrigation is now accomplished with sprinklers at a much lower diversion rate, return flows are likely to be negligible. However, the water that may have been return flow in the past now circulates through the fish hatchery operation and enters the Snake River at the same location as it would have prior to the conversion to sprinkler irrigation.

*Transfer stated approximately 5 acres.
This right will not be identified as an
enlargement under 42-1426.*

RE: Snake River Basin Adjudication (SRBA)
Power County - A35-00053 and A35-02916

Department of Water Resources
Eastern District Office

Dear Ms. Robertson:

Our field investigation of the SRBA water right claims listed above indicates that a water use for 6.5 acres of lawn irrigation exists at the American Falls Fish Hatchery. This use has not, however, been claimed in the SRBA. Without a claim for the irrigation use, IDWR cannot recommend it to the SRBA court for decree.

Our investigation also shows that transfer #1051 of right 35-00053 in 1965 approved five acres of irrigation at the hatchery site. Because 35-00053 is a previously decreed right, IDWR can probably recommend the 6.5 acres of irrigation as part of this right under the provisions of Idaho Code §42-1416(1).

I have prepared and enclosed a draft amended notice of claim to include the 6.5 acres of irrigation on A35-00053. If you wish to amend your claim, please change any incorrect information, sign the claim, have it notarized, and return it to this office by **November 23, 1993**. In addition, please enclose the \$7.00 additional claim fee required for the irrigated acres.

If you have any questions, please contact me at (208)327-7934 or Erik Norquest at (208)327-7935.

Sincerely,

Shelley Walter Keen
Senior Water Resource Agent

RE: Field examination of a water right claimed in the Snake
River Basin Adjudication (SRBA)

Dear Claimant:

The field staff of this department plans to conduct field examinations of water right claims in your area the week of September 27, 1993. The identification numbers of your SRBA claims which require field verification are shown below. The field examination is necessary to verify your water use.

We will attempt to contact you by telephone to schedule a time for the field examination. If you, or someone with knowledge of your water system, could be available at the time of the field examination, your cooperation and assistance would be appreciated. If you have any questions regarding the field examination, please contact us at 1-800-451-4129.

Sincerely,

A handwritten signature in cursive script that reads "Shelley Walter Keen".

Fish Propagation
EVALUATION

Hatchery LICOUSES - 19.1 CFS TOTAL

$$20 \text{ Raceways } 8' \text{W} \times 110' \text{L} \times 3' \text{ water depth} \\ = 52,800 \text{ CF} / 43,560 = 1.21 \text{ AF}$$

$$19.1 \text{ CFS} / 20 \text{ Raceways} = .955 \text{ CFS/Raceway}$$

$$52,800 \text{ CF} / 20 \text{ Raceways} = 2640 \text{ CF/Raceway}$$

$$\frac{52,800 \text{ CF}}{19.1 \text{ CFS}} = \frac{2764 \text{ Sec}}{3600 \text{ Sec/hr}} = .768 \text{ hrs/Change of Water} \\ = 1.3 \text{ Changes/hour}$$

* normal water changes vary from one change per hour to three changes per hour.

* normal range for lbs. of Trout per cubic foot is 1.5 to 2.0 LBS/CF

$$1.5 \text{ LB/CF} \times 52,800 \text{ CF} = 79,200 \text{ LBS} = 3960 \text{ LB/Raceway}$$

$$2.0 \text{ LB/CF} \times 52,800 \text{ CF} = 105,600 \text{ LBS} = 5280 \text{ LB/Raceway}$$

Facility Volume

5/14/37 Field Exam

CONCRETE FISH PONDS

$$(A) 27' \times 150' \times 3' = 12,150 \text{ CF ea} = 48,600 \text{ CF Total}$$

$$(B) 27' \times 75' \times 3' = 6,075 \text{ CF ea} = 36,450 \text{ CF Total}$$

$$\frac{85,050}{43,560} = 1.952 \text{ AF}$$

35-00035

REPORT OF ENGINEER

35-02916

Permit No. 17608

This proof is for Completion of Works & Beneficial Use

In Water District No.

1. Name of applicant..... Fish & Game Department, State of Idaho

2. Source of water supply:..... Springs

3. Location of point of diversion: Is in the..... NW $\frac{1}{4}$ SW $\frac{1}{4}$,..... of Section..... 31

T. 7 S. R. 31 E. County of..... Power

4. Describe works as they exist, giving dimensions and capacities of same: Springs are con-

lined by concrete faced dam 300 ft long $\times$ 15 ft high. Flume
via ten concrete fish ponds (4-27' $\times$ 150' $\times$ 3') $\times$ (6-27' $\times$ 75' $\times$ 3'), Pipes
(8" $\times$ 10" diam.) $\frac{3}{4}$ sprinklers to points of return or use respect-
ively; Hatchery house 30' $\times$ 60' with 40 hatching trough
capacity

5. Water is used for:..... Irrigation and fish cultural purposes

6. State whether or not water has been turned into works of diversion: *yes*

7. List legal subdivisions of lands to be irrigated. If proof is for beneficial use, give exact number of acres
under cultivation in each forty-acre tract. (Describe manner and place of use if for other than irriga-
tion):..... NW $\frac{1}{4}$ SW $\frac{1}{4}$, Sec. 31, T. 7 S., R. 31 E., B. M.

(Submit map on attached plat, showing location and details of above description.)

8. What large stream would the water here appropriated finally reach? *Snake River*Remarks: *Irrigation for about 12 acres is provided**by pressure pipes, sprinklers, etc.***FILED**

WATER RIGHT CLAIMS FOR FISH PROPAGATION
Suggested Guidelines for Field Review

In order to complete a review of SRBA claims for fish propagation, the reviewing agent should prepare a system diagram and attempt to answer the following questions.

1. What is the inflow diversion rate? If this cannot be determined, then can the outflow diversion rate be measured? (Consumptive use is considered "de minimus", so outflow should approximate inflow minus any seepage loss.)

2. If there are ponds, can the seepage losses be quantified? Are the ponds lined at all? (Concrete raceways will have little or no seepage loss.) *Ponds are settling ponds*

3. What is the facility volume? (The facility volume is the volume of water held in ponds and raceways. Measure the depth of the water in the raceway, not the depth of the raceway itself.)

Scale diagrams Race 8' x 110' x 3' (x20) 52,800 AF = 1,21 AF

Raceway D06

4. What type of fish is being raised? What is the maximum number of fish of each size, or the maximum number of pounds of fish, being raised at the facility at any one time?

*All trout ① 150,000 lbs of 9"+ rainbow trout $\approx$ 300,000 fish
② and 30,000 lbs of fingerling trout $\approx$ 300,000 to 1 million fish*

5. Does the operator keep flow records? Can we see them? Which months usually have the highest flows? Which years had the highest flows?

Outflow records. 21.12 CFS max 2/93

6. Has the facility been expanded, i.e. new raceways or ponds added? If so, when? (Portray the changes on the system diagram.)

Not been increased in size, but has been renovated.

Raceways used to be scattered, but now they are concentrated for efficiency. Same amount of water + same # of fish. (Renovation 1983.)

Please contact Marci Sterling at 327-5450 for more information regarding the analysis of claims for fish propagation.

* Flows are expressed in cubic feet per second.

These values represent the amount of water available for rearing plus the flows from several small springs and seeps that come in below the raceways. The flows from these seeps and springs may total anywhere from two to four c.f.s. at different times.

REPORT OF ENGINEER

Permit No. 17608

This proof is for Completion of Works & Beneficial Use

In Water District No.

1. Name of applicant Fish & Game Department, State of Idaho

2. Source of water supply: Springs

3. Location of point of diversion: Is in the NW $\frac{1}{4}$ SW $\frac{1}{4}$ of Section 31

T. 7 S. R. 31 E. County of Power

4. Describe works as they exist, giving dimensions and capacities of same: Springs are con-

fined by concrete faced dam 300 ft long x 15 ft high. Flow
via ten concrete fish ponds (4-27' x 150' x 3') x (6-27' x 75' x 3'), Pipes
(8" x 10" diam) & sprinklers to points of return or use respect-
ively; Hatchery house 30' x 60' with 40 hatching trough
capacity

5. Water is used for: Irrigation and fish cultural purposes

6. State whether or not water has been turned into works of diversion: yes

7. List legal subdivisions of lands to be irrigated. If proof is for beneficial use, give exact number of acres under cultivation in each forty-acre tract. (Describe manner and place of use if for other than irrigation): NW $\frac{1}{4}$ SW $\frac{1}{4}$, Sec. 31, T. 7 S., R. 31 E., B. M.

(Submit map on attached plat, showing location and details of above description.)

8. What large stream would the water here appropriated finally reach? Snake River

Remarks: Irrigation for about 12 acres is provided
by pressure pipes, sprinklers, etc.

ORDER GRANTING TRANSFER

NO. 1051 (35-00053)

For a Transfer of Water Right,
in the County of Power, State
of Idaho)

WHEREAS, On the 30th day of March, 1965, at the Department of Reclamation of the State of Idaho at Boise, Idaho, this matter of the application of the Idaho Fish and Game Department, through Robert L. Salter, Assistant Director, 518 Front Street, Boise, Idaho, for a transfer of water right came on regularly for hearing, pursuant to the published notice in due and statutory form, and,

WHEREAS, No protest has been filed against the application, and the evidence filed by the applicant with the application shows that the water will be put to a higher and more efficient beneficial use and no one will be injured thereby;

NOW, THEREFORE, IT IS ORDERED, That the said application be, and the same is, HEREBY GRANTED, and that a Certificate of Transfer be issued to the applicant herein as provided by the laws of the State of Idaho.

IN WITNESS WHEREOF, I have hereunto set my hand and caused the official seal of the Department of Reclamation of the State of Idaho to be hereunto affixed at Boise, Idaho, this 24th day of June, 1965.

Department of Reclamation
Form 20

RECEIVED
MAR 8 1965

Application For Transfer of Water Right Reclamation

STATE OF IDAHO

County of Ada

Robert L. Salter, Asst. Director of the Idaho Fish and Game Department, acting for and on behalf of said Department, being first duly sworn, deposes and says:

That his name is Robert L. Salter; that he is of lawful age, a citizen of the United States and of the State of Idaho, and that his postoffice address is Idaho Fish and Game Department, 518 Front Street, Boise, Idaho.

That he is the owner and using a certain water right, bearing date of priority of March 27, 1925, for five cubic feet per second of the waters of Rueger Springs, County of Power, State of Idaho, decreed to United States of America, for use by the City of American Falls by decree of Judge Charles C. Cavanah of the Eastern Judicial District of the State of Idaho, in and for the county of Power, in the case of United States of America, Plaintiff vs. Charles C. Rueger, et al., D., said decree bearing date of April 12, 1927 (or obtained by virtue of License No. issued by the State Department of Reclamation of the State of Idaho, dated 19, bearing date of 19) for the purpose of domestic use and irrigating the following described lands situate, lying and being in Water District No. in the County of Power and State of Idaho, to-wit: Domestic water for the City of American Falls

and is the person (or representative of the corporation) to whom such right so issued, or has become the owner thereof in the following manner, i.e. by purchase from the City of American Falls, Idaho as per abstract of title of said water right hereto attached and made a part of this statement: Photo of Deed That said waters are now diverted from said Rueger Spring in the Pennsylvania Bar Placer Claim, an Idaho Survey #1407, of Section 31, Township 7 South, Range 31 East, B. M., and conducted to the above described lands through a pipeline as per map herewith and of this affidavit made a part. (No map available)

CHANGE IN PLACE OF USE

That affiant and petitioner desires to abandon the use of five cubic feet per second of said water upon the above described land, and to convey and use same upon the following tract, situate, lying and being in the County of Power and State of Idaho, to-wit: Pennsylvania Bar Placer Mining Claim Survey #1407 located in Sec. 31, T. 7 S., R. 31 E. B. M. and those lands of said Survey #1407 lying east of a line connecting survey monuments #4 & #16 of said Survey #1407, Sec. 36, T. 7 S., R. 30 E. B. M., Idaho.

That reasons for desiring to make such transfer are as follows: To use the waters on lands held by the State for the use and benefit of the Idaho Fish and Game Department for fish-cultural purposes, domestic use and irrigation of the lands of Survey #1407 above designated, being the State's American Falls fish hatchery complex.

PROFILED

AUG 04 2005

That he intends to divert and convey said five second feet of water to the tract of land last above described in the following manner and as per map accompanying this application: gravity flow from Rueger Spring via pipeline and by pumping from the spring reservoir.

Note—If this water right has heretofore been carried jointly in a ditch with other water, affiant should secure written consent of other owners or users to removal from its original carrier and file such consent with this affidavit.

CHANGE IN POINT OF DIVERSION

That affiant desires to change the point of diversion of said waters from the point above described to a point located in 1/4 of 1/4 of Section , Township , Range , and thereafter conduct same to the above described land through the ditch, as per map appended.

That his reasons for desiring to make such change are as follows:

No change in point of diversion is needed.

Petitioner asserts that no one will be injured by such transfer, or change in point of diversion, and that the change will be made at petitioner's own risk.

WHEREFORE, Affiant and Petitioner prays that the State Reclamation Engineer of the State of Idaho issue to him the proper certificate authorizing such change in point of diversion and/or place of use, in accordance with the provisions of Sections 42-108 and 42-222 of the Idaho Code.

STATE OF IDAHO, Fish and Game Department

By Robert L. Salter
Robert L. Salter, Asst. Director Applicant.

Subscribed and sworn to before me this 5th day of March, 1965.

Anne Epicki
Notary Public.

APPLICANT WILL ANSWER THE FOLLOWING QUESTIONS:

From what stream is the water diverted? Rueger Springs

Where is the diversion point located? Approximately S. 75° E. 1350 feet distance from the west quarter corner of Sec. 31, T. 7 S., R. 31 E.B.M., Idaho.

Through what ditch is it now conducted? Private pipeline owned by the State of Idaho Fish and Game Department, and located on its lands.

How much land is now irrigated by the water sought to be transferred? Approximately 5 acres.

Give the description: Segment of Placer Mining Claim Survey #1407, State of Idaho, Sec. 31, T. 7 S., R. 31 E.B.M., Idaho.

PROFILED

SCANNED
AUG 04 2005

What is the total amount of water in inches, or second feet, dedicated to said land?.....955.....
What kind of crops are being raised?.....fish, an industrial use.....
How much water per acre is now required to irrigate said land? Approximately 5 inches per acre
for irrigation.
What will be the effect on the land now irrigated, if the use of water on it is discontinued?.....It would
become arid and nonproductive.....

Give location of new point of diversion, if change is to be made No change.....
Through what ditch will it be conducted after transfer?..... Existing pipelines.....
How much water will be required per acre to irrigate the land to which this water is transferred?.....
3 inches per acre for irrigation; 955 inches for fish cultural purposes.....
Do you claim any other water right for the land from which you seek to abandon the use of this water?
If so, give amount, date and source No..... However, the City of American Falls does.....
Is there any other water right for the land to which you seek to make this transfer? If so, give amount,
date and source..... Yes. 14.1 c.f.s., Permit #17608, Nov. 24, 1931, Rueger Springs.....
