REMARKS:

Claimant raises 6 head of cattle from 3-1 to 9-30 each year. However, stockwater was not a use on the original license. Therefore, stockwater is an additional use that cannot be recommended under the original priority.

Stockwater for 6 head, however, should easily be covered by the domestic use since it is used in conjunction with the home and since, at 12 gallons per head per day, it requires only 72 gpd, which is far less than the 13,000 gpd limit on domestic use.

REMARKS: (INCLUDE LIMITATIONS ON CONSUMPTIVE USE FOR COMBINED RIGHTS.)

① Theoretical diversion rate based on information from the claimant of 64' to water and 10 H.P. motor + pump. System pressure is unknown and is therefore estimated.

$$Q = \frac{8.8 (.7) 10 \text{ H.P.}}{(2.31 \cdot 40 \text{ psi}) + 64'} = \frac{61.6}{156.4} = \underline{\underline{0.39 \text{ cfs}}}$$

② Irrigation application rate $Q = 17 \text{ birds (various sizes) at a time at } 40 \text{ psi} = 85 \text{ gpm} = \underline{\underline{0.19 \text{ cfs}}}$
(assume 5 gpm/bird)

③ Claimant claimed 0.12 cfs for irrigation, which is 0.03 cfs/acre, which is allowed for averages under 5 acres.

④ Original license was for 0.28 cfs on 17 acres. $\frac{4 \text{ acres}}{17 \text{ acres}} (0.28 \text{ cfs}) = 0.066 \text{ cfs total for this portion} \approx 0.07 \text{ cfs}$

REMARKS:

This place of use, which was apparently licensed when it had one home and 17 acres of irrigation and one well, now appears to have 6 homes, each with a few acres. This claim and A35-12765 are the only two claims filed that appear to be possible portions of 35-02918. ~~A35-12765~~ T75, R31E, S30, Lot 10 was identified for 2nd Round review. Therefore, no need to contact other property owners at this point. Since no other claimant claimed the domestic portion of this right, and because the license file is unclear about the location of the licensed domestic use, I recommend the domestic portion of this license on this claim.

Field Check = 9-30-93 by S.W. Keen
Phone Conversation = 10-5-93 with
Ben Strand

Summary of field notes and telephone conversation notes
collected by IDWR agent S.W. Keen

- System :-
- Depth to water in the well is approximately 64 feet.
 - Submersible pump and motor (10 H.P.).
 - Operating pressure is unknown
 - Well delivers water to the house, to the irrigation system in the west pasture, to the irrigation system in the east pasture, and to a drip irrigation system for a few fruit trees and the ornamental shrubbery around the house. There is also a very small lawn and water to 6 head of cattle from 3-1 to 9-30 each year.

The front (west) pasture is irrigated from 3" hand lines with 33 total sprinkler heads of various nozzle sizes. The lines are configured as drawn below.

x = sprinkler (7 per line plus 5 on the vertical line)

The east pasture has two similar 3-inch hand lines.

The drip irrigation has $\frac{3}{4}$ ", buried, plastic pipe.

- The operation of the system is to irrigate with two hand lines at once - either $\frac{1}{2}$ the west pasture or all of the east pasture. Claimant says operation of the pasture irrigation system does not affect domestic or drip irrigation operations.

Ben Strand called today to answer some questions Kathie Strand could not answer on 9-30-1993. He was able to tell me that the motor on the pump in his well is 10 H.P. He also said he believes the depth to water in his well is about 64 feet, and he confirmed that his stock use is from 3-1 to 9-30 each year.

Mr. Strand also said that years ago several of the places in his area were on the well on his property, but all have since drilled their own wells. I believe some of those places may be able to claim portions of 35-02918.
