TO: File 35-8097

FROM: Jim Johnson

RE: Adjustment to Recommendation for License

In response to a telephone call and subsequent letter from the permit holder, I have reviewed the reasons that the permit holder's feel more land should be included than was originally proposed by the field examiner.

Area in Question

When the field examination was conducted, the examiner excluded an area which was adjacent to the existing lawn because it contained sagebrush and trees. The trees were planted and watered according to the permit holder.

The permit holder stated that winds were prominent and they had to maintain some type of ground cover in order to prevent wind-caused erosion. During the dry, hot months (July, August & September) they watered the native sagebrush as well as the trees to insure that ground cover would be maintained. Therefore, the permit holder feels that this area should be included. They plan to change the sagebrush growth to lawn when the trees get established enough to serve as an effective wind break.

Conclusion

The examination did not identify that trees were present, and that some irrigation was occurring, however, rather than re-do the examination which probably would result in the addition of the area in question, I recommend that the area be included on the license.

RE: Permit No. 35-8097

Attention: Jim Johnson, Water Rights Supervisor

Department of Water Resources

In reference to the proposed water right permit, and in response to your request following our telephone conversation, February 6, 1987, I am writing to note that we do not concur with the information shown on the draft copy of the license proposed to be issued on the above referenced water right.

As I explained in our telephone conversation, our request was for two acres, not one, as noted on the proposed license. The state inspector has obviously neglected to consider ground area which includes approximately 325 trees, which are to serve as a windbreak, in addition to a large garden and raspberry patch (approximately 300 raspberry plants). Although the windbreak area presently has sagebrush growing in it also, there is justifiable reason for such. In planting the seedlings approximately 5 years ago, our county extension agent advised us to leave the sagebrush where it was until the trees had developed enough to help break the wind. This was determined an absolute 'must' as the total area of property concerned is sandy, and with the frequent winds which we experience, the trees and landscaping would both receive a great deal of damage without the aided protection of the sagebrush. For example, in seeding our yard with grass, one side area remained un-watered one afternoon while we were away from the home. Three to four hours later we arrived home only to find approximately 200 square feet of seeded yard across the road on a neighboring yard, heavy enough that the grass underneath it could not be seen.

The only other option we presently have is to do a great deal more irrigating, which does not seem practical. I hope you can see that this is definitely a situation needing individual consideration. We request the license be issued for two acres as originally noted, instead of only one. We will be waiting for your response to this matter.

From: Richard Lenon R.L.
Date: June 26, 1986
Re: Permit No. 35-8097

During the conversation that took place over the telephone between Ms. Stanger and me on June 25, 1986, she stated that she and Mr. Kay were planning to plant grass and trees and install a sprinkler system on the other acre of land, which is currently sagebrush. Also, during the conversation I had with Mr. Kay during the field exam on June 26, 1986, he stated they were eventually going to plant grass and trees on the other acre of ground.

At the time of this exam, I observed one acre of lawn that was being irrigated and another one acre of land of sagebrush. I licensed them for only one acre of irrigation since that was the actual use.

This memorandum is made for clarification purposes. Mr. Kay and Ms. Stanger desired to be licensed for two acres, and they may be under the impression that they will be licensed for two acres.
