IN AND FOR THE COUNTY OF TWIN FALLS

IN RE THE GENERAL ADJUDICATION
OF RIGHTS TO THE USE OF WATER FROM
THE SNAKE RIVER BASIN WATER SYSTEM

CIVIL CASE NUMBER: 39576

Ident. Number 63-9658
Date Received: 6/19/1989
Receipt No: W003267
Received By:

NOTICE OF CLAIM TO A WATER RIGHT
ACQUIRED UNDER STATE LAW

1. Name of Claimant(s)

LAKEWOOD UNIT NO 4 HOMEOWNERS ASSN Phone: (208)363-0208
3156 WOODBROOK PL
BOISE ID USA 83706

2. Date of Priority: 03/01/1981

3. Source: GROUND WATER Trib. to:

4. Point of Diversion:

Township	Range	Section	1/4 of 1/4 of 1/4 Lot	County	Type
03N	02E	26	NE NW	ADA	
03N	02E	26	NE NW	ADA	

5. Description of diverting works:

Also known as Raindrop Well

6. Water is used for the following purposes:

Purpose	From To	C.F.S.	(or) A.F.A
AESTHETIC STORAGE	01/01 12/31		1
DIVERSION TO STORAGE	10/01 04/15	0.42	

7. Total Quantity Appropriated is:

0.42 C.F.S. and/or 1 A.F.A.

8. Total consumptive use:

9. Non-irrigation uses:

SCANNED
OCT 11 2006

10. Place of use:

Township	Range	Section	1/4 of 1/4	Lot	Use	Acres
03N	02E	23	SE	SW	AESTHETIC STORAGE	
03N	02E	26	NE	NW	AESTHETIC STORAGE	

11. Place of use in counties: ADA

12. Do you own the property listed above as place of use? No

13. Other Water Rights Used:

14. Remarks:

The right holder shall accomplish the change authorized by this transfer within one year of the date of this approval.

Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.

Approval of this transfer does not preclude the opportunity for review of the validity of this water right in the ongoing Snake River Basin Adjudication.

This right does not grant any right-of-way or easement across the land of another.

Right holder shall comply with the drilling permit requirements of Section 42-235, Idaho Code and applicable Well Construction Rules of the Department.

The well previously used under Right 63-9658 in the NWNE, Section 3 shall be abandoned in a manner which complies with Department well abandonment rules.

After specific notification by the Department, the right holder shall record the quantity of water diverted or shall enter into an agreement with the Department to determine the amount of water diverted from power records and shall annually report the information to the Department.

Prior to diversion of water under this approval, the right holder shall provide a means of measurement acceptable to the Department from all authorized points of diversion which will allow determination of the total rate of diversion.

The total instantaneous diversion of water from all points of diversion under Rights 63-8402, 63-9658 and 63-10818 shall not exceed 0.42 cfs, nor a total combined annual volume of 28.1 af.

Rights 63-8402 and 63-10818 are also diverted through the points of diversion described above.

15. Basis of Claim: License

) SPECIAL MASTER'S REPORT
)
) FINDINGS OF FACT AND
) CONCLUSIONS OF LAW
)
) FOR WATER RIGHTS 63-08402
) and 63-09658

I. FINDINGS OF FACT

A notice of claim was filed for the above-captioned water rights pursuant to I.C. § 42-1409. The Director of the State of Idaho Department of Water Resources (IDWR) examined the water system for this reporting area. The *Director's Report* contained a recommendation or abstract for the elements of these water rights.

On April 11, 2006, the claimant of these water rights, the Lakewood No. 4 Homeowners Association, filed objections to the *Director's Report*. On December 1, 2006, the parties to the subcases filed a *Standard Form 5 – Stipulated Elements of a Water Right*, which resolved the objection. The Idaho Department of Water Resources concurred in the stipulation.

II. CONCLUSIONS OF LAW

Therefore based on the file and record herein and pursuant to the *Standard Forms 5*, IT IS RECOMMENDED that water rights 63-08402 and 63-09658 be decreed with the elements as set forth in the attached *Recommendations for Partial Decrees Pursuant to I.R.C.P. 54(b)*.

NOTICE OF ISSUANCE OF
SPECIAL MASTER'S
RECOMMENDATION

Water Right(s): 63-08402
63-09658

On December 19, 2006, Special Master THEODORE R. BOOTH issued a SPECIAL MASTER'S RECOMMENDATION for the above subcase(s) pursuant to SRBA Administrative Order 1 (AO1), Section 13a.

Pursuant to SRBA Administrative Order 1, Section 13a, any party to the adjudication including parties to the subcase, may file a Motion to Alter or Amend on or before the 28th day of the next month.

Failure of any party in the adjudication to pursue or participate in a Motion to Alter or Amend the SPECIAL MASTER'S RECOMMENDATION shall constitute a waiver of the right to challenge it before the Presiding Judge.

DATED December 19, 2006.

STANDARD FORM 5

**STIPULATED ELEMENTS OF A
WATER RIGHT**

This form is used to report the stipulated elements of one water right acquired under state law and/or one federal reserved water right. Submission of this form will not automatically result in the issuance of a partial decree. The Presiding Judge or Special Master will conduct any hearing necessary to determine whether the facts, data, expert opinions and law support the issuance of a partial decree for the water right.

The parties agree that the Snake River Basin Adjudication Court has jurisdiction of the parties and subject matter to enter a partial decree for this water right; that they have been served with sufficient process, according to the law; and that they have appeared, prosecuted, and defended their positions with regard to this water right dispute.

The parties and IDWR agree and stipulate that the elements of this water right should be described per the attached. The parties and IDWR have further indicated their concurrence by initialing each of the attached pages.

OTHER PROVISIONS NECESSARY FOR DEFINITION OR ADMINISTRATION OF THIS WATER RIGHT:

~~The right holder shall accomplish the change authorized by Transfer 71237 within one year of the date of the approval.~~

This partial decree is subject to such general provisions necessary for the definition of the rights or for the efficient administration of the water rights as may be ultimately determined by the Court at a point in time no later than the entry of a final unified decree. Section 42-1412(6), Idaho Code.

EXPLANATORY MATERIAL: BASIS OF CLAIM - License

After specific notification by the Department, the right holder shall record the quantity of water diverted or shall enter into an agreement with the Department to determine the amount of water diverted from power records and shall annually report the information to the Department.

Prior to diversion of water under this approval, the right holder shall provide a means of measurement acceptable to the Department from all authorized points of diversion which will allow determination of the total rate of diversion.

Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.

The well previously used under Right 63-9658 in the NWNE, Section 3 shall be abandoned in a manner which complies with Department well abandonment rules.

This right does not grant any right-of-way or easement across the land of another.

Right holder shall comply with the drilling permit requirements of Section 42-235, Idaho Code and applicable Well Construction Rules of the Department.

9. ☐ **Place of Use**
Should be: _____
10. **I object because:**
 - ☐ This water right should not exist.
 - ☐ This water right was not recommended, but should be recommended with
the _____ elements described above.

E. REASONS SUPPORTING OBJECTION(S):

- 1) In the "Quantity" section of the recommendation for this right, the 1.0 afv volume provision should be clarified to apply only to the "Aesthetic Storage" purpose listed under the "Purpose and Period of Use" section of the recommendation. Similarly, the combined annual volume of 28.1 af in the

sentence under the "Quantity" section should be clarified to apply only to "Irrigation" and "Aesthetic Storage" purposes authorized under Right Nos. 63-8402, 63-9658 and 63-10818. Diversion and use of water for the purpose listed as "Diversion to Storage" under the "Purpose and Period of Use" section of the recommendation for this right should not be subject to these annual volume limits, in accordance with the development and use of the right and as licensed by IDWR. Water in addition to that required for irrigation and to fill the pond has always been diverted to flow through the pond to maintain the quality of water in the pond.

- 2) Paragraphs related to conditions of approval from Transfer No. 71237 that are no longer applicable should be dropped from the "Other Provisions Necessary for Definition or Administration of this Water Right" and the "Explanatory Material" sections of the recommendation for this right; i.e. Paragraph 1 under "Other Provisions..." and Paragraphs 4, 5 and 7 under the "Explanatory Materials" section should be deleted from the recommendation. The new well for the change in point of diversion approved by the transfer has been constructed and the old well has been abandoned. Drillers' reports have been filed with IDWR documenting compliance.

F. VERIFICATION (Must be Completed)

State of Idaho)
) ss.
County of Ada)

I, Dale Matthews, duly sworn, upon oath, deposes and says:
(Name of person filing objection)

That I am the party/claimant filing this objection, as defined by I.C. §§ 42-1401A (1) and (6) or that I am the attorney for the party/claimant objecting and that I have read this objection, know its contents and believe that the statements are true to the best of my knowledge.

IDAHO DEPARTMENT OF WATER RESOURCES
PRELIMINARY RECOMMENDATION OF WATER RIGHTS ACQUIRED UNDER STATE LAW

Right holder shall comply with the drilling permit requirements of Section 42-235, Idaho Code and applicable Well Construction Rules of the Department.

This right does not grant any right-of-way or easement across the land of another.

After specific notification by the Department, the right holder shall record the quantity of water diverted or shall enter into an agreement with the Department to determine the amount of water diverted from power records and shall annually report the information to the Department.

Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.

Prior to diversion of water under this approval, the right holder shall provide a means of measurement acceptable to the Department from all authorized points of diversion which will allow determination of the total rate of diversion.

The well previously used under Right 63-9658 in the NWNE, Section 3 shall be abandoned in a manner which complies with Department well abandonment rules.

Comments:

1. csaxton 5/10/2004 Overlap

Comment: This right overlaps with rights: 63-08402, 63-09658, and 63-10818. Note: 63-10818 was not filed on in the adjudication and was not required to be. A transfer has been filed on these rights to change/add one point of diversion.

2. csaxton 5/10/2004 Copied From License(1)

Comment: Copied From License (1): Right 63-10818 is also diverted through the points of diversion described above.

3. csaxton 5/10/2004 Copied From License (2)

Comment: Copied From License (2): Right 63-08402 is also diverted through the point of diversion within the NENW, S26, T03N, R02E.

4. csaxton 5/10/2004 Copied From License (3)

Comment: Copied From License (3): The issuance of the right does not grant any right-of-way or easement across the land of another.

5. csaxton 5/10/2004 Copied From License (4)

Comment: Copied From License (4): Water stored under this right is subject to fluctuations of the water table caused by changes in the flow of local streams and by diversions under prior ground water rights and shall be used in accordance with Idaho law and applicable rules of the Department of Water Resources.

6. lharris 12/28/2004 Amended Recommendation

Comment: Recommendation amended per Transfer 71237 approved 11/1/04.

7. csaxton 1/18/2005 POD

Comment: Approved Transfer #: 71237 on 11/1/04, added second POD in NENW of section 26, T3N, R2E. Recommended to reflect TR 71237.

CONDITIONS OF APPROVAL

1. The right holder shall accomplish the change authorized by this transfer within one year of the date of this approval.
2. Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.
3. Approval of this transfer does not preclude the opportunity for review of the validity of this water right in the ongoing Snake River Basin Adjudication.
4. This right does not grant any right-of-way or easement across the land of another.
5. Right holder shall comply with the drilling permit requirements of Section 42-235, Idaho Code and applicable Well Construction Rules of the Department.
6. The well previously used under Right 63-9658 in the NWNE, Section 3 shall be abandoned in a manner which complies with Department well abandonment rules.
7. After specific notification by the Department, the right holder shall record the quantity of water diverted or shall enter into an agreement with the Department to determine the amount of water diverted from power records and shall annually report the information to the Department.

WATER RIGHT NO. 63-9658
As Modified by Transfer No. 71237

CONDITIONS OF APPROVAL

8. Prior to diversion of water under this approval, the right holder shall provide a means of measurement acceptable to the Department from all authorized points of diversion which will allow determination of the total rate of diversion.
9. The total instantaneous diversion of water from all points of diversion under Rights 63-8402, 63-9658 and 63-10818 shall not exceed 0.42 cfs, nor a total combined annual volume of 28.1 af.
10. Rights 63-8402 and 63-10818 are also diverted through the points of diversion described above.

This water right is subject to all prior water rights and shall be administered in accordance with Idaho law and applicable rules of the Department of Water Resources.

Conditions/Remarks:

1. Rights 63-08402 and 63-10818 when combined for irrigation purposes shall not exceed a total diversion rate of 0.12 cfs, a total annual maximum diversion volume of 26.1 af at the field headgate, and the irrigation of 5.8 acres.
2. This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 4.5 afa per acre at the field headgate for irrigation of the lands above.
3. Rights 63-08402, 63-09658 and 63-10818 when combined shall not exceed a total diversion rate of 0.42 cfs.
4. Right 63-09658 is also diverted through the points of diversion described above.
 Right 63-08402 is also diverted through the point of diversion located in the NENW, S26, T03N, R02E.

APPLICATION FOR A NEW WELL

ORIGINAL WELL

NEW WELL

ORIGINAL WELL

MEMORANDUM

TO: Transfer File No. 71216

FROM: Lori Graves

DATE: May 5, 2004

RE: Evaluation of Sufficiency of Information Submitted

Brief: For management flexibility, applicant proposes the place of use to be generally described as within the boundary of the Centerville Water System, Inc. service area. The site is located in New Centerville, Boise County.

Contact person for the applicant is Matt Howard, Attorney at Law.

Authority to File: Applicant is current owner of record.

Water Right Validity: Right assumed valid because the partial decree was issued on 4/21/2003, within the past five-year period.

Injury to Other Water Rights: None anticipated.

Enlargement of Use: No change in nature of use has been proposed. Applicant is tracking total water use via Idaho Power records. This information can be provided upon request.

Local Public Interest: No negative impacts are anticipated.

Beneficial Use/Conservation of Water Resources: Applicant proposed beneficial use consistent with conservation of water resources in Idaho.

Review of the application finds there is no clear inconsistency with criteria of I.C. § 42-222 preventing processing of this application.

Additional Information:

\$290 was originally submitted for the transfer fee, which covered only the irrigation portion of the right. To include fire protection, applicant paid an additional \$160 on 5/3/04. Applicant was hoping that the fire protection p/u would automatically change with the irrigation p/u for the purposes of uniformity, without being subject to additional fees.

The final service area map was submitted 5/3/04 by Oscar Baumhoff, Director of Centerville Water Sytem, Inc. Oscar stated that the applicants water delivery system is

5-10-04: Overlap for Aesthetic Storage with 63-09658.

However, Dan Nelson's calculations said maximum pond volume is 0.61 af of storage. Licenses 63-09658 and 63-08402 don't show volume limiters, and in combination do not exceed pond capacity. Since 63-09658 was licensed in 2002 and shows a limiter on rate but not Vol, I see no reason to add a diversion volume limiter. Remaining Storage Vol of 0.61 AFA can be covered in pending permits.

D. FLOW MEASUREMENTS

1.

Measurement Equipment	Type	Make	Model No.	Serial No.	Size	Calib. Date

2. Measurements: During my visit there was a blown mainline on the sprinkler system. Therefore, the applicant could not run both pumps to get an adequate measurement. I performed a theoretical for each well and used the pump curve determine the capacity of each system.

E. NARRATIVE/REMARKS/COMMENTS

This system IS supplied by 2 wells. The first well is known as the Carter Well. This well is located in the NWNE of S 26. The well open discharges into a small vault approximately 35 feet northeast of the well. The water is transported from the vault through a buried mainline in a northeasterly direction to the northeast corner of the NENW of S 26 where it enters another vault. The water from this point travels southwest to the Carter Irrigation Vault. The water in the Carter Irrigation Vault can be diverted through a 7.5 Hp irrigation pump that delivers irrigation water to the homes on the east side of the subdivision. The 7.5 Hp pump diverts approximately 140 gpm or 0.31 cfs into the irrigation system. All remaining water is delivered to the series of ponds in the subdivision. The water from the ponds can flow into the irrigation vault if the Carter well is not being operated.

The second well is known as the Raindrop Well. This well is the main well for the system. The water from the Raindrop well is connected to the irrigation system that supplies the subdivision lots on the eastern side of the subdivision. The subdivision has a timer set to switch the Raindrop well to the irrigation system at night and then switch it back to the ponds during the day. The Raindrop well open discharges directly into the ponds. There is a 10 Hp circulation pump in the Raindrop well pump house that pulls water already in the pond and delivers it to 4 places in the pond system to keep the water circulating through the pond system. The Raindrop Re-circulation pump diverts water at a rate of 600 gpm or 1.34 cfs and only pumps water already diverted into the ponds.

The ponds are all connected and the water flows from one pond to another. The lowest elevation point is located at the Raindrop pump house. This area has an overflow drain that feeds into the City of Boise's storm drain system. This drain is used to regulate the water levels in the pond. The circulation pump is used to keep the water moving within the system as much as possible to avoid over pumping the wells. The entire system is tied together and either well can fill the pond system and irrigated the grounds associated with the Carter Irrigation Vault. The irrigation line from the Raindrop well can only be supplied by the Raindrop well.

The pond system is actually one large pond varying in size and proportions to a few feet wide to several feet wide. I used the GIS system to determine a surface area of the pond of .87 acres and an average depth of 3 feet. This equates to a total pond volume of 2.61 acre-feet. The irrigation out of this system was calculated at 5.8 acres of irrigation.

OVERLAP

Water right 63-8402 was the original water right for this subdivision. This water right allows for 5 acres of irrigation at 0.10 cfs (0.02 cfs/acre) and 21.4 acre feet (4.28 afa/acre); Aesthetic use for 0.30 cfs continuous flow; and Aesthetic storage for 1 acre feet of volume. This right only used the Raindrop well for this system. Permits 63-09658 and 63-10818 were filed to add the Carter well and to bring the original right up to the full capacity of the system. Although the capacity of the system has increased with the addition of the new well, the ability to put that water to use is minimal. The maximum pond volume that could be allowed is 2.61 afa minus the 1 afa from 63-8402 equals 1.61 afa of storage for these permits. The irrigation will also be limited by 5.8 acres total irrigation minus 5 acres from 63-8402 equals 0.80 acres left to license for irrigation.

RECOMMENDATIONS:

I recommend that this permit be licensed for 0.42 cfs for diversion to storage and 1.6 afa for aesthetic storage. The remainder of the aesthetic uses are covered under water right 63-8402. When combined with water rights 63-8402 and 63-10818 the total allowable diversion at anytime from these two wells will be 0.42 cfs and when combined with 63-8402 the total annual volume for aesthetic storage should be limited to 2.6

The subdivision has a timer set to switch the Raindrop well to the irrigation system at night and then switch it back to the ponds during the day. The Raindrop well open discharges directly into the ponds. There is a 10 Hp circulation pump in the Raindrop well pump house that pulls water already in the pond and delivers it to 4 places in the pond system to keep the water circulating through the pond system. The Raindrop Re-circulation pump diverts water at a rate of 600 gpm or 1.34 cfs and only pumps water already diverted into the ponds.

The ponds are all connected and the water flows from one pond to another. The lowest elevation point is located at the Raindrop pump house. This area has an overflow drain that feeds into the City of Boise's storm drain system. This drain is used to regulate the water levels in the pond. The circulation pump is used to keep the water moving within the system as much as possible to avoid over pumping the wells. The entire system is tied together and either well can fill the pond system and irrigated the grounds associated with the Carter Irrigation Vault. The irrigation line from the Raindrop well can only be supplied by the Raindrop well.

The pond system is actually one large pond varying in size and proportions to a few feet wide to several feet wide. I used the GIS system to determine a surface area of the pond of .87 acres and an average depth of 3 feet. This equates to a total pond volume of 2.61 acre-feet. The irrigation out of this system was calculated at 5.8 acres of irrigation.

OVERLAP

Water right 63-8402 was the original water right for this subdivision. This water right allows for 5 acres of irrigation at 0.10 cfs (0.02 cfs/acre) and 21.4 acre feet (4.28 afa/acre); Aesthetic use for 0.30 cfs continuous flow; and Aesthetic storage for 1 acre feet of volume. This right only used the Raindrop well for this system. Permits 63-09658 and 63-10818 were filed to add the Carter well and to bring the original right up to the full capacity of the system. Although the capacity of the system has increased with the addition of the new well, the ability to put that water to use is minimal. The maximum pond volume that could be allowed is 2.61 afa minus the 1 afa from 63-8402 equals 1.61 afa of storage for these permits. The irrigation will also be limited by 5.8 acres total irrigation minus 5 acres from 63-8402 equals 0.80 acres left to license for irrigation.

RECOMMENDATIONS:

I recommend that this permit be licensed for .02 cfs for irrigation of 0.8 acres of ground. The total volume for this permit should be licensed for 4.7 afa for irrigation to bring the entire volume for the 5.8 acres to the 4.5 acre feet of water per acre for the entire place of use. When combined with water rights 63-8402 and 63-9658 the total allowable diversion at anytime from these two wells will be 0.42 cfs and when combined with 63-8402 the total annual volume for irrigation should be limited to 26.1 afa.

Have conditions of permit approval been met? ☒ yes ☐ no

F. FLOW CALCULATIONS

YES Additional Computation Sheets Attached

Measured Method:

95 GPM FOR EACH WELL x 2 WELLS = 190 GPM CAPACITY FOR SYSTEM**190 GPM CAPACITY / 448.8 = .42 CFS MAXIMUM ALLOWABLE DIVERSION RATE.****THIS PERMIT IS LIMITED TO .02 CFS/ACRE TIMES 0.8 ACRES = .02 CFS****G. VOLUME CALCULATIONS**

1. Volume Calculations for Irrigation:

$$V_{I.R.} = (\text{Acres Irrigated}) \times (\text{Irrigation Requirement}) = 0.8 \text{ ACRES} \times 4.5 = 3.6 \text{ AFA}$$

$$V_{D.R.} = [\text{Diversion Rate (cfs)}] \times (\text{Days in Irrigation Season}) \times 1.9835 = 0.02 \times 260 \times 1.9835 = 9.5 \text{ AFA}$$

$$V = \text{Smaller of } V_{I.R.} \text{ and } V_{D.R.} = 3.6 \text{ MAXIMUM ALLOWABLE}$$

PLEASE NOTE: The maximum allowable for all 5.8 acres is 26.1 afa (5.8 acres x 4.5 = 26.1 afa). Only 21.4 afa has been licensed for the 5.8 acres. Therefore, I recommend that 4.7 afa be licensed under this permit.

B

2. Volume Calculations for Other Uses:

H. RECOMMENDATIONS**1. Recommended Amounts**

BY: Daniel A. Nelson

THEORETICAL RATE OF FLOW: $Q = \frac{(8.8 \times (HP) \times (EFF.))}{TDH}$

Q = CFS

HP = Total Brake Horsepower of pumping plant (including booster)

Eff. = Pumping plant efficiency (assume 70% or 0.70)

TDH = Total dynamic head = [(LIFT) + (PSI X 2.31)]

LIFT = Depth to water in FEET from land surface to pumping water level

PSI = Pumping pressure measured in PSI near pump (if open discharge assume [0])

$$Q = \frac{(8.8) \times (5 \text{ hp}) \times (0.70)}{[(19) + (10 \times 2.31)]} = \frac{30.8}{42.1} = .73 \text{ CFS}$$

NOTES ON PUMP:

Motor Make, Serial or ID

Pump Make, Serial or ID, rating

REMARKS:

Pumping level was calculated
by subtracting total well depth minus
static water level and dividing by 2.
43 FT - 9 1/2 = 17 FT. + 10 FT for
this did not seem reasonable so
I calculated pumping level by
adding 10 FT to static level on
19 FT.
Pressure was calculated at 10 PSI.
