HOW YOU WILL RECEIVE NOTICES IN THE SNAKE RIVER BASIN ADJUDICATION

All documents filed in the Snake River Basin Adjudication other than notices of claims are filed with the court. Notices of claims to water rights filed in the Snake River Basin Adjudication are filed with the Idaho Department of Water Resources. Copies of all documents filed in the Snake River Basin Adjudication will not be mailed to all parties (claimants) in the adjudication.

By order of the court, any document filed with the court will be mailed only to those parties who may be directly affected by it. A monthly docket sheet will be prepared by the department which contains a summary of all documents filed with the court in the previous month and the dates and locations of hearings scheduled for the following three months. The docket sheet will be filed with the district court clerk in each county within the Snake River Basin in Idaho. Copies of the docket sheet may be obtained from any of the offices of the department either in person or by mail; a small fee will be charged to cover the cost of mailing and/or copying. If you wish to receive a copy of the docket sheet each month, you should mark the appropriate place on your notice of claim form. You will be charged a small annual subscription fee to cover the cost of copying and mailing. Copies of any document listed on the docket sheet may be obtained from any of the offices of the department either in person or by mail; a small fee will be charged to cover the cost of mailing and/or copying.

Copies of all notices of claims filed with the department will be available for inspection from all offices of the department. Copies of the notices of claims may be obtained in person or by mail, but you will be charged for the cost of copying and mailing. (A claimant will not be charged for a copy of his or her own notice of claim, and a person who acquires property with water rights for which a notice of claim was filed will not be charged for a copy of the notice of claim filed by the previous owner.)

After the notices of claims have been reviewed, the director will prepare and file a report with the court. Part 1 of the report will contain the director's recommendations as to each water right claimed under state law. Part 2 of the report will list each federal reserved water right claimed. A number of reports will be prepared, one or more for each sub-basin in the Snake River Basin. When the report for your sub-basin is filed with the court, you will be mailed a notice informing you that the report for your sub-basin has been filed. The notice will be sent to the most recent address shown by the department's files. Attached to the notice will be a copy of those portions of the report describing the water rights you have claimed. If you do not agree with the way your water right is described, you may file an objection to the report with the court. You can also file an objection if you disagree with the way other claimant's water rights are described, and the notice will tell you where a copy of the full report is available for inspection. The notice will tell you when and where to file your objection. The notice of filing for each sub-basin report will also be published state-wide in local newspapers.

ACTION OF THE DIRECTOR, DEPARTMENT OF WATER RESOURCES

This is to certify that I have examined Application for Permit to appropriate the public waters of the State of Idaho No. 63-9668, and said application is hereby approved.

1. Approval of said application is subject to the following limitations and conditions:

a. SUBJECT TO ALL PRIOR WATER RIGHTS.

b. Proof of construction of works and application of water to beneficial use shall be submitted on or before March 1, 19 86.

c. The rate of diversion, if water is to be used for irrigation under this permit, when combined with all other water rights for the same land shall not exceed 0.02 cubic feet per second for each acre of land.

d. Other:

An access port or other device as specified by the Department shall be installed by the permit holder to provide for the installation of measuring equipment and the determination of the rate of diversion by the Department.

The issuance of this permit in no way grants any right-of-way or easement across the land of another.

Witness my hand this 24th day of March, 1981.

Re: Volume

Water rights for municipal purposes are not normally restricted to an annual volume. In this case, however, the municipal use is not for distribution to the municipal customers through the common mainline. Therefore, a volume limit is being placed on the municipal use.

Department of Water Resources

Dear Mr. Tuthill:

On behalf of the City of Kuna, I am enclosing the following as per your request:

1. AutoCAD R14 drawing of Kuna's potable water system.
2. An Excel spreadsheet summarizing Kuna's water rights.

The enclosed map shows Kuna's existing potable water distribution system as of February 27, 2004. It also shows planned extensions for which plans are approved but not constructed. The location Kuna's six existing wells are identified on the map. The locations of the four proposed new wells that have been applied for but are currently under protest are also shown.

Kuna has two wells not shown on the map but included on the spreadsheet. One is known as the Process Well, 63-9668, which is located south of Kuna at their wastewater treatment facility. The second is known as the Noble Well, 63-7327, which is also located south of Kuna at their wastewater treatment facility. These two wells are used at the wastewater treatment facility to supply process water and supplemental irrigation water to the farming operation.

Well No. 1 is located under the existing elevated water reservoir. Well No. 1 has not been used for years and is currently capped. There does not appear to be a water right for this well. Kuna is currently looking into their old records for information regarding this well. The only thing we have found is an photograph showing the existing elevated water tower that has a hand written date of 1948 or 1949 on the back. This would indicate that Kuna had a potable water system prior to 1949. I am mailing a copy of this photograph for your records.

Please let me know if you need anything else. I will forward any additional information we may find about Well No. 1.

Sincerely,

We believe that Well No. 1 was drilled prior to 1949. We are searching Kuna's records for information about the well. The only evidence we have at this time is a photograph that is dated 1948-1949 that shows the elevated tank. Well No. 1 is located under the elevated tank.

APPLICATION FOR PERMIT

To appropriate the public waters of the State of Idaho

APPROVED

1. Name of applicant City of Kuna Phone 922-5546

Post office address P. O. Box 13, Kuna, Idaho 83634

2. Source of water supply Ground water which is a tributary of _____

3. Location of point of diversion is NE $\frac{1}{4}$ of NE $\frac{1}{4}$ of Section 2 Township 1 N.

Range 1 W B.M. Ada County, additional points of diversion if any: _____

4. Water will be used for the following purposes:

Amount 1.98 for irrigation purposes from April 1 to Oct. 31 (both dates inclusive)
(cfs or acre-feet per annum)

Amount 0.02 for municipal purposes from Jan. 1 to Dec. 31 (both dates inclusive)
(cfs or acre-feet per annum)

Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
(cfs or acre-feet per annum)

Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
(cfs or acre-feet per annum)

5. Total quantity to be appropriated:

a. 2.0 cubic feet per second and/or b. _____ acre-feet per annum.

6. Proposed diverting works:

a. Description of ditches, flumes, pumps, headgates, etc. a 40 horsepower submersible pump and a one horsepower submersible pump.

b. Height of storage dam _____ feet, active reservoir capacity _____ acre-feet; total reservoir capacity _____ acre-feet, materials used in storage dam: _____

Period of year when water will be diverted to storage _____ to _____ inclusive.

c. Proposed well diameter is 16"/14"/12" (Month/Day) inches; proposed depth of well is 400 (Month/Day) feet.

7. Time required for the completion of the works and application of the water to the proposed beneficial use is 5 years (minimum 1 year — maximum 5 years).

8. Description of proposed uses:

a. If water is not for irrigation:

(1) Give the place of use of water: NE $\frac{1}{4}$ of NE $\frac{1}{4}$ of Section 2 Township 1 N
Range 1 W B.M.

(2) Amount of power to be generated: N/A horsepower under _____ feet of head.

(3) List number of each kind of livestock to be watered N/A

(4) Name of municipality to be served City of Kuna, or number of families to be supplied with domestic water 0.

(5) If water is to be used for other purposes describe: _____

ACTION OF THE DIRECTOR, DEPARTMENT OF WATER RESOURCES

This is to certify that I have examined Application for Permit to appropriate the public waters of the State of Idaho No. 63-9668, and said application is hereby approved.

1. Approval of said application is subject to the following limitations and conditions:

- a. SUBJECT TO ALL PRIOR WATER RIGHTS.
- b. Proof of construction of works and application of water to beneficial use shall be submitted on or before March 1, 19 86.
- c. The rate of diversion, if water is to be used for irrigation under this permit, when combined with all other water rights for the same land shall not exceed 0.02 cubic feet per second for each acre of land.
- d. Other:

An access port or other device as specified by the Department shall be installed by the permit holder to provide for the installation of measuring equipment and the determination of the rate of diversion by the Department.

The issuance of this permit in no way grants any right-of-way or easement across the land of another.

Witness my hand this 24th day of March, 1981.

E. NARRATIVE/REMARKS/COMMENTS

A 408' deep, 12" well, equipped with a 40 hp submersible pump for irrigation and a 2 hp submersible pump for municipal use provides water to the City of Kuna's sewer treatment plant.

The irrigation pump bowls are set at 324' and the municipal pump is set at 312'.

Municipal water from the well provides a lab building, a chlorine building and also a small amount of landscaping surrounding the buildings.

The irrigation pump is used only when the sewage ponds are too low to pump for land application during the irrigation season. Four wheel line sprinklers were found at the time of the exam. No other rights are used. The SRBA claim has been filed by the City.

Contact person for the sewage treatment plant is Leola "Butch" Vega @ 880-4396.

Have conditions of permit approval been met? X yes ___ no

F. FLOW CALCULATIONS

_____ Additional Computation Sheets Attached

Measured Method:

Flowmeter: 300 gpm = .67 cfs (irrigation pump)

Theoretical: $\frac{2 \text{ hp} \times 8.8 \times .7}{300 + 50 \times 2.31} = \frac{11.9}{415.5} = .03 \text{ cfs (domestic pump)}$

G. VOLUME CALCULATIONS

1. Volume Calculations for Irrigation:

 $V_{I.R.} = (\text{Acres Irrigated}) \times (\text{Irrigation Requirement}) = 130 \times 4.5 = 585$ $V_{D.R.} = [\text{Diversion Rate (cfs)}] \times (\text{Days in Irrigation Season}) \times 1.9835 = .67 \times 214 \times 1.9835 = 284.4$ $V = \text{Smaller of } V_{I.R.} \text{ and } V_{D.R.} = 284.4$

2. Volume Calculations for Other Uses:
