PLACE OF USE: See Remarks **

CONDITIONS OF APPROVAL AND REMARKS

1. Right holder shall comply with the drilling permit requirements of Section 42-235, Idaho Code.
2. After specific notification by the department, the right holder shall annually report the amount of water diverted to the department.

SEP 12 1996

TRANSFER NO. 4857
WATER RIGHT NO(S). 37-04080/37-07585/37-07586

CONDITIONS OF APPROVAL AND REMARKS

3. The change authorized by this transfer shall be accomplished within one (1) year of the date of this approval.
4. Failure to comply with the conditions of this transfer is cause for the director to issue an order to show cause why the approval of the transfer should not be rescinded.
5. Approval of this transfer does not preclude the opportunity for review of the validity of the water right(s) in the ongoing Snake River Basin Adjudication.
6. Prior to diversion of water under this approval, the right holder shall provide a means of measurement acceptable to the Department from all authorized points of diversion which will allow determination of the total rate of diversion.
- * 7. The total instantaneous diversion of water from all points of diversion under Transfer No. 4857 shall not exceed 7.05 cfs.
- ** 8. Place of use is within the City of Gooding.
9. Approval of this transfer in no way confirms Right No. 37-04080 as claimed.
10. Two points of diversion are located within SESW, S32, T05S, R15E.

Dated this 5th day of September, 1996.

Chief, Water Alloc. Bureau

SEP 12 1996

MEMORANDUM

TO: FILE NOS. 37-04080, 37-07585 & 37-07586

FROM: PAM SKAGGS/^{PS}STATE OFFICE

SUBJECT: TRANSFER NO. 4857

DATE: September 4, 1996

=====

Transfer No. 4857 was filed by the City of Gooding to combine their municipal rights into a single combined system, combining all the existing wells and adding a proposed new well. Six total wells will be combined to serve municipal uses.

The transfer application originally included two SRBA Claims associated with the historic use of two wells identified as the Lincoln Inn well (A37-11204) and the TB Hospital well (A37-11210). Review and investigation by the region office found that these wells had not been used for many years, if ever in the case of the Hospital well, by the city for municipal use. The Lincoln Inn well had the pump removed about 25 years ago and the site has since been paved over. These two SRBA Claims are being recommended disallowed by the Southern Region manager and are not a part of this transfer approval.

The two licensed rights are both from four existing wells and the statutory claim identifies the two oldest of these wells. The total rate of diversion confirmed and licensed is 5.90 cfs. The total capacity of the four wells was found to be 7.05 cfs (See region memo dated 8-9-96). The combined total of the licensed rights and the claim are limited to the capacity of these wells or 7.05 cfs under this transfer approval.

The priority date of Statutory Claim No. 37-04080 was retained as originally claimed. The SRBA Claim for this right identifies an earlier priority and will be evaluated through the adjudication process. All three rights are for Municipal use within the city of Gooding.

Recommended conditions include drilling permit requirements, non-confirmation of claim, multiple points of diversion/measuring devices, future annual reporting and standard transfer conditions.

RECEIVED
SEP 12 1996

MEMORANDUM

TO: City of Gooding Transfer File

FROM: Corey Skinner *CS*

DATE: June 11, 1996

SUBJECT: Staff Review

The enclosed transfer application, filed by the City of Gooding, seeks to add diversion points to licenses 37-07585 and 37-07586 (SRBA claim A37-11221 and part of claim A37-04080) and SRBA claims A37-11204 and A37-11210.

Apparantly the City of Gooding currently has six wells that are listed as diversion points in the licenses and claims mentioned above. These well locations and corresponding licenses and/or claims are as follows...

WELL LOCATION	LICENSE	SRBA CLAIM
NESESW, Section 32 (two wells)	37-07585 37-07586	A37-04080
SWNESE, Section 6	37-07585 37-07586	A37-11221
SWSENE, Section 6	37-07585 37-07586	A37-11221
NENWNW, Section 8	none	A37-11210
NESESE, Section 31	none	A37-11204

The four wells covered under licenses 37-07585 and 37-07586 were measured in the 1981 licensing field exam and were found to have a total system capacity of 7.05 cfs. The section 32 wells were measured at 2.9 cfs (one at 2.45 cfs and the other at 0.45 cfs) and the section 6 wells were measured at 4.15 cfs (one at 2.43 cfs and the other at 1.72 cfs). However, 37-07585 and 37-07586 were originally permitted for only 2.7 cfs and 3.2 cfs respectively, and were licensed for these amounts.

In addition, SRBA beneficial use claims for the wells in section 8 and 31 are also involved with this particular transfer. However, the "part 2's", of the enclosed transfer application, for these two claims (A37-11210 & A37-11204) state that these two wells have experienced longer than five consecutive years of non use and are subject to forfeiture.

SEP 12 1996

T # 4857

The enclosed transfer seeks to add a new point of diversion (in the NWSWSW of Section 32) along with the existing wells in section 32 (two wells), section 8, and section 6 (two wells) to the licenses and claims listed on the previous page. The individual flow rates for these licenses and claims add up to more than the "total amount of water being transferred" as listed on part one of the application. However, the total amount of water being transferred (10.21 cfs) is based on the 7.05 cfs system capacity (from 1981 field exam) of the existing wells in sections 6 and 32, the 2.8 cfs claimed under A37-11204, and the 0.36 cfs claimed under A37-11210.

Since the wells for claims A37-11204 and A37-11210 have not been used and appear forfeited, it appears to me that only the measured 1981 system capacity of 7.05 cfs for the sections 6 and 32 wells could possibly be available for transfer. However, this amount is only licensed for 5.9 cfs (2.7 + 3.2). Based on this information, I see the rights and claims involved with this transfer as follows...

License 37-07585.....	2.7 cfs
License 37-07586.....	<u>3.2 cfs</u>
Total licensed amount for sections 6 & 32 wells = 5.9 cfs	
Claim A37-11221.....	4.15 cfs
(system capacity of the section 6 wells in 1981 licensing exam)	
Claim A37-04080.....	1.75 cfs
(licensed amount 5.9 - 4.15 = 1.75 cfs. However if City of Gooding can prove the section 32 wells were present prior to 1963, then A37-04080 would be 2.8 cfs, the amount claimed since 1981 exam measured 2.9 cfs on section 32 wells)	
Claim A37-11210.....	FORFEITED
(Due to more than five consecutive years of non-use as stated on Part 2 of enclosed transfer application.)	
Claim A37-11204.....	FORFEITED
(Due to more than five consecutive years of non-use as stated on part 2 of enclosed transfer application.)

Gooding, ID 83330

Gentlemen:

Our records show you have filed your adjudication claim(s) in the Snake River Basin Adjudication. Our records do not, however, include a clear map of your service area. Would it be possible for us to get a map of your customer service area for your municipal water system, both to supplement the record of your claim(s) and for use as described below?

In our review and investigation phase of the Snake River Basin Adjudication, the map would be helpful for us to have this information in verifying individual claims to water rights for domestic purposes. We will be happy to discuss with you the most convenient way for you to provide this information to us. I can be reached at 327-7931 or you may contact my assistant, Anita Warntjes at 327-7986.

Your assistance in this matter is greatly appreciated.

Sincerely,

DAVID B. SHAW
Adjudication Bureau, Chief

COMMUNICATION DOCUMENTATION

This form is to be used to document public record information requests regarding any SRBA claim or claims. The form may also be used to document IDWR communications requesting information regarding any SRBA claim or claims when the request is not made in writing or the claim verification report is not readily available to document the request. This form is to be filed in all relevant claim files or a central office file.

She wanted well drilling permits issued in the name of CITY OF GOODING and also profile reports of the above claims.

I sent her all of the above.
