Steve

Hi. Giant White Campground well was drilled in 1966; it's 196 feet deep. Has a hand pump; and pump capacity is 4 gpm. It has one surface connection and is listed as existing active. Susan Graves (Kamiah Engineer program manager) provided me with this information. Thank you Susan!

Hi Susan,

Attached is the "well log" that was in my folder for Giant White Pine CG. Very grainy, but if you look, you will see that it is for the Giant White Pine CG on the St Joe.

I have no information regarding a well log for Laird Park. All previous surveys indicate that there is no well log for Laird. I did find the specification for construction of the water system from 1965 indicates that the well is 6" ID (which it is), has a total depth of 72 feet, static water level of 8 feet and a drawdown of 52 at a pump rate of 5 gpm. The pump intake was to be set at 65 feet. The pump was to be a ½ hp minimum, 2 gpm pump rate at 215 TDH.

I am sorry that I can't offer more. This is the information from my folders and what I could glean from the Pinyon files that Jim kept.

Let me know if you need other information.
