EXPLANATORY MATERIAL: Beneficial Use

North Side Canal Company Basin 37 Winter Stockwater

Weekly Report of Paul S. A. Bickel, Chief Engineer,
Twin Falls North Side Land & Water Company.
For week ending March 26, 1910.

SUNDAY MARCH 20, 1910.

Gooding, Jerome, Twin Falls and Milner.

Left Gooding 1 P.M.; went to Jerome and drove to Twin Falls instead of going by Minidoka. Arrived at Milner 8:40 P.M. Looked over correspondence at Jerome.

MONDAY, MARCH 21, 1910.

From Milner to Twin Falls.

Walked over improvements on Main Canal and found that all concrete work was progressing fairly well. The walls will probably be up in eight days, but the floor will take until April 10, by this time most of the large cut will be out, but it will take until the 15th of April to finish. The sycam shovel is working but is a losing proposition.

The weather is favorable and the work on Main Canal below the Diversion Dam, and B5 to the Shoestring will be completed April 1st. Through Sugar Loaf Channel will be completed. The Canals on Clover Creek extension will be ready to turn water in shortly; also, the Mullins Canal. There will be some work to finish after this, but it can practically all be done with water in the canal.

A little work near Gooding on B5 Extension will be required after the 1st. of April, but this portion was left purposely as we can get water from the Malade or Big Wood River.

Went to Twin Falls in afternoon. Mr. Wiley asked the construction department to tamp the concrete after 24 hours, on the floor of canal, to smooth it, but I do not think this is the proper thing and should not be done. I examined some of these concrete treated this way and found that it broke the bond, and left it much softer than the other. I know that it is impossible to get an absolutely smooth surface without a great deal of trowling, but the lime and growing moss or vegetation there in the Snake River water smooths up all the surfaces over which it runs, and makes a good smooth surface.

I went out to Twin Falls Water Works Filter, and measured out-put of Filter. Cone 30 x 60 - 5 ft. water, 6/10 sec. ft. Another which is short of sand 1 sec. ft. but when this one,

Thursday, March 31, 1910.

Drove from Uhrlaub's to Wendell and Jerome.
Met Mr. MacWatters and Judge Hays at Jerome.

Went over correspondence and plats for
pumping on High Land NE of Milner. Looked over notes
on Swan Valley Reservoir.

Went to Wendell by train and saw Heller about
Jackson Ditch, and decided upon the Hastings Ditch. Mr.
MacWatters and Mr. Marr to meet here tomorrow.

Friday, April 1, 1910.

Met Mr. Hastings and he agreed to pay \$100.00
on his proposed ditch. Later Mr. MacWatters, Heller
& Marr went to Dr. Jackson's ranch and it was agreed to
to put in the Hastings ditch to the center of Sec. 29, for
Jackson & others. Also decided upon pipe line through
Wendell. Twelve inch pipe to be laid to west edge of town,
or rather to the pump house, which is the highest point
in Wendell.

Went to Jerome and tried to get Shobert to turn
water in at Mullins Headgate, but a mile below they are still
working, and have a few days' more work to do here.

Went to Gooding in evening.

Saturday, April 2, 1910.

At Gooding in the morning. Saw Donald Grant
and talked over the work.

In the afternoon went to Hailey and returned.
Got notes on land withdrawn by the Government.

At night went to Boise to see Judge Hays.

Respectfully submitted,

Paul S. A. Bickel,
Chief Engineer.
