MEMORANDUM

July 14, 2009

To: Monica Van Bussum

From: Bob Foster

Re: 75-4494A, 75-4496A

In response to Mr. Bishop's concern over ditch loss, I assume he is referring to the ditch from Hull Creek which is the conveyance system for 75-4496A. This ditch is of considerable length and traverses a gravely alluvial fan. The possibility for ditch loss in this conveyance system would be of some concern.

The issue of conveyance loss under right 75-4494A would be directly related to the efficiency of pumping system Mr. Bishop utilizes from the North Fork of the Salmon River. This reach of the North Fork of the Salmon River is not flow impaired during the irrigation season.

RE: Snake River Basin Adjudication (SRBA) claims 75-4494A and 75-4496A

Dear Claimants:

Thank you for your patience as IDWR has been more thoroughly investigating your claims. You filed objections to water rights 75-4494A and 75-4496A seeking additional flow rate under each, citing ditch loss as the reason for additional flow.

A site visit was conducted to examine the points of diversion (POD) from Hull Creek and North Fork Salmon River. The site visit found the ditch from Hull Creek is lengthy and traverses a gravelly alluvial fan, indicating ditch loss would be of concern. The site visit indicated loss from North Fork Salmon River would be directly related to the efficiency of the pumping system and ditch loss would not be a factor.

Based on the site visit, I have generated two new recommendations trying to address the ditch loss from Hull Creek. Please look these over carefully and let me know if you agree to I can generate documents to formally settle your objection. However, if you do not agree and wish to pursue ditch loss from North Fork Salmon River, IDWR will ask you to provide additional evidence supporting additional flow from North Fork Salmon River in the form of a Hubble analysis. Please contact me if you wish to pursue the Hubble analysis method.

You can contact me at the address above, or by telephone at (208) 287-4907. Of course, feel free to call if you have questions, as well.

Sincerely,

Monica Van Bussum

**RE: CLARIFICATION OF INFORMATION CONTAINED IN RECORD OF WATER
RIGHT NUMBER A75-04494A.**

My wife and I recently became the new owners of water right number A75-04494A and you mailed a copy of the record showing my wife and I as the new owners. Thank you for this service.

I would like to make one correction/clarification regarding the record of number A75-04494A (a copy of which is attached). Under item #5 (discription of diverting works) "Headgate & Ditch" is the recorded information. This is no longer correct. A pipe line has been put in place and the water is being pumped out of the river which is much less wasteful.

The point of diversion is still correct.

If you need further clarification of this point, please advise.

Respectfully,

William V. Bishop

RE: Filing on Water Rights Snake River Basin Adjudication

Dear Claimant:

As per my telephone conversation with Mrs. Keadle of 26 February 1990 enclosed are the necessary forms with instructions to file an adjudication claim on your water rights. Since I did not have a complete description of the property I contacted the Lemhi county assessor. It would appear that you own all or part of claims 75-4494 and 75-4496. (For your convenience I have also included a copy of claim 75-4368 which you may also own a part of.)

If you will review the copies of 75-4494 and 75-4496, you should be able to determine the water right(s) that you own.

Instead of copying the map of your right on the "Map of Project" page you can include a copy of the map from the enclosed claims. Be sure to make any changes that has occurred in the place of use or point of diversion.

Feel free to contact this office for any additional assistance that you may need.

Sincerely,

Keith C. Wilson
Senior Resource Agent

75-4494

Under the provisions of Section 42-243, Idaho Code, any person using or claiming rights to the public waters of Idaho established by diversion and application to the beneficial use must file a claim with the Department of Water Resources on or before June 30, 1983. Exempted from the filing are single family domestic uses as defined in Section 42-230(d), Idaho Code. Also exempted are rights represented by a priority, license, decree, adjudicated right, or a previously filed claim.

The filing of this claim does not confirm the water right claimed but failure to file may result in forfeiture of a water right.

Notice is hereby given that B & W Land Co., Inc. (Name of Claimant)

P.O. Box 399, Idaho Falls, ID 83402 Telephone No. 523-0862
(Mailing Address) (Zip Code)

claims a right to the diversion and beneficial use of the surface or ground water. The extent and nature of said claim is as follows:

- (1) Date of priority: (When was the water first applied to a beneficial use) Apr 11 1, 1908

A claim is not acceptable on a ground water source with a priority later than March 25, 1963 or on a surface water source with a priority later than May 20, 1971. An exception is that a claim may be filed on single family domestic use from a ground water source.

- (2) Describe the source of water: (Name of stream, lake, spring, etc., or ground water)

- (3) North Fork of the Salmon River tributary to Salmon River.
Describe the purpose for which the water has been used and the time during the year when you have used the right claimed:

(cls, af) (Domestic, Irrigation, Stock, Etc.) (Both dates inclusive)
(Mo., Day) (Mo., Day)

Quantity	2.88cfs	Use	Irrigation	Period of Use From	4-1	To	10-31
Quantity	.02cfs	Use	Stock	Period of Use From	4-1	To	10-31
Quantity		Use		Period of Use From		To	
Quantity		Use		Period of Use From		To	
Quantity		Use		Period of Use From		To	

- (4) 2.90 cfs TOTAL QUANTITY USED.

- (5) A) Point of diversion: (Location of point where water is diverted from its source)
SW $\frac{1}{4}$ NW $\frac{1}{4}$ Sec. 28 Twp. 25N Rge. 21E B.M., County of Lemhi
Additional points of diversion: NWSW Sec. 28, T. 25N R. 21E

8) Describe means of diversion of water: (Pump and pipeline, well, diversion dam, reservoir, length of ditch and field, etc.). Give sizes and capacities: be as specific as possible. Describe any changes in the system and give the date of the change. See attached.

- (6) A) Describe location of use by listing number of irrigated acres within each 40-acre tract in appropriate box. If use is not for irrigation, place an "X" in appropriate box to show location.

[illegible]No. of acres 144

- B) If water is used for other than irrigation, fully describe that use, being as specific as possible: Water stock

NOTE: Include here the type and number of stock watered. Range stock 30-60 head

- (7) If you are claiming water as a member of an organization, list name of organization:

Subject: RE: 75-4494A & 75-4496A

THIS EMAIL CONTAINS ATTORNEY-CLIENT PRIVILEGED INFORMATION AND SHOULD NOT BE
SCANNED.

Hi Garrick,

Below is a summary of my analysis of 75-4494A and 75-4496A. As always, it's more complicated than it once appeared.

75-4494A

I looked at 75-4494A and the other splits of statutory claim 75-4494. The stat claim was for 144 acres at 2.88 cfs for irrigation (that equates to exactly 1 inch to the acre). The adjudication claim for 75-4494A was filed for 0.38 cfs and 13 acres of irrigation (small stockwater component), or just slightly less than 1.5 inches to the acre.

We recommended the other 75-4494 splits with flow rates commensurate with 1 inch to the acre and, if they overlapped with another right, set a total combined use limit with a quantity that would limit total diversion to 1 inch to the acre. The recommendation for 75-4494A was different in that it was given a flow limit with 75-4496 that limited to 1 inch to the acre but did not have the total combined use limit condition (e.g. rights are limited to a total diversion of ____ cfs). However, we recommended a total diversion rate for both 75-4494A and 75-4496B that would equate to roughly 1.5 inches per acre without the total flow limiting condition. In short, we recommended 75-4494A inconsistent with other splits.

If I had it to do over again, I would recommend 75-4494A with a flow rate equal to 1 inch to the acre and add a total combined use limit for flow rate with 75-4496A. However, I don't think this will take care of the claimant's objection because we will not be giving over 1 inch to the acre. I am happy to rewrite the recommendation as I have suggested, but if the claimant wishes to pursue the additional flow rate, I would ask for a Hubble analysis.

75-4496A

Statutory claim 75-4496 was claimed for 13 acres of irrigation and 0.26 cfs of flow for irrigation. The adjudication claim was filed for 0.26 cfs and 13 acres for irrigation (small stockwater component). We recommended 75-4496A for 0.38 cfs and 13 acres of irrigation. It was given a combined use limit with 75-4494A for 1 inch to the acre. There are no comparable splits of 75-4496 because we disallowed the B portion. However, we should not have recommended 0.38 cfs to 75-4496A because it is (significantly) more than was claimed.

If I had to rewrite the recommendation, I would put it back to 0.26 cfs for irrigation and put a combined use limit with 75-4494A for 0.26 cfs between the two of them. I do not believe there is a need for the 0.02 cfs per acre condition if both are limited to a total diversion of 1 inch to the acre. If the claimant wants to pursue this, we would need an amended claim and I would also ask for a Hubble analysis. I do not believe my proposed corrections to this recommendation will resolve the objection.

On a side note, we cannot recommend 1.5 inches to the acre for 75-4494A and 75-4496B without the Hubble because there are more than 10 irrigated acres.

If the claimant does pursue the additional water under these rights, I envision other splits will want to do the same. I will wait to hear back from you before altering either of these recommendations. Please let me know if you have any questions.

3/6/2009

Thanks!

Monica

Subject: 75-4494A & 75-4496A

Monica,

These are the cases where the recommended cfs is over an inch to the acre, but then there is a combined use limit suggesting they are limited to an inch to the acre. The claimant filed a motion to have this fixed because his ditch goes over a half mile through gravel. When you have time, please look into these and determine what an appropriate comment would be. Once you have that, please prepare a new recommendation and forward it to Suzy. No hurry on this...next status conference is July.

Suzy,

Please add these to our Basin 75 tracking sheet. Once Monica shoots you the new rec, please prepare coversheet and forward for my review. Also, please prepare a cover letter for your signature explaining that IDWR proposes a new condition and that if they accept, to sign & initial the new recommendation and to return to you.

Thanks!
Garrick
