To whom it may concern:

- (1) Enclosed is a check for \$408.78 representing payment for our participation in the recent water dispute issues of the "Burns Group" water users of Carmen (Creek) Idaho.
- (2) As per my conversation with your office this date (Dec 22, 2008) we will NOT require any further legal Services from your office and we are withdrawing any and all past or future associations with the "Burns Group" water users. We find your legal fees incredibly excessive and your results predictably worthless.

In Re SRBA)

Case No. 39576)

Subcase No. 75-10705)

State of Idaho)

My name is Michael L. Zanutto. My current address is 78 South Cherokee Road, Salmon, Idaho. I purchased Lot 2, in Ajax Peak Subdivision, Lemhi County, Idaho, in 1980, being the second purchaser of property within the subdivision. Lot 2 lies directly to the east of Lot 3 and shares a common boundary running north and south. At the time of purchase, there was no road access to Lot 2. The developer, Maurice Foland, created a 50-foot wide easement for a road along the northern boundary of Lot 3 to access my property. The ground on much of Lot 3 was wet and boggy, even outside of the irrigation season. Prior to the construction of the access road to Lot 2, a vehicle could not be driven across Lot 3 to access my property. In 1981, I hired Mike Tupper Construction, of Salmon, Idaho, to construct an access road from the subdivision's main road to the area of my planned house site. Mr. Tupper inspected the proposed path of the road and informed me that a drain system would have to be installed for the entire length of the road across Lot 3 to drain the area where the road was to go. This significantly increased the cost of construction. At one point during construction, Mr. Tupper's dozer got stuck working in the saturated ground. Even after the road was constructed, several inches of water still accumulated on a low spot in the road approximately 100 feet east of the main subdivision road and remained during the entire irrigating season.

I began construction of a barn and house on the property shortly after the road was constructed. I lived on the property while building my house and traveled in and out almost daily. I owned the property until 1992. During the time that I owned and lived on Lot 2, I never observed any water being diverted out of the ditch that lies just north of Lot 3, on the McFarland ranch, and which

RECEIVED

runs parallel to the northern boundary of Lot 3. When I had the access road to Lot 2 constructed, no provision was made or requested to allow any water from the above ditch to be conveyed to any part of Lot 3 by means of a culvert or other method beneath the road bed. Likewise, no irrigation water was ever put across the road surface to irrigate any part of Lot 3. Charles Drew, the first purchaser of Lot 3, never requested or contacted me regarding the conveyance of any water from the ditch, either under or over the road, to Lot 3, for irrigation or any other purpose. Mr. Drew, in fact, installed his own drain system on the south side of the access road to redirect some of the abundant sub water to other parts of his property.

I do solemnly swear or affirm that the statements contained in the foregoing document are true and correct.

RE: Evidence of Water Right Claim Number 75-10705

Ms. Brown:

As requested by your office we are submitting information and/or documents relative to the active water right number 75-10705 with a priority date of May 1, 1901 and currently listed for use as crop irrigation and stock water.

We purchased this ten acre property in June 2000 and completed construction of a home on the same property in June 2001. Our current use of the above referenced water right includes:

- (1) Flood type irrigation of grass pasture for use as livestock feed. We do not cut or sell hay from this irrigated pasture.
- (2) Irrigated wetland and uncut grassland for wildlife habitat including ducks, pheasants and deer.
- (3) Waste irrigation water collection pond livestock and wildlife watering, additional wetland habitat and fish habitat.

We have necessarily obtained historical information regarding the water right "priority date" of 1901 from local residents who have knowledge of prior ownership of our property. We are new to the area and were not involved in this water right claim until June 2000. The following record of prior ownership, water right claim and water use on our property, to the best of our research and knowledge, is as follows:

Thomas Palmer (1901?-1930?) - Possible original/initial land owner and water right claimant; flood irrigated pasture for cattle and sheep ranching and hay farming.

Phillip Wybargen (1930?-1950?)- Flood irrigation of pasture for sheep ranching and hay farming.

Peter McFarland (1950?-1970?)- Flood irrigation of pasture for cattle ranching and hay farming.

SCANNED

AUG 02 2005

Frank Parmenter (1970?-1980)- Flood irrigation of pasture for cattle ranching and hay farming.

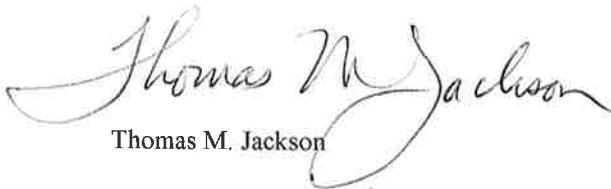

Maurice Foland (March 1980-November 1980) - Land developer of Ajax Subdivision, individual lot owners to irrigate for livestock pasture or hay farming.

Charles and Gayle Drew (Nov. 1980-June 2000) - Flood irrigated pasture for livestock grazing.

Thomas and Donna Jackson (June 2000 to date- Flood irrigated pasture for livestock grazing and wetlands wildlife habitat.

The above information was obtained from sales and water rights transfer documents (included) and statements from local residents, John Burns and Dave McFarland, of Carmen, Idaho.

Sincerely,

Thomas M. Jackson
