Director

Phone Call Summary, 87-10887
1/3/2020

On January 1, 2020 I spoke with Janiece Barber in regards to her claim 87-10887 and information about the wells. She confirmed the history of the property and the story of the wells that she attached to her claim. She also stated that the water being shared from the well at 17588 Central Grade was only temporary, and she does not know how the water got from that property to hers because there was no long-term infrastructure or pipeline connecting the house to the neighbor's well when she bought the property in 1998. When she bought the property, the neighbor's well was no longer supplying the property. In 1998 they drilled a new well, located about 20 ft east of the machine shed that is located to the east of the home, and 10 ft south of the driveway. This is the only well that supplies the house.
