Developed spring for 1290 Gold Hill Rd, Princeton, Idaho 83857

What history I know for the in use spring for the 1290 Gold Hill Rd house.

The spring was dug and brick lined in the early 1930's. I was told house and spring were built in the early 1930's, no specific date but it was prior to 1935.

When my father started to build the house at the 1290 Gold Hill Rd address the first thing he and my uncle did was improve the spring. They dug it out, relined it with cement block and ran a line to the building site.

If you have any other question please contact me.
