

## FIELD EXAMINATION OF CSRBA WATER RIGHT CLAIM

---

**Claim Identification Number:** 95-7294

**Date of Examination:** 3/2/2020

**Approximate Time of Examination:** 9:00 a.m.

**IDWR Field Staff:** Chris Holmes, Linda Werner

**Point of Contact:** Ana Negru, (208) 966-1291, Mailing Address: PO Box 133, Worley ID 83876. Physical Address: 8216 W Conkling Rd, Worley ID.

**Examination Location:** Parcel Nos. 09000001003A, 09000003003A, 47N04W291300, 09000001002A

### **Purpose of Visit:**

To determine correct well location for domestic use for Worley Rolling Hills Water Association, claim 95-7294.

Claim was supplied with a map (figure 1) that shows the well on Parcel No. 09000003003A in basin 95. Claim was recommended to reflect this. In December 2019, new water association president came in to see what she needed to do to add another home to the association. She said that the well was not the one shown in the claim/recommendation, but was actually located in the field on Parcel No. 47N04W291300 in basin 93 (figure 2). The purpose of the visit was to determine where the well is.

### **Field Examination Notes:**

Confirmed that there is a well from figure 2 located in the middle of the field, D-Tag D0010084, figures 3-5, with a casing diameter of about 6 inches. This D-Tag and diameter corresponds with the Well Driller's Report for a modified well (deepened) finished in 1999, and based off of the starting depth corresponds with the Well Driller's Report for Permit No. 95-95-N-74-000 that was completed in 1995. Location: N 47 degrees 23.670', W 116 degrees 51.514'.

MAR 03 2020

Also confirmed the original claimed well from figure 1 that is located on Parcel No. 09000003003A, figures 6-8, with A-Tag A0011075 and diameter of about 8 inches. This corresponds with the Well Driller's Report for Permit No. 93-73-N-1 which was completed in 1973 and was corrected in GIS by segbert in 2012 to the correct legal description. I also spoke with the owner of the property with the well, Keith McIntosh, who said that this well is the well that supplies the water association. Location: N 47 degrees 23.677', W 116 degrees 51.358'.

The well originally claimed and shown in figure 1 is the well that supplies the water association, not the well in the field. Figures 9-11 show original claimed parcels.
