To Whom this may concern,

This property at 1201 Magee Road, Genesee, Idaho, has been in the Moser family more than 60 years. My parents purchased this farm in the 1950's. Dad had begun farming just after WWII with my Grandad and farmed adjacent properties in the area. This property had an old well and cistern. Dad drilled the current well in the 1960's. It is an artesian well and when it was drilled they measured it producing over 65 gallons a minute.

The small acreage that the well is on, which is situated 100 yards south of the old house, that I grew up in, has been sold with an agreement that we retain our rights to the water for livestock and around the farm. We have raised livestock throughout the years. The property that I have retained is the shop, machine sheds, an old grainery, barn, pastures and farm ground that joins the additional 2500 acres of farm ground that we actively farm. We have raised cattle, swine, sheep, chickens and dairy cattle over the years. We currently raise cattle as the livestock side of our operation.

Sincerely,  
  
Ronald J. Moser
