AND

Name: RHONDA K. MORRIS 208-837-6213
Address: 1101 EAST 2900 SOUTH
RT. 1
HAGERMAN, ID 83332

2. Date of Priority: DEC 12, 1901

3. Source: SPRINGS Trib. to: BILLINGSLEY CREEK

4. Point of Diversion:

Township	Range	Section	1/4 of	1/4 of	1/4 of	Lot	County
07S	14E	30	SE	NE	SW		GOODING

5. Description of diverting works:
DIVERSION AT SPRINGS, STEEL PIPELINE, PUMP & MOTOR, SPRINKLERS

6. Water is used for the following purposes:

Purpose	From	To	C.F.S	(or)	A.F.A.
IRRIGATION	03/15	11/15	2.220		
STOCKWATER	01/01	12/31	0.070		
DOMESTIC	01/01	12/31	0.040		

7. Total Quantity Appropriated is:
2.220 C.F.S. (and/or) A.F.A.

8. Total consumptive use is 375.0 Acre Feet Per Annum.

9. Non-irrigation uses:
D/1 HOME, S/300 CATTLE

A36-00061

Page 1

Date: 02/07/89

MICROFILMED

JAN 21 1993

10. Place of Use:

Township	Range	Section	1/4	of	1/4	Lot	Use	Acres
07S	13E	36	NE		NE		IRR	30.0
			NE		NE		DOMEST	
			NE		NE		STOCK	
			SW		NE		IRR	5.0
			SW		NE		STOCK	
			SE		NE		IRR	40.0
			SE		NE		STOCK	
			NE		SE		IRR	15.0
			NE		SE		STOCK	
	14E	31	NW		NW	1	IRR	5.0
			NW		NW	1	STOCK	
			SW		NW	2	IRR	30.0
			SW		NW	2	STOCK	
							Section Acres	35.0
							Total Acres	125.0

11. Place of use in counties: GOODING

12. Do you own the property listed above as place of use? YES

13. Other Water Rights Used:
36-00062, 36-00063

14. Remarks:

SOURCE LOCALLY KNOW AS WEATHERBY SPRINGS
THIS AMOUNT OF WATER IS NEEDED TO IRRIGATE THE PROPERTY BECAUSE
IT IS VERY SANDY IN NATURE.

15. Basis of Claim: DECREED

Case Number:

NOTICE OF CLAIM
TO A
WATER RIGHT
ACQUIRED UNDER STATE LAW

RECEIVED

AUG 26 1988

Department of Water Resources
Southern Region Office

Please type or print clearly

1. Name of Claimant (s) HOWARD L. MORRIS and RHONDA K. MORRIS Phone (208) 837-6213

Mailing Address 1101 East 2900 South, Rt. #1, Hagerman, Idaho Zip 83332

2. Date of Priority (Only one (1) per claim) December 12, 1901

3. Source of water supply (a) Weatherby Springs
which is tributary to (b) Billingsley Creek

4. a. Location of existing point of diversion is: Township 7 South Range 14 East Section 30,
SE 1/4 of NE 1/4 of SW 1/4, Govt. Lot, _____ B.M., County of Gooding

Additional points of diversion if any: _____

b. If instream flow, beginning point of claimed instream flow is:

Township _____ Range _____ Section _____, _____ 1/4 of _____ 1/4 of _____ 1/4,

Govt. Lot _____ B.M., County of _____

ending point is: Township _____ Range _____ Section _____, _____ 1/4 of _____ 1/4 of _____ 1/4, Govt. Lot _____ B.M., County of _____

5. Description of existing diversion works (Dams, Reservoirs, Ditches, Wells, Pumps, Pipelines, Headgates, Etc), including the dates of any changes or enlargements in use, the dimensions of the diversion works as constructed and as enlarged and the depth of each well. From the diversion at the head of the Springs, the water is transported to the subject property through a steel pipeline to a concrete box where the water is pressurized by the use of a pump and motor. The property is irrigated by a sprinkler system.

MICROFILMED

OCT 11 1994

6. Water is claimed for the following uses:

(both dates are inclusive)

(cfs)

(acre feet)

For Irrigation purposes from Mar. 15 to Nov. 15 amount 2.22 or _____

For Stockwater purposes from Jan. 1 to Dec. 31 amount 0.07 or _____

For Domestic purposes from Jan. 1 to Dec. 31 amount 0.04 or _____

For _____ purposes from _____ to _____ amount _____ or _____

7. Total quantity claimed (a) 2.22 (cfs) and/or (b) 500 (acre feet)

8. Total consumptive use claimed is 375 acre feet per annum.

9. Non-irrigation uses; describe fully (eg. Domestic: Give number of households served; Stockwater: Type and number of livestock Etc.) One household and the lawn and garden area around the home and there are from 200 to 300 head of cattle on the property at times.

10. Description of place of use:

a. If water is for irrigation, indicate acreage in each subdivision in the tabulation below.

b. If water is used for other purposes, place a symbol of use (example: D for Domestic) in the corresponding place of use below. See instructions for standard symbols.

TWP	RNG	SEC	NE 1/4				NW 1/4				SW 1/4				SE 1/4				Totals
			NE1/4	NW1/4	SW1/4	SE1/4	NE1/4	NW1/4	SW1/4	SE1/4	NE1/4	NW1/4	SW1/4	SE1/4	NE1/4	NW1/4	SW1/4	SE1/4	
7 S	13 E	36	S&D 30		S 5	S 40									S 15				90
7 S	14 E	31					Lot1 S-5	Lot2 S-30											35

Total number of acres irrigated 125 acres

11. In which county (ies) are lands listed above as place of use located? Gooding County

12. Do you own the property listed above as place of use? Yes X No _____

If your answer is No, describe in Remarks below the authority you have to claim this water right.

13. Describe any other water rights used at the same place and for the same purposes as described above.

36-0062 & 36-0063 or None ()

14. Remarks:

This amount of water is needed to irrigate the property because it is very sandy in nature.

Re: Notice of Appearance

Dear Mr. Brown:

We received your Notice of Appearance on behalf of Hagerman Water Owners, Inc. and its individual members on February 10, 1993. The records listed on the notice were updated with some exceptions.

Claim numbers with "A" prefixes identify claims filed in the SRBA. Claim numbers without prefixes identify recommendations in the Director's Report. The following table identifies claimants for which you filed a notice of appearance, but the number you referred to is actually the identification of the recommendation. They have been updated with the notice information.

Claimant's Name	Recommendation No. (no "A" prefix)
Bybee, Gertrude B. Owsley	36-00042A 36-00041C
Candy, Walter W. & Margaret	36-00135B
Crandlemire, Roger C.	36-00134C 36-00135C
Gustafson Family Trust/Gustafson, Ivan J. & Lucille co-trustees	36-00033F
McFaddan, Dan H. & Irma R.	36-00048A
Muller, Manfred	36-00035J
Zink, Basil Lester & Myrle Hyde	36-00103F

MICROFILMED
OCT 11 1994

Mr. Patrick D. Brown
March 1, 1993
Page 2

The following is a list of claims that have been updated with the notice information, however, there is a discrepancy between IDWR records and the notice list (see third column).

Claimant's Name as listed on Notice of Appearance	As Claimed/ As Recommended	Claim No. or Claimant's Name in IDWR's Records
Anderson, Anita G.	A36-00050D/36-00050D	Andersen (name spelling is different)
Brailsford, Robert H.	A36-04260/36-04260	A36-04260B/36-04260B (claim was split--"B" suffix)
Brooks, Allen L. & Andree	A35-00060	A36-00060/36-00060 (Basin 36 instead of Basin 35)
Crandlemire, Roger C. & George C.	A36-00113J/36-00113J	Crandlemire, Roger C. (George C. not listed as claimant)
Gisler, Harry R.	A36-00021B/36-00021B	A36-00021/36-00021 (claim was renumbered)
Glauner, Frank L. & Joan	A36-00039E/36-00039E	Jean instead of Joan
Gustafson Family. Trust/Gustafson, Ivan J. & Lucille co-trustees	A36-00011C/36-00033F	Gustafson, Ivan J. (not listed as a trust)
Johnson, Ira L. & Huguette M.	A36-07142/36-07142	Johnson, Ira L. (Huguette M. not listed as claimant)
Joint Hagerman School Dist. 233	A36-15463/36-15463	Original claim & IDWR records show school dist. as #3.
Jones, John W., Jr.	A36-00068/36-00068 A36-00069/36-00069 A36-07071/36-07071 A36-00070/36-00070	Jones, John W. Jr. & Deloris D. (Deloris D. is included as a claimant)

MICROFILMED
OCT 11 1994

Claimant's Name as listed on Notice of Appearance	As Claimed/ As Recommended	Claim No. or Claimant's Name in IDWR's Records
Mueller, Manfred	A36-00034D/36-00035J	Muller (name spelling is different in IDWR records)
Strange, Wm. (Penelope Turn- er-remainder man)	A36-00006/36-00006 A36-00007/36-00007 A36-00008/36-00008	Strange, Wm. & Louise (Louise is included as a claimant, Penelope Turner is not in records)
Veenendaal, Dick J.	A36-00108A/36-00108A A36-00039C/36-00039C	Veenendaal, Dick J. & Sigrid E. (Sigrid E. is included as a claimant)
Wiens, M. J., Jr.	A36-80317	A36-08317/36-08317 (no. was transposed on notice)
Wiens, M. J., Jr.	A36-00098/36-15384	36-15384 (claim was combined with no. 36-00141 into no. 36- 15384)
Wiens, M. J., Jr.	A36-00141/36-15384	36-15384 (claim was combined with no. 36-00098 into no. 36- 15384)

The following claims have not been updated with the notice information because of the discrepancies listed in the third column.

Claimant's Name	Claim No. as listed on Notice of Appearance	Discrepancy Between Notice of Appearance and IDWR Records
Hagerman Gun Club	A36-00100/36-00100 A36-00099/36-00099 A36-07233/36-07233 A36-07172/36-07172 A36-10249/36-10249	Owners are listed as Bob Porter and Fred Surbaugh MICROFILMED OCT 11 1994

) Subcase 36-00061

Case No. 39576

)
)
) SPECIAL MASTER'S REPORT
)

FINDINGS OF FACT AND CONCLUSIONS OF LAW

A notice of claim was filed for this water right pursuant to I.C. § 42-1409 (1990). The director of the State of Idaho Department of Water Resources examined the water system for areas 1, 2, and 3 and investigated and abstracted the notices of claims for those Reporting Areas. The Director of the Idaho Department of Water Resources then filed a *Director's Report* which asserted how the elements of this water right should be decreed by the court.

An objection to the *Director's Report* for water right 36-00061 was filed. Subsequently, a *Standard Form 5* was filed as to how the elements of this water right should be decreed. The *Standard Form 5* was accepted by the court; now therefore,

IT IS THEREFORE RECOMMENDED that subcase 36-00061 be decreed as recommended in the attached *Special Master's Report and Recommendation for Partial Decree*.

DATED March 19, 1998.

WATER RIGHT NOS.

36-00061

36-00062

36-00063

The following information is submitted to the Idaho Department of Water Resources to allow it to form an opinion regarding the amount of water needed to irrigate my fields using a surface water irrigation system.

My fields were historically irrigated using a surface water system: ☒ Yes ☐ No

My typical cropping pattern, based upon the percentage of my total acreage, is as follows:

FORAGE/GRAIN/OTHER (hay, pasture, grain, mint)

100 %

ROW CROPS (beans, potatoes, sugar beets, corn)

100 %

My total acreage is 128 acres.

Department of Water Resources

**IN THE DISTRICT COURT OF THE FIFTH JUDICIAL DISTRICT OF THE
STATE OF IDAHO, IN AND FOR THE COUNTY OF TWIN FALLS**

In Re SRBA	)	STANDARD FORM 5
	)	
Case No. 39576	)	
	)	SUBCASE NO: 36-00061
	)	
	)	STIPULATED ELEMENTS OF A
	)	WATER RIGHT

THIS FORM MAY ONLY BE USED IF ALL PARTIES HAVE STIPULATED TO ALL ELEMENTS OF ONE WATER RIGHT AND MAY BE SUBMITTED AT ANY TIME FOLLOWING THE CLOSE OF THE STATUTORY RESPONSE PERIOD.

INSTRUCTIONS

This form has been adopted by the court in SRBA Administrative Order 1, Rules of Procedure (amended Oct. 16, 1997), Section 4, which may be consulted for further information.

This form is used to report the stipulated elements of one water right acquired under state law and/or one federal reserved water right. Submission of this form will not automatically result in the issuance of a partial decree. The Presiding Judge or Special Master will conduct any hearing necessary to determine whether the facts, data, expert opinions and law support the issuance of a partial decree for the water right.

The parties agree that the Snake River Basin Adjudication Court has jurisdiction of the parties and subject matter to enter a partial decree for this water right; and they have been served with sufficient process, according to the law; and that they have appeared, prosecuted and defended their positions with regard to this water right dispute.

A copy of this water right as recommended in the Director's Report shall be submitted with this form. A statement shall accompany each element of a water right.

Statement and Stipulation of Parties and IDWR

Parties/Claimants and IDWR agree that the above referenced water right should be as described in the attached printout entitled Recommended Water Rights Under State Law.

Review By IDWR

To speed up entry of a decree, the parties are encouraged to talk to the Idaho Department of Water Resources about their proposed settlement and have IDWR indicate its concurrence by signing the Standard Form 5.

Where all parties have signed, a Standard Form 5 may be filed with the court without the concurrence of IDWR. However, the parties must certify that they have served IDWR with a copy of the Standard Form 5 and that they have made a good faith attempt to resolve the matter with IDWR.

Within 14 days of filing a Standard Form 5 not containing an IDWR concurrence, IDWR shall file a statement of its position with the court.

If IDWR has not concurred by signing below, signing parties certify that they have served a copy of this document on the Idaho Department of Water Resources and have made a good faith attempt to obtain IDWR'S concurrence, but have failed.

Signatures and Addresses of Parties and their Attorney of Record (attach additional page if necessary):

I have read this form and know its contents and that the statements are true to the best of my knowledge.

IDAHO DEPARTMENT OF WATER RESOURCES SURFACE IRRIGATION ANALYSIS WORKSHEET

WATER RIGHT NOS. 36-00061
36-00062
36-00063

The following information is submitted to the Idaho Department of Water Resources to allow it to form an opinion regarding the amount of water needed to irrigate my fields using a surface water irrigation system.

My fields were historically irrigated using a surface water system: ☒ Yes ☐ No

My typical cropping pattern, based upon the percentage of my total acreage, is as follows:

FORAGE/GRAIN/OTHER (hay, pasture, grain, mint)

100 %

ROW CROPS (beans, potatoes, sugar beets, corn)

100 %

My total acreage is 23 acres.

CT 6-21-96

36-00062

36-00063

Tracing of Sec. 36, T7S, R13E on scanned NAPP AATOSW shows 640.7 ac.

Tracing of irrigated land south of the Curren Ditch in Lot 1 (NWNW) of Sec. 31 T7S R14E shows 2.7 ac.

Tracing of all the irrigated land within the legal description on the deed shows 122.6 ac. (note, this includes more than $\frac{1}{4}$ mile of the Curren Ditch.)

Conclusion:

There may be approximately $1\frac{1}{2}$ acres of additional land being irrigated within the legal description supplied with the deed.

There appears to be even more acres irrigated (according to the field boundaries) on lands outside of the legal description on the deed.

(Approximately 9 to 10 acres.)

MEMORANDUM

TO: Claim Files, see below
FROM: Douglas Jones, Water Rights Supervisor, Adjudication Bureau
DATE: July 12, 1996
RE: "706" reports submitted to court

In response to an order from the court, resulting from the Motions for Summary Judgement filed on the subcases, IDWR has prepared the following documents:

- 1) DIRECTOR'S SUPPLEMENTAL REPORT
- 2) REPORT REGARDING QUANTIFICATION OF SMALL DOMESTIC AND STOCKWATER USES
- 3) REPORT REGARDING CONSUMPTIVE USE IN THE HAGERMAN AREA
- 4) REPORT REGARDING EVALUATION OF IRRIGATION DIVERSION RATES
- 5) HAZEN, W; GIBSON, G; NEIBLING, H; CROP WATER REQUIREMENTS IN THE HAGERMAN VALLEY; IN A REPORT TO HAGERMAN WATER RIGHT OWNERS ASSOCIATION
- 6) GUIDELINES FOR THE EVALUATION OF IRRIGATION DIVERSION RATES ("HUBBLE REPORT") IN A REPORT TO IDWR
- 7) EVALUATION WORKBOOK FOR IRRIGATION DIVERSION RATES
- 8) AFFIDAVITS FROM:
 - a. David B. Shaw
 - b. Steve Clelland: As to investigation of claims in the Hagerman area
 - c. Helen Harrington-Thornton: Regarding investigation of claims in the Hagerman area
 - d. Marci Sterling
 - e. Jeff Peppersack
 - f. David R. Tuthill, Jr
 - g. Carter Fritschle: Regarding planimeter measurements of claims 36-00064B and 36-00079
- 9) REPORTS REGARDING ... (each specific claim, 24 in all)

Submittals 1-8 can be referenced in the file cabinet section titled "SPECIAL REPORTS" which follows the irrigation claims within Basin 36. The reports regarding specific rights can found in the file jacket for that right.

REPORT REGARDING CLAIM TO WATER RIGHT NO. 36-00061

The Director of the Idaho Department of Water Resources (IDWR) submits this report regarding claim to water right no. 36-00061 in response to the request of Special Master Haemmerle, pursuant to Idaho Code §42-1412(4) and the court's Order Re: Contested Claims for Amounts Claimed in Excess of .02 CFS. This report was prepared under the supervision of Karl J. Dreher, Director, David B. Shaw, Adjudication Bureau Chief, and David R. Tuthill Jr., Acting Adjudication Bureau Chief for IDWR. The following persons assisted in the preparation of the following portions of this report:

David B. Shaw, Adjudication Bureau Chief, reviewed and verified this Report Regarding Claim to Water Right No. 36-00061. Mr. Shaw reviewed and verified IDWR's Report Regarding Quantification of Small Domestic and Stockwater Rights, which is incorporated by reference herein. The Affidavit of David B. Shaw describes Mr. Shaw's education and work experience, and is incorporated by reference herein. Mr. Shaw also reviewed IDWR's Report Regarding Evaluation of Irrigation Diversion Rates, described below.

Jeff Peppersack, Adjudication Engineer, prepared and verified IDWR's Report Regarding Evaluation of Irrigation Diversion Rates, which is incorporated by reference herein. The Affidavit of Jeff Peppersack describes Mr. Peppersack's education and work experience, and is incorporated by reference herein. Mr. Peppersack also reviewed IDWR's Report Regarding Consumptive Use for Irrigation in the Hagerman Area, described below.

David R. Tuthill Jr., Acting Adjudication Bureau Chief, prepared IDWR's Report Regarding Consumptive Use for Irrigation in the Hagerman Area, which is incorporated by reference herein. Mr. Tuthill also reviewed this Report Regarding Claim To Water Right No. 36-00061. The Affidavit of David R. Tuthill Jr. describes Mr. Tuthill's education and work experience, and is incorporated by reference herein.

Steven C. Clelland, Senior Water Resource Agent, investigated and prepared the preliminary recommendation for claim no. 36-00061. The Affidavit of Steven C. Clelland describes Mr. Clelland's education and work experience, and is incorporated by reference herein. The affidavit also includes a general description of his investigation of claims in the Hagerman area. The Affidavit of Steven C. Clelland Regarding Claim Nos. 36-00061, 36-00062 and 36-00063 describes Mr. Clelland's investigation of the quantity and place of use of this water right; it is attached hereto and incorporated by reference herein.

Helen L. Harrington-Thornton, formerly Senior Water Agent and currently Hydrogeologist, participated in the field examination for claim no. 36-00061. The

Affidavit of Helen L. Harrington-Thornton describes Ms. Thornton's education and work experience, and is incorporated by reference herein. The Affidavit of Helen L. Harrington-Thornton Regarding Claim Nos. 36-00061, 36-00062, and 36-00063 describes her investigation of the quantity and place of use of this water right, and is attached hereto and incorporated by reference herein.

I. INVESTIGATION AND RECOMMENDATION OF CLAIMS GENERALLY

IDWR's general methodology for the investigation and recommendation of claims is described in Appendix A, which is incorporated herein by reference.

II. WATER RIGHT NO. 36-00061

A. Basis of Claim

Claim no. 36-00061 was filed with IDWR by Howard L. and Rhonda K. Morris on August 26, 1988.¹ The claim is to a one of three rights decreed to Mr. and Mrs. L.W. Hoffman in the *New International Mortgage* decree, entered in 1932.² The water rights decreed to the Hoffmans are numbered in IDWR's files as water right nos. 36-00061, 36-00062, and 36-00063. All three were decreed for use on the same lands; all three were decreed, along with numerous others, for "irrigation, domestic, power and other purposes." The claimants also claimed right nos. 36-00062 and 36-00063, filed objections to the director's recommendations as to these claims, and filed motions for summary judgment in the subcases as to these claims. IDWR's Report Regarding Claim to Water Right No. 36-00062 and IDWR's Report Regarding Claim to Water Right No. 36-00063 are incorporated by reference herein.

B. Name and Address of Claimant

The name and address of the claimant set forth in the claimant's motion for summary judgment is the same as recommended in the director's report.

¹ The original notice of claim is currently located in the files of the SRBA District Court, attached to IDWR's response to the claimant's objection.

² *New International Mortgage Bank v. Idaho Power Co., et al.*, Equity No. 1602 (D.S.Id. 1932), at pp. 3-4.

C. Source of Water

The source of water is described in the director's report as Hoagland Tunnel, tributary to Billingsley Creek. The claimant's objection does not contest the source. The claimant's motion for summary judgment describes the source as Weatherby Springs.

Hoagland Tunnel is a source distinct from the source known as Weatherby Springs. The two sources are hydrologically related, in that they are both part of an area known as the Weatherby Springs Complex, and are in close proximity to each other (both in the same 10 acre tract). They are nonetheless distinguishable in that each has a distinct location, in that the flow of each is diverted by different systems and delivered pursuant to different water rights, and in that the tunnel was created and/or augmented through the construction of a concrete-lined tunnel, while the source known as Weatherby Springs is not so constructed. Hoagland Tunnel tributary to Billingsley Creek is therefore the more accurate description of the source of this right, and description of the source in this manner helps to distinguish the various rights diverted from the Weatherby Springs Complex.³

D. Date of Priority

The priority date set forth in the claimant's motion for summary judgment is the same as recommended in the director's report.

E. Point of Diversion

The point of diversion set forth in the claimant's motion for summary judgment is the same as recommended in the director's report.

F. Purpose of Use

The purposes of use stated on the notice of claim were irrigation, stockwater and domestic. The purposes of use recommended in the director's report include all three claimed purposes of use. The objection did not contest the purpose of use.

³ The director's report includes the body of water to which the source of the right is tributary for each water right in the director's report, except for rights to ground water. IDWR adopted this standard for the description of the source of water rights because there are so many instances, sometimes in the same administrative basin, where different surface water sources bear the same name. IDWR relied upon the following in reaching its conclusion: Idaho Code §42-1411(2) (which provides that the director shall determine the source of the right to the extent the director deems appropriate and proper to define and administer water rights acquired under state law).

The claimant's motion for summary judgment now seeks to add wildlife, recreation, aesthetics, and "diversion system maintenance."⁴

The description of the purposes of use of this right in the decree is ambiguous in that it describes the purposes of use for the three Hoffman rights and others in the same list collectively as irrigation, domestic, power and other purposes," rather than specifically identifying each purpose of use for each right.⁵ IDWR's investigation confirmed the use of water for irrigation, stockwater and domestic purposes, as further described below in the sections addressing quantity and place of use. Neither the claimant nor IDWR's investigation has yielded information that would confirm the beneficial use of water for the other purposes listed in the motion, either pursuant to the right as originally appropriated or as currently used.⁶ Such information is necessary not only to confirm the use but to quantify the amount of water beneficially used for that purpose.

G. Quantity of Water Used

The notice of claim states a quantity of 2.22 cfs for irrigation, 0.07 cfs for stockwater, 0.04 cfs for domestic, and a total quantity of 2.22 cfs. The quantity recommended in the director's report is the same as claimed. The objection contests quantity, but does not state an amount. The claimant's motion for summary judgment states a total quantity of 2.22 cfs, but does not state a quantity for each

⁴ The filing fee for claims other than small domestic and stockwater claims consists of a flat \$50.00 fee, plus a variable fee of \$1.00 per acre for any claimed irrigation use, plus a per cfs variable fee for other claimed purposes of use. The filing fee for small domestic and stockwater claims is \$25.00; no filing fee is required for portions of rights for small domestic and stockwater uses. The filing fee paid for this claim was limited to the purposes of use claimed in the notice of claim, and no filing fee was paid for the domestic and stockwater portion.

⁵ IDWR relied upon the following in reaching its conclusion: *Morgan v. Udy*, 58 Idaho 670, 79 P.2d 295 (1938) (a water right decree that omitted the description of the point of diversion necessarily determined the point of diversion but was ambiguous as to its location).

⁶ IDWR relies upon the following in reaching this conclusion: Idaho Code §42-1427 (which allows an ambiguity in a prior decree or license to be resolved based on current beneficial use); the statement of the Presiding Judge that this section "cannot change or exceed the previously decreed or recorded element of the decreed or licensed right" nor "be used to claim an expansion of use beyond the beneficial use existing at the time the right was originally memorialized in a decree or license," Revised Memorandum Decision and Order on Basin-Wide Issue 4, dated May 17, 1995, at page 9; and the statement of the Presiding Judge that, "the purpose of use is defined by the intentional application of water to an intended beneficial use of water," Memorandum Decision and Order Re: Basin-Wide Issue 5, dated April 26, 1996, at page 8.

purpose of use. The quantity decreed for right no. 36-00061 in the *New International Mortgage* decree is 2.22 cfs.

1. Necessity for quantity for each purpose of use

The director's report includes a quantity for each purpose of use in addition to the total quantity. This information is necessary to indicate whether and to what extent the total quantity or any portion of the total quantity is used for multiple purposes, or whether and to what extent the total quantity is allocated among the listed purposes of use. For example, if a claimant diverted one cfs through a hydropower facility and then used that same water for irrigation, the amount for each purpose of use would be 1 cfs, with a total diversion rate of 1 cfs. If a claimant diverted one cfs, but used one-half in a hydropower facility and the other half for irrigation, the amount for each purpose of use would be 0.5 cfs, with a total diversion rate of 1 cfs.

Omission of a quantity for each purpose of use would result in ambiguities in the definition of the right that could result in enlargements in use that would result in expansion of the right and injury to other water users. In the example above, assume the claimant who used one-half of a 1 cfs right in a hydropower facility and the other half for irrigation decided to start using the full cfs in a hydropower facility, followed by use of the full cfs for irrigation. If the hydropower use were a year-round use, then the use of the irrigation half outside the irrigation season for hydropower use would result in injury to junior water users outside the irrigation season who were previously subject to a prior use of one-half cfs who are now subject to a prior use of 1 cfs. In addition, if the half cfs formerly used only for hydropower were also used for irrigation, junior water users during the irrigation season would be injured by the use of this half cfs for a more consumptive purpose.⁷

2. Quantity for irrigation

As noted above, the claimant claimed a quantity of 2.22 cfs for irrigation and IDWR recommended 2.22 cfs for irrigation. 2.22 cfs is also the quantity decreed in the *New International Mortgage* decree. Any further information as to the basis for IDWR's recommendation as to quantity for irrigation therefore appears to be unnecessary.

⁷ This further quantification is provided pursuant to Idaho Code §42-1411(2) (which provides for IDWR to determine the quantity of water used to the extent the director deems appropriate to define and administer the water right).

3. Quantity for stockwater

As noted above, IDWR recommended a quantity of 0.07 cfs for stockwater. In addition, the recommendation includes a further description of non-irrigation uses, which states: STOCKWATER, 300 RANGE [CATTLE].

This right was claimed for 0.07 cfs for stockwater for 300 head of cattle. IDWR recommended 0.07 cfs based on the claim and its guidelines for quantity for stockwater use. The 0.07 cfs is the standard for 300 head of range cattle. The guidelines for quantity for stockwater use are described in IDWR's Report Regarding Quantification of Small Domestic and Stockwater Rights. Neither the claimant nor IDWR's investigation has yielded information which would confirm the beneficial use of a greater quantity for stockwater.

As noted above, the director's report includes a further description of non-irrigation uses by number and type of head which is not included in the claimant's motion for summary judgment. The further description of non-irrigation uses is based in part on the notice of claim. Additional information as to the basis for the further description of non-irrigation uses is set forth in IDWR's Report Regarding Quantification of Small Domestic and Stockwater Rights. As part of Basin Wide Issue 12, however, IDWR has proposed that the further description of non-irrigation use be rephrased as: THE QUANTITY FOR NON-IRRIGATION USE IS LIMITED TO THE AMOUNT OF WATER BENEFICIALLY USED FOR: STOCKWATER, 300 RANGE CATTLE. The basis for this rephrasing is also described in IDWR's Report Regarding Quantification of Small Domestic and Stockwater Rights.⁸

4. Quantity for domestic purposes

As noted above, IDWR recommended a quantity of 0.04 cfs for domestic. In addition, the recommendation includes a further description of non-irrigation uses, which states: DOMESTIC, 1 HOME.

This right was claimed for 0.04 cfs for domestic use for one home. IDWR recommended 0.04 cfs based on the claim and its guidelines for quantity for domestic use. The 0.04 cfs is the standard for one home. The guidelines for quantity for domestic use are described in IDWR's Report Regarding Quantification of Small Domestic and Stockwater Rights. Neither the claimant nor IDWR's investigation has

⁸ Special Master Haemmerle has issued his recommendation regarding Basin Wide Issue 12; a motion by the United States for reconsideration is pending.

yielded information which would confirm the beneficial use of a greater quantity for domestic use.

As noted above, the director's report includes a further description of non-irrigation uses by number of households. The further description of non-irrigation uses is based in part on the notice of claim. Additional information as to the basis for the further description of non-irrigation uses is set forth in IDWR's Report Regarding Quantification of Small Domestic and Stockwater Rights. As part of Basin Wide Issue 12, however, IDWR has proposed that the further description of non-irrigation use be rephrased as: THE QUANTITY FOR NON-IRRIGATION USE IS LIMITED TO THE AMOUNT OF WATER BENEFICIALLY USED FOR: DOMESTIC, 1 HOME. The basis for this rephrasing is also described in IDWR's Report Regarding Quantification of Small Domestic and Stockwater Rights.

5. Quantity for other purposes

As to the quantity for other purposes of use stated in the claimant's motion for summary judgment, neither the claimant nor IDWR's investigation has yielded information that would confirm the beneficial use of water for other purposes, as noted in section F above. Therefore, IDWR does not have information that would confirm the quantity used for the other purposes.

H. Period of Year Water is Used for Each Purpose of Use

1. Irrigation

Both the notice of claim and director's report state a period of use of 3/15 to 11/15 for irrigation. The claimant's objection states a period of use of 1/1 to 12/31. The claimant's motion for summary judgment states the period of use as "the irrigation season." The *New International Mortgage* decree does not state a period of use for irrigation.

The recommended season of use is consistent with season of use standards for irrigation developed by IDWR for various climatic regions throughout the state, which are based on a 75% chance of a 24 degree Fahrenheit frost. In addition, the director's report included general provision 12b, which allowed use of water for irrigation outside the season of use stated in the description of the individual right subject to certain conditions. In the Memorandum Decision and Order Re: Basin-Wide Issue 5, the Presiding Judge concluded that general provision 12 is not necessary and would not be decreed. This decision further provided that "all decrees for irrigation in the SRBA shall set the period of use as the "irrigation season." Order, pp.

15-16. The district court denied a subsequent motion for permission to appeal the decision. Pending any further proceedings on the decision, any further statement of the basis for IDWR's recommendation as to the season of use for irrigation appears to be unnecessary.

2. Stockwater and domestic purposes

The period of use claimed on the notice of claim and recommended in the director's report is 1/1 to 12/31 for stockwater and domestic. The claimant's motion for summary judgment states the period of use as year-round, which is for all intents and purposes the same as recommended in the director's report.

3. Other purposes

As to the season of use for other purposes of use stated in the claimant's motion for summary judgment, neither the claimant nor IDWR's investigation has yielded information that would confirm the beneficial use of water for other purposes, as noted in section F above. Therefore, IDWR does not have information that would confirm the season of use for the other purposes.

I. Legal Description of the Place of Use

1. Place of use for each purpose of use

The director's report includes a place of use for each purpose of use. This information is appropriate and necessary both to define and to administer water rights, as illustrated by the following example. Assume an appropriator has a water right to irrigate lands in each of four quarter-quarter sections (40-acre tracts) in a quarter-section (160-acre tract), and for domestic use for one home in the NE quarter-quarter section. The appropriator then sells the SW quarter-quarter, with appurtenant water rights, and the buyer files a notice of change in ownership with IDWR (which splits the water right). Absent the identification of the place of use for the domestic use in the NE quarter, IDWR would not know, without further investigation and determination of the water right, whether the domestic use remained with the purchaser or was conveyed to the buyer. To take the example one-step further, if the new owner were then to build a home and start using the water right for domestic purposes, IDWR would not know, without further investigation and determination of the water right, whether it was the buyer or the seller who was using water for domestic purposes without a valid right for that purpose.

2. Irrigation

The legal description of the place of use for irrigation recommended in the director's report is the same as the notice of claim, except that the director's report recommends 4 irrigated acres less than claimed in one quarter-quarter section. The objection contests the recommended place of use only as to the difference in the number of irrigated acres. The legal description of the place of use for irrigation in the claimant's motion for summary judgment nonetheless differs from the description in the director's report in the following respect, in that the two tracts in section 31 are described in the claimant's motion for summary judgment as the NWNW and the SWNW. These tracts are described in the director's report as Lot 1 (NWNW) and Lot 2 (SWNW). The legal description of these tracts as shown by U.S. government plat maps of the public land survey system are the government lot numbers. (The description of the claimant's lands in the deed attached to the motion for summary judgment also describe the claimant's lands as portions of these two government lots.) The quarter-quarter descriptions in the parentheses are not the actual legal descriptions; these designations are provided for the convenience of those who do not have ready access to U.S. government plat maps.

As to the difference in the number of irrigated acres, the claimant's lands as described in the deed include those portions of Lot 1 and Lot 2 "south of the North Bank of John Curran Irrigation Ditch." The claimant's lands thus include the ditch. The irrigated acres recommended in the director's report include all of the lands in Lots 1 and 2 south of the Curran ditch. The recommended irrigated acres thus exclude the ditch. The recommendation and the claimant's motion for summary judgment both state 30 acres for Lot 2; the difference is between the 5 acres claimed and the 1 acre recommended in Lot 1. One acre is IDWR's best estimation of the size of the lands south of Curran ditch in Lot 1. IDWR Senior Water Resource Agents Steve Clelland and Helen Thornton confirmed the irrigation of lands south of Curran ditch by personal observation and aerial photography. The examination of the place of use for this claim is described in the Affidavit of Steven C. Clelland Regarding Claim Nos. 36-00061, 36-00062 and 36-00063, and the Affidavit of Helen L. Harrington-Thornton Regarding Claim Nos. 36-00061, 36-00062, and 36-00063.

3. Stockwater

The legal description of the place of use for stockwater recommended in the director's report is one of the quarter-quarter sections in which irrigated acres are recommended (the SENE S36). The stockwater use consists of corrals located in this quarter-quarter section, which was confirmed by IDWR Senior Water Agents Steve Clelland and Helen Thornton through personal observation and aerial photography.

Stockwater use is not recommended in each quarter-quarter section in which irrigated acres are recommended, as claimed in this case and as IDWR has recommended for other water rights; in this instance the irrigation system is a closed system wherein water is delivered through pipes and sprinklers, rather than open ditches from which stock might water.

IDWR's recommendation of the place of use is contested only with respect to the number of irrigated acres. In the claimant's motion for summary judgment, the claimant asserts that the place of use for stockwater is the same quarter section where there are irrigated acres. Neither the claimant nor IDWR's investigation has yielded information that would confirm the beneficial use of water for stockwater purposes pursuant to this right within quarter-quarter sections other than the one recommended.

4. Domestic

The legal description of the place of use for domestic recommended in the director's report is one of the quarter-quarter sections in which irrigated acres are recommended (NENE S36). This is the same place of use for domestic described on the notice of claim, and was confirmed by IDWR Senior Water Agents Steve Clelland and Helen Thornton through personal observation and aerial photography. As noted above, IDWR's recommendation as to the place of use is contested only with respect to the number of irrigated acres. In the claimant's motion for summary judgment, the claimant asserts that the place of use for domestic is the same quarter sections where there are irrigated acres. Neither the claimant nor IDWR's investigation has yielded information that would confirm the beneficial use of water for domestic purposes pursuant to this right within quarter-quarter sections other than the one claimed and recommended.

5. Other purposes

As to the legal description of the place of use for other purposes of use stated in the claimant's motion for summary judgment, neither the claimant nor IDWR's investigation has yielded information that would confirm the beneficial use of water for other purposes, as noted in section F above. Therefore, IDWR does not have information that would confirm the place of use for the other purposes.

J. Annual Volume of Consumptive Use

The notice of claim states an annual volume of consumptive use of 375 AFY, or 3.0 AFY per irrigated acre. The annual volume of consumptive use recommended

in the director's report is 363 AFY, or 3.0 AFY per acre. The claimant's objection contests the recommended consumptive use, but does not state an amount. The claimant's motion for summary judgment states an amount of 562.5 AFY, or 4.5 AFY per acre. The Affidavit of Charles E. Brockway, submitted by the claimant in support of the motion for summary judgment, states "that 3.75 acre feet per acre per annum is the amount of consumptive use that is reasonable [in the Hagerman area] based upon a yield of ten tons [of alfalfa] per acre." Applying this standard, the total annual consumptive use volume would be 453.75 AFY for the 121 recommended acres, or 468.75 AFY for the 125 claimed acres.

IDWR developed standards for annual volume of consumptive use for the various climatic areas throughout the state. The standard for the area in which the claimant's place of use is located is 3.0 AFY. IDWR's recommendation is based on this standard. The development of IDWR's standards for annual volume of consumptive use is described in IDWR's Report Regarding Evaluation of Irrigation Diversion Rates. IDWR has conducted further analysis of the annual volume of consumptive use based on further information IDWR received subsequent to its original analysis. The further analysis is described in IDWR's Report Regarding Consumptive Use for Irrigation in the Hagerman Area. Based on this further analysis, IDWR recommends an annual volume of consumptive use of 3.5 AFY per acre, for a total of 423.5 AFY for the 121 recommended acres. (This is the total annual consumptive use volume for this right and right no. 36-00062, as further described in section K below.)

In response to the request of the Presiding Judge, the director filed an Amended Director's Report for Reporting Area 3 (Basin 36), which substantially reduced the number of general provisions in the director's report. Attachment 2 to the amended report explains the changes made to the general provisions, and further explains the changes to the list of recommended rights necessitated by the changes to the general provisions. The amended report deleted General Provision 14, which established that the recommended consumptive use is for the irrigation portion of the right only. As a result, the description of the annual volume of consumptive use for this right should contain the following language:

THE CONSUMPTIVE USE VOLUME IS ONLY FOR THE IRRIGATION PORTION OF THIS RIGHT. ⁹

⁹ IDWR relied upon the following in reaching its conclusion: Idaho Code §42-1401A (Supp. 1996) (which provides that the determination of the annual volume of consumptive use for all uses of water other than irrigation need not be decreed unless reported in the director's report).

K. Conditions on the Exercise of the Right and Other Necessary Matters

The recommendation of this right in the director's report includes the following remarks:

THE APPROPRIATOR IS ENTITLED TO THE AMOUNT OF WATER DESCRIBED HEREIN FOR STOCKWATER PURPOSES AT A POINT OF MEASUREMENT WHERE THE DELIVERY DITCH ENTERS THE PLACE OF USE DESCRIBED HEREIN. THE PORTION OF THIS RIGHT FOR STOCKWATER PURPOSES MAY BE DIVERTED SO LONG AS THE AMOUNT OF WATER DIVERTED AT THE POINT OF DIVERSION FOR STOCKWATER DOES NOT CONSTITUTE UNREASONABLE WASTE AND DOES NOT CONFLICT WITH THE PUBLIC INTEREST, AS DETERMINED BY THE DIRECTOR. WATER IS DELIVERED THROUGH THE HOAGLAND DITCH. USE OF THIS RIGHT WITH RIGHT NO. 36-00062 IS LIMITED TO A TOTAL ANNUAL CONSUMPTIVE USE VOLUME OF 363 AF, AND TO THE IRRIGATION OF A COMBINED TOTAL OF 121 ACRES IN A SINGLE IRRIGATION SEASON.

The claimant's objection seeks deletion of remarks except the remark identifying the common name of the ditch. The claimant's motion for summary judgment seeks deletion of all the remarks.

1. Ditch name (third sentence)

In response to the request of the Presiding Judge, IDWR submitted IDWR's Report for September 19, 1995 Status Conference. In this report, IDWR indicated that it had reviewed its use of remarks in the description of the individual water right, both to address concerns identified by the court, and to separate explanatory material from material the Director recommends be included in the decree of water rights pursuant to the 1994 amendments to the adjudication statute.¹⁰ The remark identifying the common name of the ditch through which the water right is delivered is explanatory material.

2. Stockwater (first and second sentences)

The first two remarks were erroneously included in the recommendation of this right as the result of a coding error. These remarks are sometimes included to quantify stockwater use outside the irrigation season where an irrigation ditch with substantial conveyance losses that carries a relatively large amount of water for

¹⁰ See Idaho Code §42-1411 (which addresses the form and content of director's reports).

irrigation pursuant to numerous water rights during the irrigation season is used to deliver a relatively small amount of water for a number of stockwater rights outside the irrigation season. In this instance, the diversion system from the Hoagland Tunnel is used to deliver a number of water rights, but the diversion system consists of a concrete-lined ditch and pipeline, in which the conveyance losses are not significant. The first two remarks should therefore be deleted from the recommendation of this right.

3. Combined use (fourth sentence)

As noted above, IDWR submitted IDWR's Report for September 19, 1995 Status Conference, in which IDWR indicated that it had reviewed its use of remarks in the description of the individual water right to address concerns identified by the court. One of the concerns identified by the court was the need to move remarks under the description of the individual elements of the water right to the extent possible. As also noted above, IDWR filed an Amended Director's Report for Reporting Area 3 (Basin 36), which substantially reduced the number of general provisions. Attachment 2 to the amended report explains the changes made to the general provisions, and further explains changes to the list of recommended rights necessitated by the changes to the general provisions. Attachment 3 to the amended report included samples of uncontested water rights, which were amended as explained in Attachment 2. One of the changes illustrated in these samples was the rephrasing and relocation of combined use remarks. The combined use remark listed above should similarly be rephrased and relocated as follows:

The following language should be included under the description of the place of use:

USE OF THIS RIGHT WITH RIGHT NO. 36-00062 IS LIMITED TO THE IRRIGATION OF A COMBINED TOTAL OF 121 ACRES IN A SINGLE IRRIGATION SEASON.

The following language should be included under the description of annual volume of consumptive use:

USE OF THIS RIGHT WITH RIGHT NO. 36-00062 IS LIMITED TO A TOTAL ANNUAL CONSUMPTIVE USE VOLUME OF 423.5 AF. (The number of acre feet is higher than stated in the director's report, as described in section J above.)

Both remarks are appropriate and necessary to define and administer water rights, as further described below.¹¹

a. Irrigated acres

The description of the place of use of each right (nos. 36-00061 and 36-00062) describes the irrigated acres for that right as 121 acres. Inclusion of the additional language noted above in the description of the place of use for each right establishes that the two rights are used for the irrigation of the *same* 121 acres. Recommendation of the right in this manner accurately reflects actual use. More importantly, it avoids the possible misconception that the appropriator is entitled to use water on the sum of the irrigated acres pursuant to the two rights (121 plus 121, for a total of 242), which would be double the actual beneficial use, and would constitute an enlargement and would presumptively cause injury to other rights by increasing the total consumptive use under the two rights.¹²

b. Consumptive Use

With multiple rights for irrigation of the same parcel, IDWR does not state the annual volume of consumptive use for each right. Rather, IDWR includes a remark in each right stating the total annual volume of consumptive use under both rights. IDWR does not state a consumptive use for each right individually because the portion of the total annual volume of consumptive use that is actually consumed under each water right cannot reasonably be determined. The consumptive use volume provided by each right will vary from year to year depending on the portion of the total water supply provided under each water right in any given year. But because the rights are used in combination, the essential limit is the total annual consumptive use volume from both rights.

¹¹ IDWR relies upon the following in reaching its conclusion: Idaho Code §42-1411(2), which provides that the director shall determine the place of use and the annual volume of consumptive use to the extent the director deems *appropriate and proper* to define and administer water rights acquired under state law, and Idaho Code §42-1412(6), which provides that the decree shall contain or incorporate a statement of each element of a water right as stated in section 42-1411, as contrasted with language later in section 42-1412 providing for the inclusion of general provisions to the extent *necessary* to define and administer water rights.

¹² IDWR relied upon the following in reaching its conclusion: *Hall v. Blackmun*, 22 Idaho 556, 126 P. 1047 (1912); Idaho Code §42-222 (prohibiting injury or enlargement from changes in use).

REPORT REGARDING CLAIM TO WATER RIGHT NO. 36-00061

State of Idaho)

APPENDIX A

A. INVESTIGATION AND RECOMMENDATION OF CLAIMS GENERALLY

To promote the accuracy and consistency of water right decrees, and to minimize the burden on the court and the claimants in a water right adjudication, the state has made the specialized expertise of IDWR available through IDWR's investigation and reporting function.¹

The resources the state has made available for this function, however, are limited. IDWR has the duty to conduct a reasonable investigation within the spending authority granted by legislative appropriation. Those resources are not sufficient for IDWR to exhaustively investigate each and every potentially relevant fact regarding each and every claim and to make a conclusive determination of the water right. Rather, IDWR reviews the claim and the information already available to IDWR, and conducts such further investigation as is reasonable to determine whether there is sufficient information to support recommendation of the water right to be decreed.

To make the most efficient use of the available resources, IDWR must make determinations as to what is a reasonable level of investigation for various classes of claims prior to making a recommendation to the court regarding any particular claim. IDWR has employed two primary mechanisms to identify a reasonable level of investigation. First, the statutes set criteria and IDWR has developed standards for various types of uses, requiring less information to support a claim to water within those standards and more information to support a claim outside those standards. Second, IDWR has adopted a "tier" approach, identifying classes of claims which for various reasons merit further investigation.

Generally, with claims based on beneficial use², IDWR conducts a "licensing type" field exam, which includes confirmation of the source, point(s) of diversion, purpose(s) of use, place(s) of use, and an examination of the water delivery system and the quantity of water beneficially used. IDWR also contacts the claimant to obtain information supporting the priority date claimed. This level of examination is conducted because there has been no prior administrative or judicial

¹ Idaho Code §§ 42-1410 and 42-1411.

² Water rights based on beneficial use are sometimes referred to as constitutional rights or grandfather rights.

confirmation of the existence and extent of a water right based on beneficial use.³

Generally, for water rights that have been previously confirmed by license or decree, IDWR begins its examination by comparing the claim to information already available to IDWR. Other information includes, for example, IDWR's decree files; license, permit and transfer files; remotely sensed data, including Landsat imagery of irrigated acres and aerial photography; watermaster reports; applicable laws and IDWR's interpretation of those laws in light of the water resource policies of the state; etc. If there are discrepancies between the claim and information already available to IDWR, IDWR conducts further investigation to resolve the discrepancy, which generally includes a field exam and/or contacting the claimant for further information. Thus, where there has been a prior judicial or administrative confirmation of the existence and extent of a water right, IDWR uses information already available to IDWR to limit its review to issues identified by its discrepancy analysis.

Finally, IDWR uses both the court-ordered notice of error process⁴ and the statutory objection process to identify claims which merit further review. If this further review yields new information that supports a different description of the water right, then IDWR will revise its recommendation (in the case of a notice of error) or submit a supplemental director's report or offer a standard form 5 (in the case of an objection), consistent with the new information.⁵

Further information as to IDWR's standards and procedures for the investigation and recommendation is set forth in IDWR's Claim Investigation Manual, Field Examiner's Handbook, Administrative Memorandums, and

³ IDWR conducts a more summary investigation of beneficial use claims limited to domestic and/or stockwater use up to 0.24 cfs.

⁴ The notice of error process, as originally conceived and implemented, was limited to disagreements between the claimant and IDWR as to fairly straight-forward "errors", such as clerical errors or other readily verifiable matters. Based on its experience in the test basins, IDWR has subsequently recommended that the notice of error process be expanded to address any type of perceived error, as well as to address disagreements between claimants.

⁵ This "tiered" approach to determining a reasonable level of investigation is embodied in the statutory framework for water right adjudications. See §42-1410 (which provides for the discretion of the director in determining the level of IDWR's investigation, and allows but does not require the agency to conduct hearings), and §42-1412 (which authorizes IDWR to submit supplemental reports, and authorizes the court or the parties to request further investigation by IDWR in contested subcases). The tiered approach embodied in the statutory framework promotes efficiency and minimizes the burden on the court and the claimants by providing a report/objection process to identify disputed matters, and reserving the highest level of investigation for disputed matters.

B. METHODOLOGY TO DETERMINE IRRIGATED ACREAGE

The area of irrigated acreage can be determined by information obtained from scaled and non-scaled photographs of the place of use supplied by one of several U.S. government agencies. The use of aerial photography by the U.S. government dates back to 1937, when the U.S. Department of Agriculture, Agricultural Stabilization and Conservation Service (ASCS, now known as the Farm Service Agency, or FSA) began photographing selected counties of the United States on a repetitive basis. This coverage continues today and aerial photos are used by the ASCS (FSA) to figure acreage planted on farms for purposes of managing farm programs. Photos used by IDWR typically include: ASCS photos and 35 mm color slides⁷; NAPP photos⁸; ortho-photoquads⁹; and U2

⁶ These documents set forth general standards and procedures and do not address all possible exceptions to the general standards and procedures. In addition, as a result of its experience in the test basins, statutory changes, judicial decisions, etc., IDWR has identified refinements and revisions to its standards and procedures for the investigation and recommendation of claims that have not yet been included in these documents.

⁷ Both the photos and slides are high oblique and vertical aerial photography. The ASCS photos are scaled and have selected features, such as roads, section lines, ditches, and field acreage superimposed on them by the ASCS. The color slides are simply color slides frequently taken with hand-held 35mm equipment. IDWR staff typically obtain copies (which are not scaled) of maps for lands claimed as the place of use during the investigation of the claims, either from the claimant or from the local ASCS office. Color slides may also be checked-out from the local ASCS office as needed; IDWR sometimes obtains the color slides as they are discarded by the local ASCS office.

⁸ NAPP (National Aerial Photography Program) photos are all color-infrared aerial photography. IDWR obtained coverage for most of the Snake River Basin, including all of the test basins; the photos are primarily from flights during 1987 and 1988, though some are from 1986 or 1989. The date of the flight is shown on the photo. NAPP photography is available from the U.S. Geological Survey Earth Resources Observation Systems (EROS) data center in Sioux Falls, South Dakota.

⁹ The full name for an ortho-photoquad is "orthographic photograph quadrangle." These are black and white photoimages prepared from aerial photographs that have been rectified to eliminate image displacement due to terrain relief that cover a systematically subdivided area of latitude and longitude. IDWR obtained coverage for most of the Snake River Basin, including all the test basins; the photos are primarily from flights during the 1970's. The date of the flight is shown on the quad sheet. Most of the orthophotos were obtained from the U.S. Geological Survey National Cartographic Information Center (NCIC) in Menlo Park, California. In some areas, maps were not available from U.S.G.S. but were available from other agencies, such as the United States Department of Agriculture, Forest Service.

aerial photos¹⁰.

A photographic "scale," like a map scale, is an expression that states that one unit of distance on a photograph represents a specific number of units of actual ground distance.

$$S = \text{Photo scale} = \frac{\text{Photo distance}}{\text{Ground distance}} = \frac{d}{D}$$

The scale may be expressed as unit equivalents, representative fractions, or ratios. For example, if 1 mm on a photo represents 25 m on the ground, the scale of the photo can be expressed as 1 mm = 25 m (unit equivalents), or 1/25,000 (representative fraction), or 1:25,000 (ratio).

The photo(s) used by IDWR personnel have varying scales. The ASCS photographs have map features drawn in by the ASCS. These photos are stated to be "not to scale," but do include the field acreage as determined by ASCS written on the places of use. NAPP photography is at a nominal scale of 1:40,000; U2 aerial photography is at a nominal scale of 1:120,000; and ortho-photoquads have a scale of 1:24,000.

To determine the area used, IDWR staff employed various transparent overlays, known as grid templates. These templates are available at most blueprint supply stores. One type consists of lines forming rectangles or squares of known area in the same scale that is utilized in the scaled photograph. The grid is placed over a scaled photograph and the area of a ground unit is estimated by counting grid units that fall within the unit to be measured.

Another commonly used grid is the dot grid, which is composed of uniformly spaced dots on a transparent overlay. The grid is placed over the photograph and the dots falling within the region to be measured are counted. The value assigned to each dot is dependent on the scale of the photograph. First, the number of acres per centimeter (or other measuring unit) is computed. This figure is then divided by the number of dots per measuring unit on the grid to obtain the acreage represented by each dot. For instance, a square 3.4 cm on each side containing 640 dots will cover 160 acres on a photo with a nominal

¹⁰ These photos are color-infrared aerial photography obtained by the National Aeronautics and Space Administration (NASA) Airborne Instrumentation Research Project, and available from EROS. IDWR obtained coverage of most of the southern portion of the Snake River Basin, most of which was flown in 1977. In addition, because the State of Idaho was part of an ongoing project with NASA to photograph selected areas, photography from various areas in various years is also available. The date of the flight is shown on the photo.

scale of 1:24000; 640 dots divided by 160 acres equals 4 dots to the acre, thus 1 dot equals 0.25 acres.

Because of its simplicity, the grid system is a practical method to determine the size of irrigated areas; it nonetheless requires some training and experience to be used effectively.

For non-scaled photos, such as the ASCS 35 mm photos, IDWR did not directly make acreage determinations. Instead, these photos were used to confirm whether the place of use and amount of irrigated acreage had changed for that year according to common landmarks visible in the photographs.

IN THE DISTRICT COURT OF THE FIFTH JUDICIAL DISTRICT

OF THE STATE OF IDAHO, IN AND FOR THE COUNTY OF TWIN FALLS

In Re SRBA	)	Subcase No. 36-00061, 36-00062, 36-00063
	)	
Case No. 39576	)	AFFIDAVIT OF STEVE CLELLAND
	)	REGARDING CLAIM NO. 36-00061,
_____	)	36-00062, 36-00063

STATE OF IDAHO	)
	) ss.
County of Twin Falls	)

I, STEVE CLELLAND, being first duly sworn on oath, depose and state as follows:

1. I am a Senior Water Resource Agent with the Idaho Department of Water Resources (IDWR).
2. My work address is Idaho Department of Water Resources (IDWR), Southern Regional Office, 222 Shoshone St. East, Twin Falls, ID 83301-6105. I reside in Twin

Falls, Idaho.

3. My educational background and work history both outside and within IDWR are detailed in my Affidavit of Steve Clelland as to the Investigation of Claims in the Hagerman Area.

4. As part of my duties as a senior water rights agent, I investigated the acreage claimed as irrigated pursuant to claim nos. 36-00061, 36-00062 and 36-00063. The pertinent details of that investigation are as follows:

A. On August 21, 1990, IDWR water agent Helen Thornton and I conducted a field examination to verify the irrigated acreage claimed in claim nos. 36-00061, 36-00062 and 36-00063.

B. I observed that the water delivered pursuant to these claims had as its source the Hoagland tunnel. I observed that water delivered from the Hoagland tunnel was applied to acreage claimed as irrigated by the claimant.

C. I observed the existence of one home on the property. Using aerial photography, I confirmed the location of that home as being in the NENE quarter-quarter of Section 36.

D. I observed that stockwater was used only at the corrals. Using aerial photography, I confirmed the location of those corrals as being in the SENE quarter-quarter of Section 36.

E. Upon my return to the office, I used an orthophoto quad from 1974 with the grid system described in Appendix A to IDWR's Report Regarding Claim to Water

Right No. 36-00061 to measure the irrigated area and determined that acreage irrigated with water pursuant to these claims totaled 121 acres. My best estimate of the irrigated acreage south of the Curran ditch in Lot 1 was one acre. I also observed the pertinent NAPP photograph that showed as irrigated those areas I had observed were actually irrigated.

4. As part of my duties as a senior water agent, I also investigated the quantity of water delivered pursuant to claim nos. 36-00061, 36-00062, and 36-00063. The pertinent details of that investigation are as follows:

A. I observed that water pursuant to these claims was delivered from the source to the claimed place of use through a concrete lined ditch and a pipeline and pumped directly into a sprinkler system. Because of my observations, I concluded that conveyance losses to deliver water pursuant to this claim were insignificant due to the impermeable nature of the delivery system.

DATED this 15th day of July, 1996.

Steve Clelland

I, HELEN THORNTON, being first duly sworn on oath, depose and state as follows:

1. I am currently a Hydrogeologist with the Idaho Department of Water Resources (IDWR). At the relevant time for purposes of this affidavit, I was employed as a Senior Water Resource Agent with IDWR.

2. My work address is Idaho Department of Water Resources (IDWR), 1301 N. Orchard, Boise, ID 83706. I reside in Boise, Idaho.

3. My educational background and work history both outside and within IDWR

DEC 04 1996

are detailed in my Affidavit of Helen Thornton as to the Investigation of Claims in the Hagerman Area.

4. As part of my duties as a senior water rights agent, I investigated the acreage claimed as irrigated pursuant to claim nos. A36-00061, A36-00062 and A36-00063. The pertinent details of that investigation are as follows:

A. On August 21, 1990, IDWR water agent Steve Clelland and I conducted a field examination to verify the irrigated acreage claimed in claim nos. A36-00061, A36-00062 and A36-00063.

B. I observed that the water delivered pursuant to these claims had as its source the Hoagland tunnel. I observed that water delivered from the Hoagland tunnel was applied to acreage claimed as irrigated by the claimant.

C. I observed the existence of one home on the property.

D. I observed that stockwater was used only at the corrals.

5. As part of my duties as a senior water agent, I also investigated the quantity of water delivered pursuant to claim nos. A36-00061, A36-00062, and A36-00063. The pertinent details of that investigation are as follows:

A. I observed that water pursuant to these claims was delivered to the claimed place of use through a concrete lined ditch and a pipeline. Conveyance losses pursuant to these claims were calculated as insignificant. Through my observations, I concluded that the insignificant conveyance losses were due to the impermeable nature of the delivery system.

MICROFILMED

OCT 11 1994

IN THE DISTRICT COURT OF THE FIFTH JUDICIAL DISTRICT OF THE
STATE OF IDAHO, IN AND FOR THE COUNTY OF TWIN FALLS

In Re the General Adjudication
of the Rights to the Use of Water
from the Snake River Basin
Water System

Case No. 36-00061 -0001

The State of Idaho, ex rel.
R. Keith Higginson in his
official capacity as Director
of the Idaho Department of
Water Resources,

RESPONSE TO OBJECTION

Petitioner,

vs.

The United States; the State
of Idaho; and all Claimants to
the use of water from the Snake
River Basin Water System,

Respondents.

I. GENERAL INFORMATION

1. Person responding to objection:

Name: R. KEITH HIGGINSON, DIRECTOR

Address: IDAHO DEPARTMENT OF WATER RESOURCES
P.O. BOX 44449
BOISE, ID 83711-4449

Briefly describe your interest in this water right:

IDWR is required to file a response to an objection to part
I of the director's report pursuant to I.C. section 42-1412(2).

(Over)

MICROFILMED
OCT 11 1994

2. Person who filed objection:

Name: HOWARD L & RHONDA K MORRIS
Address: 1101 E 2900 SO
HAGERMAN ID 83332

3. If this response is filed by an attorney:

Attorney Name(s): NICHOLAS B. SPENCER
Attorney Address: DEPUTY ATTORNEY GENERAL(S)
IDAHO DEPARTMENT OF WATER RESOURCES
P.O. BOX 44449
BOISE, ID 83711-4449

Attorney Phone No.: (208) 327-7900

II. STATEMENT OF THE RESPONSE

3. |X| Quantity: I respond to the objection concerning:
- 3a. |X| The total quantity of water used in cubic feet per second.
8. |X| Period of Year: I respond to the objection concerning the period of year when water is used or is necessary for the purpose stated.
9. |X| Place of Use: I respond to the objection concerning:
- 9a. |X| The legal description of the place of use.
10. |X| Consumptive Use: I respond to the objection concerning the annual volume of consumptive use.
11. |X| Remarks: I respond to the objection concerning the "remarks" listed with the water right.
14. |X| Other: I respond to the objection concerning:

ALL MATTERS RAISED IN THE CLAIMANTS' ANSWER,
AFFIRMATIVE DEFENSES AND PRAYER FOR RELIEF.

REASONS SUPPORTING EACH BOX CHECKED

In response to Statement of the Objection items 3 and 3.a, and all allegations of the objection regarding those items, IDWR responds as follows: (1) it recommended the amount of water it determined was being beneficially used; (2) the claimant is not entitled to any amount greater than that which is beneficially used (Idaho Code Secs. 42-104 and 42-1402); (3) the recommendation of the director to the SRBA Court as to how the right should be decreed does not constitute a taking because it is simply a recommendation and not a final determination of the right; and (4) the eventual decree by the SRBA Court of the amount of water beneficially used, even if less than the amount previously decreed, will not constitute a taking because the right is limited to that amount beneficially used.

In further response to this objection item, IDWR responds that it recommended this element of the water right as claimed.

In response to Statement of the Objection item 8, and all allegations of the objection regarding that item, IDWR responds as follows: (1) The decree asserted by the claimant does not contain a period of use decreed for this water right. (2) Idaho Code Sec. 42-1411(2)(g) requires the director to determine the period of use of each water right acquired under state law that is recommended in the director's report. (3) IDWR has developed irrigation season of use standards for various climatic areas throughout the state based on a 75% chance of a 24 degree fahrenheit frost. (4) The irrigation season of use cannot exceed the period in which water may be beneficially used. (5) The period of the year during which this water right may be used is consistent with the standard irrigation season of use for the area in which the place of use of this water right is located. (6) Water may be used for irrigation outside the standard season of use, subject to the conditions set forth in general provision 12b of the director's report. (7) The recommendation of the director to the SRBA Court as to how the right should be decreed does not constitute a taking because it is simply a recommendation and not a final determination of the right. (8) The eventual decree by the SRBA Court of the irrigation season of use will not constitute a taking because the right is limited to the period in which water may be beneficially used.

In further response to this objection item, IDWR responds that it

(Over)

recommended this element of the water right as claimed. By now seeking a year round season of use for irrigation, the claimant improperly seeks to use the objection process to amend the claim. A claimant must obtain leave of the court to amend a claim after a director's report is filed, just as a party must obtain leave of the court to file a late claim after the director's report is filed. Once leave of the court is granted, IDWR can investigate the amended claim and make an appropriate recommendation to the court.

In response to Statement of the Objection items 9 and 9a., and all allegations of the objection regarding those items, IDWR responds as follows: There is an error in the description of the place of use of the domestic portion of this right in the director's report. The recommendaiton should be corrected as shown in the attachment entitled "Recommended Water Rights Acquired Under State Law."

In further response to these items, IDWR responds that the recommended water right accurately describes the place of use of the remaining portions of the right.

In response to Statement of the Objection item 10 and all allegations of the objection regarding that item, IDWR responds as follows: (1) The decree asserted by the claimant did not set an annual volume of consumptive use for this water right. (2) Idaho Code Sec. 42-1411(2)(i) requires the director to determine the annual volume of consumptive use for each water right acquired under state law and recommended in the director's report. (3) Idaho Code Sec. 42-1401A(2) provides that the quantification of consumptive use "is included as a rebuttable presumption in a decree only for the purpose of transfers pursuant to section 42-222, Idaho Code"; therefore, the consumptive use claimed and recommended for this water right is included solely for use in future transfer proceedings. (4) The annual volume of consumptive use claimed and recommended is 3 acre feet per acre. This is the maximum volume of water consumed by the most water consumptive crop (pasture) that can be grown in the area during the period of year when water is used for irrigation, as provided for by Idaho Code Sec. 42-1401A(2). (5) The recommendation of the director to the SRBA Court as to how the right should be decreed does not constitute a taking because it is simply a recommendation and not a final determination of the right. (6) The eventual decree by the SRBA Court of the amount of water beneficially used, even if less than the amount previously decreed, will not constitute a taking because the

right is limited to that amount beneficially used.

In response to Statement of the Objection item 11, and all allegations of the objection regarding that item, IDWR responds that it has authority pursuant to Idaho Code Sec. 42-1411(2)(j) to include in its recommendations of water rights acquired under state law and recommended in the director's report "such other matters as are necessary to define the right." The remark or remarks objected to are necessary to adequately describe and define this water right.

In response to Statement of the Objection item 14, and all allegations of the objection regarding that item, see attached "IDWR's Response to Answer Affirmative Defenses and Prayer for Relief of Claimant".

In response to the sentence listed in Changes to the Director's Report, whereby the claimant attempts to "reserve the right to claim all purposes of use and quantities of use as shown by the evidence at trial," IDWR responds as follows: Insofar as this purported reservation of rights may constitute an attempt to reserve the right to amend at trial the claimant's notice of claim, the claimant improperly seeks to use the objection process to amend the claim. A claimant must obtain leave of the court to amend a claim just as a party must obtain leave of the court to file a late claim after the director's report is filed.

IDWR'S RESPONSE TO ANSWER, AFFIRMATIVE DEFENSES AND PRAYER FOR
RELIEF OF CLAIMANT

This portion of the response addresses the multi-page attachment to the objection (hereinafter "the attachment"), wherein the claimant admits or denies all sections of Parts I, II, and III of the director's report, asserts 27 affirmative defenses, and alleges a prayer for relief. The attachment contains the following sections, corresponding to the various sections of the director's report:

- (1) I. GENERAL RESPONSE
- (2) II. DESCRIPTIVE SUMMARY, (first unnumbered page of Part I of the director's report)
- (3) III. TABLE OF CONTENTS (second and third unnumbered pages of Part I of the director's report)
- (4) IV. 1. INSTRUCTIONS FOR USING THIS REPORT PART I (page 1 of Part I of the director's report)
- (5) IV. 2. SCOPE OF THE ADJUDICATION (pages 1-3 of Part I of the director's report)
- (6) IV. 3. PURPOSE OF THIS REPORT PART I (pages 3-4 of Part I of the director's report)
- (7) V. 1. BOUNDARIES OF BASIN (pages 4-6 of Part I of the director's report)

The attachment also contains part VIII, **AFFIRMATIVE DEFENSES** (pp. 20 through 28) and a **PRAYER FOR RELIEF** (untitled, p. 28).

In response to each of the items enumerated above IDWR responds that pursuant to Section 4 a.(2)(c) of SRBA Administrative Order 1, Rules of Procedure, IDWR generally denies each and every allegation, if any, contained in each enumerated portion of the attachment. IDWR affirmatively responds that neither SRBA Administrative Order 1, Rules of Procedure, nor Title 42, Chapter 14, Idaho Code, make provision for IDWR to affirm, amplify, or otherwise respond to the claimant's admissions, or to deny the claimant's denials, and that IDWR therefore does not believe that it is required to do so. Title 42, Chapter 14, Idaho Code solely defines the content and scope of the director's report. It is to contain a description of the water system and is to provide a recommendation as to each water right claimed and as to those matters necessary for administration of those water rights. Therefore, the content and scope of the objection is limited to those same matters. The attachment to the present objection asserts or otherwise raises matters not directly addressing the elements of the water right as recommended, the description of the water system, or the general provisions. Rather, the attachment raises broad issues as to the constitutional, statutory and administrative efficacy of the entire adjudication process. All such issues should be raised by means of motions to designate basinwide issues and similar procedural vehicles specifically designed to provide for basinwide notice and participation. They should not be permitted to divert the focus of any individual subcase away from the issues directly connected to the elements of the water right and the administration thereof. Therefore, because the attachment to the present objection is not within the scope of the statutory purpose of an objection it should be stricken.

However, in the event that the court should determine that all or part of the attachment is properly within the scope of the objection, IDWR further responds as follows:

IDWR affirmatively responds that all statements within the director's report are properly included therein pursuant to Title 42, Chapter 14, Idaho Code, and in particular pursuant to Idaho Code §§ 42-1411 and 42-1412(8); and that the provisions of the Idaho Rules of Civil Procedure regarding pleadings are inapplicable to the extent that they are in conflict with the statutory requirements. Therefore IDWR denies all allegations directed at the contents of the director's report.

As to the enumerated portions of the attachment addressing the listings of recommended water rights, abstracts of federal reserved water right claims, or negotiated agreements, other than the individual recommendation that is the subject of this objection, IDWR responds that such claims or agreements are not brought before this court by this objection.

Responding to the 27 affirmative defenses asserted in the attachment, IDWR generally denies each and every affirmative defense asserted. IDWR further responds that affirmative defense numbers 1, 2, 4, 5, 10, 11, 12, 18, and 22, asserting various violations of civil or constitutional rights, fail to comply with the requirements I.R.C.P. 9(b) providing that in all averments of violation of civil or constitutional rights the factual circumstances constituting such violation must be stated with particularity. Accordingly, IDWR asserts that those affirmative defenses should be stricken.

In response to that portion of the multi-page attachment to the objection wherein the claimant asserts a prayer for relief, IDWR responds as follows:

1. IDWR denies that the director's report asserts any claims against the claimant; rather, the director's report contains only the recommendation of the director as to how the claimant's water right should be decreed and administered.
2. IDWR denies that the claimant is entitled to have the water right decreed as claimed unless in the director's report the water right has been recommended as claimed.
3. IDWR denies that any acts upon its part constitute the taking of private property for which just compensation should be allowed and awarded.
4. IDWR denies that the claimant is entitled to recover court costs and reasonable attorney fees.
5. IDWR denies that the claimant by this objection has raised any claims against IDWR entitling such claimant to any relief other than the eventual judicial determination and decree of the various elements of the claimant's water right, if any, and of those related matters necessary to describe and administer that water right.

MEMORANDUM

To: Nick Spencer, SRBA Attorney

From: helen Harrington-Thornton

Date: November 23, 1992

Subject: Basin 36 Recommended Right 36-00061

=====

During a review of recommended rights, I came across the following problem that needs to be addressed in an amendment to the Director's Report --

The place of use for domestic use is actually Range 13E, rather than Range 14E as recommended.

MICROFILMED

OCT 11 1994

To: DWR60::CHRISTENSEN
CC: THORNTON
Subj: Review of Basin 36 Recommendation, Please

Good morning. I understand that you'd like to move forward and never look back at Basin 36, however ...

I have noted a possible error in our recommendation on 36-00061. When you responded to the NOE, is it possible that you put in the wrong Range? When I was down there last week, I looked in the file and it appears to me that the domestic use should be located in Range 13E, rather than Range 14E as it was recommended. However, I can't really confirm that from the map in the file, so perhaps you have more information on which to base the recommendation. The claim originally claimed 13E.

If you would please look at the file and let me know which is right, I'd appreciate it. If we will need to change our recommendation, I can write a note to the attorney.

Thanks.

*It appears that I entered 14N rather than
the required 13N as it should have been. I notified

INSTRUCTIONS

This form must be used to file an objection to any water right recommended in the Director's Report. You may object to one water right per objection form. The water right number you are objecting to must be indicated above in the blank space following "Case No." To object to more than one water right, you must file a separate objection form for each. Forms may be obtained from the Idaho Department of Water Resources (IDWR), or you may copy or reproduce this blank form, as long as it is identical to the court's form. You must file your objection by the deadline shown in the notice that IDWR mailed to you. The objection must be received by the court on or before the deadline specified. Instructions for mailing this objection are found at Page 6, and must be strictly followed.

Any party physically filing 25 (twenty-five) or more objections must make an appointment with the Clerk of the Adjudication Court and arrange for an appointment to file multiple objections.

(Over)

MICROFILMED
OCT 11 1994

By filing an objection form, you are certifying that the objection is well-grounded in fact; is warranted by existing law or a good-faith argument for the extension, modification or reversal of existing law; and that it is not filed for any improper purpose, such as to harass, cause unnecessary delay or needless increase in the cost of litigation.

I. GENERAL INFORMATION

Please fill in the following information:

1. Person objecting:

Name: Howard L. and Rhonda K. Morris

Address: 1101 E 2900 So

Hagerman, ID 83332

Briefly describe your interest in this water right:

Decreed water right pursuant to New

International Mortgage Bank v. Idaho Power

Co. dated 3/22/1932 with a priority date of

12/12/1901

2. Owner of the water right:

Name: Howard L. and Rhonda K. Morris

Address: 1101 E 2900 So

Hagerman, ID 83332

3. If this objection is filed by an attorney:

Attorney Name: Patrick D. Brown & Penelope Parker

Attorney Address: Hepworth, Nungester & Lezamiz

P.O. Box 389, Twin Falls, ID 83303

Attorney Phone No.: (208) 734-7510

If filed by an attorney, notice of pending court proceedings will be sent to the attorney only.

II. STATEMENT OF THE OBJECTION

Please check each "box" which states your objection to the recommendation in the Director's Report.

1. ☐ Name and Address: I object to the name and/or address of the owner of the water right.
2. ☐ Source: I object to the source of water.
3. ☒ Quantity: I object to:
 - a. ☒ the total quantity of water used in cubic feet per second; or
 - b. ☐ the total quantity of water stored in acre-feet per year; or
 - c. ☐ the total quantity of water reserved for each and every purpose, including all present and future uses.
4. ☐ Priority Date: I object to the priority date.
5. ☐ Points of Diversion: I object to the legal description of the point(s) of diversion.
6. ☐ Instream Flow: I object to the legal description of the beginning and ending points of the instream flow.
7. ☐ Purpose(s) of Use: I object to the purpose(s) of use.
8. ☒ Period of Year: I object to the period of year when water is used or is necessary for the purpose stated.
9. ☒ Place of Use: I object to:
 - a. ☒ the legal description of the place of use; or
 - b. ☐ the number of irrigated acres within each forty (40) acre subdivision.
10. ☒ Consumptive Use: I object to the annual volume of consumptive use.
11. ☒ Remarks: I object to the "remarks" listed with the water right.

(Over)

12. ☐ Water Right Recommendation: I object to:

a. ☐ this water right being recommended at all; or

b. ☐ this water right not being recommended.

13. ☐ Description of Reservation: I object to the legal description of the reservation.

14. ☒ Other: I object to: See attached

REASONS SUPPORTING EACH BOX CHECKED

In the space following, you must state the reason(s) by number for each box checked. You may use additional pages if necessary.

See page 7

CHANGES TO THE DIRECTOR'S REPORT

Specifically describe how you want the Director's Report to be changed. You may use additional pages if necessary.

Maximum quantity: as decreed and/or beneficially, whichever is
higher with corresponding change in consumptive use; period of
use: 1/1 to 12/31; place of use: domestic R13, not R14; acres:
add 4; remarks: strike all except "water delivered through
Hoagland Ditch."

Please note: You should attach copies of documents which support your objection. Note on each document the "box number" it supports.

☒ Check here if you are submitting documents. Please list each document by the title and number of pages. You may use additional pages if necessary.

INSTRUCTIONS FOR MAILING

You must mail the objection, including all attachments, to the Clerk of the Court. **FAX filings will not be accepted by the Clerk of the Court.** You must also send a copy to the owner of the water right, if other than yourself; to the Office of the Attorney General, State of Idaho; and to the United States Department of Justice, as set out below in the Certificate of Mailing. Finally, you must sign the Certificate of Mailing to show that you followed these steps.

CERTIFICATE OF MAILING

I hereby certify that on the 28 day of April, 1993, I mailed the original and copies of the foregoing objection, including all attachments, to the following persons, by mailing the original and/or true and correct copies, postage prepaid and addressed as follows:

1. Original to:

Clerk of the District Court
Snake River Basin Adjudication
253 Third Avenue North
P.O. Box 2707
Twin Falls, Idaho 83303-2707

2. One copy to the owner of the water right, and you must fill in the following information:

Owner name: Howard L. and Rhonda K. Morris

Owner's address: 1101 E 2900 So

Hagerman, ID 83332

3. One copy to:

Chief, Natural Resources Division
Office of the Attorney General
State of Idaho
P.O. Box 44449
Boise, Idaho 83711-4449

4. One copy to:

United States Department of Justice

550 West Fort Street, Box 33
Boise, ID 83724

Signature of Objector or attorney
mailing on Objector's behalf

REASONS SUPPORTING EACH BOX CHECKED, page 4

Box 3, 3a and 10 - IDWR recommends an amount less than decreed and/or beneficially used. A reduction in water right would constitute a taking.

Box 8 - IDWR recommends a period of use less than decreed and/or beneficially used. A reduction in water right would constitute a taking.

Box 9 - Director's Report fails to accurately state the place of use.

Box 11 - This is beyond the statutory authority vested in the Director.

CHANGES TO DIRECTOR'S REPORT, page 4

Objectors reserve the right to claim all purposes of use and quantities of use as shown by the evidence at trial.

MICROFILMED

OCT 11 1994

Question 14., page 4, Other

I.

GENERAL RESPONSE

Except as specifically admitted herein, objectors deny each and every allegation contained in the Director's Report, any related or subsidiary pleadings, and/or any attachments thereto.

II.

DESCRIPTIVE SUMMARY

(DIRECTOR'S REPORT PART I)

(hereinafter DRP-I)

(DRP-I at first unnumbered page)

The objectors admit that Part I of the Director's recommendation contains some claims to water rights appropriated under state law from Reporting Area 3. The objectors deny all other averments because the objectors lack sufficient knowledge or information upon which to form a belief as to the truth of the averments.

III.

TABLE OF CONTENTS

(DRP-I at 2nd and 3rd unnumbered pages)

The objectors admit that the Table of Contents reflects the page numbers of the referenced sections and deny all other averments based upon the objectors' lack of sufficient knowledge or information upon which to form a belief as to the truth of the averments and because any averment, expressed or implied, is so

indefinite that it prevents the objectors from knowing what would be admitted or denied.

IV.

INTRODUCTION

1. INSTRUCTIONS FOR USING THIS REPORT PART I. (DRP-I at page 1)

The objectors admit that Part I consists of seven sections; that the description of the water system includes a brief description of Reporting Area 3 and an illustration of the boundaries of the reporting area; that the water rights and the list of the recommended rights are grouped alphabetically by source and listed chronologically by priority date; that the rights or claims in the list of claims/rights not recommended are listed numerically by water right number; and that brief instructions are found at the beginning of the applicable sections. The objectors deny that any description or any implication that the description of the water system or the illustrations are true and accurate due to lack of knowledge or information regarding the truth of the averment; deny that the general provisions apply to all water rights or define or limit classes of water rights; and deny that the general provisions "will affect your water right," based upon insufficient knowledge or information upon which to form a belief as to the truth of the averments.

2. SCOPE OF THE ADJUDICATION. (DRP-I at page 1 - 3)

The objectors deny all averments in paragraph a., due to lack of sufficient knowledge or information upon which to form a belief as to the truth of the averments.

Regarding paragraph b., the objectors lack sufficient information or knowledge upon which to form a belief as to whether water rights which are not claimed in the adjudication will or will not exist upon entry of the court's decree and, therefore, deny such averment. The objectors admit that the court entered an order dated January 17, 1989, but presently lack sufficient knowledge to know whether any of the other averments concerning the court's order are true or accurate and, therefore, deny the same. The objectors deny that a right must be adjudicated before water may be distributed by the director. The objectors deny all other averments in paragraph b.

3. PURPOSE OF THIS REPORT PART I. (DRP-I at page 3 - 4)

The objectors admit that portion of the first sentence which states "This report contains the Director's recommendations to the SRBA District Court as to the nature and extent of water rights," but deny that such recommendations "are necessary for administration of water rights in Reporting Area 3," and further deny the Director has authority to "administer" such rights.

Regarding the second paragraph, the objectors admit that all water rights remain subject to the applicable law generally, but deny the remainder of the second paragraph.

Regarding the third paragraph of this section, the objectors deny all averments therein based upon lack of knowledge or information upon which to form a belief as to the truthfulness of the averments.

MICROFILMED
OCT 11 1994

V.

DESCRIPTION OF THE WATER SYSTEM: BASIN 36

1. BOUNDARIES OF BASIN. (DRP-I at pages 4 - 6)

Regarding the first paragraph of this section, the objectors deny all averments due to a lack of knowledge or information upon which to admit or deny.

Regarding the second, third and fourth paragraphs of this section, the objectors admit that as broad statements, those paragraphs are generally accurate but the statements are so broad and attenuated from any matter relevant to the objectors' water right that the objectors are unable to know what would be implicitly admitted or denied and therefore, deny the same.

With respect to the fifth paragraph of this section, the objectors lack sufficient knowledge or information upon which to form a belief as to the truth of any matter averred and, therefore, deny the averments.

2. WATER SOURCES. (DRP-I at page 6)

The objectors admit that the Snake River Plain Aquifer is the source of outflows of springs located along the Snake River Canyon Wall in the Hagerman Valley. The objectors presently lack sufficient knowledge or information upon which to form an opinion as to the truth of the other averments set out in this section and, therefore, deny the same.

3. DEVELOPMENT OF WATER USE. (DRP-I at pages 6 - 9)

The objectors admit that numerous factual and historical averments are set out in this section, which may be accurate, but

these objectors have no basis for knowing whether some or all of the averments are intended to relate to the objectors' claims and, thus, are prevented from knowing what would be admitted or denied. Therefore, the averments are denied.

VI.

GENERAL PROVISIONS

GENERAL PROVISIONS 1 - 8 APPLY TO ALL WATER RIGHTS IN BASIN 36.
(DRP-I at page 9)

The objectors deny that "General Provisions 1 - 8" apply to all water rights in Basin 36 as the statements are so broad and attenuated from any matter relevant to the objectors' water rights, that the objectors are unable to know what would be explicitly admitted or denied. The objectors also specifically deny that general provisions 1-8 apply to the objectors' right.

1. EFFECT OF ADJUDICATION. (DRP-I at page 9)

With respect to paragraph a., the objectors presently have no knowledge or information upon which to form a belief as to the truth of whether a future decree would supersede prior decrees, or whether unclaimed rights would cease to exist and, therefore, deny the same.

Regarding paragraph b., the objectors deny that the Director has any powers to administer water rights other than those specifically delegated by the Legislature of the State of Idaho, and which do not violate the objectors' state and federal constitutional rights, and therefore the averments are denied.

MICROFILMED

OCT 11 1994

2. GENERAL ADMINISTRATIVE PROVISIONS. (DRP-I at pages 9 - 10)

The objectors admit paragraphs a. and b.

3. CONJUNCTIVE ADMINISTRATION (DRP-I at page 10)

The objectors deny the conjunctive administration provisions based upon the objectors' lack of sufficient knowledge or information upon which to form a belief as to the truth of the averments and because any averment expressed or implied is so indefinite that it prevents the objectors from fairly understanding what would be admitted or denied. Additionally, the objectors deny that the Department of Water Resources has any statutory or regulatory authority for the "conjunctive administration" as therein described.

4. ADMINISTRATION OF GROUND WATER RIGHTS (DRP-I at page 10)

The objectors deny the averments within this section.

5. ADMINISTRATION OF BASIN 36 RELATIVE TO THE SNAKE RIVER (DRP-I at page 10)

The objectors admit that the springs are hydrologically interconnected with the Snake River Aquifer, but deny all other averments based upon the objectors' lack of sufficient information or knowledge upon which to form a belief as to the averments herein. The objectors additionally deny any said averments expressed or implied because the averments are so indefinite and generalized as to prevent the objectors from fairly understanding what would be admitted or denied.

6. ADMINISTRATION OF SMALL DOMESTIC AND STOCK WATER RIGHTS (DRP-I at page 11)

The objectors admit that part of the first sentence of subparagraph a. to the effect that "small domestic and stock water rights from surface water are not subject to administration," but deny the balance of said sentence and said paragraph.

The objectors admit the first sentence of paragraph b., and deny the balance of that paragraph because the criteria set forth therein ("if the director determines that administration is necessary") is so ambiguous, indefinite and uncertain that it prevents the objectors from knowing what would be admitted or denied, and by further reason of the fact that no statutory or regulatory authority exists conferring such sweeping and unlimited authority upon the Director or the Department.

The objectors deny the averments in paragraph c. as the averments are inaccurate and because the objectors lack sufficient knowledge or information upon which to form a belief as to the truth of the matters averred.

7. MEASURING DEVICES AND CONTROL WORKS (DRP-I at page 11)

The objectors deny all averments contained herein as such averments are based upon an indeterminate subjective standards which are so ambiguous and indefinite as to prevent the objectors from fairly knowing what would be admitted or denied. Additionally, no statutory or regulatory authority exists conferring such sweeping and unlimited authority upon the Director or the Department as is alleged in this paragraph.

MICROFILMED
OCT 11 1994

8. FIRE FIGHTING PURPOSES (DRP-I at page 11)

The objectors admit that subparagraph a. and subparagraph b. are generally accurate statements of present law, but deny the averments are in any way relevant to defining the objectors' right.

9. CONSUMPTIVE USE (DRP-I at page 12)

The objectors lack sufficient knowledge or information upon which to form a belief as to the truth of any matter averred and, therefore, deny the same.

GENERAL PROVISION 10 APPLIES TO ALL WATER RIGHTS IN BASIN 36 SHOWN WITH DOMESTIC USE AS A PURPOSE OF USE (DRP-I at page 12)

The objectors deny that "General Provision 10" applies to all water rights in Basin 36 shown with domestic use as a purpose of use as the statements are so broad and attenuated from any matter relevant to the objectors' water rights, that the objectors are unable to fairly understand what would be explicitly admitted or denied and, therefore, deny the same.

10. DOMESTIC USE (DRP-I at page 12)

The objectors deny that the definition of "domestic use" contained in paragraphs a., b., and c. is consistent or in conformity with the definition of such term for purposes of the Idaho Constitution, or statutory definition contained in I.C. Section 42-111 as now, or as heretofore in effect at relevant times. The objectors further deny that the limitations set forth therein exist, are in force, or apply or serve in any way to limit objectors' rights.

GENERAL PROVISION 11 APPLIES TO ALL WATER RIGHTS IN BASIN 36 SHOWN WITH STOCK WATER USE AS A PURPOSE OF USE. (DRP-I at page 13)

The objectors deny that "General Provision 11" applies to all water rights in Basin 36 shown with stock water use as a purpose of use as the statements are so broad and attenuated from any matter relevant to the objectors' water right, that the objectors are unable to fairly understand what would be admitted or denied and, therefore, deny the same.

11. STOCK WATER USE (DRP-I at page 13)

The objectors deny the averments herein as beyond the scope and applicability of the definition as provided by Idaho law as now, or as heretofore in effect at relevant times. The objectors further deny that the limitations set forth therein limit the objectors' right or are relevant to the right.

GENERAL PROVISIONS 12 - 16 APPLY TO ALL WATER RIGHTS IN BASIN 36 SHOWN WITH IRRIGATION AS A PURPOSE OF USE (DRP-I at page 13)

The objectors deny that "General Provisions 12 - 16" apply to all water rights in Basin 36 shown with irrigation as a purpose of use as the statements are so broad and attenuated from any matter relevant to the objectors' water right that the objectors are unable to fairly understand what would be admitted or denied.

12. IRRIGATION USE. (DRP-I at pages 13 - 14)

The objectors deny all averments based upon the objectors' lack of sufficient knowledge or information upon which to form a belief as to the truth of the averments and because

prevent the objectors from fairly knowing what would be admitted or denied; because the standard utilized ("as determined by the director") is ambiguous, subjective and indefinite so as to prevent objectors from knowing what would be admitted or denied; and because it is both expressly and implicitly in excess of the power and authority conferred upon the State of Idaho, the Director or the Department by the Constitutions of the United States and State of Idaho, pertinent provisions of the Idaho Code or valid applicable regulations, if any, adopted by the Department in conformity with law. Therefore, the objectors deny the same.

13. DIVERSION VOLUME FOR IRRIGATION. (DRP-I at page 14)

The objectors admit that Figure 1 generally depicts certain lands in Basin 36; however, the objectors deny all other averments including that the amounts set forth are the maximum annual volume of water reasonably required at the field headgate for irrigation, either within Basin 36 in general, or upon objectors' real property in particular. The objectors additionally deny that the maximum annual volumes per acre set forth is that which is "reasonably required for irrigation unless a higher annual diversion volume is reasonably required due to conveyance losses, method of irrigation or field conditions;" because the standard utilized ("as determined by the director") is ambiguous, subjective and indefinite so as to prevent objectors from knowing what would be admitted or denied; and because it is both expressly and implicitly in excess of the power and authority conferred upon the State of Idaho, the Director or the Department

by the Constitutions of the United States and State of Idaho, pertinent provisions of the Idaho Code or valid applicable regulations, if any, adopted by the Department in conformity with law. Therefore, the objectors deny the same.

14. CONSUMPTIVE USE FOR IRRIGATION. (DRP-I at page 14 and 15)

The objectors admit that the recommended water rights contained within the Director's Report show only the irrigation use listed unless otherwise indicated in "Remarks." The objectors deny all other averments contained within this section, including the amount of maximum annual volume of consumptive use per acre in the northern and southern portions of the basin, all of which is beyond the scope of any power or authority vested in the Director or the Department, and contrary to fact; historical use; established, vested, decreed, licensed or permitted rights.

15. AMOUNT OF COMBINED WATER RIGHTS FOR IRRIGATION. (DRP-I at page 15)

The specific averments have no relationship to or basis in fact relating to the individual needs or rights of the objectors, and accordingly, objectors deny this section in its entirety. In addition, no statutory or regulatory authority exists conferring upon the Director, or the Department, the power to limit use and ownership of objectors' private property rights as alleged.

MICROFILMED
OCT 11 1994

16. DIVERSION RATES IN EXCESS OF .02 CFS PER ACRE. (DRP-I at page 15 - 16)

The objectors deny the averments contained in this section in its entirety.

17. INSTRUCTIONS FOR USE OF LIST OF RECOMMENDED WATER RIGHTS. (DRP-I at page A-i, A-ii and A-iii)

The objectors admit that each water right in the list of recommended water rights includes a description including right number, name and address, source, maximum quantity, consumptive use, priority date, point of diversion, purpose of use, period of use, place of use, basis of right and others. The objectors lack sufficient knowledge or information upon which to form a belief as to the truth of any matter averred in said descriptions other than that the descriptions allegedly include the Director's or Department's version of the facts as they relate to the matters identified. Objectors deny the accuracy of the substantive allegations or information set forth with regard to the objectors' right.

18. IDAHO DEPARTMENT OF WATER RESOURCES RECOMMENDED WATER RIGHTS ACQUIRED UNDER STATE LAW. (DRP-I, pages A-1 - B-25)

The objectors lack sufficient knowledge or information upon which to form a belief as to the truth of any matter averred in said recommended water rights other than those specific admissions contained in Questions 1 - 12 of the attached individual objection, and therefore deny the same.

DIRECTOR'S REPORT FOR REPORTING AREA 3 (BASIN 36)

(DIRECTOR'S REPORT PART II)

I.

Objectors do not understand the allegations, averments or contents of Part II of the Director's Report for Reporting Area 3 (Basin 36) to pertain or relate to objectors or their claims, and do not believe any response is required. To the extent a response is required, objectors deny the same in its entirety.

DIRECTOR'S REPORT FOR REPORTING AREA 3 (BASIN 36)

(DIRECTOR'S REPORT PART III)

I.

No report denominated as Part III of the Director's Report for Reporting Area 3 (Basin 36) has been filed, and accordingly objectors are unable to admit, deny or otherwise response to the same. Objectors do not understand that the contemplated subject matter of such Part III will relate or pertain to objectors or their claims, and no response is required in any case. To the extent any response is required, objectors deny the same in its entirety.

VIII.

AFFIRMATIVE DEFENSES

Pursuant to I.R.C.P. 8(c), objectors herewith state the following matters of affirmative defense or avoidance:

AFFIRMATIVE DEFENSE NO. 1

The objectors' water right is an incorporeal form of real property (as defined by Idaho Code Sections 7-703, 73-114, 55-101,

and like statutes) protected by Section 14, Article 1, of the Idaho Constitution, and the Fifth Amendment to the United States Constitution, and allege that the actions of the Director in recommending, limiting and/or regulating said rights is an unconstitutional infringement upon and a taking of private property, without just compensation and violation thereof.

AFFIRMATIVE DEFENSE NO. 2

The adjudication authorization legislation, I.C. Section 42-1401, et seq., on its face and as applied by the Director and the Department constitutes an improper delegation of constitutional power and authority conferred upon the executive, legislative and/or judicial branches of government and as such violate the provisions governing separation of powers set forth in Article 2, Section 1, Idaho Constitution.

AFFIRMATIVE DEFENSE NO. 3

The procedure set forth in the adjudication authorization legislation, statutes, I.C. Section 42-1401, et seq., and any rules, regulations, procedures, policies or standards promulgated by the Director and/or the Department, if any, are vague and so lacking in reasonable specificity so as to render them impossible of reasonable comprehension, or consistent and meaningful application.

AFFIRMATIVE DEFENSE NO. 4

The procedures, rules, regulations, policies or standards, if any, adopted, implemented and applied by the Department and/or the Director violate the equal protection and due

process clauses of the Fourteenth Amendment, United States Constitution, and Article 1, Sections 2 and 13, Idaho Constitution.

AFFIRMATIVE DEFENSE NO. 5

The adjudication authorization legislation, Idaho Code Section 42-1401, et seq., and the actions of the Director and Department in recommending, limiting and/or regulating the objectors' water right constitutes a violation of 42 U.S.C. Section 1983.

AFFIRMATIVE DEFENSE NO. 6

The water right owned by the objectors is the subject of valid existing decrees issued by the Director and Department, which decrees are binding upon the State of Idaho, the Department and the Director. As a result, the State of Idaho, the Department and the Director are precluded by the doctrines of res judicata, collateral estoppel, judicial estoppel and the like from relitigating or questioning the validity, existence or priority of such right, and/or from taking any position in the Director's Report, or otherwise, which is inconsistent with such decrees.

AFFIRMATIVE DEFENSE NO. 7

The Director's recommendations are contrary to decreed rights, historical use and extent licenses and permits issued by the Department. There has been no forfeiture nor abandonment of the objectors' water rights, nor have the objectors' water rights been prescriptively or adversely possessed, nor have such decrees been vacated or such licenses and permits revoked.

MICROFILMED

AFFIRMATIVE DEFENSE NO. 8

The Directors' Report fails to state a claim to the extent the same asserts a forfeiture, abandonment, prescriptive or adverse acquisition or loss, or loss resulting from estoppel, of the objectors' water right in the absence of any fact upon which forfeiture, abandonment, prescriptive or adverse acquisition for loss, or loss resulting from estoppel, may be based or asserted.

AFFIRMATIVE DEFENSE NO. 9

The objectors' water right is an incorporeal form of real property, as defined by Idaho Code Sections 7-703, 73-114, 55-101, and like statutes, and, as such, pursuant to Idaho Code Section 7-904, et. seq., the actions of the Director in attempting to limit, reduce and/or regulate such rights, and the assertion of some inconsistent proprietary ownership or right to use or control by the State of Idaho, constitutes an unauthorized and invalid taking of private property without the payment of just compensation, or compliance with statutory requirements, all in violation of Title 7, Chapter 7, Idaho Code.

AFFIRMATIVE DEFENSE NO. 10

The actions of the Director, the Department and their agents, servants and employees in recommending, limiting, reducing and/or regulating objector's water rights, either as alleged in the Director's Report or as in fact applied, violates objectors' rights as secured by Art. 1, Section 1; Art. 15, Sections 3, 4 and/or 5; and/or as otherwise provided in the Constitution of the State of Idaho.

AFFIRMATIVE DEFENSE NO. 11

The various allegations, statements and assertions contained in the Director's Report concerning the Department and/or the Director's position or intentions with regard to the adjudication, as well as the implementation of statutes and/or regulations, as well as the administration of water or management of water rights or claims to the beneficial uses of water, if implemented, constitute a violation of various provisions the United States and Idaho constitutions, and/or a violation of the letter, spirit and/or intent of various statutes enacted by the legislature, and/or constitute an exercise of purported authority or powers either in excess of those conferred by law, or in a manner inconsistent with those conferred by law, or both.

AFFIRMATIVE DEFENSE NO. 12

The individual recommendations relating to the specific water right of the objectors as set forth in the Director's Report are (1) not based upon substantial evidence and/or are not, in fact, the product of any reasonable, complete or accurate investigation as required by law; (2) are the product of arbitrary and capricious action on the part of the Department or the Director; (3) have been made in excess of the constitutional and statutory authority of the Department and the Director; (4) have been made upon an unlawful and invalid procedure; (5) are affected by various and sundry errors of law; and/or (6) are clearly erroneous in view of the reliable, probative and substantial evidence.

MICROFILMED
OCT 11 1994

AFFIRMATIVE DEFENSE NO. 13

The Director's Report is a pleading subject to the provisions of the Idaho Rules of Civil Procedure, including, but not limited to the requirement of I.R.C.P. 8(a)(1) that such pleadings contain a clear and plain statement of the facts, demonstrating an entitlement to relief. The Director's Report violates such provision.

AFFIRMATIVE DEFENSE NO. 14

The Director's Report fails to state a claim upon which relief may be granted.

AFFIRMATIVE DEFENSE NO. 15

The Director's Report is subject to, and must comply with, the requirements of Idaho Code Section 42-1411. The Director's Report does not comply with the requirements of the statute.

AFFIRMATIVE DEFENSE NO. 16

In conducting the investigation and compiling the Director's Report, the Department and the Director have not complied with the requirements of Idaho Code Section 42-1410.

AFFIRMATIVE DEFENSE NO. 17

In conducting the investigation and compiling the Director's Report, the Department and the Director have not complied with the requirements of Idaho Code Section 42-1416.

AFFIRMATIVE DEFENSE NO. 18

The procedures specified in the authorizing legislation and procedural rules promulgated in accordance therewith serve to

deny objectors due process of law in violation of Amendment Fourteen to the Constitution of the United States and Art. 1, Section 13, Idaho Constitution.

AFFIRMATIVE DEFENSE NO. 19

The "General Provisions" and "Other Statements" contained in the Director's Report, along with the Claims Investigation Manual, Adjudication Memoranda and other materials of a similar nature used or employed by the Department, the Director and/or their agents, servants and/or employees constitute rules and regulations which were required to be proposed, promulgated, adopted and approved in conformity with the Administrative Procedures Act and other applicable statutory provisions. The Department, Director and their agents, servants and employees have failed to comply with such requirements, and accordingly, the "General Provisions," "Other Statements", Claims Investigation Manual and the like are invalid, void and of no force or effect.

AFFIRMATIVE DEFENSE NO. 20

Neither the "General Conditions," the Claims Adjudication Manual, Adjudication Memoranda or other promulgations, adoptions, policies, or the like have been submitted to or approved by the Legislature as required by Idaho Code Section 67-5217.

AFFIRMATIVE DEFENSE NO. 21

The relief requested by the Department and the Director in the Director's Report are beyond and in excess of the subject matter jurisdiction of the Court.

MICROFILMED

AFFIRMATIVE DEFENSE NO. 22

The actions of the Legislature, or the Department and the Director to enact, adopt, implement or enforce statutes, regulations, rules or policies subsequent to November 19, 1987, and to apply or enforce the same for the purpose of, or with the effect of recommending, diminishing or altering objectors' water rights, constitute a violation of Amendment Fourteen, United States Constitution; Art. 1, Section 13, Idaho Constitution; the SRBA authorization legislation; and Idaho Code Sections 73-101 and 73-106.

AFFIRMATIVE DEFENSE NO. 23

These proceedings are subject to the requirements and provisions of Idaho Code Sections 12-117, 12-121, 12-123 and I.R.C.P. 11, and the provisions of the private attorney general doctrine, and other related doctrines, and the Department, Director and State of Idaho are obligated to objectors for the payment and reimbursement of any and all reasonable costs or attorney fees incurred herein.

AFFIRMATIVE DEFENSE NO. 24

The Director's Report asserts what amounts to be a taking of private property by power of eminent domain as governed by Idaho Code Section 7-701 et seq., and as such, venue is therefore improper.

AFFIRMATIVE DEFENSE NO. 25

The Department and the Director are equitably estopped from seeking any reduction in the quantity, quality or priority of

objectors' water rights by virtue of prior statements, representations and actions of the Department, Director or their agents, servants and employees.

AFFIRMATIVE DEFENSE NO. 26

The Department and the Director are barred by laches and the applicable statutes of limitation, including, but not limited to, Idaho Code Sections 5-202, 5-203, 5-204, 5-206, 5-207, 5-208, 5-215, 5-218, 5-219(2), 5-224 and/or 5-241.

AFFIRMATIVE DEFENSE NO. 27

Objectors hereby reserve the right to assert any further affirmative defenses not expressly stated herein, but which subsequently become apparent.

WHEREFORE, the objectors pray for judgment as follows:

1. That the State of Idaho take nothing by reason of its Directors' Report, and that this action, and any claims asserted against objectors, be dismissed.

2. That a decree be entered adjudicating the existence, validity, amount and priority of objectors' water rights in accordance with objectors' claims.

3. That to the extent the acts of the Department or Director constitute a taking of objectors' property for public use, that objectors be allowed and awarded just compensation therefor.

4. That the objectors be allowed all costs of suit and reasonable attorney fees incurred herein.

5. For such further relief to which the Court finds objectors justly entitled.

The notice of error must be received at IDWR by the **deadline date** printed below with your proposed recommendation.

YOUR DEADLINE FOR FILING A NOTICE OF ERROR IS: SEP-24-1992

1. Water right number: 36-00061
2. Name: HOWARD L. MORRIS & RHONDA K. MORRIS

MICROFILMED

JAN 21 1993

Address: 1101 East 2900 South, Route #1, Hagerman, Idaho 83332

Weekday Telephone Number: 208-837-6213

TEAR AT PERFORATIONS AND COMPLETE FORM ON OTHER SIDE

(Instead of filling in items 3 and 4 below you may include a copy of your proposed recommendation with the changes made on the copy.)

3. Describe the portion of proposed recommendation with which you disagree:
We disagree with the period of use and the elimination of the domestic use that has been recommended.

4. Describe the changes you wish to have made in the proposed recommendation:
We wish to have the period of use from March 15th to November 15th of each year as stated in the 1932 Federal Court Decree and the use of 0.04 cfs of water for domestic purposes.

5. Describe why you disagree with the proposed recommendation:
The extended period of use is needed because of the climate, growing season, crops grown, the ability of double cropping & etc. of the Hagerman Valley area. The domestic use is required to provide water for our home and outbuildings.

RE: RESPONSE TO NOTICE OF ERROR FOR CLAIMS 36-00061 &
36-00062.

Dear Mr Morris

As your claims are from the same source and for the same uses they have been evaluated as a combined right system. The department's recommendation for your claimed uses is based upon the legal limit for each use.

The combined irrigation recommendation is an inch to the acre. We have recognized the claimed rate for 36-00061 and the balance required to equal the inch to the acre under 36-00062.

The legal limit for stockwater is recommended under 36-00061 which has the earlier priority date. Any additional rate recommended under 36-00062 would exceed the legal limit established by the department for the number of cattle you claimed.

Based upon my phone conversation with Ms Morris, I am reinstating the domestic portion of 36-00061. We were under the impression that only Ms Omohundro used water from the Hoagland Tunnel.

The Director has reviewed the Period of Use for the Hagerman Valley and has changed that area to 3-15 to 11-15. This change is being made to all irrigation claims in the Valley.

If you still do not agree with the proposed IDWR recommendations to the court, you may file an objection with the court after you receive the final recommendation of your water right. The objection process will be explained when you receive your final recommendation of your water right.

Sincerely

Kelly K Christensen
Sr Water Resource Agent

REACH = SECTION OF CHANNEL
 LENGTH = LENGTH OF REACH, THE CHANNEL CAN BE DIVIDED INTO EQUAL LENGTH REACHES
 OR ACTUAL LENGTHS BETWEEN DELIVERY POINTS
 AVE WIDTH = AVERAGE TOP WIDTH OF REACH
 SEEPAGE = SOIL SEEPAGE RATE OF REACH
 WORSTELL LOSS = CONVEYANCE LOSS IN REACH BASED ON WORSTELL METHOD
 DELIVERY = TOTAL DELIVERIES IN REACH
 DELIVERY LEFT = SUM(DELIVERIES OF CURRENT AND REMAINING REACHES)
 LOSS FACTOR = WORSTELL LOSS/DELIVERY LEFT
 DELIVERY LOSS = SUM(LOSS FACTORS OF CURRENT AND PREVIOUS REACHES) X DELIVERY,
 REPRESENTS THE LOSSES ASSIGNED TO THE DELIVERIES IN THE REACH
 FLOW = TOTAL FLOW AT BEGINNING OF EACH REACH
