	)	and 36-15184

I. PROCEDURAL BACKGROUND

A claim for water right 36-15176 was filed in 1988, and an amended claim for water right 36-15184 was filed in 1991. *Motions to File Late Claims* were filed by Layne and Judy Osborne (hereafter "Osborne") for claim numbers 36-00071B, 36-00072, and 36-00074, on January 15, 1999. SRBA Presiding Judge Barry Wood granted the *Motions* in *Order Granting Motions to File Late Notices of Claim* (April 20, 1999). After the Late Notices of Claim were allowed to proceed under numbers 36-00071B, 36-00072, and 36-00074, Osborne stipulated to **withdraw** claim number **36-15176**. The claim originally numbered **36-15184** was **renumbered** as **36-00073**. Osborne filed a *Motion to Amend Notice of Claim* for 36-00073. Therefore, Osborne implicitly agreed to **withdraw** claim number **36-15184** since it duplicates **36-00073**. The Idaho Department of Water Resources filed *Amended Director's Reports* for all subcases in September 1999, and filed *Corrected Recommendations* in February 2000. Osborne and IDWR submitted *Standard Forms 5* prior to trial.

II. FINDINGS OF FACT

A. AMENDED DIRECTOR'S REPORTS

Amended Director's Reports for 36-00071B, 36-00072, 36-00073, 36-00074, 36-15176 and 36-15184 were filed September 27, 1999. The *Amended Director's Reports* recommended 36-15176 as **withdrawn** and recommended 36-15184 be **disallowed** because the claim was "renumbered and recommended as water right number 36-00073."

Osborne did not file Objections to the *Amended Director's Reports* for 36-15176 or 36-15184. Osborne did file Objections to the *Amended Director's Reports* for 36-00071B, 36-00072, 36-00073, and 36-00074 on quantity, acreage and conveyance loss. On October 22, 1999, North Snake Ground Water District filed Responses to the *Amended Director's Reports* for 36-00071B, 36-00072, 36-00073, and 36-00074.

B. CORRECTED RECOMMENDATIONS

Corrected Recommendations were filed by IDWR February 18, 2000, which amended the previous *Amended Director's Reports*. On March 17, 2000, Osborne filed Objections to the *Corrected Recommendations* for 36-00071B, 36-00072, 36-00073, and 36-00074 raising issues of quantity and conveyance loss. North Snake Groundwater District did not file Objections or Responses. NSGWD discontinued its participation in these subcases as a result of declining to file Objections or Responses.

C. STANDARD FORMS 5

Prior to trial, Osborne and IDWR settled these subcases with *Standard Forms 5* signed by IDWR and counsel for Osborne. The *Standard Forms 5* included the phrase:

Delivery of this right is subject to the terms of the April 28, 2000, letter from David R. Tuthill, Jr., P.E., Chief, Adjudication Bureau, to Patrick D. Brown, P.C., addressing the measurement of water diverted into the John Bell Ditch.

However, the claimant and IDWR agreed to delete that phrase from the "Other Provisions Necessary for Definition or Administration" portion of these rights. Instead the claimant and IDWR assert the following information is necessary to define or administer these water rights:

Due to leakage from the ditch back into the creek in the 200 feet of ditch immediately below the diversion structure, measurement of this right shall be based on the amount flowing in the ditch 200 feet below the point of diversion.

Letter from Nick Spencer dated Aug. 2, 2000; *Letter from Patrick D. Brown* dated Aug. 1, 2000.

This Special Master concurs that language is necessary to properly define and administer these water rights.

III. CONCLUSIONS

A. CLAIMS NOT RECOMMENDED

1. 36-15184

The claim originally numbered 36-15184 was renumbered as 36-00073. Because claim 36-15184 was renumbered, IDWR recommended that no right be included in any decree for 36-15184. Osborne did not object to IDWR's recommendation for disallowance. Therefore, IT IS RECOMMENDED that water right claim 36-15184 **not be confirmed** in any partial or final decree.

2. 36-15176

Osborne agreed to withdraw claim number 36-15176. Therefore, IT IS RECOMMENDED that water right claim 36-15176 **not be confirmed** in any partial or final decree.

B. CLAIMS RECOMMENDED AS STIPULATED TO IN *STANDARD FORMS 5*

Claims number 36-00071B, 36-00072, 36-00073, and 36-00074 proceeded with IDWR filing *Amended Director's Reports* and *Corrected Recommendations*. North Snake Ground Water District filed Responses after the *Amended Director's Reports* were filed, but discontinued participation in these subcases after the *Corrected Recommendations* were filed. Osborne objected to the *Corrected Recommendations* filed in February 2000. The Osborne objections were resolved by *Standard Form*

5 settlement documents signed by Osborne and IDWR¹ and further explained in the letters from Patrick D. Brown and Nick Spencer. Therefore, IT IS RECOMMENDED that water rights 36-00071B, 36-00072, 36-00073, and 36-00074 **be decreed** as stipulated to in the *Standard Forms 5* and as set forth in the *Partial Decrees Pursuant to I.R.C.P. 54(b)*.

DATED August 9, 2000.

BRIGETTE BILYEU, Special Master
Snake River Basin Adjudication

¹ Claim 36-00071B was split from 36-00071. IDWR reported that 36-00071A was decreed to Robert L. and Betty Jo Harney. IDWR further reported that the combined quantities for 36-00071A (Harney) and 36-00071B (Osborne) are 1.79 cfs which does not exceed the total quantity decreed for 36-00071 in *New International Mortgage Bank v. Idaho Power Company*, in Equity No. 1602 (S.D. Idaho, Mar 22, 1932) (correspondence from Nick Spencer dated May 5, 2000).

Start: Mon 11/15/99 3:00 PM
End: Mon 11/15/99 4:00 PM
Duration: 1 hour

Appointment was made the previous week with notice to Steve Clelland and Nick Spencer. The meeting commenced a few minutes after 3 PM.

Osborne asked for the most recent GIS map for his property - It isn't on the Basin36 master shapefile. Steve's laptop computer, which had the shapefile, was not available. The best I could provide was a scanned copy of the field note map Steve developed.

Osborne presented his opinion that IDWR's recommendation cheapens or totally invalidates his spring water rights, since IDWR states that his Bell Ditch right can be used on any of the land also covered by spring water. I explained the flexibility that our recommendation provides to him and that in the future if he feels that someone has injured his water right(s) he can pursue a call or civil action.

He said that he wanted to specify acres for each spring. I explained that the claim and the historical usage was to combine water from the sources into a common system. IDWR is responsible to recommend usage as of 1987. I also explained that information came to light just as the amended recommendations were submitted that indicates that some of the area above the Bell Ditch was not developed in 1972 that was recommended. Explained further that development and changes after 1987 that would require a transfer could not be encoded in these recommendations.

Osborne asked if he could sell a portion of the land with only one source on it. I explained how a land transaction would have to be explicit on reservation or assignment of water. I also explained that consolidating water onto fewer acres is not acceptable beyond a reasonable duty of water. Transfers could be required depending on circumstances.

The Osbornes gave me a legal description of a parcel and a copy of a CFSA map of the property, photo date unknown.

They indicated they are looking for 26 acres and 2"/ac of water. They take exception to the width of the ditch on the layout and the area connecting the orchard and the 5.4 acres drafted on the field map as out.

I showed him some old ASCS photos I scanned to my computer, all the photos show the POU above the John Bell Ditch as NOT irrigated prior to 1972 when the sprinkler system was added by Mrs. Anderson. I told him I could not change my recommendation at this point but this info would be considered if I am to reconsider a future recommendation. I stressed that I told him this for his information and to let him know it exists.

SRBA CLAIM: A36-00071B, A36-00072, A36-00073 & A36-00074

EXAM DATE: SEPTEMBER 20, 1999

PREVIOUS EXAM: MARCH 12, 1991

IDWR AGENT: STEVE CLELLAND

ACCOMPANIED BY CLAIMANT: LAYNE OSBORNE

PURPOSE: This examination was made to investigate the amendment and late claims filed by Layne & Judy Osborne.

OBSERVATIONS & FINDINGS: I met with Layne Osborne at his home on 9/20/99 just after 2 PM to begin the examination. This was not expected to be a fully detailed exam since I have visited the site before; rather this was an update to show the changes made since the last exam.

I told him he needs to show me why he claimed the uses claimed for each spring source used and we began at Spring #1. He showed me the site where the spring rises and we walked the natural channel down to where it joins the John Bell Ditch. He pointed to the place on the small stream where he dams and diverts the flow into pipelines to run out onto his pasture below or west of the John Bell Ditch. I asked Layne if he thought the actual irrigated acreage under this small flow was 5 acres or less. We discussed the rate per acre issue as it has been developed in the Hagerman Valley; 1"/acre for gravity or more. He agreed to two acres for the 5 inches of decreed water from this source.

We returned to the house area and viewed the pump and pond system north of the house. It appears to be unchanged from my previous exam in 1991, however, Layne indicates he has changed the pump sizes since he has taken ownership of the property. He showed me Spring #3 which is on the east side of the pond as I found in 1991. He described various pipelines and water flows as we walked around the area east of the house and on up to the site below the road. He led me to a spring site below the road but above the site known as Spring #3. He told me he referred to this small spring as part of Spring #3 because it is below the road. It does not appear to be part of Spring #3. Spring #3 was very separate and unique flow to the pond. While the many seeps and springs may be somewhat related it appears this small piped spring is neither #2 nor #3 and we referred to this in our conversation as "upper #3". This Upper #3 Spring is piped to the house area and is used to provide some irrigation of the yard areas. It is piped under the sidewalks and to a drinking fountain and excess flows to the pond. I took some pictures of this site to show the various pipelines and the area of Upper #3.

We walked down the driveway and he showed me how he uses the overflow from Spring #2 to irrigate part of the pasture just below the road, Justice Grade. This small flow is run onto the pasture but the main irrigation source is from the sprinkler system as pumped up from the John Bell Ditch. Estimate less than 1 acre is irrigated with this flow and it is only a supplemental use.

We then went to the site of Spring #2 and observed the pipelines running from the diversion boxes. Due to brush and poison ivy it was not possible to get to the exact point of diversion but it is the same location as I observed in 1991 and no disagreement exists to the location of Spring #2. This spring is piped to the house for domestic uses, which includes the culinary, heat pump, stockwater taps and some yard irrigation. Some of the overflow from the collection box flows to the pasture for gravity irrigation as described above. Overflow after the water is diverted to the house system is dumped into the pond and pumped into the sprinkler system.

SUMMARY & RECOMMENDATIONS:

During my previous exam and review of these rights with Anita Anderson and Layne Osborne on 4/9/91 (See memo in CVR page 2, A36-00073), the water from the John Bell Ditch was pumped up to the pond and all irrigation water was distributed through a common sprinkler system, installed in 1972. Sometime after the 1992 Director's Report for Basin 36, Layne Osborne altered the irrigation system. He now irrigates the north end of the place of use (POU) from the pond using water from #2 and #3. A pump in the John Bell Ditch irrigates the south end of the POU. Since the system was operated as one POU prior to 1987 the recommended POU will reflect that system. All the previous review notes are contained in the file now labeled A36-00073.

RATE PER ACRE: I reviewed the recommendations made for Woodhead claims (36-00111B & 36-00112B) and the final FIR duty of water is 0.037 cfs/ac. While these lands are not identical in soil types they are very close in proximity, < 1/2 mile apart. This is comparable to other rates currently being allowed in the valley for the gravity rate of flow. It is used to base the flow rates for the rights reviewed herein.

COMBINED USE LIMITS

Combined use limits will apply to the POU and flow rates for these rights. Total POU is limited to a 22.2 acre PPU. Each right is further limited to an annual acreage based on the FIR allowed for these rights.

Combined flow rates based on these uses:

0.82 cfs irrigation (per Woodhead FIR)
0.04 cfs domestic (per 1 home standard)
0.04 cfs stockwater (per 100+ head cattle, non-dairy)
====

0.90 CFS COMBINED TOTAL FLOW RATE ALL RIGHTS.

Final recommendations will be described in the database.
