RE: RESPONSE TO NOTICE OF ERROR FOR CLAIM 36-00123C.

Dear Mr Summers

Although you may own 5.96 acres, a field examination for that property determined that only 1.8 acres were being irrigated and, as water right is based upon beneficial use, only those acres are recommended.

Your second request to change the period of use has been approved. The Director has approved a 3-15 to 11-15 irrigation season for the Hagerman Valley.

As the home was not in existence when 36-00123 was decreed IDWR cannot recognize that portion of your claim. Any new uses of water requires a new water right with a priority date based upon the completion date of that use. It cannot be retroactively added to an existing right. Based upon Idaho Code, you could combine the two uses on one right if you advanced the priority date of the first use to the priority date of the second use.

Your NOE also questions the basis for recommendation of an amount that is less than the amount shown in a previous decree.

Under Idaho law, a water right is limited to the amount of water beneficially used for the purposes for which the water right was established. The amount of water beneficially used is limited to the amount that is actually used and is reasonably required. For irrigation purposes, a reasonable amount is the amount required using irrigation methods that are reasonably efficient under current circumstances. If the amount of a water right shown in a decree is greater than the amount that is beneficially used, then the portion that is not beneficially used is forfeited.

The amount proposed to be recommended for your claim is based on the amount of water determined to be beneficially used for

MICROFILMED

the recommended uses, based on available data and current methods of analysis. To support recommendation of a greater amount, you will need to submit evidence of beneficial use of a greater amount to IDWR.

If you still disagree with IDWR's recommendations, you will have an opportunity to file an objection to the Director's Report with the court. When the Director's Report is filed with the court, you will be mailed a notice that will contain more information about the objection process. As part of the objection process, IDWR will work with the claimants to resolve disputed issues, including efforts to obtain additional data which will be shared with the water users.

Sincerely

Kelly K Christensen

RECEIVED

I, the undersigned, HAROLD W. SMITH, as past owner and director of the Vader property Distribution, appoint CHARLES P. JOHNSON as resident water manager and representative of the four undeveloped property parcels plus his own.

The Forty-two (42) plus acres of the Fred Vader farm are decreed 59.944 inches of water or 489.496 gallons per min. (in a normal water-flow year). This constitutes minus 37% of the Spring Creek Springs water. Cliff Edwards' property is allotted minus 63%.

Division of the 59.944 inches of water is determined by property size, present required household, balance of trout ponds, fire protection, gardening, etc. needs. Also, consideration of a year round spring on the West Meeks' property.

Division is as follows:

PARCEL #	Owner	Acres	Inches	Ac.	
PARCEL #1-	Harold V. Woline	4.69	acres - 7.10	inches	0.04
PARCEL #2-	Elmer & David Bentler	1.82	acres - 5.424	inches	
PARCEL #3-	Genevieve Harper	0.41	acres - 8	inches	
PARCEL #4-	E. Reed Nielson	5.93	acres - 7.24	inches	
PARCEL #5-	Don Louder	4.	acres - 5.68	inches	
PARCEL #6-	Clark D. Meek	Approx. 11.	acres - 12	inches	2.9 Ac. 0.24
PARCEL #7-	Charles E. Johnson	4.90	acres - 14.50	inches	13.0 Ac. 0.29
		40.75		59.944	

(Additional allowance from year round household, trout pond balance, fire protection, gardening, etc., requirements).

Mr. Johnson has agreed to work closely with the other two property holders to maintain the 37% total appropriated water for everyone's benefit.

DATED this 17th day of April, 1978.
