Memo 87-10959
5/21/2020

On May 20th, 2020 I spoke on the phone with Andrea Adler regarding claim 87-10959. The issue with the claim was that there are two sources listed, and I did not know if the creek source was for instream stockwater or not.

The claimant confirmed that Deep Creek Tributary to Palouse River is used for instream stockwater. I told her that it would be appropriate for her to file another claim on the creek so she has one claim for the well and one claim for the creek.

She decided to file a second claim for instream stockwater from the creek. We agreed that nothing would need to be changed on the original claim 87-10959, I would recommend it with groundwater as the source, one point of diversion, for domestic and stockwater uses. The claim does not need amended because I am recommending less than what was claimed. The claimant understood and was okay with this.

On May 21st I sent her a Notice of Claim for the instream stockwater use for her to complete and send back along with the claim fee.

A handwritten signature in blue ink, appearing to read 'Chris', is located at the bottom left of the page.
