MEMORANDUM

TO: Carlquist Brothers Transfer Files

FROM: Corey Skinner *CS*

DATE: April 1, 1996

SUBJECT: Staff Review

Carlquist Brothers have filed the two enclosed transfer applications in order to tie their water rights together into a permissible place of use on their farm. The first transfer application covers their groundwater rights based on claims recommended in the Director's Report (36-02171, 36-04154, and 36-07527). The second transfer application covers their wastewater rights based on claims recommended in the Director's Report (36-02052 and 36-02313). In addition, Carlquist Brothers have a permit 36-08498 (amendment to permit has been filed, permit currently awaiting final field exam) for groundwater that is proposed to be a part of the proposed permissible place of use.

On February 22, Lyn Carlquist and I examined his farm and the permissible place of use proposed with these transfer applications. The farm has been all tied together via a connected mainline system. From my observations in the field and aerial photos and slides at the Jerome ASCS office, the entire farm has been recently irrigated and forfeiture since the filing of the Director's Report of the individual rights is not an issue.

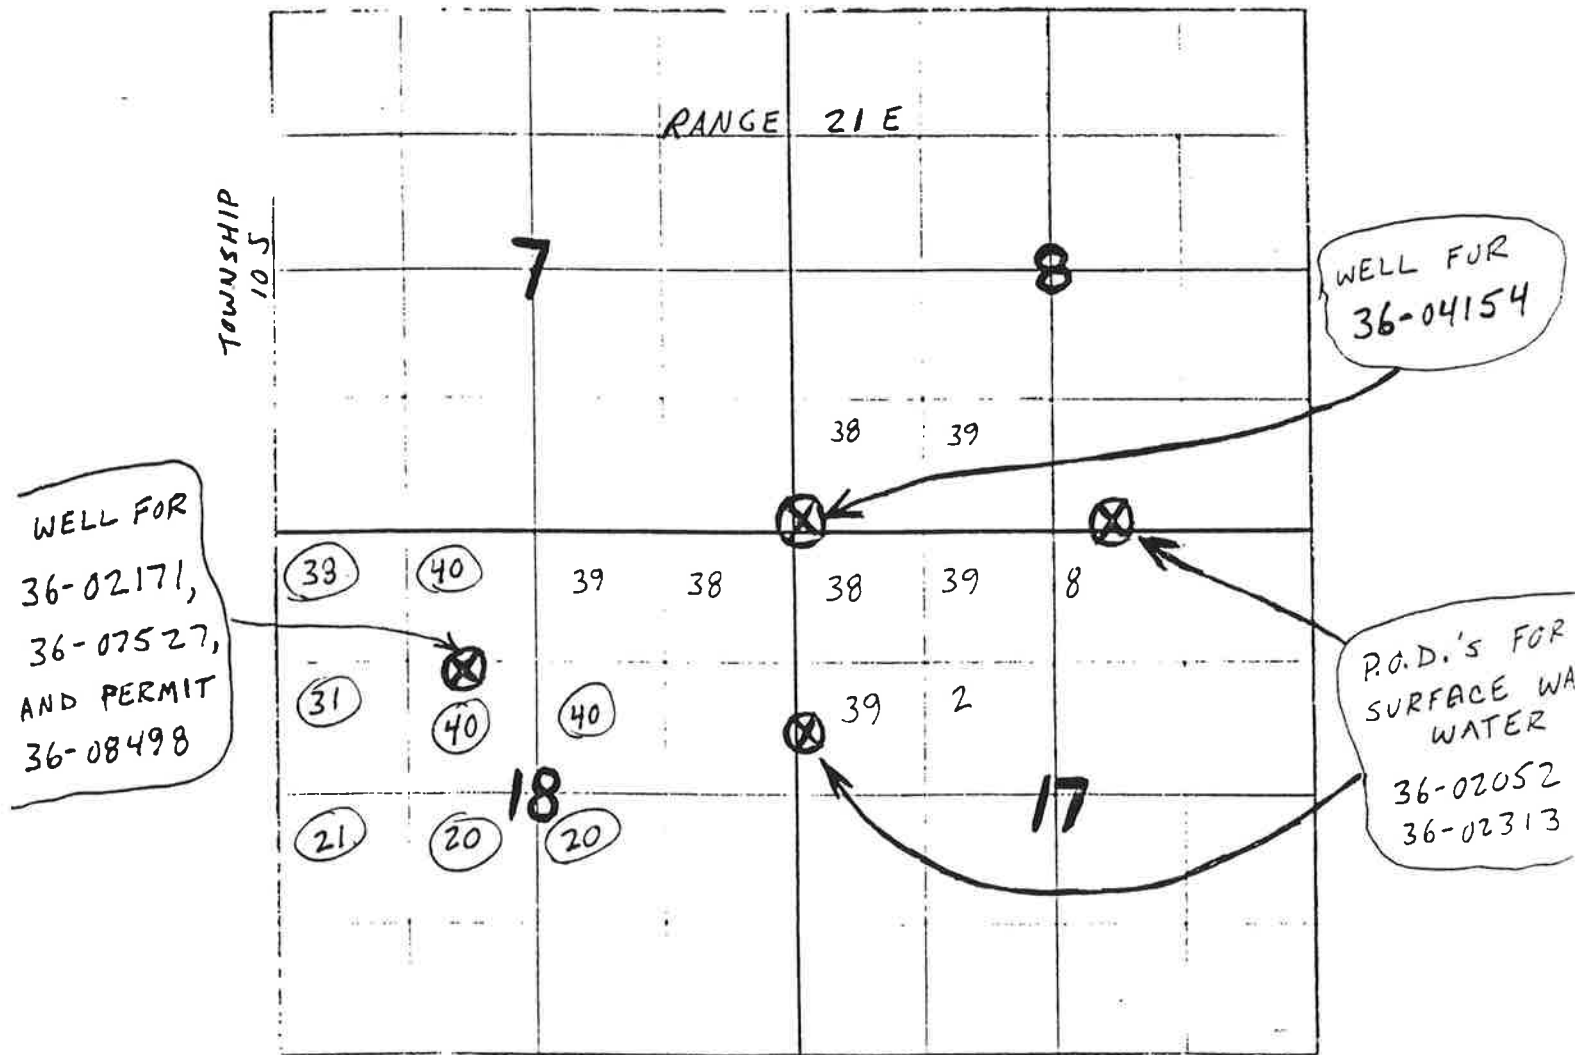

There appears to be no possibility of expansion with these two proposed transfer applications, as long as the appropriate limits are part of the approval conditions. The five recommended claims involved with this transfer are limited to 8.6 cfs for the irrigation of 530 acres. The related water right permit, 36-08498, is for 250 acres that overlap with the 530 acres involved with these two transfer applications. All together, after the proposed transfers and the amended permit, there will be a total of 9.6 cfs appurtenant to 528.5 acres. This would still provide less than an inch to the acre. I have attached a summary that explains the limits of these five claims and the permit as they currently stand, before the two proposed transfers and the amendment to the permit.
