Notes: Myself and Corbin Knowles visted the site with the owner Mark Toone. He has installed a new section of pipe and installed a new McCrometer flow meter. We turned the pump on and tried to measure flow with the Fuji meter. We tried in several different places and could not get a reading. The water from the pump dumps into a pond and the water around the spill area was milky, indicating air in the water. We determined there was nothing more we could do at this time. We ran aten minute average from the well pump and McCrometer meter and got 974.2 gpm. I entered this number into the "Flowmeter" section of this report. When we can figure out how to get a flow measurement from the sonic meter or other meter we will check it out. My judgement is that the McCrometer information would be better than nothing so that part is data entered and has a multiplycation factor of 1.0.

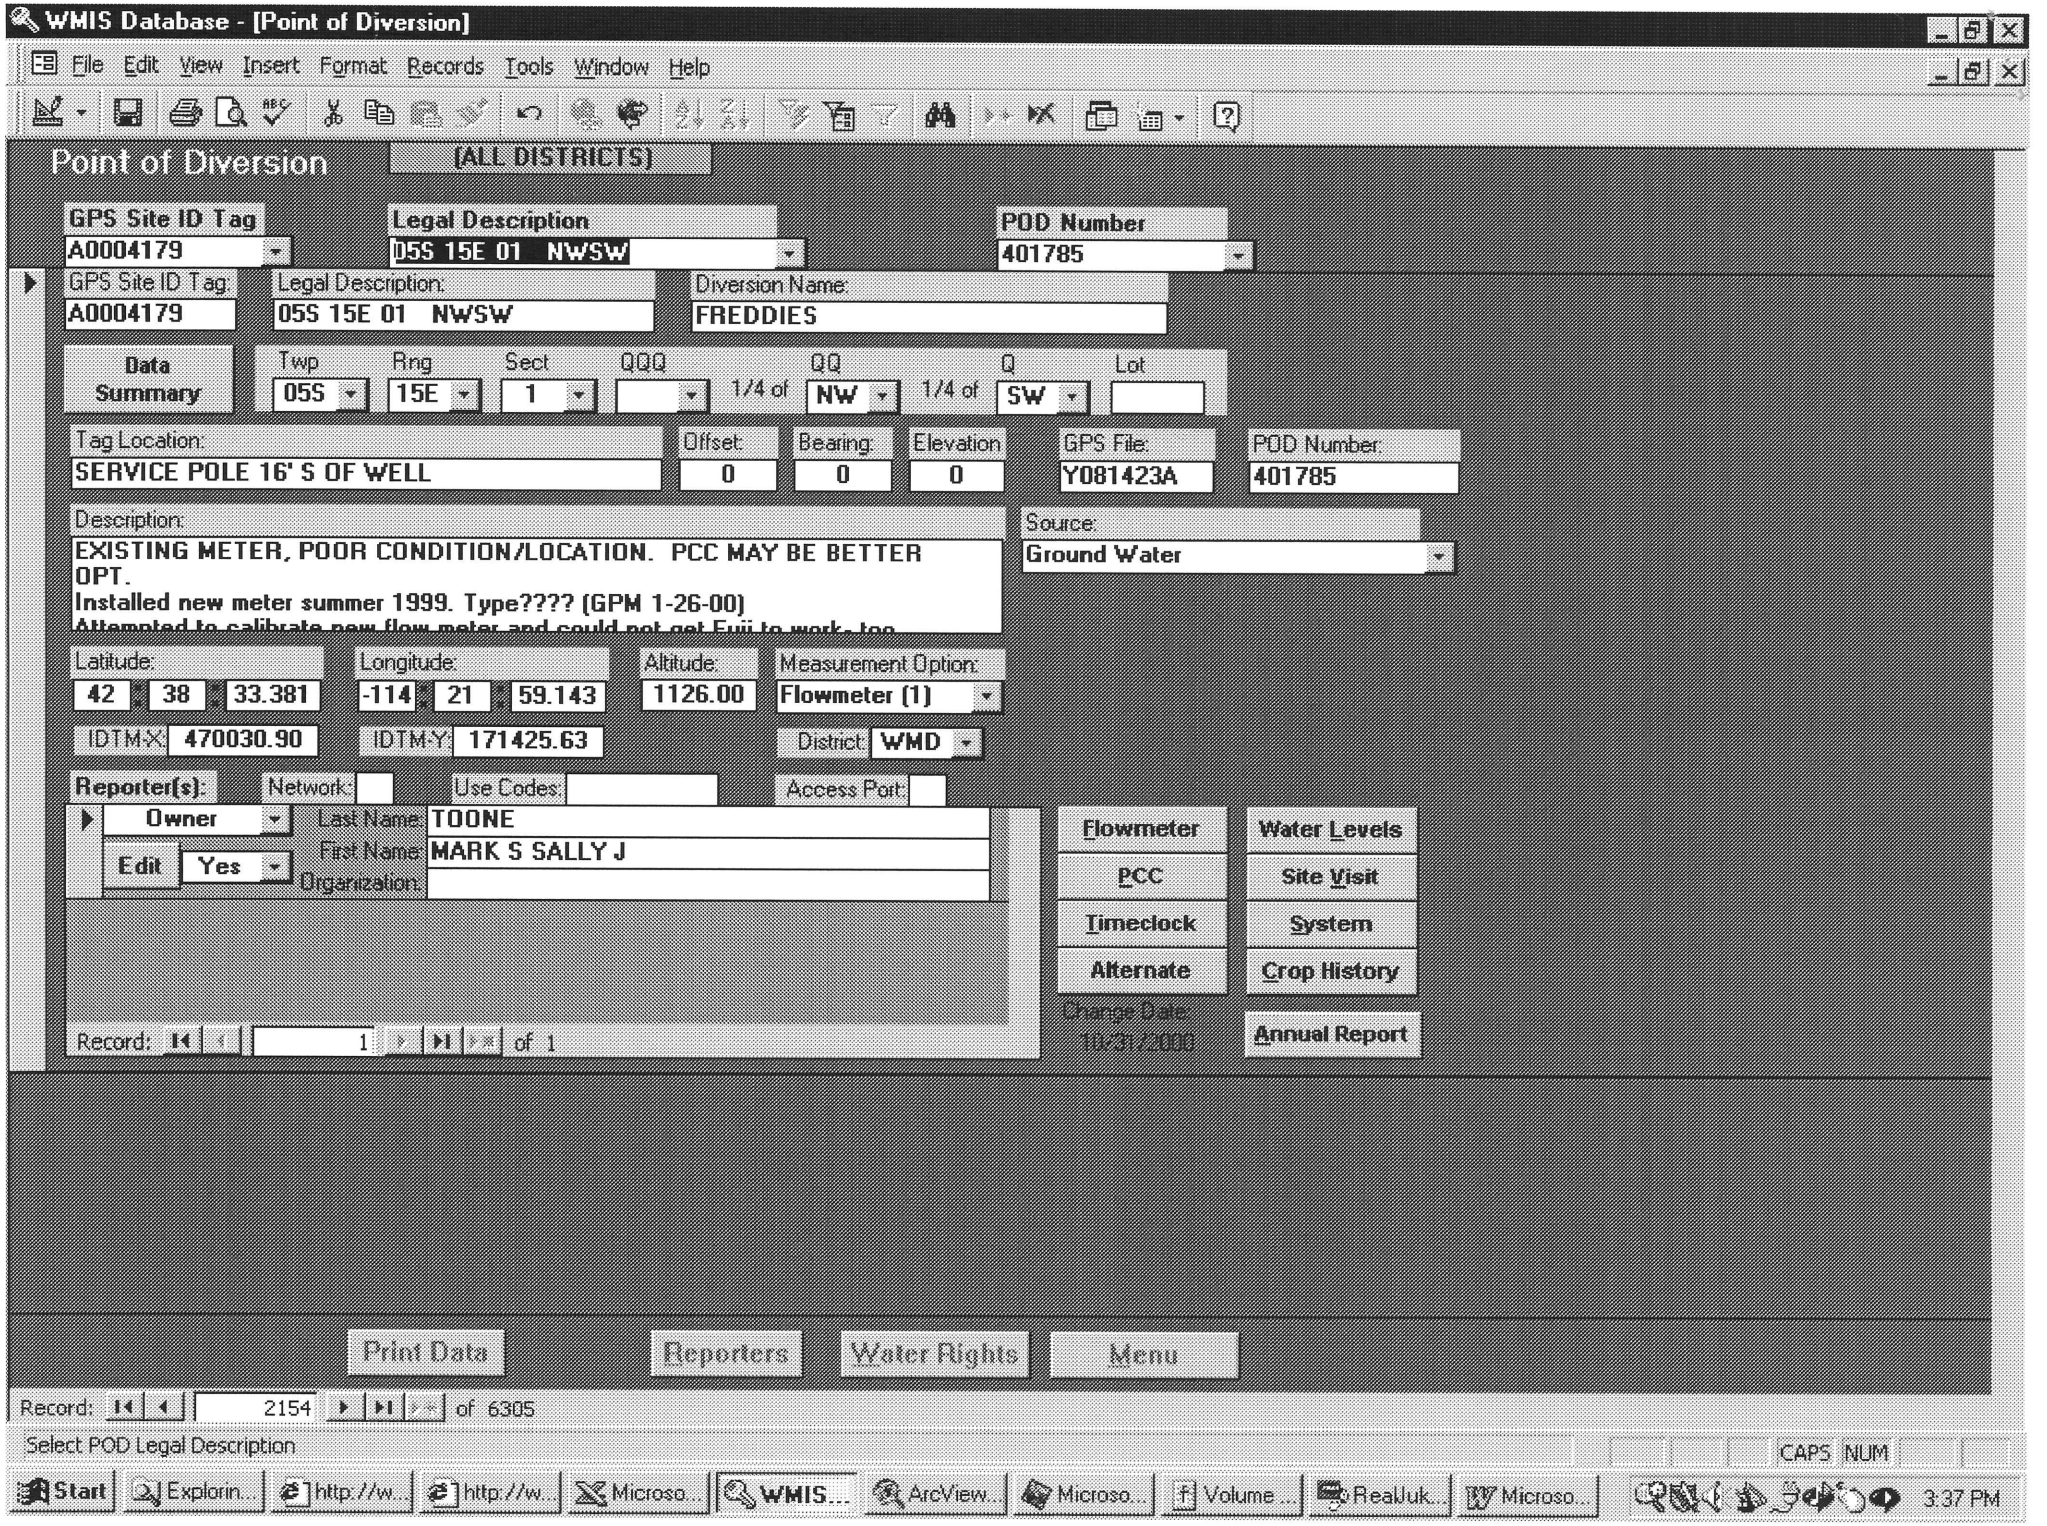

8/26/1999	AWETZSTEIN	Flowmeter Calibration	1/21/2000

Notes: Arnie measured well to calibrate installed flowmeter but found problems with air in discharge pipe and poor operation of meter when valve opened (assumed valve normally opened). Arnie advised owner that meter would not work for this scenario and that a timeclock be installed or else install a separate power meter. Idaho Power records appear to confirm use of multiple pumps on same meter.

I used the Idaho Power records to estimate hours of operation and thus annual volume using Arnie's flow measurement. This estimate may be poor due to multiple pump situation. (tluke 1/21/2000).

If source is surface water, estimate total flow of source

Methods of measurement Badger Meter Meets Permit requirements? ✓

Measurement calculations:
Measured 2000 gal/118.7 sec/60 sec/min = 1011 gpm/448 gpm/cfs = 2.25 cfs capacity
Volume: 247 ac x 3.0 AFA/ac = 741 AFA ✓
