SUBJECT: STATUS OF KINCAID CLAIMS
phone () walk-in(X)

His neighbor came in to find out what rights Mr Kincaid had. I found 36-02147 and 36-02370. They indicated that 02370 is diverted from their property and that they are trying to develop a plan that would require moving the pond next to the road and possibly rerouting the canal company ditch. I explained that it was a private matter between the two parties unless the diversion point(s) changed legals.

He stated that the property is being divided between brothers and that nothing would occur until after the split has actually occurred. He indicated that he had talked to the canal company and that they were not aware that Mr Kincaid had a waste water claim.

REASONS SUPPORTING EACH BOX CHECKED

In the space following, you must state the reason(s) by number for each box checked. You may use additional pages if necessary.

Box 9 is checked because the claim includes irrigation of land owned by the United States, for which a private water right cannot be obtained. Boxes 3 and 10 have been checked because the quantity of water is overstated to the extent that the water is used to irrigate federally owned land.

CHANGES TO THE DIRECTOR'S REPORT

Specifically describe how you want the Director's Report to be changed. You may use additional pages if necessary.

The place of use that should be deleted from the Director's Report is T10S R21E S21 NENW. Also, it is requested that the Director's Report be changed to indicate a decrease in the quantity of water claimed in an amount proportional to the acreage deleted from the place of use.

Please note: You should attach copies of documents which support your objection. Note on each document the "box number" it supports.

☒ Check here if you are submitting documents. Please list each document by the title and number of pages. You may use additional pages if necessary. "Map of Non-federal

PICTURE SET # 1

This picture set was taken from the center of section 20. It shows the loop in the canal and the ground within the loop. It is used for a stack yard and equipment storage and is permanently out of production. Not clearly shown is the small drainage located on the west of this lot. The drainage is too steep to farm and is also excluded from the irrigation P/U recommendation as marked on the ortho photograph.
