Re: Comments on Analysis of Woodland Water Rights

Dear Mr. Christensen:

Although I generally agree with your draft analysis for the five water rights held by Michael Woodland, there are a few matters that I feel may be misstated.

*Based upon
licensing which
indicates capacity
is 3.44 cfs*

My first concern is your statement that the maximum diversion under the well developed under Water Right No. 36-02207 would produce only 3.44 cfs. I recognize that under the permit, this is the maximum amount of water that would be allowed as the diversion rate. However, I question whether or not this was the limitation on the diversion capacity, as it is unlikely that a well would be designed to only divert this amount of water. I therefore feel that the diversion rate under 36-10197 should be as recommended for these additional 36 acres. It would therefore appear that the diversion rate under both rights should be 4.16 cfs for the diversion of .02 cfs per acre. On the other hand, this probably is not a critical determination if in 1968, the total capacity of the well was only 5.24 cfs, as indicated.

As you have indicated, it seems clear that Water Right No. 36-02674, with a priority of August 25, 1966, was obtained to increase the diversion rate for the lands described in 36-02567 and to provide water for expanded acres. It is impossible to determine additional acres were not included within the permitted place of use and why the overlapping rights were not identified, even though it is difficult to identify in a permit the acres for which water rights are overlapping and acres which were not previously included within any water right.

Finally, we agree that by unstacking these water rights, whether it was deemed to have occurred as a result of a change in the place of use without following Idaho Code §42-222, or occurred after the water rights were obtained and a change in the place of use occurred as a result of a later expansion, we

Kelly K. Christensen
Idaho Department of Water Resources

feel that the 491 acres should have licensed water rights for a diversion of 9.28 cfs, or by advancing the beneficial use right priority of 36-10197 to a date made prior to the mandatory permit statute, and there [they are] providing a full 9.82 cfs.

Very truly yours,

Roger D. Ling *RL*

Not
all acres were

1975

**ANALYSIS
FOR
36-02207, 36-02567, 36-02674, 36-10197, & 36-15179**

The 491 acres currently irrigated by Michael Woodland were recognized in the adjudication through three licenses, a 36 acre beneficial use right, and a 61 acre enlargement right. Two wells exist at the following legal descriptions.

**TWP 06S, RNG 22E, SEC 28, SESESW
TWP 06S, RNG 22E, SEC 19, NESWSE**

Transfer 5179 was approved July 23, 1998 to settle a BLM objection to the adjudication recommendation. The transfer moved 8 acres from BLM property to new acres. No other changes were made.

36-02207

The first right recognized by the department is 36-02207 for 3.44 cfs and 172 acres being irrigated from the point of diversion in **SEC 28**. The resulting rate is 3.44 cfs/172 acres = 0.02 cfs per acre.

36-10197

A beneficial use right (36-10197) was recognized for an additional 36 acres with a priority date of 08-11-1959 which is the field exam date for the first right. Although the right is currently being recommended from both wells, the original development was from the same well in **Sec 28**, which had a capacity of 3.44 at the recognized priority date. Therefore, 36-02207 when combined with 36-10197 should be limited to a total combined diversion rate of 3.44 cfs.

The resulting rate is 3.44 cfs/208 acres = 0.0165 cfs per acre. The adjudication recommendation did not recognize a combined limit for the diversion rates for the two rights.

36-02567

The next right licensed by the department was 36-02567 with a priority date of 03-07-1963. This right was permitted for 3.40cfs/202acres or 0.0168 cfs per acre. It was subsequently licensed for 3.40 cfs and 202 acres.

This ground was also irrigated from the well in **Sec 28**, however the field examiner determined that the system capacity was now 5.24 cfs. The exam was conducted on 08-29-1968.

As this right shares the same well as the two above listed rights they should be limited to a total combined diversion rate of 5.24 cfs. The system total for all rights is 5.24 cfs/406 acres = 0.0129 cfs per acre.

36-02674

The next right in sequence was 36-02674 which had a priority date of 08-25-1966. The application for permit (subsequently approved) was for 4.50 cfs for the irrigation of 122 acres. The rate per acre is inconsistent with department standards $4.50/122 = 0.037$ cfs per acre. It would appear that with that diversion rate additional acres should have been included within the permitted place of use. No explanation of this discrepancy was noted in the allocations file.

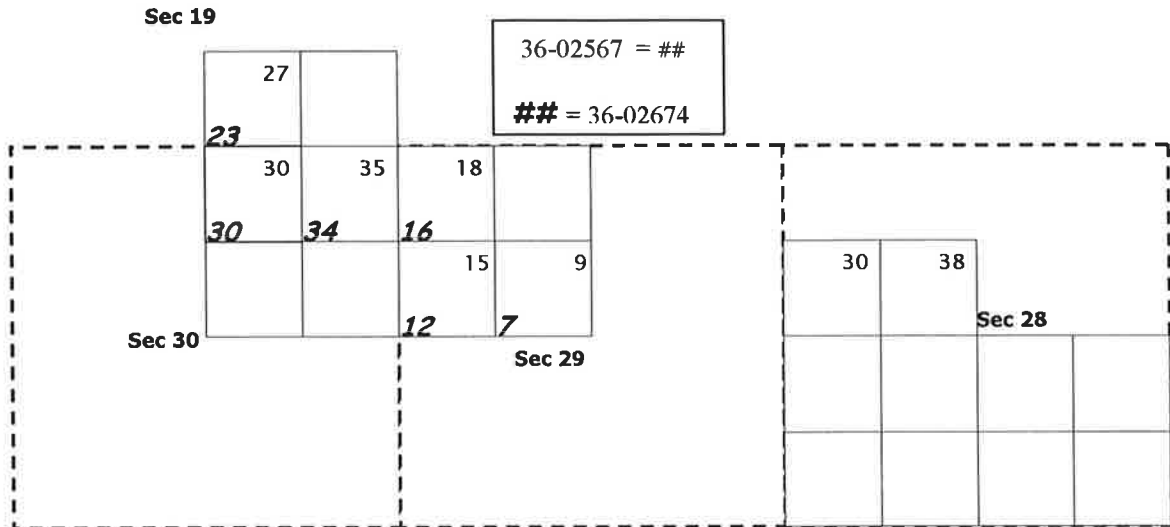

This right was licensed for 2.44 cfs on the same permitted 122 acres. The point of diversion was located in **Sec 19** and the system was measured at 5.00 cfs. The entire place of use for this right was also within the quarter/quarters previously licensed by 36-02567.

The extent of overlap is not clear even after reviewing the field examiners notes for the two rights. However, the license appears to identify those acres as overlapping and limited to 1 inch to the acre. The field exam date for this right was 05-14-1968. The letter submitted with the application for permit indicates a need for additional water. Acres identified in the proof of beneficial use document, although identifying the same quarter/quarters, do not list comparable acre numbers by quarter/quarter.

LICENSED PLACE OF USE COMPARISON FOR:

PG 2/3

36-02567 & 36-02674

ANALYSIS OF ADJUDICATION RATE REDUCTION FOR 36-02674

During the adjudication review 20 acres for 36-02674 were identified as being independent of the 202 acres licensed through 36-02567. The total acres irrigated by the two rights would then be 222 acres. 222 acres at 0.02 cfs/acre = 4.44 cfs. As 36-02567 was already licensed for 3.40 cfs, the recommended rate for 36-02674 was reduced as follows 4.44 cfs – 3.40 cfs = 1.04 cfs.

ANALYSIS SUMMARY BY CLAIM

CLAIM NUMBER	RECOM LIMIT	OVERLAP REVIEW	RECOMMENDED DIVERSION RATE	COMBINED DIVERSION RATE	P/D CAPACITY DIVERSION RATE
36-02207	172	172	3.44	5.24 cfs	5.24 cfs
36-02567	202	202	3.40		
36-10197	36	36	0.72		
36-02674	122	20*	1.04	1.04 cfs	5.00 cfs
total	532	430 acres		6.28 cfs	10.24 cfs

*(non overlapping acres)

Licensed
At 2.44cfs

As the adjudication review found 491 acres being irrigated, the difference 491- 430 = 61 acres were recognized as valid through enlargement right 36-15179. The claimant indicated that the 61 acres were developed over time but that all were being irrigated by the recommended priority date of 03-15-75.

By 1987 the two wells were tied together and operated through a common delivery system. As the wells had the capacity to deliver the licensed rates the total combined rate was calculated as follows;

36-02207	3.44
36-02567	3.40
36-02674	1.04 (recommended rate)
36-10197	0.72 (beneficial use right)
total	8.60 cfs

Limiting each right according to development by point of diversion was not addressed during the original adjudication recommendation.

The system capacity and resulting rate per acre is;
10.24 cfs / 491 acres = 0.0208 cfs per acre

CLAIMANT ASSERTION

Mr Ling (attorney of record for Mr Woodland) proposes that there should be fewer overlapping acres recognized under 36-02674 and/or that the rights were unstacked after they were licensed. He asserted that the system has historically provided approximately 10.24 cfs for irrigation and that, as circumstances allowed additional acres to be developed, it was the claimant's intention to transfer one of the rights from the overlapping place of use to the new acres.

The system provides just over 1 inch to the acre ($10.24 / 491 = 0.0208$) and has had that capability since the last licensing field examination for 36-02674 conducted on 05-14-68. If the department recognizes the 'unstacking' of 36-02567 and 36-02674 to the full extent of the 61 acres recognized under 36-15179, then 36-15179 should be disallowed. As 36-02674 was originally licensed for 122 acres, and the analysis to the right identifies 81 independent acres, the balance of $122 - 81 = 41$ acres would still overlap with 36-02567.

The department would also have to recognize that the two wells were utilized for both rights to allow partial unstacking of the rights and still maintain each right's licensed rate independently.

The total system rate calculation to the right still recognizes that 36-10197 was developed from the well in sec 28 and when combined with 36-02207 is still limited to the then system capacity of 3.44 cfs.

Rate analysis where 36-02207 & 36-10197 have a combined limit and 36-02567 & 36-02674 are unstacked

Claim No.	rate	acres
36-02207 &		172
36-10197	3.44 cfs	36
36-02567	3.40 cfs	202
36-02674	2.44 cfs	81
total	9.28 cfs	491

System total

9.28 cfs / 491 acres = 0.0189 cfs/acre

The field exam for 36-02567 was conducted on 08-29-68 and the capacity of the well was determined to be 5.24 cfs at that time. An argument that could be made that, if the priority date were advanced for the beneficial use right 36-10197 to just prior to the mandatory permit statute, those acres could also be recognized at 1 inch to the acre.

The system total could then be recognized as $491 \text{ acres} * 0.02 \text{ cfs/acre} = 9.82 \text{ cfs}$.

MEMORANDUM

TO: Files 36-02207, 36-02567, 36-02674, 36-10197 & 36-15179

FROM: Pam Skaggs^{CS}/State Office

SUBJECT: Transfer 5179

DATE: July 17, 1998

Transfer 5179 changes the place of use under Rights 36-02207, 36-02567, 36-02674, 36-10197 and 36-15179. These rights as recommended in the SRBA Basin 36 Director's Report identified 8 irrigated acres located on BLM land. The transfer moves the 8 acres to privately owned land. BLM has provided a letter of agreement to the transfer.

Recommended conditions include permissible place of use, measuring/annual reporting requirements, irrigation overlap, combined right limits and standard transfer conditions.

**RE: Snake River Basin Adjudication (SRBA) Claim
Michael & Patricia Woodland Transfer:
36-02207, 36-02567, 36-02674, 36-10197 and 36-15179.**

Dear Mr. Jones:

By this letter I state that I have the authority to act on behalf of the United States, Dept. of Interior, Bureau of Land Management (U.S.D.I., BLM), with myself as its agent, to the matters discussed herein. I understand that Michael & Patricia Woodland wishes to transfer water under rights 36-02207, 36-02567, 36-02674, 36-10197 and 36-15179 from the federal public property to land which the Woodlands own as private property. The federal public property legal descriptions are as follows:

T06S R22E S29 NESW	4.0 acres; and
T06S R22E S29 SENE	<u>4.0 acres</u>
	8.0 acres TOTAL to be transferred off of public land.

I understand that the Idaho Dept. of Water Resources (I.D.W.R.) cannot complete such a transfer of water under a water right without the notarized consent of the landowner where the water right describes land not owned by the transfer applicant.

On behalf of the United States and the U.S.D.I., BLM, my notarized signature below provides the necessary consent to facilitate the transfer.

Woodland Transfer

A transfer is planned for these Hs. This is an authorizing letter from BLM to dry up acres on their land

**RECOMMENDATION ANALYSIS FOR
36-02207, 36-02567, 36-02674, 36-10197, AND 36-15179
currently held by MICHAEL WOODLAND**

REPLY TO ROGER LING'S LETTER DATED OCTOBER 10, 1997

re: paragraph 1

The transfer of the 8 acres from BLM property to other ground owned by Mr Woodland, would not reduce the number of acres recognized under the expansion claim 36-15179 as this transfer is 'moving' those acres to another location, not just drying up 8 acres.

The BLM has filed an objection to those 8 acres and the resolution of that objection is the transfer. The 'new' place of use will eventually become the decreed place of use assuming that the transfer is approved by the department's state office allocations section. The transfer is currently being processed in the southern region office by Corey Skinner and myself and is nearly completed as of this date. I do not believe that an objection by the claimant concerning the same transfer is necessary.

re: paragraph 2

The second issue raised in the letter indicates that the existing licensed rights are sufficient to cover the 491 recommended acres.

Right 36-02674 was originally licensed for additional water for the same, or nearly the same place of use as 36-02567 (see Attachment A land listing). Also by comparing the adjudication recommendation to the previously licensed acres, as shown on Attachment A, you can note that accomplished transfers were recognized.

Attachment B is the APPLICATION FOR PERMIT which states on page 2 item 13 that other appurtenant rights to the lands irrigated is G-31043 (renumbered to 36-02567).

Also, attachment C which is the REPORT OF EXAMINER for permit 33135 (renumbered to 36-02674), indicates on the second page that this right is supplemental to G-31048 (renumbered to 36-02567). It also indicates that additional ground was being irrigated at that time. The 122 acre limit was based upon the permitted acres.

As the acres recommended for 36-02674 did not exactly match the licensed acres for 36-02567 and there was no notation or explanation for the difference, I compared the licensed place of use against the 'found' place of use determined from my 6-24-91 field examination. Minor discrepancies were found in all overlapping quarter/quarters. The additional 'found' acres beyond the licensed acres for 36-02567 were recognized as non-overlapping acres for 36-02674. I identified 20 acres as non-overlapping acres during my original recommendation.

COPY

This review identifies 22 acres using the same criteria. The net result of the 2 acre difference, if changed, would be that the expansion claim would be reduced to 59 acres from the original 61 acres, and the combined right remarks for both rights would be changed from 222 acres to 224 acres.

INSTRUCTIONS

This form must be used to file an objection to any water right recommended in the Director's Report. You may object to one water right per objection form. The water right number you are objecting to must be indicated above in the blank space following "Case No." To object to more than one water right, you must file a separate objection form for each. Forms may be obtained from the Idaho Department of Water Resources (IDWR), or you may copy or reproduce this blank form, as long as it is identical to the court's form. You must file your objection by the deadline shown in the notice that IDWR mailed to you. The objection must be received by the court on or before the deadline specified. Instructions for mailing this objection are found at Page 6, and must be strictly followed.

Any party physically filing 25 (twenty-five) or more objections must make an appointment with the Clerk of the Adjudication Court and arrange for an appointment to file multiple objections.

OBJECTION - 1

OCT 13 1994

By filing an objection form, you are certifying that the objection is well-grounded in fact; is warranted by existing law or a good-faith argument for the extension, modification or reversal of existing law; and that it is not filed for any improper purpose, such as to harass, cause unnecessary delay or needless increase in the cost of litigation.

I. GENERAL INFORMATION

Please fill in the following information:

1. Person objecting: United States of America
Bureau of Land Management
Name: U.S. Department of the Interior
Address: 3380 Americana Terrace
Boise, Idaho 83706

Briefly describe your interest in this water right:

The United States, through the Bureau of
Land Management, is the owner of the land
upon which this water right is claimed.

2. Owner of the water right:

Name: claimant PATRICIA WOODLAND
MICHAEL WOODLAND
Address: RT 2 BOX 2542
PAUL, IDAHO 83347

3. If this objection is filed by an attorney:

Attorney Name: K. Jack Haugrud
Daria J. Zane
Attorney Address: U. S. Department of Justice
500 West Fort Street
Box 33
Boise, Idaho 83734
Attorney Phone No.: 202-272-4134/8351

If filed by an attorney, notice of pending court proceedings will be sent to the attorney only.

STATEMENT OF THE OBJECTION

Please check each "box" which states your objection to the recommendation in the Director's Report.

1. ☐ Name and Address: I object to the name and/or address of the owner of the water right.
2. ☐ Source: I object to the source of water.
3. ☒ Quantity: I object to:
 - a. ☒ the total quantity of water used in cubic feet per second; or
 - b. ☐ the total quantity of water stored in acre-feet per year; or
 - c. ☐ the total quantity of water reserved for each and every purpose, including all present and future uses.
4. ☐ Priority Date: I object to the priority date.
5. ☐ Points of Diversion: I object to the legal description of the point(s) of diversion.
6. ☐ Instream Flow: I object to the legal description of the beginning and ending points of the instream flow.
7. ☐ Purpose(s) of Use: I object to the purpose(s) of use.
8. ☐ Period of Year: I object to the period of year when water is used or is necessary for the purpose stated.
9. ☒ Place of Use: I object to:
 - a. ☒ the legal description of the place of use; or
 - b. ☐ the number of irrigated acres within each forty (40) acre subdivision.
10. ☒ Consumptive Use: I object to the annual volume of consumptive use.
11. ☐ Remarks: I object to the "remarks" listed with the water right.

- _____

REASONS SUPPORTING EACH BOX CHECKED

In the space following, you must state the reason(s) by number for each box checked. You may use additional pages if necessary.

Box 9 and Box 9a were checked because the Place of Use includes federal land. The claimant has no valid authorization for this claimed use of the federal property. Boxes 3, 3a, and Box 10 were checked because the quantity of water is overstated to the extent the water would be improperly used on federally owned land.

CHANGES TO THE DIRECTOR'S REPORT

Specifically describe how you want the Director's Report to be changed. You may use additional pages if necessary.

The Directors report should be changed to recommend disallowance of this claim in part. The Place(s) of Use, described as, T06S R22E S29 (NE SW) 40.0, S30 (SE NE) 4.0, should be deleted.

Please note: You should attach copies of documents which support your objection. Note on each document the "box number" it supports.

☐ Check here if you are submitting documents. Please list each document by the title and number of pages. You may use additional pages if necessary. _____

RE: PLACE OF USE DISCREPANCY DISCUSSION BY PHONE ON 10-2-92

Dear Mr Woodland

Enclosed is the ASCS photo that I used to establish your recommended place of use. What is needed is to establish any acres that were farmed prior to 1987 and not enclosed within the outlined boundary. Another possible difference may be in the number of acres I have recommended within a specific forty acre tract. Please review the recommendation with that in mind also.

As I stated during our phone conversation, if all goes well with my Mother, I should be back to Twin Falls by the end of next week.

Sincerely

Kelly K. Christensen
Sr. Water Resource Agent

RE: Claims modification to, Permissible Place of Use.
Claims, A36-02207, A36-02567, A36-02674, A36-10197, and
A36-15179.

Dear Mr. Woodland

Enclosed are the modified claims that require your notarized signature to be accepted by the Department.

As we discussed at your home, the place of use lists all acres found irrigated conditioned to each claim's individual acres (see Remarks on the claim form). I have also enclosed a copy of the place of use boundary drawn upon an ASCS aerial photo and a land list broken down by quarter-quarter that corresponds with the claims. My assumption is that if any additional acres beyond that boundary is an expansion that must be covered by the permit process for licensing purposes.

I will recommend that the priority date for the expansion claim A36-10197 be advanced to 8-11-59 based upon the licensing field examination for 36-02207 of the same date. Also the diversion rates will be modified for both expansion claims to reflect Department standards. The major limiting factor for diversion rate is the system capacity listed in the remarks section of each claim.

Please review the claims and the place of use boundary to verify my findings. If there is a mistake or if you have any further questions please contact me and I will explain what I have done.

If they are acceptable, please sign the claims, have them notarized, and return them to this office.

Sincerely

Kelly K Christensen
Sr. Water Resources Agent

A36-15179

The system, ^{was} originally irrigated from ^{the} P/O in Sec 28. When the well in Sec 19 was licensed, it overlapped some of the acres covered by A36-2567 and added new acres within some Q/Qs to have the licenses reflect the actual irrigated acres in Sec 19, Sec 30 and the W $\frac{1}{2}$ of Sec 29.

As the property is now under one owner, he has elected to claim this as a permissible place of use system.

The expansion claims are for lands irrigated since the licensing field examination for 36-2207 on 8-11-59. A hand sketch of the system shows gravity irrigation and conregation directions for both Q/Qs.

A36-10197

this claim was for ground in NE/SW, Sec 28 with a claimed priority date of 6-1-58. Based upon the above field exam date the recommended priority date is 8-11-59 for the entire 36 claimed acres.

A36-15179

The claimed priority date was Mar 15, 1975. As the mentioned field exam indicated that the ground was irrigated as early as 1959, I recommend accepting the claimed priority date for the claimed acres.

RECORDED
JAN 26 1993

The total found acres were ~~489~~⁴⁹¹. The total claimed acres (counting overlap acres once) is 506. The difference of 17 acres is 3.5%. This is within the Departmental guidelines therefore all claims are recommended as claimed with the P/A being defined upon the Q/Q land list and the Aerial photo.

Calculations For the expansion Acres

Both expansion rights are based upon license 36-02207 which was licensed at the system capacity of 3.44 CFS for 172 Acres. Both claims fall within the rate-per-acre guidelines established for by the Dept. for sprinkler system irrigation which was a part of the then existing system.

RECOMMENDED DIVERSION RATE CALCULATIONS.

For A36-10197

$$\text{ACRES} + \text{EXP. ACRES} = \text{SYS. ACRES}$$

$$172 + 36 = \underline{208 \text{ ACRES}}$$

$$\text{DIV RATE} \div \text{ACRES} = \text{RATE-PER-ACRE}$$

$$3.44 \div 208 = \underline{0.0165 \text{ CFS/ACRE}}$$

$$\text{RATE-PER-ACRE} * \text{ACRES} = \text{DIV. RATE}$$

$$0.0165 \text{ CFS/A.} * 36 = 0.595 \approx \underline{\underline{0.60 \text{ CFS}}}$$

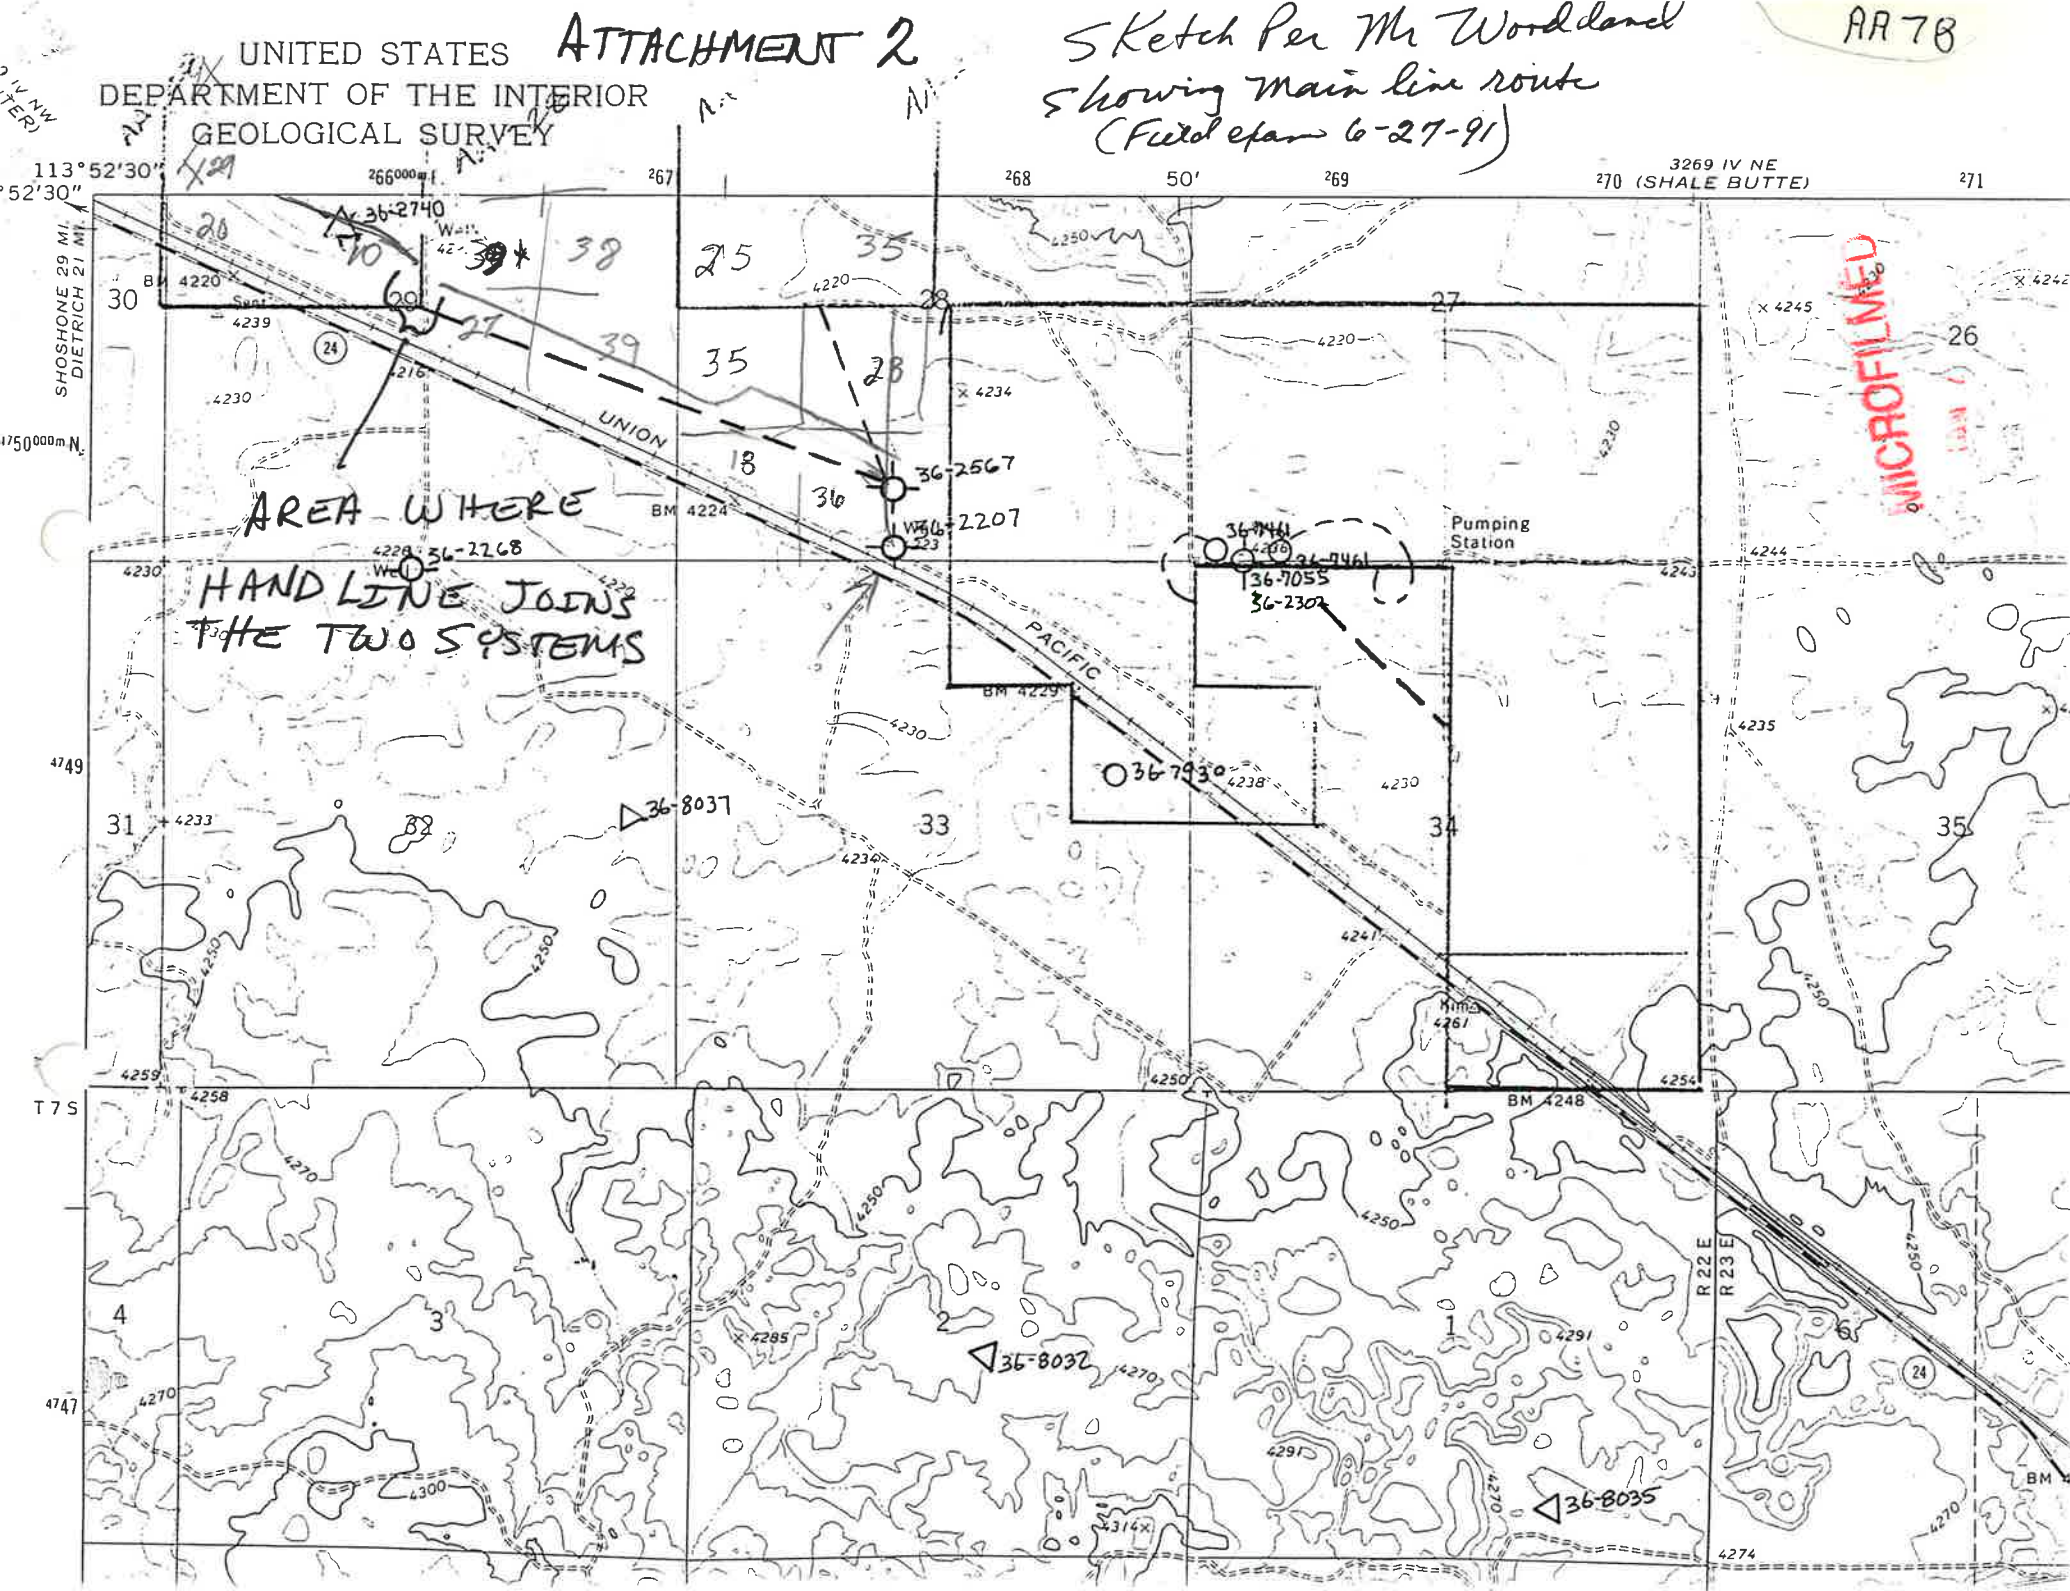

For A36-15179

$$208 + 61 = \underline{269 \text{ ACRES}}$$

$$3.44 \div 269 = \underline{0.0128 \text{ CFS/ACRE}}$$

$$0.0128 * 61 = \underline{\underline{0.78 \text{ CFS}}}$$

Expansion Calculations

Both exp. Claims are based upon license 36-2207 which was licensed at system capacity of 3.44 CFS 172A

Rate per acre calculations

1) for A36-10197

$$172 + 36 = 208 \text{ A total}$$

$$3.44 / 208 = 0.0165 \text{ CFS/A} \times 36 = 0.595 \text{ CFS} \approx 0.60 \text{ CFS}$$

2) For A36-15179

$$208 + 61 = 269 \text{ A}$$

$$3.44 / 269 = 0.0128 \text{ CFS/A} \times 61 = 0.78 \text{ CFS}$$

Allow 0.72 cfs 1" per

P/D in Sec 28 was last measured during the field exam for 36-2567 and ~~was determined~~ the system capacity was determined to be 5.24 CFS.

P/D in Sec 19 was last measured during the field exam for 36-~~2567~~ 2674 and the system capacity was determined to be 5.00 CFS

total system capacity therefore is 10.24 CFS.

INSTRUCTIONS TO EXAMINERS

1. Always carefully note the location of the point of diversion and accurately plat same.
2. When proof is for beneficial use, carefully check up the number of acres actually irrigated in each forty and accurately plat same.
3. Make a map showing the correct location of streams and ditches, and the irrigated lands, and any adjacent permanent landmarks, such as towns, lakes, large streams and public roads.
4. If any unusual conditions are discovered, make plain statement of them under remarks.
5. Always see the holder, if possible, and go over the whole ground with him and make your report only upon actual existing facts and conditions.
6. Give general characteristics of soils, topography, and crops raised.

CLAIM A36-02207 (Base file for Permissible Place of Use filing for 4 additional rights)

PICTURE SET # 1

This picture set was taken to verify the amount of irrigation that actually occurs around the claw like lava flow located in the S"NW~ Sec 29. The picture set was taken from the NE SE NW of sec 29 and looks east on the left side and pans through to the ~~south~~ west on the right. The handline shown covers a portion of the NOT recommended lava outcroppings. The owner indicated that he may file a permit for this ground in the future. A railroad semaphore is visible on the south side of this ground. It is also included in picture set # 2. A neighbors farmstead is also visible.

PICTURE SET # 2

This picture set was taken from Highway 24 and shows the south side of the same lava flow shown in picture set # 1. Also shown is the semaphore. Although it is hard to see, irrigation does go part-way up the lava flow slope which I felt covered acres greater than what was pictured in the aerial photo, thus the adjusted P/U boundary on the south side of the lava flow.
