Important Information About Your Water Right

Winoa Rosa
Rt 1 Box 1300
Paul, ID 83347

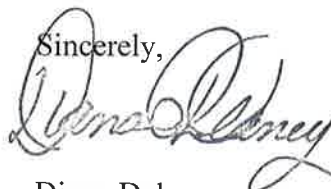

Dear Water Right Claimant(s):

The reverse side of this letter contains a copy of an **Order Amending Irrigation Period of Use Element in Partial Decree, Nunc Pro Tunc** (hereinafter "**Order**") for water right number 36-02236. According to Idaho Department of Water Resources (IDWR) records, you are the current owner of this water right. If you are not the current owner, please contact IDWR immediately at:

Idaho Department of Water Resources
1301 North Orchard
Boise, ID 83706
800-451-4129

The purpose of the **Order** is to set forth beginning and ending dates for the irrigation period of use for this water right. As stated in the face of the **Order**, this action was necessary following the decision of the Idaho Supreme Court in *A&B Irrigation Dist. v. Idaho Conservation League*, 131 Idaho 411, 423, 958 P.2d 568, 580 (1998). This **Order** also incorporates into the **Partial Decree** an express statement that the **Partial Decree** is subject to such general provisions necessary for the definition or for the efficient administration of the water right. This express statement is necessary to comply with the requirements of Idaho Code section 42-1412(6). This **Order**, in combination with the **Partial Decree** that was issued for this water right on February 24, 1998, sets forth all of the elements of your water right. The Snake River Basin Adjudication (SRBA) Court suggests that you keep this document in a safe location together with a copy of the **Partial Decree** to show evidence of this water right. The original of this **Order** and the original of the **Partial Decree** for this water right are on file with SRBA Court. If you do not have a copy of the original **Partial Decree**, one can be obtained by contacting the SRBA Court at (208) 736-3011. Please note that the **Order** is entered **Nunc Pro Tunc**, meaning that the **Order** will be treated as if it were issued on the same date that the **Partial Decree** was originally issued.

Sincerely,

Diana Delaney

I called Mrs. Winona Rosa (Melvin Rosa is deceased) at 438-5618 to discuss her claim. The following is what she told me:

- 1) The groundwater right is presently used to irrigate the northermost 9 acres of the 40. The rest is irrigated with Minidoka Irrigation District Water.
- 2) This is flood irrigation entirely - NO SPRINKLERS.
- 3) The water from this well is physically capable of reaching the 9 acre field and the middle field, which is roughly 16 acres. It cannot, with current diversion works, cross the C-2 Canal to the southernmost field. The last time groundwater was used on the 16 acre field was in the early 1960s.

Kelly, on both of these examples, the best solution is for the claimant, if they are willing, to sign a stipulation modifying the water right. The guidance for such stipulations should be coming out this week...

Subj: DIRECTION FOR GIS PROBLEM

I have 36-13580 that has a note to the file where the claimant states that one of the two wells recommended for the right is actually for drinking and domestic purposes, not irrigation. No objection has been filed. The field verification info states that the info was taken from claim data and a theoretical calc for div rate made. No field exam made. (investigator was Worstell)

Do I do anything with this file?

I have 36-02236 that has a notice of error indicating that only approx 9 acres are irrigated from the well, not the 26 acres recommended. At notice of error the original claimant was deceased. The notice of error was submitted by his wife. An ownership change has since been completed and the claim is now in her name. Notes in the file indicate that objection forms had been mailed to her but no objection was filed.

Do I do anything with this file?

I have completed the GIS entries for these files based upon the current recommended pod and pou.

3. Describe the portion of proposed recommendation with which you disagree:

It appears that the water rights from MID and the ground water from a pump have been switched around. The pump water can not cross a large lateral between MID ground & the 12 acres watered by pump.

4. Describe the changes you wish to have made in the proposed recommendation:

I wish to have the water rights which you desire switched around. I checked with MID & they found 26 1/2 acres on their books. We have owned this ground since 1938 and drilled the deep well in 1953.

5. Describe why you disagree with the proposed recommendation:

Because I do not irrigate this 26 1/2 acres plus 1 acre yard with the pump or ground water as is stated in this paper.

I. Issues identified by claimant: It appears that water rights from the MID and from the well have been switched around. Only 10 acres irrigated by the well and pump in the NWNW¹/₄. Other fields are irrigated with MID water.

II. Reasons provided claimant for original recommendation: The recommendation is based on the claim and on a telephone conversation memo by SW Keen to Mrs Rosa on 10/15/91. Part of this call resulted in a misunderstanding of the lands that are actually being irrigated by the well

III. Additional information provided by claimant: Mrs Rosa clearly indicated the 10 acre field now irrigated from the well, and provided a copy of an additional aerial photo of her property. All other fields are irrigated with MID water.

IV. Changes to be made in final recommendation (if any): Reduce the acres of place of use to 10 acres in NWNW¹/₄ of Sec 9, T9S, 23E. Reduce the diversion rate to 0.20 cfs, the Diversion Volume to 40 AFA and the consumptive use volume to 30 AFA

V. Action taken (date): Made the above changes, changed the notice of error flag to "B" and re-verified the claim. 9/29/92

REMARKS:

Examination of NAPP, ~~USGS~~, and USGS aerial photography revealed the acreages listed above. The 1979 license grants 20 acres in NW NW and 20 acres in the NW SW. The photography, however, shows roads, farm buildings, houses, etc. that detract from the irrigated acreage. Especially - Farmstead in the NWNW; canal through the SW NW.
ASCS Photo = 9.1 acres + 16.2 acres + 7.5 acres = 32.8
