I called Mr. Hunza and suggested he come in and file for the other 10 acres on his license claim. The option would require me to reduce his diversion rate. He said he would come in next week and correct this.

36-04169, 36-10859

Dear Mr. Hruzz,

You recently filed a Notice of Error with IDWR concerning the water right referenced above. No change to our recommendation has been made at this time.

It is the Department's policy to indicate both the season of use and maximum diversion volume on all groundwater irrigation rights recommended in this adjudication. The same standard is used for all irrigation rights in your area.

After reviewing our explanation, you may still disagree with the proposed IDWR recommendations. You may file an objection with the Court after you receive the final recommendation of your water right. The objection process will be explained at the time you receive this final recommendation.

Please contact this office if you have other questions or concerns.

Sincerely,

Roxanne McCarthy

in case follow-up is needed.

Eugene ARJAZA

PO Box 66

Minidoka, ID 83343

2. SUBJECT OF INQUIRY:

He questioned the fact that the adjudication process could put limitations on his elder license. He felt the adjudication process could set shorter limits on his period of use, on his diversion volume, and on his consumptive use volume since these were not specified on his water right license.

3. RESPONSE TO INQUIRY:

I told him we must put these values into his adjudication claim as a method of updating his license.
He will file notice of error cards on his claims as a protest of this policy.

Water Resources,

RESPONSE TO OBJECTION

Petitioner,

vs.

The United States; the State
of Idaho; and all Claimants to
the use of water from the Snake
River Basin Water System,

Respondents.

I. GENERAL INFORMATION

1. Person responding to objection:

Name: R. KEITH HIGGINSON, DIRECTOR

Address: IDAHO DEPARTMENT OF WATER RESOURCES
P.O. BOX 44449
BOISE, ID 83711-4449

Briefly describe your interest in this water right:

IDWR is required to file a response to an objection to part
I of the director's report pursuant to I.C. section 42-1412(2).

(Over)

2. Person who filed objection:

Name: EUGENE & SHIRLEY HRUZA
Address: PO BOX 66

BOISE, ID 83711-4449

Attorney Phone No.: (208) 327-7900

II. STATEMENT OF THE RESPONSE

8. ☒ Period of Year: I respond to the objection concerning the period of year when water is used or is necessary for the purpose stated.
10. ☒ Consumptive Use: I respond to the objection concerning the annual volume of consumptive use.
11. ☒ Remarks: I respond to the objection concerning the "remarks" listed with the water right.
14. ☒ Other: I respond to the objection concerning:
ALL GENERAL PROVISIONS.

REASONS SUPPORTING EACH BOX CHECKED

In response to Statement of the Objection item 8, and all allegations of the objection regarding this item, IDWR responds as follows: Idaho Code Sec. 42-1411(2)(g) requires the director to determine the period of use of each water right acquired under state law that is recommended in the director's report. IDWR's irrigation season of use standards have evolved over time as better technical information has become available. A necessary

consequence of this is that, depending on when a particular license was issued, water rights in the same area have been licensed inconsistently, some licenses being issued with different lengths of season listed and some being issued with no season of use listed. To remedy this problem IDWR has developed irrigation season of use standards for various climatic areas throughout the state based on a 75% chance of a 24 degree fahrenheit frost. The period of the year during which this water right may be used is consistent with the standard irrigation season of use for the area in which the place of use of this water right is located. The director's report does not prohibit pre-season or post-season irrigation; subject to the conditions set forth in general provision 12b of the director's report, water may be used for irrigation outside the standard season of use.

In response to Statement of the Objection item 10 and all allegations of the objection regarding this item, IDWR responds as follows: The license upon which the claimant's claim is based does not set an annual volume of consumptive use for this water right. Idaho Code Sec. 42-1411(2)(i) requires the director to determine the annual volume of consumptive use for each water right acquired under state law and recommended in the director's report. IDWR has developed uniform standards of consumptive use for various climatic areas throughout the state, based upon the definition of consumptive use contained in Idaho Code Sec. 42-1401A(2), which is the maximum volume of water consumed by "the most water consumptive crop that can be grown in the area during the period of year when water is used for irrigation." The consumptive use recommended for this water right is based upon the maximum volume of water consumed by the most water consumptive crop (pasture) that can be grown in the area during the irrigation season. Idaho Code Sec. 42-1401A(2) provides that the quantification of consumptive use "is included as a rebuttable presumption in a decree only for the purpose of transfers pursuant to section 42-222, Idaho Code." Therefore, the consumptive use recommended for this water right is included solely for use in future transfer proceedings, and not as a limitation on the quantity of water that the claimant may divert pursuant to this recommended right.

In response to that portion of the objection that states the changes sought in the director's report, wherein the claimant seeks deletion of the diversion volume, IDWR responds as follows: Idaho Code section 42-1411 requires IDWR to determine the amount of water that may be diverted pursuant to a water right appropriated under state law, and further provides that IDWR shall determine "such other matters as are necessary to define

(Over)

the right". Idaho Code section 42-1412(9) further provides that the court's decree shall include matters necessary for the efficient administration of water rights. Because a right to groundwater is a right to draw from a source measured and described in terms of volume, the quantification of diversion volume for groundwater rights is necessary both to define the right and for administration of the right.

In response to Statement of the Objection item 11, and all allegations of the objection regarding that item, IDWR responds that it has authority pursuant to Idaho Code Sec. 42-1411(2)(j) to include in its recommendations of water rights acquired under state law and recommended in the director's report "such other matters as are necessary to define the right." The remark or remarks objected to are necessary to adequately describe and define this water right.

In response to Statement of the Objection item 14, and all allegations regarding this item, IDWR responds as follows: The objection refers to all general provisions without supplying a reason for the objection. IDWR denies the objection.
