RE:

PROPOSED REPORTNAME OF PARTY: Marvin Allred.CONTACT BY: office visit

ISSUE: Claims filed By FHA but no fees paid, subsequent ownership change to Mr Allred, therefore claims rejected because of lack of fees.

Action: Mr Allred paid \$248 to reinstate #36-2286 and #36-7582. (no late fees as FHA had timely filed the claims with fees waived for federal agencies)

Mr Allred's concern is that FHA assured him that they would pay the fees & that when the Fed paid the fees for these claims the double amt would be refunded to FHA rather than to him.

I talked to Don Shaff and there is no clear way to flag these claims to catch the conflict. With these claims now showing a valid receipt # other than "XIIIIII" the fed may not even be billed for these claims. Mr. Allred's best option is to personally keep on top of the situation through IDWR AND/OR FHA.

Mr. Allred came in on the 23rd & met w/ Jim Stanton to resolve this matter. Jim asked me to call him.

I called and explained the situation of United States claims and how they are not yet paid.

He feels it should be the USA who pays the fees since they told him it was "taken care of."

I suggested he call them and get proof of the payment or solicit a check for \$248⁰⁰ to cover the fees.

He will contact them & work it out.

He called me after I left a card and change of ownership form on his door. I explained what it was for & how to fill it out & return with a copy of his Warranty Deed.

He asked if I knew the diversion rates of the pumps & wells. I described the theoretical calculations I have made (SEE ADDED SHEETS) and the licensed rates. It was obvious the small well was over licensed & the Big well was under licensed - I told him I needed to do some more review to understand the reasoning & history behind the measurements as licensed. I will call back @ 536-6439.

* IDWR* CALLBACK NOTES

Since 36-2286 was claimed on pivot lands and the well has the capacity to deliver, it will be recommended as a split right, parts A & B, since it is separate systems.

The well hooked to the pivot has a potential capacity of 4.43 cfs per theoretical calculation. At Licensing it was found to have a system capacity of 2.45 cfs. This will be the recognized combined rate of R36-02286B & R36-7582.
