RE: Snake River Basin Adjudication (SRBA) Claim Nos. 37-20734 and 37-20735

Dear Claimants:

Thank you for responding so quickly with your Notice of Error Reply to the claims shown above. The points shown on the map are where Lee Peterson determined they should be using a GPS unit when he conducted a field exam for your SRBA claims. However, as you noticed on the GIS Layout with the 1987 aerial photo, the points appear to be shifted to the south. I have enclosed another GIS Layout showing the same points with a 1992 Digital Orthophotoquad, which is an aerial photo produced by the United States Geological Survey. I think you will now find that the points of diversion appear in the proper locations with respect to other features shown in the photo.

I have corrected the legal descriptions for the points of diversion on claim 37-20734 to match the location where the GPS points appear on the 1992 aerial photo. The legal description for the point of diversion for claim 37-20735 did not have to be changed in order to depict the correct Township, Range, Section and Government Lot as shown on the GIS layout.

Thank you for reviewing your preliminary recommendations so thoroughly, and bringing the discrepancy between the aerial photo and GPS points to my attention. If you have any questions, you may contact me at (208) 287-4917.

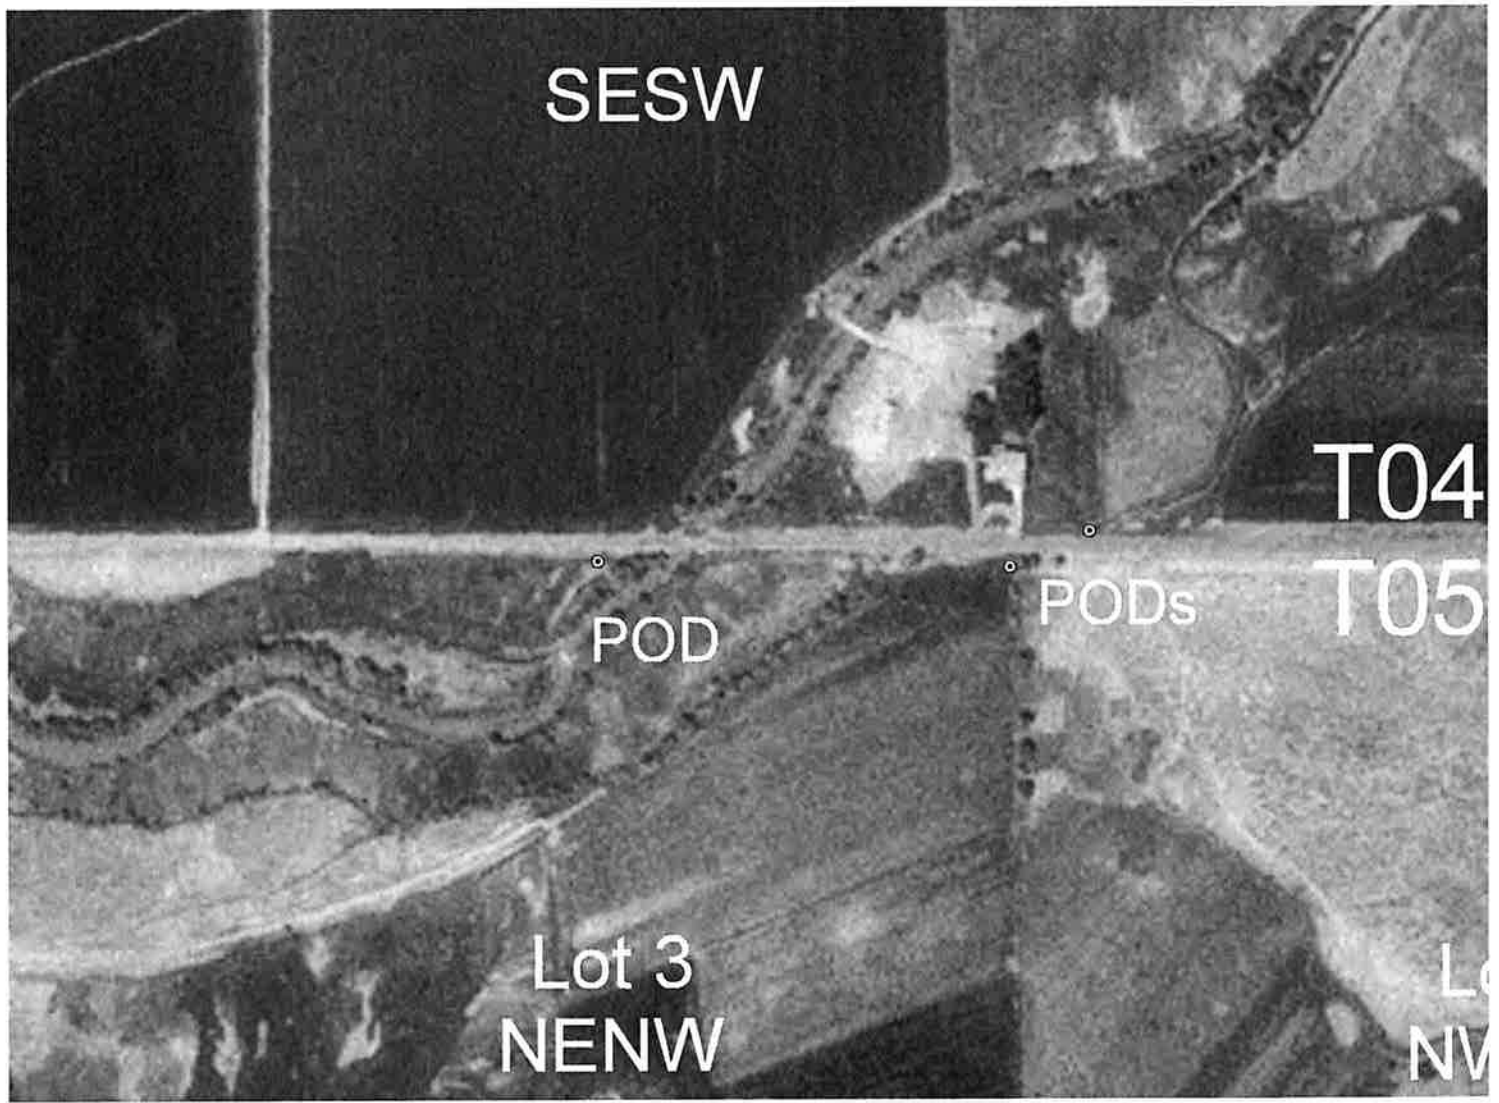

Sincerely,

Carter Fritschle
Water Rights Supervisor
Adjudication Bureau

WATER RESOURCES

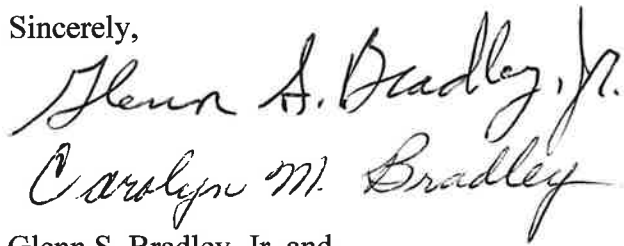

Dear Mr. Fritschle:

Please Refer to our Claims numbered 37-20734 and 37-20735.

In response to your letter of July 30, 2004, please find enclosed two notarized affidavits for each claim.

We trust this will be sufficient evidence to support our claimed priority date. If you need any further documentation, please notify us.

Sincerely,

Handwritten signatures of Glenn S. Bradley, Jr. and Carolyn M. Bradley. The signature of Glenn S. Bradley, Jr. is written in a cursive style, and the signature of Carolyn M. Bradley is written in a similar cursive style below it.

WATER RESOURCES

To Whom It May Concern:

I am writing this letter to support the claim to waste water filed by Glenn and Carolyn Bradley on June 26, 2002. The claim number is 37-20734.

I have intimate knowledge of the use of water on the Bradley property and nearby ownerships. My Uncle, Delbert R. Betty, was the former owner of the Bradley property from May 27, 1944 to the fall of 1965. I helped him farm his place almost every year from 1946 to 1965. When the Bradleys bought the Betty farm in 1965, I leased it from them and farmed it continuously until I retired in 1984.

From the first time I was on the property until the present, the small pastures and the yard area of the Bradley property lying on the south side of the Main Gooding Canal have been watered from waste water which flowed off of the Walker farm to the east of the Bradley property.

The pasture across the road south of the Bradley farm was owned by Charlie and Dessa Gwinn and has been sold several times since. The Bradleys acquired a small tract of it in 2002. It is watered by a ditch from the main Gooding Canal which contours through the southwest corner of the Walker property and is piped under the 620 North road.

Originally, all of the waste water flowing west from the Walker farm was collected and flumed across the old Gwinn ditch to the Bradley property. Since the 1980's, most of the waste water flowing west from the Walker property has been allowed to flow into the old Gwinn ditch to be diverted out as needed by the Bradleys to irrigate their land.

Structures have been in place for many years to enable the waste water to be diverted from the Gwinn ditch to either the Bradley property on the north side of the 620 North road or to the pasture the Bradleys own on the south side of the 620 North road.

Based upon my knowledge, the Bradleys would be entitled to a priority date of at least 1944. They are certainly entitled to the 1965 date they are claiming.

Sincerely,

Elden Guthrie

History of the Use of Waste Water from Walker Farm on Bradley Property
Being Offered as Support to Water Right Claim 37-20734
Written by Glenn Bradley on July 27, 2004

Please refer to the attached drawing for names and details.

When we bought our farm from Delbert Betty in 1965, the farmstead area and pastures south of the Main Gooding Canal were irrigated with waste water from the Walker farm to the east of our place. Elden Guthrie, who is Delbert Betty's nephew, said it had always been irrigated that way since Bettys bought it in the early 1940s.

All of the waste water that flows to the west from the Walker farm was collected in a waste water collection ditch which is just east of the Gwinn Ditch. It was flumed across the Gwinn Ditch just upstream from where the Gwinn Ditch enters the pipeline going under the 620 North Road. Once it was flumed across the Gwinn Ditch, it was available to the Bradley property via a short ditch and a division structure at the property line between Bradleys and Walkers.

Some years later, Harold and Jeanne Brown bought the property which was once owned by the Gwinns. It is now owned by the Woffords and shows on the drawing as "Wofford Pasture".

The waste water collection ditch east of the Gwinn Ditch was almost impossible to maintain due to trampling by Walker's cattle. When it was trampled out, the waste water flowed across it and directly into the Gwinn Ditch. In the late 1980s, I approached the Browns to see if we could make a small change to the system. We reached an agreement that I could install a pipeline from the Gwinn Ditch to our property so I could recover the waste water that flowed into the Gwinn Ditch from the Walker farm. I installed that pipeline in 1988, and have used it continuously since then. It eliminated the job of trying to maintain the waste water collection ditch in Walker's property.

The other part of the agreement was that, if necessary, I could have live water delivered from the canal via their ditch to our property. I also volunteered to supply some labor to maintain the Gwinn Ditch and have worked on it every year since then.

The lower end of the waste water collection ditch still picks up some water, and it is piped into the Gwinn Ditch for our use or can be flumed across the Gwinn Ditch if Walkers need it to water their extreme southwest corner of their pasture.

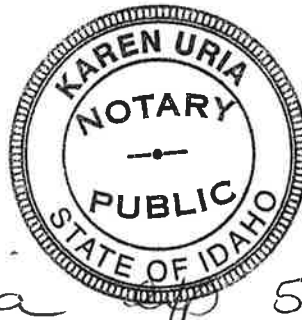

In the summer of 2002, we bought five acres of the former Gwinn property across the road from our house. It shows on the drawing as "Bradley Pasture". At that time we filed for water rights on the waste water coming from the Walker farm for the farmstead area where we have always used it and for the piece of ground across the road from our house.

I then approached Don Wofford for permission to bring the waste water across the road in his pipeline to the "Bradley Pasture". He agreed to let us do that. When we are not using the waste water from Walkers, it runs onto Wofford's property. In exchange, when we need to irrigate our pasture about every two weeks, he lets us take enough water to get it all irrigated in 24 to 36 hours.

Re: Evidence of Priority Date

RESPONSE DEADLINE
AUGUST 27, 2004

Dear Claimants:

The Notices of Claim to a Water Right (claim) identified with the numbers shown above your names has been filed in the Snake River Basin Adjudication (SRBA). The claims indicate your water usage is based on "Beneficial Use" or a "Statutory Claim." Water rights of this type are established by the historic use of water, dating back to when water was first used for the purpose claimed, and are termed beneficial use rights. The date of first use, known as the priority date, has not been confirmed by a License, Decree or Permit. Since the priority date and historic use of a beneficial use right cannot be confirmed by field examination, **proof must be provided by the claimant** supporting the priority date claimed and the historic use of the water.

If you no longer own the property to which the claims are appurtenant please forward this correspondence to the present owner, or return it to Idaho Department of Water Resources (IDWR). If you have received this correspondence from the previous owner of the property it is recommended that you file a Change of Ownership form with IDWR in order to receive future mailings and to participate in the adjudication.

Enclosed you will find a computer printouts of your claims and the pamphlet entitled "Evidence of Priority." The pamphlet describes the types of evidence required and suggests which documents will fulfill this requirement.

PLEASE NOTE: IDWR will recommend the SRBA Court decree the claims disallowed if no evidence of the priority date and of the historic use is submitted. It will be to your advantage to provide clear and convincing evidence. If you choose to submit statements from individuals as evidence, the statement should be in the form of a notarized affidavit.

Please submit the required evidence supporting the priority date and the historic use by the date shown above, referencing all documents with the corresponding claim numbers. If you have questions not covered by this letter or the enclosed pamphlet, please contact this office. Our toll free number is 1-800-451-4129.

Sincerely,

Carter Fritschle
Water Rights Supervisor
