The "B" Main Drain of the North Side Extension is a dug ditch following a natural waterway. The drain ditch was dug and is maintained by the "B" North Side Extension - now called A & B Irrigation District to dispose of the waste water from the project. The project ends at the center of the SE $\frac{1}{4}$ NE $\frac{1}{4}$ on the south line. No attempt is made to reclaim any of the waste water.

Mr. Bennett has made a ditch to pick up the waste water from the A & B Irrigation District and uses it to irrigate ground not reached by Minidoka Project Lateral #25. When he doesn't need the water he has constructed a 30" culvert with a screw gate to divert excess water into Minidoka Project Lateral #25. When the Canal Company can't use the water it is syphoned under lateral and used on other ground owned by Mr. Bennett that is under the Minidoka Project.

No measuring device is used. Only controls are where water is diverted into Lateral #25 or syphoned under Later #25. Mr. Bennett said the amount of water varies from none to 200 inches through the season.

See Contract #11-06-100-2227 between A & B Irrigation District and Minidoka Project, Page 5
