RE: Snake River Basin Adjudication
Claim #A36-02420

Dear Mr. May:

We have accepted the above referenced Notice of Claim based on License #36-02420. However, our records show that the original license was issued for 154 acres. Attached is a copy of the claim as accepted for you to keep in your files.

In order to protect the additional acres now being claimed, you have two choices. You may file an additional claim to cover the additional 6 acres based on beneficial use under the presumption statute §42-1416, Idaho Code. This does not mean that this use will be automatically allowed. The presumptions under the statute are rebuttable and if this claim is contested in the Snake River Basin Adjudication, it may eventually be recommended for disallowal.

Another option is to file an Application for Permit on this additional irrigated acreage and have it acted upon by the Department and perhaps eventually licensed. In this case, the date of priority is the date the complete application is received and since the proof of beneficial use would be after the commencement date, November 17, 1987, you would not be required to file a Notice of Claim. Of course, you may do both if you wish.

RE: Snake River Basin Adjudication
A36-02420

Dear Mr. May:

We are returning the Notice of Claim to a Water Right filed for property owned by the James Westfall Estate in Gooding County. We have noted a problem with the claim in regards to the signature of claimant, Item #16, which we would like you to correct.

The claim has been signed by you, but we did not receive a power of attorney signed by the personal representatives, I. Clarrissa Westfall and Dorothy Krueger, authorizing you to act on their behalf in this matter. Please provide us with the signed power of attorney form or have Ms. Westfall and Ms. Krueger sign the form.

Please return the documents to this office at the attention of Helen Harrington-Thornton. If you will make these corrections before April 16, 1989, you will not be assessed a late filing fee. Please do not hesitate to contact this office if you have any questions or concerns.

Yours Truly,

Notice of Error Response
Recommended Right No. 36-02420

Dear Sir,

You recently filed a Notice of Error with IDWR concerning the water right referenced above. No change to our recommendation has been made at this time.

As you know, the adjudication claim for Mr. Westfall's estate was based on a previously licensed right. On May 3, 1989, Mr. Donald Shaff wrote to you suggesting some alternatives that might allow recommendation of the additional irrigated lands. We have no record of a response to that correspondence.

Our final recommendations to the Court must be complete by October 13, 1992. You may wish to visit our office in Twin Falls before that date.

After reviewing our explanation, you may still disagree with the proposed IDWR recommendations. You may file an objection with the Court after you receive the final recommendation of your client's water right. The objection process will be explained at the time you receive this final recommendation.

WHY IS THE NOTICE OF ERROR REQUIRE?

The court has ordered that IDWR adopt this procedure to provide a simple and inexpensive means to try to resolve potential disputes informally before the Director's Report is filed with the court. Disputes that are not resolved through this procedure will be resolved by the court through the objection procedure described below.

If a dispute can be resolved informally before the Director's Report is filed, it will save time and money for everyone, since you and IDWR will not have to appear before the judge to resolve the matter. Many disagreements can be resolved informally through this procedure.

WHAT HAPPENS AFTER THE DIRECTOR'S REPORT IS FILED WITH THE COURT?

When the Director's Report is filed with the court, you will be mailed a notice of filing the Director's Report, along with a copy of your claim as it is recommended in the report. The notice will state the locations where a complete copy of the report is available.

If you disagree with any portion of the Director's Report, then you will have an opportunity to file an objection to the report with the court. This includes the director's recommendation as to your water right, or to someone else's water right. If you disagree with any portion of the Director's Report, you must file an objection with the district court by the objection deadline, or you may lose the right to challenge anything that you think is wrong in the report.

IDWR must file a response to each objection. You will have the opportunity to file a response if someone else objects to your water right, or if you wish to participate in the proceedings on an objection to someone else's water right.

Once the deadlines for filing objections and responses have passed, the court will enter a partial decree that determines all of the recommendations to which no objections were filed. The uncontested claims will be decreed the same as they are shown in the Director's Report. The court will then proceed to resolve the disputes raised by the objections (the contested claims), after trial if necessary, and to enter partial decrees of those remaining claims.

The notice of filing the Director's Report will contain further information about the procedures to be followed after the report is filed with the court, including the deadlines for filing objections and responses, and the date and location of the hearing on the partial decree of uncontested matters.

IS THERE ANYTHING ELSE IN THE DIRECTOR'S REPORT?

The Director's Report will also include "general provisions." These provisions apply to all water rights in the area where your claim is located or to certain types of water rights in your area. Some of the general provisions further describe or limit certain types of water rights. Some of the general provisions will affect the way in which water rights in your area will be administered.

Proposed general provisions for the Director's Report are available for your review and comment at this time. Copies are available for inspection at all IDWR offices (listed below), and at the additional locations printed with your proposed recommendation. Copies can be obtained from IDWR (subject to a small charge for mailing and/or copying).

WHAT IF YOU DISAGREE WITH THE PROPOSED GENERAL PROVISIONS?

If you disagree with the proposed general provisions, please complete the "Notice of Error" form below, and return it to IDWR by the deadline shown on your proposed recommendation. You are not required to file a notice of error if you disagree with the proposed general provisions, but filing a notice of error will provide an opportunity for resolving disputes as to this portion of the Director's Report before the report is filed with the court.

HOW CAN YOU GET MORE INFORMATION?

If you have questions about your proposed recommendation or the notice of error procedure, please call your attorney or IDWR.

EXPLANATION OF ELEMENTS OF A WATER RIGHT

This explanation is provided to assist you in reviewing the proposed recommendation of your claim.

Water right number: This number is assigned by IDWR to identify your claim. The first two digits indicate the sub-basin of the Snake River Basin where your claim is located.

Name and address of claimant: This is the name and address shown on the notice of claim form, or on the most recent notice of change in address or change in ownership that was filed with IDWR as required by statute.

Source: The source is the natural water body to which the claimant has a right. For surface water sources, the natural water body to which the source is tributary is also shown.

Priority date: This is the calendar date which is used to determine the relative priority of the right in relation to other rights from the same source, and is determined based on the method of appropriation (see basis of right, below). When there is insufficient water available to satisfy all existing rights, the water right holders with the oldest priorities are entitled to have their water rights satisfied before right holders with newer priorities are entitled to water.

Purpose of use: Purpose of use indicates the general type of use made of the water, such as irrigation, domestic, or stockwater.

Period of use: The period of use is the portion of the calendar year when water may be used for a particular purpose.

Quantity: The quantity of the right is the rate of diversion in cubic feet per second (CFS), the volume of water diverted in acre feet per calendar year (AFY), and/or the volume of water stored in AFY. The quantity for each purpose of use is shown, as well as the total quantity.

Non-irrigation uses: If your proposed recommendation includes purposes of use other than irrigation, then this element further describes the other purposes of use.

Point of diversion: The point of diversion is the point at which water is diverted from the source, and is generally described by a legal description of the 40 acre tract (1/4 1/4 section or 1/16 section) or government lot within which the point of diversion is located. In some instances the point of diversion is described by a legal description of the 10 acre tract (1/4 1/4 1/4 section or 1/64 section) within which the point of diversion is located.

"B" and "E" suffixes indicate the beginning and ending points of an instream flow right. "I" and "R" suffixes indicate points of injection and rediversion. Points of injection and rediversion are indicated where water is diverted from one source, injected into another source, and then rediverted, or where water from one source is exchanged with water from another source.

Place of use: The place of use is the location where water is used, which is indicated by a legal description of the 40 acre tract (1/4 1/4 section or 1/16 section) or government lot where the water is used. For irrigation rights, the number of irrigated acres in each 40 acre tract or government lot is listed.

Consumptive use: Consumptive use is the amount of water that does not remain in the water system after use or is not returned to the water system through return flows or seepage. Consumptive use is shown only for irrigation rights or for the irrigation portion of water rights, unless the description of the water right indicates otherwise. Where consumptive use for any purpose of use is not stated, then the consumptive use is so small that it is not quantified.

Remarks: Remarks, if any, further describe the particular right. PLEASE REVIEW THE REMARKS CAREFULLY - Due to technical difficulties, the remarks shown on your proposed recommendation may be different from the remarks on your claim but do not show overstrikes and underlines.

Basis of right: The basis of the right may be a decree (where the water right was previously determined by a court); posted notice (an historical method of appropriation that is no longer available); beneficial use (another historical method of appropriation that is available today only in very limited circumstances); permit (where IDWR has granted an application seeking approval of a proposed appropriation); or license (where an appropriation has been completed pursuant to a permit).
