RE: FIELD EXAM OF WOLTERS FARM

DATE 8-30-91

NAME OF PARTY

MARTIN WOLTERS

He said the pumps tied together produce 2250 GPM as listed on the name plate at the time of testing. They run 15 lines and each line runs about 150 gallons per line at 50 PSI. ($15 \times 150 \text{ GAL} = 2250 \text{ GPM}$)

He also was puzzled at why this farm was licensed all around the pump in NENE sec. 16 but was never licensed for the NE 1/4 in Sec. 16. He explained the pump was first used as a gravity system and irrigated down the hill from the pump. (Indicates the NE 1/4 sec. 16)

STEVE CLELLAND

After my field exam of this place of use, it does appear the NE 1/4 of Sec. 16 was irrigated at the time of licensing. Since the information in the records is unclear at this point, I have shifted acres around under the rights supplied from the two intertied wells. This will give all the lands under a permissible place of use a licensed right. The pivot system & well is only licensed for 300 acres so I have recognized the additional acres under that system as an expansion under 42-1416(a). All the wells were licensed at capacity diversion rate so new waters are available for development. The expansion was developed in 1994 when the pivot was installed.
