Ownership Change

Dear Claimants:

As you know, the title company assisted you with some documents dealing with changing the ownership of water rights. Those documents were sent to the SRBA Court who in turn forwarded the Standard Forms 3 you completed to our office. In mid-1996 the Court altered the procedure placing the Department in the 'gate-keeper' role. Before we can make any changes, we must have a copy of the recorded Warranty Deeds to confirm the conveyance and legal descriptions.

Upon receipt of the Deed copies, the water right claim records will be reviewed and changed. Notice of the change will be sent to the SRBA Court, to you and any other necessary parties to the water right cases.

If your mail delivery address changes in any form, please contact us in writing so we can update our records to assure you receive important notices concerning your water right claims.

Please contact this office toll-free at 1/800-451-4129 if you have any questions.

Sincerely,

Idaho Department of Water Resources

Ownership Change

Dear Claimants:

As you know, the title company assisted you with some documents dealing with changing the ownership of water rights. Those documents were sent to the SRBA Court who in turn forwarded the Standard Forms 3 you completed to our office. In mid-1996 the Court altered the procedure placing the Department in the 'gate-keeper' role. Before we can make any changes, we must have a copy of the recorded Warranty Deeds to confirm the conveyance and legal descriptions.

Upon receipt of the Deed copies, the water right claim records will be reviewed and changed. Notice of the change will be sent to the SRBA Court, to you and any other necessary parties to the water right cases.

If your mail delivery address changes in any form, please contact us in writing so we can update our records to assure you receive important notices concerning your water right claims.

Please contact this office toll-free at 1/800-451-4129 if you have any questions.

Sincerely,

Idaho Department of Water Resources
Adjudication Bureau

II. STATEMENT OF THE RESPONSE

1. ☒ Name and Address: I respond to the objection concerning the name and/or address of the owner of the water right.
8. ☒ Period of Year: I respond to the objection concerning the period of year when water is used or is necessary for the purpose stated.

REASONS SUPPORTING EACH BOX CHECKED

In response to Statement of the Objection item 1, and all allegations regarding this item, IDWR responds as follows: No notice of change of ownership has been filed with IDWR by the owner of the right as required by Idaho Code Sec. 42-1409(7). IDWR therefore lacks sufficient information to form a belief as to the truth of the matter asserted. Upon the filing of a notice of change of ownership, IDWR will correct the name and address of the owner of this water right accordingly. The claimant may also need to file a Standard Form 3 with the SRBA Court.

In response to Statement of the Objection item 8, and all allegations of the objection regarding this item, IDWR responds as follows: Idaho Code Sec. 42-1411(2)(g) requires the director

to determine the period of use of each water right acquired under state law that is recommended in the director's report. IDWR's irrigation season of use standards have evolved over time as better technical information has become available. A necessary consequence of this is that, depending on when a particular license was issued, water rights in the same area have been licensed inconsistently, some licenses being issued with different lengths of season listed and some being issued with no season of use listed. To remedy this problem IDWR has developed irrigation season of use standards for various climatic areas throughout the state based on a 75% chance of a 24 degree fahrenheit frost. The period of the year during which this water right may be used is consistent with the standard irrigation season of use for the area in which the place of use of this water right is located. The director's report does not prohibit pre-season or post-season irrigation; subject to the conditions set forth in general provision 12b of the director's report, water may be used for irrigation outside the standard season of use.

CHANGES TO THE DIRECTOR'S REPORT

The director proposes no changes to the description of this claim in the Director's Report.

GREG & CRISTI HEINS

2. SUBJECT OF INQUIRY:

They called to set up an appointment to get copies and review all their SRBA claims on file with the Court. They came in and asked for these copies and objection forms.

3. RESPONSE TO INQUIRY:

On the phone I told Cristi Heins, I cannot discuss the recommendations or objections; I can explain the process of the adjudication.

When they came in I explained this is a lawsuit and is operated under certain legal rules and procedures. Since I am not a lawyer I am unable to give this or other information which might be legal advice.

I gave them ^{PROFILE} copies of the recommended rights and the claims record. I explained the differences between Total Volume and Consumptive Volumes. I showed them the Map published by IDWR listing these values and the season of use.

I gave them 22 objection forms and explained I cannot assist in completing them. They also got a handout explaining D+S special procedure for late filing after the DReport.

The Period of use FROM

4. Describe the changes you wish to have made in the proposed recommendation:
Return the Period From April 1 back to the March 1 as is stated on the original permit.

5. Describe why you disagree with the proposed recommendation:

The original permit states March 1 as the period from date and there are times, such as 1992 crop year, when we have had to irrigate in March in order to provide moisture to sprout the seeds. Surely, one cannot change a license date by "administrative decree"?

Dear Mr. & Mrs Heins:

This letter is in response to the Notice of Error (NOE) you recently filed with IDWR regarding the Director's proposed recommendation of the claim(s) listed above. Your NOE indicates that you would like the recommendation to show a longer season of use for irrigation. For the reasons states below, the season of use that will be recommended in the Director's Report will remain as proposed.

The proposed recommendation is based on irrigation season of use standards adopted by the director for the various regions throughout the state. These standards are based on the period of the year in which there is less than a 75% chance of a 24 degree F. frost.

In addition, since there are some years in which water can be beneficially used for irrigation outside the irrigation season, the proposed Director's Report includes a general provision which provides for irrigation outside the irrigation season under certain conditions. The conditions are that the water is beneficially used, as determined by the director; that all water rights with a period of use outside the irrigation season regardless of priority, are satisfied; and that the use does not conflict with the public interest as determined by the director. This proposed general provision will be included in the Director's Report.

If you still disagree with IDWR's recommendations you will have an opportunity to file an objection to the Director's report with the court. When the Director's Report is filed with the court, you will be mailed a notice that will contain more information about the objection process.

Sincerely,

Allen D. Merritt, P.E.
Water Rights Supervisor

RE: WELL CAPACITIES

I was doing some theoretical calculations of the South well used by Heins. At first I used the 300 HP as listed on their map and the amount came out just right for the licensed amounts. When I checked the system as claimed it listed a 200 HP motor which indicates the 300 HP was developed after the claim was filed.

I determined the unrecorded transfer of parts A & B to parts C, D & E occurred in Sept. 1975 when Maldonado bought the N $\frac{1}{2}$ from Morgan-Shillington (see conversation memo w/ Miller).

This being so, the 5 year forfeiture period had passed and it appeared the right was lost, or portions of it were.

When I looked at the old license Exam it appears both wells were used to produce the total 11.05 cfs. Since each well & pump was similar, they should produce about $\frac{1}{2}$ the total amount or 5.525 cfs each. RECORDED
JAN 28 1993

Without more information on the rate of Diversion from each well separately at time of exam, It appears Each well is capable of supplying the rights claimed.

NAME OF PARTY

JOLENE MILLER

I asked her when they bought their farm and split the wells. She looked up some information and found she bought the lands in ~~September 1975~~. At that time Patterson Farms either rented or owned the other portion known as Monogram Farms. She thought Heins bought that piece a couple years later. * Mrs. Miller called back.

Maldonado bought from Morgan-Shillington Sept. 1975
Millers bought it from Maldonado in Dec 1981

Therefore Heins would have bought around 1983.
However the Transfer on 36-2066A was not completed by Patterson Farms until 1984.
