Re: Water Right Nos. 67-88, 67-90B, 67-4175 (Carolex "Down River" Rights)
Water Right Nos. 67-87-, 67-93, 67-4174 (Carolex "Up River" Rights)
Water Right Nos. 67-89B, 67-4069, 67-7403 (Yantis "Down River" Rights)

Dear Craig:

Following up on my voice mail and email, I am enclosing for your review in connection with the above-captioned water rights the response of Alvin Yantis (dated February 12, 2006). Mr. Yantis' letter responds to your letter dated October 19, 2006 (copy also enclosed).

As you know, I represent Carolex LP in connection with its rights captioned above. The issues raised by Mr. Yantis have implications for the appropriate duty of water for Carolex' water rights.

I will look forward to discussing this with you, once you have had an opportunity to review this information.

Sincerely,

Christopher H. Meyer

RE: Hubble Analysis, Claim No. 67-4069

Dear Mr. Yantis,

We received the packet of information you sent in response to the Hubble Analysis Worksheet that we gave you to investigate and determine whether more than 0.02 cfs per acre has been put to beneficial use.

The information submitted appears to be applicable to the ground below your property, which is owned by Carolex LP. I spoke with my supervisor and it was determined that there is not sufficient information to conduct a review of the property you claimed for this water right.

I will be recommending the water rights as is at a combination of one inch per acre with an additional 0.46 cfs for ditch loss on this right.

You will have a chance to object to the recommendation and submit the detailed information requested that can lead to settlement of the water right for the Court to decree. I encourage you to use the form that I mailed you on September 28, 2006 so as not to miss any needed information.

Respectfully submitted,

Craig L. Saxton
Sr. Water Resource Agent

February 12, 2007

Dear Mr. Saxton,

RE: (Lower Ditch) Water Rights 67-89B, 67-7403, 67-88, 67-90B & 67-4175

I'm resubmitting the flow rate questionnaire. Your calculations show irrigating 161.4 acres between Carolex LP and us on the lower ditch. The old decree rights allowed 120 acres for us and 960 for Carolex LP. Under New Decree these additional acres will be lost. IDWR is allowing .02 cfs per acre. Our records (see attached) and water master daily records show we have historically used more. Based on (attached) field report and past measurements, we request at least .04 cfs per acre for decree right. "Flood irrigation" is just as it sounds. You flood over the ground and it goes back into the river for someone else to use.

Sincerely,

Alvin Yantis

Enclosures

SCANNED

MAR 15 2007

1. See attachments
2. Yes, there are two separate irrigation systems. The "up river" group allows .85 cfs on 42.5 acres. This ditch system is a mile long. .85 cfs will not make it to the first turnout.
3. Stock watering is ok
4. Gravity: "see attachment" The lava irrigated south of the river was irrigated by gravity flow from wastewater off Mesa Orchard. There could possibly have been a time that a pump and sprinklers could have been used. Due to the nature of soil type, cost of capitol outlays, and operation, what little extra production that could be obtained makes it not feasible at this time.
5. Priority dates are consistent with Muir Decree Records obtainable from the IDWR Internet site.
6. Points of Diversion are consistent with what I told IBWR & Mr. Myers.
7. Disallowed claims: This is also consistent with what I told Mr. Myers. The storage water is administered by the Irrigation Company. Water master of District 67 sets the flow.
8. Weir issue: See attachment
9. Forfeiture – water bank: Very modern irrigation practices for "flood irrigation" are being applied on Carolex Property.

Prior to the late 50's, Mesa Orchard took 95% of the usable water in the late irrigation season. They diverted it four miles upstream and diverted it to the South side of the river. Therefore, there wasn't much water left to be diverted on the north side. Their water right was 70cfs.

When we started irrigating this property in the 70's most water ran down into the low areas straight to the river, or set in the low spots making swamps. With an elaborate set of lateral ditches a more uniform coverage is accomplished, therefore, creating more production. I advised Mr. Myers that he was welcome to come and I would show him around. To successfully flood irrigate on sloping ground takes a lot of time and effort, which is pretty much a lost art. If we do not aggressively pursue the Decree of extra water I have shown we are using by "gravity irrigation", we will not be able to efficiently irrigate all 203 acres.

RE: Water rights ~~67-4069~~, 67-89B, & 67-7403 67-88 67-908 67-4175

Dear Mr. Saxton,

The crops irrigated are native grasses used for hay and pasture. The ditch irrigating these crops is approximately two miles long. There are thirty-five checks on a seven-day rotation.

Measuring records, which you have, indicate the amount of water used from the 1970's. The water master has more records, which are forthcoming. You will find enclosed work sheets from Mr. Tom Dietz who used his gps to gather data on the area and noted the slopes and soil types.

We use more than an inch per acre but are really only borrowing it. As is indicated by the aerial photos, the longest run back to the river is one-fourth mile. Most water is returned in less than two hours. There is a river-measuring device at Fall Creek above us, and another below us at the highway bridge. Measurements in the past indicate that when we are irrigating more water is measured below us than above our place.

We appreciate all your time and effort and if you have any further questions please let us know. Thank you.

Sincerely,

Alvin Yantis

TO:

REGARDING: ALVIN YANTIS "HOME PLACE" GPS / AREA

ALVIN YANTIS ASKED ME TO GPS HIS ACREAGE AND GIVE A GENERAL DESCRIPTION.

I USED A GARMIN GPS INSTRUMENT AND WALKED THE PERIMETER OF FIELDS MOSTLY PLANTED TO ^{NATIVE GRASSES} ALFALFA.

LOCATIONS OF FIELDS WERE BETWEEN THE MIDDLE FORK ROAD AND THE MIDDLE FORK OF THE WEISER RIVER, EXTENDING FROM THE YANTIS' HOME TO THE LOWER DIVERSION (MARKED *).

COMBINED ACREAGE FOR ALL AREAS UNDER IRRIGATION BETWEEN DITCH AND RIVER IS APPROXIMATELY 162.2 ACRES (ALLOWING FOR POSSIBLE ERRORS IN TREE AREAS).

GENERALLY, THE ACREAGE HAS A SOUTH ASPECT, AVERAGING 1.5% SLOPE; AREAS CLOSEST TO RIVER ARE LEVEL.

OVERALL, SOILS ARE VERY ROCKY, AND WELL-DRAINED, RESULTING IN POOR FIELD RETENTION.

RUNOFF INTO MIDDLE FORK IS EASILY OBSERVED (WINTER PERCOLATING THROUGH ROCKS); EASTERN-MOST SECTIONS HAVE SOME MARSHY, HAY-PRODUCING SOIL.

ACREAGES OF INDIVIDUAL SECTIONS (DIVIDED FOR EASIER MEASUREMENT) ARE AVAILABLE.

I AM NOT A LICENSED ENGINEER, BUT I DO HAVE A BACKGROUND IN FORESTRY AND AGRICULTURE (B.S. AGRONOMY).

Subject: RE: Hubble

Craig,

To even start on things I need the soil property tables for Musym=32, 98 & 99 from the Soil Survey for Adams County. This data is not available through ArcView. If you can track down the survey and scan the various tables for those soil types that would be excellent.

Also, what is with the Lost Valley Res. "shares" that is spoken of in 67-4175? Are these rights and the shares commingled? Or is the priority set due to the existence of a decree for other lands? Why do all the water master delivery books show Yantis with 0 diversion?

Thanks,

Doug

Subject: FW: Hubble

Hey Doug,

I hope this doesn't catch you off guard. I have been submitted a Hubble analysis worksheet and was informed you could review it. I have sent the first request back because they didn't have all the elements needed for the analysis. This time they at least used the form. I don't know if there is enough info there too do it though.

First of all there is a ton more information in the form of dialog and questions regarding the recommendations on the respective water rights that would give the history of why they want the Hubble analysis as well as water master records showing delivery of more water.

But here is the short version of the background: There are two water users that use the same ditch and POD (actually 3, but the third isn't involved in this). Alvin Yantis is the user farthest down the ditch (67-4069) farms his property and also the other property involved that is owned by Carolex LP (67-4175). 67-4069 originally requested a Hubble for his water right but submitted information the Carolex LP property. The attorney for Carolex (Chris Meyer) somehow connected up with Yantis and now they are trying to get additional water for both properties.

That is the short story. The long story involves, among other things, the question of if that additional water is decreed or flood water (I only listed the flood water rights). But it would seem the first question would be if they need more than an inch per acre in the first place.

Anyway, let me know if this is a problem or if you have questions.

Thanks,

Craig

Craig,

I just spoke with my supervisor, Scott King, who is more familiar with the Carolex case. He clarified the fact that SPF has been hired by Givens Pursley only to review IDWR's Hubble work, rather than to do our own Hubble. So it sounds like you're still stuck with this one. I'll be speaking with Scott tomorrow about this one, so I'll let you know if anything changes.

Thanks,
Marci Pape

Hey Marci,

I contacted Doug Jones at Southern and he said he hasn't gotten to it yet. So it sounds like it is yours to run with. Whatever information I may have is yours. I will be glad to e-mail it to you or whatever would work best.

Thanks Marci, I am really glad you are on the job.

RE: Lost Valley Reservoir Shares for Carola Holdings (now known as Carolex LP)

Dear Ms. Shumway,

I am writing to request information about Lost Valley Reservoir storage shares in the name of Carola Holdings. I have tried to contact you by phone without success.

I have a digital copy of Bosco Bosler's 2005(?) water master records that show 20 shares of Lost Valley Reservoir storage water allocated to Carola Holdings on parcel RP15N01W120600.

Can you tell me if these shares are delivered to Carola Holdings?

Any information you could provide on these shares and how they are used would be greatly appreciated.

Respectfully submitted,

Remarks:Comments:

1. csaxton 4/12/2006 Acres On SE side of river

Comment: Lands south west of the river have not been irrigated since the late 60s I think. The claimants attorney Chris Meyer called and left me a voice mail giving me the year of the last time the acres to the south were irrigated. It was far enough back that if there was a water right there at one time, it was forfeited. Unfortunately, I did not write down the date that Chris told me. But I did note in a 3-24-06 e-mail to Chris that I was not going to recommend the acres on the south side of the river. At this time he has not argued with that determination.

2. csaxton 4/12/2006 Quantity

Comment: Alvin Yantis that uses the same pod for his water rights provided measurement records from 1978 that show the POD can divert well over 4 cfs.

3. csaxton 4/12/2006 Copied From Claim (1)

Comment: OTHER RIGHTS (CONT.): 67-00090, 67-00093, 67-04174, 67-04176.

Subject: RE: Yantis Diversion Rate Records

Chris,

I will use the information that Alvin Yantis provided to support that the point of diversion can divert enough water to satisfy all water rights that it serves at the same time. At this time, I do not see a need to put a remark limiting the diversion rate, on all the water rights served from this POD, to 2.9 cfs.

Craig

Hey Chris,

Here is what I have. Just to verify, I will look into this and at this point, no further action needs to be taken regarding this issue.

Thanks,

Craig

Subject: POD measurement information

Hey Chris,

Thanks for the message. Based on the information provided stating that the last time the land below the river was irrigated was 1968, I will have to remove that acreage from the recommendations.

As far as the diversion rate. In order to remove the need for the remark we spoke about, I need evidence that 3.43 cfs can be diverted through the POD in section 14. What I am thinking, is if your client cannot provide information on the flow, I think it best that we come out there when we can and when high water is flowing and get a measurement from the weir.

The more we talk, the more it is appearing that we have two separate irrigation systems out there. One from the POD in Section 12, and one from the POD in section 14. If there are two separate systems, then I am going to have to recommend the rights in two groups (instead of one big one).

The ground irrigated from Section 14 is 117.6 acres and includes the following rights:

67-88
67-90B
67-4175; priority of 5-10-1918 (one day after the decree)
67-4176 (disallow as recommended under 67-4175)

The total diversion rate planned to be recommended under these rights is 2.35 cfs or 1 inch per acre. This is the POD that we still need to confirm can divert 3.43 cfs or more to avoid adding a limiting remark to the rights diverted from this point of diversion.

The ground irrigated from Section 12 is 42.3 acres and includes the following rights:

67-87
67-93
67-4174; priority of 5-10-1918 (one day after the decree)

The total diversion rate planned to be recommended under these rights is 0.85 cfs or 1 inch per acre.

In summary, I am still planning on recommending all the acreage we spoke about at the very beginning except for the acreage on the south side of the river. And I still feel I can recommend a total of 1 inch per acre on all the ground irrigated. And if we confirm a greater diversion rate from the POD in section 14, then we won't have an limiting remark. I am just describing two irrigation systems as that is what appears to exist in the field.

Drop me a line if you have questions. I will be leaving the office today at 1:30 however, but will be back in on Monday.

Have a good weekend.

Craig

Subject: RE: Carolex LP Water Rights

Hello Chris,

I did find one thing I need some help with. I need to know when the water was first put on the south side of the river? For your convenience I have enclosed a map. Now one thing I am a little worried about is that when statutory claim 67-4176 was filed, it didn't appear that they were irrigating anything south of the river and that was in 1977. So if it occurred after 1977 then we are in violation of the mandatory permit statute for surface water (May 20, 1971). But I am not going to hold the original Statutory claim as the final word. Just wanted to point that out. I am attaching the backfile for 67-4176 for your review.

So anyway, what I need is basically evidence of priority telling me how the water gets to the other side of the river and verification of when it first took place.

Drop me a line if you have any questions.

Craig

Hello Chris,

I just thought I would drop you a line and let you know that received your letter and I think we are both on the same page. I don't have any questions at this time. I will let you know if something comes up.

Later,

Craig Saxton

Re: Carolex LP – Water Right Nos. 67-80D, 67-81AC, 67-87, 67-88, 67-89A,
67-90B, 67-93, 67-4174, 67-4175, 67-4176, 67-4270, and 67-7338

Dear Craig:

This follows up on our December 15, 2005 meeting regarding the above-captioned water rights for which SRBA claims have been filed by my client, Carolex LP, in Adams County. Carolex also owns rights in other basins, which are not addressed in this letter.

I. NAME OF ENTITY

As I mentioned, there has been a change in the corporate entity, from Carola Holdings to Carolex LP. We will forward to you a change of ownership form and documentation.

II. WATER RIGHT NO. 67-80D

Water Right No. 67-80D is claimed out of original Water Right No. 67-80, which corresponds to the original right decreed in the amount of 3,500 inches to Orchards Water Company with an extensive place of use, the closest to the Carolex property being:

T15N, R1W, Sec. 10, S SW
T15N, R1W, Sec. 10, SE SW

This is outside of the Carolex property. As of this date, I do not have evidence that any portion of this right was transferred to Carolex.

III. WATER RIGHT NO. 67-81AC

Carolex holds shares in the Lost Valley Reservoir Company. We understand that Carolex's claim for Water Right No. 67-81AC will be disallowed on the basis that the water rights associated with the Lost Valley Reservoir will not be decreed to the individual shareholders (which hold beneficial title), but instead will be decreed to the Lost Valley Reservoir Company (which holds legal title).

Storage water from this project is used by Carolex for exchange purposes. I have discussed this with David Tuthill, who is reviewing these storage claims. David assured me that the place of use for the Reservoir Company's rights will include the Carolex property. David and I agree that there is no need to document the exchange arrangement under which storage rights are released from the reservoir for the benefit of Carolex's diversion on the Middle Fork Weiser River.

IV. WATER RIGHT NO. 67-89A

Water Right No. 67-89A is claimed out of original Water Right No. 67-89, which corresponds to the original right decreed in the amount of 21 inches to George Shaw with the following place of use:

T15N, R1W, Sec. 10, NW NE
T15N, R1W, Sec. 10, NE NW
T15N, R1W, Sec. 3, E SW

This is outside of the Carolex property. It is my understanding that this is property owned today by Alvin Yantis, not Carolex. As of this date, I do not have evidence that this right was transferred to Carolex.

V. WATER RIGHT NO. 67-90B

When we met, you pointed out that the watermaster lists Water Right No. 67-90B in the name of Mink Land & Livestock. This is in error. This water right is owned by Carolex. I have spoken with the watermaster, Bosco Bosler, about correcting the watermaster's records.

Water Right No. 67-90B is claimed out of original Water Right No. 67-90, which corresponds to the original right decreed in the amount of 44 inches to William B. Shaw with the following place of use:

Craig L. Saxton
March 10, 2006
Page 3

T15N, R1W, Sec. 11, NW NW
T15N, R1W, Sec. 2, SW SW
T15N, R1W, Sec. 10, N SE
T15N, R1W, Sec. 10, S NE
T15N, R1W, Sec. 10, NE NE
T15N, R1W, Sec. 10, SE NW

All of this property (except for the portion in section 2) is on the current Carolex property.

A claim has been filed by Julia I. Marcum for Water Right No. 67-90A, which also derives from the same original right No. 67-90. I am advised that Ms. Marcum is now deceased and that her land is now part of the Carolex property. Consequently, the entire 44 inches should be recommended for Carolex, in accordance with Carolex' SRBA claim.

Please let me know if you need any further documentation.

VI. WATER RIGHT NOS. 67-87, 67-88, 67-90B, 67-93

It is my understanding that you anticipate recommending Carolex's decreed rights as follows:

Water Right Number	Inches	Cfs
67-87	30.0	0.60
67-88	13.0	0.26
67-90B	44.0	0.88
67-93	7.5	0.15
Total	94.5	1.89

If this changes, would you please let me know before the Director's report goes out?

VII. WATER RIGHT NOS. 67-4174, 67-4175, AND 67-4176

I understand that the three statutory claims, Water Right Nos. 67-4174, 67-4175, and 67-4176, are likely to be recommended with priority dates one day after the 1921 decree date and, consequently, will be available only when all decreed rights have been satisfied.

The claims were filed in the following quantities:

Water Right Number	Inches	Cfs
67-4174	50.0	1.0
67-4175	100.0	2.0
67-4176	100.0	2.0
Total	250.0	5.0

It is my understanding that the Department's recommendation will scale this back substantially. The Department will recommend a quantity sufficient to bring the total water rights for the Carolex property up to an inch-per-acre. What that number is will depend, in turn, on what the Department determines is the number of acres in the place of use. I discuss place of use below.

VIII. WATER RIGHT NOS. 67-4270 AND 67-7338

It is my understanding that these two domestic rights, Water Right Nos. 67-4270 and 67-7338, already have their partial decrees, and that no further action is required.

IX. 1979 APPLICATIONS

Carolex's ranch operator, Alvin Yantis, tells me that he distinctly recalls filing additional applications for water rights on behalf of Carolex's predecessor with IDWR in approximately 1979. These are different from the three statutory claims filed in 1977 (Water Right Nos. 67-4174, 67-4175, 67-4176). However, Alvin cannot locate records of this. Would you please check to see if the Department has any records of any water right applications for the Carolex property in addition to those listed in the caption to this letter?

X. PLACE OF USE

When I met with you, you explained that it appears that some lands are being irrigated south of the river. I am advised that Carolex is not currently irrigating land south of the river. However, this land has been irrigated in the past, and the company hopes to begin irrigating it again. Consequently, we believe it is appropriate to include these lands within the company's permissible place of use.

XI. POINTS OF DIVERSION

There is some inconsistency in the record over the location of points of diversion. Each of Carolex' water rights (both decreed and statutory claims) should have the same two points of diversion:

T15N, R1W, Sec. 12, SW SE (shown as a square dot in § 12 of IDWR map)

Craig L. Saxton
March 10, 2006
Page 5

T15N, R1W, Sec. 14, NW NE (shown as round dot in § 14 of IDWR map)

IDWR's map (copy enclosed) shows a third point of diversion, a square dot in the NE NE of section 14. Although this is not an active point of diversion, we have no objection to it being listed as an alternative point of diversion.

The Company's claim for Water Right No. 67-4176 lists a different point of diversion: T15N, R1W, Sec. 12, NW NE. This point of diversion is in error. As noted, each of the water rights have the same points of diversion.

Thank you again, Craig, for your help in evaluating Carolex's rights. Please do not hesitate to contact me if you have additional questions or if there are other issues that we should discuss prior to issuance of the Director's Report.

Sincerely,

Christopher H. Meyer

CONVERSATIONAL MEMORANDUM

Date: September 9, 2005

To: File 67-4174, 67-4175, 67-4176,

From: Craig L. Saxton

Subject: Evidence of priority

Brad Sneed from Givens-Pursley called and left a message regarding the request for evidence of priority letter sent to his client Carola Holdings. He requested an extension on the September 16, 2005 deadline stated in the letter we received.

I called back and told Mr. Sneed that for now, we would ignore the September 16th deadline.

I discussed the nature of the claim files, and how the beneficial use claims seemed to overlap the place of use with the claims based on Muir Vs. Allison decreed rights. One of the topics I mentioned to Mr. Sneed was that if the beneficial use claims are for flood water that directly overlaps the place of use of the decreed rights, my guidance is that we can recommend a priority date of one day after the decree without additional evidence of priority.

(8) Remarks _____

Scale: 2 inches equal 1 mile.

Map should show the location of the point of diversion and the place of use of the water by 40-acre subdivisions, section, township and range of the public land survey system.

State of Idaho)
) ss.
County of _____)

Be it known that the undersigned, being duly sworn, deposes and says that he, she, they subscribed the foregoing claim to a water right, together with all attached information, and that the matters and facts therein are true to the best of the affiants knowledge.

Sworn to before me this 11 day of March, 1977.
