

Tom,

Thank you for getting back to me and explaining the domestic water use on your property.

Best,

Alex Dagleish

Subject: Re: Isenberg Living Trust Water Claim

Hi Alex,

The house uses water (of course) and there's no water in the outbuildings.

Untreated water also goes from the house's pressure tank back outside to our lawn sprinklers and to three hydrants (one in the orchard, one next to the coop, and one next to the barn).

Regards,

Tom

Subject: Isenberg Living Trust Water Claim

Hello Mr. Isenberg,

I work at the Idaho Department of Water Resources and am beginning to review a claim to domestic water use submitted by the Isenberg Living Trust. As a trustee, I am reaching out to you in order to clarify the location of the place of use and possibly the point of diversion. I also called earlier this morning and left a voice message regarding the claim.

The claimed place of use (POU) and point of diversion (POD) are both in the SESW QQ of Section 6, Township 39 North, Range 04 West. Review of aerial imagery clearly shows three structures and a house.

I'd like additional information or clarification on where the domestic water is used. In order to make a recommendation, I need to know if the water is used in the domestic structure or at one of the 3 outbuildings, or all of the above.

The house is located right in the middle of four different quarter-quarters (SWSW, SESW, NWNW and NENW) and two different sections (6 and 7). I understand this may be confusing if you are not familiar with the Public Land Survey System information. Please contact me by phone or email to discuss this matter.

Thank you,

Alex Dagleish
