Ted,

The 13K gpd limit should apply to the entire right...not just stockwater. If we could just strike through the "for stockwater use" that would be best (see attached).

Thanks,

C

Craig,

Could you please take a look at this one. The question is whether the 13Kgal/day limiter should apply to the domestic use, or only the stockwater as it is now.

Conditions of Approval:

1. C18 This partial decree is subject to such general provisions necessary for the definition of the rights or for the efficient administration of the water rights as may be ultimately determined by the Court at a point in time no later than the entry of a final unified decree. Section 42-1412(6), Idaho Code.
2. N05 The quantity of water under this right for stockwater use shall not exceed 13,000 gallons per day.
3. N11 The quantity of water decreed for this water right is not a determination of historical beneficial use.

Remarks:

Comments:

1. jdean 9/21/2006 Irrigation

Comment: Irrigation was not recommended under this claim because there was no proof of historic beneficial use. Any "irrigation" will be recommended as a component of the domestic use with irrigation limited to 1/2 acre.

2. jdean 9/21/2006 Stockwater Quantity

Comment: The quantity for stockwater was limited to the standard for the 30 animals listed on the claim (0.02 cfs).

3. jdean 9/21/2006 Spring

Comment: From conversation with the claimant (DLN), the spring does not appear to be used as part of this water right. The spring appears to be used to water the neighbors stock. If the water is not pumped to the neighbor it spills onto the Hass property and "makes a big puddle."
