Document how the Period of Use and/or Diversion Rate were verified:

At the time of exam the system was not measurable for a quantity based on low end-of-summer flows and the fact that the spring flooded ground just below it before it started running through the ditches. No measurement is required because de minimus stockwatering increases the diversion beyond 0.2 cfs. Also, the ditches seem to have the capacity to carry the claimed diversion amount.

Rex Donald Jones

being first duly sworn,

deposes and says: I moved to this property in
August 1941, as an 11 year old child, with my
parents, Robert and Dora Jones. At that time the
spring was in use as irrigation on a hay field
and as stock water. The property has been
continually owned by my family since that time.
After my father passed away, I bought the land
from my mother and have continued to use the
spring for irrigation and stock water. My neighbor,
Cecil Kellar (who is now deceased) told me that he
knew former owners who irrigated from the spring
as far back as 1924.
